ANNUAL REPORT

OF THE

SECRETARY OF INTERNAL AFFAIRS

OF THE

COMMONWEALTH OF PENNSYLVANIA,

FOR THE

YEAR ENDING NOVEMBER 30, 1893.

PART I.—LAND OFFICE.
BOUNDARY LINES.
STATE WEATHER SERVICE.
PART II.—ASSESSMENTS.
TAXES.

CLARENCE M. BUSCH,
STATE PRINTER OF PENNSYLVANIA,
1894.

REPORT

OF THE

Secretary of Internal Affairs.

COMMUNICATION.

DEPARTMENT OF INTERNAL AFFAIRS.
HARRISBURG, *December 1, 1893.*

To His Excellency ROBERT E. PATTISON,
Governor of the Commonwealth of Pennsylvania:

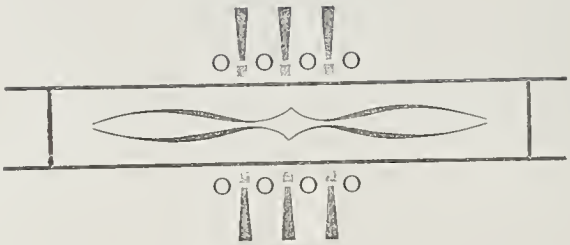
Complying with the requirements of the constitution, I have the honor to present to you herewith, for transmission to the General Assembly, reports of this Department for the year ending November 30, 1893, as follows:

Part I, Land Office.
Boundary Lines.
State Weather Service.
Part II. Assessments.
Taxes.

Very respectfully,
Your obedient servant,
THOMAS J. STEWART,
Secretary of Internal Affairs.

I A–7–93

181283



The Department of Internal Affairs, as organized, consists of six Bureaus, designated as follows:

1. *Land Office.*
2. *Boundary Lines and Monuments.*
3. *State Weather Service.*
4. *Assessments and Taxes.*
5. *Industrial Statistics, including Mine Inspection.*
6. *Railroads, Canals, Telegraphs and Telephones.*

A record of the business of the department is published in five parts:

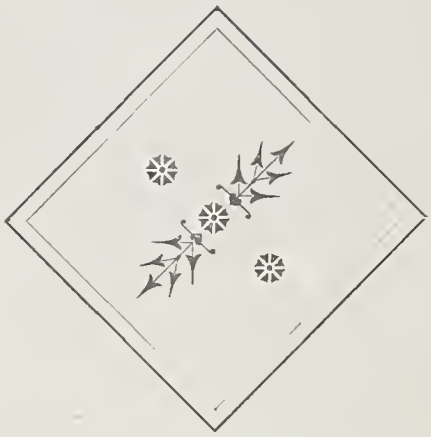
Parts I and II, Land Office, Boundary Lines, State Weather Service, Assessments and Taxes.

Part III. Industrial Statistics.

Part IV. Railroads, Canals, etc.

Part V. Reports of Mine Inspectors of the Coal Regions.

PART I--Land Office.
Boundary Lines.
State Weather Service.



REPORT.

DEPARTMENT OF INTERNAL AFFAIRS,
HARRISBURG, *December 1, 1893.*

To His Excellency ROBERT E. PATTISON,
Governor of Pennsylvania:

SIR. As required by the constitution and law, I submit herewith a detailed report of the business of the Department for the year ending on the 30th day of November, 1893.

Respectfully submitted.

THOS. J. STEWART,
Secretary of Internal Affairs.

STATEMENT

Showing the number of warrants, patents and certificates to the State Treasurer, issued from December 1, 1892, to November 30, 1893, both days included, with the amount of purchase money and fees for warrants, patents, etc., etc. Also copying fees received during the same period.

YEAR AND MONTH.	Warrants.	Patents.	Certificates to State Treasurer.	Purchase money.	Warrant and patent fees.	Fees for certificates to mine foremen.	Copying fees.	Totals.
1892, December,	2	4	6	$310 41	$50 00	$108 20	$259 75	$728 16
1893, January,		2	2	7 15	25 00	27 00	142 00	201 15
1893, February,	2	3	5	359 83	33 09	21 00	456 50	870 42
1893, March,	1	1	2	56 69	13 20	30 00	180 50	280 39
1893, April,	4	4	8	133 91	60 00	27 00	217 50	438 41
1893, May,	1	3	4	11 72	35 00	24 00	198 95	269 67
1893, June,	2	1	3	7 20	20 00	12 00	102 25	141 45
1893, July,	3	6	9	101 32	73 48	204 00	142 00	520 80
1893, August,	6	6	12	686 86	95 76	105 00	210 50	1,098 12
1893, September,	2	4	6	53 76	51 70	72 00	151 50	328 96
1893, October,						48 00	125 75	173 75
1893, November,						12 00	177 00	189 00
Total,	23	34	57	$1,728 85	$457 23	$690 00	$2,364 20	$5,240 28

DETAILED STATEMENT.

Of fees received for the year ending November 30, 1893.

691 copies of surveys,	$691 00
358 copies of patents,	358 00
216 copies of warrants,	108 00
64 searches,	16 00
72 connections embracing 664 tracts,	498 00
231 copies of applications,	165 50
263 copies of miscellaneous papers,	527 70
23 new warrants issued,	115 00
230 mine foreman certificates issued,	690 00
34 patents issued,	342 23
	$3,511 43

Recapitulation.

Purchase money,		$1,728 85
Warrant and Patent fees,	$457 23	
Mine Foreman Certificates,	690 00	
Copying fees,	2,364 20	
		3.511 43
		$5.240 28

RESUME OF THE BUSINESS OF THE DEPARTMENT FOR THE YEAR ENDING NOVEMBER 30, 1893.

Letters and Reports Received, Endorsed and Filed.

5,537 relative to land office, railroads and assessments.

1,340 relative to industrial statistics.

Letters Written, Copied and Indexed.

4,544 relative to land office and assessments, and railroads, etc.

1,340 relative to industrial statistics.

Reports and Railroad Maps Distributed; Blanks, Certificates and Circulars Forwarded, and Certificates Issued and Recorded.

1,650 reports on lands and assessments, vital statistics and weather service.

2,590 reports on industrial statistics.

1,958 reports on railroads, telegraphs.

980 blanks relative to land office business.

1,250 blanks relative to industrial statistics.

2,510 blanks relative to railroads, taxes and assessments.

230 mine inspectors certificates issued.

230 mine inspectors certificates recorded.

7,210 railroad maps of Pennsylvania distributed.

125 blanks relative to vital statistics.

Land Office.

1,931 copies of original papers certified and issued under the seal of the Department.

17,607 searchers for applications, warrants and surveys, required for copies, patenting and connections and refiling the same.

4,362 entries in fee, account and cash books, and transcribing the same quarterly for settlement with the Auditor General.

4 quarterly returns to the Auditor General.

28 applications for warrants received and entered on register.

36 applications for patents received and entered on register.

28 applicants for warrants endorsed and filed.

36 applications for patents endorsed and filed.

23 tickets issued for warrants.

34 tickets issued for patents.

23 new warrants issued, registered, numbered and filed.

23 warrants issued and directed to county surveyors for execution.

25 new surveys from county surveyors calculated and compared with warrants.

12,100 searchers transcribed for new index.

18 new surveys entered on surveyor's list of returns, numbered and filed.

7 new surveys containing an excess of land calculated, compared with warrants and placed in excess of files.

10 new surveys calculated, compared with warrants and returned to the county surveyors for correction.

34 entries on warrants, or applications, of the time of patenting.

34 entries in warrant registers of the time of patenting.

100 calculations of sums due.

54 certificates of sums due State Treasurer.

54 State Treasurer's receipts entered and delivered to Auditor General.

51 vouchers entered in fee book.

51 vouchers numbered and filed.

23 warrants issued, embracing 3,172 acres of land.

34 patents written, recorded and endorsed, embracing 4,098 acres.

41 perches of land, and four in lots.

13 satisfactions of liens on land lien docket.

13 certificates of liquidation made out and forwarded to the prothonotaries of the several counties, under the Act of the 4th day of April, 1868.

4 caveats entered, recorded on caveat book and filed.

4 citations issued and noted on caveat book.

12 monthly statements delivered to the Auditor General.

230 mine foreman's certificates issued and recorded.

22,404 additional entries made in the revising and compiling of new warrant indexes.

375 old single surveys copied for binding.

67 assessment reports of the counties of the Commonwealth, compiled and consolidated, showing the number of taxables, number of acres of cleared and timber land; value of real estate taxable, value of real estate exempt from taxation, and value of all real estate; number and value of horses, mares, geldings and mules over the age of four years, number and value of neat cattle over the age of four years; value of salaries and emolutions of offices, posts of profit, professions, trades and occupations; aggregate amount of county tax assessed; amount of money at interest, including mortgages, judgments, bonds, notes, stocks, etc.; value of stages, omnibuses, hacks, cabs, etc.; aggregate value of all property taxable for State purposes at four mills on the dollar, including money at interest, stages, omnibuses, hacks, cabs, etc.; aggregate amount of State tax assessed, and the amount of debt of each county, with a comparative statement of each item from the report of year 1892.

61 tax reports of the counties of the Commonwealth, compiled and consolidated, showing the entire amount of taxes collected or worked out for the maintenance of State, county, city, ward, borough and township governments; the total amount collected for the support of the poor; the total amount collected for the construction and repair

of streets, roads and bridges; the amount collected for school purposes; the amount collected on personal property, on occupations and licenses; the amount collected on the real estate of railroad corporations; the amount collected on real estate of railroad corporation other than railroads, including limited partnerships, in the several assessments districts of the Commonwealth, between the first day of June, 1892, and the thirty-first day of May, 1893, made pursuant to the Act of Assembly, approved the ninth dtay of May, A. D. 1889.

826 railroad, street railway, canal, telegraph and telephone companies registered.

374 reports of railroad companies tabulated, showing capital stock and dividends, debt and interest, cost of road and equipment, mileage, equipment and persons employed; miles run by trains and speed, number of passengers carried and cost per mile, kind of freight carried in tons and cost per ton; earnings and income; expenses during the year, and accidents, together with comparative statements showing figures for the past five years.

327 street railway reports tabulated, showing stock and debt, cost and characteristics of road, passengers and expenses, receipts and accidents, with a comparative statement of each account for five years.

9 canal company reports tabulated, showing stock and debt, cost and characteristics of canal, tonnage, expenses and receipts, with a comparative statement for five years.

22 telegraph and telephone company reports tabulated, showing stock, debt, cost and characteristics of line, expenses and receipts, with a comparative statement for five years.

267 checks issued for payment to State Treasurer, and on account of appropriations under Acts of Assembly.

6 meetings of the Board of Property held during the year, the proceedings of which covered twenty-seven pages of the minute book.

200 copies of the surveys of tracks in the seventeen townships in Luzerne county with certificates.

LAND OFFICE BUREAU.

BOARD OF PROPERTY.

A Board of Property, consisting of the Attorney General, Secretary of the Commonwealth and Secretary of Internal Affairs, is authorized by law.

Its powers are to "hear and determine in all cases of controversy on caveats, on all matter of difficulty or iregularity, touching escheats, warrants on escheats, warrants to agree, rights of pre-emption, promises, imperfect titles, or otherwise, which may arise in transacting the business of the said Land Office."

The present Board consists of

William U. Hensel, Attorney General.

William F. Harrity, Secretary of the Commonwealth.

Thomas J. Stewart, Secretary of Internal Affairs.

Stated meetings of the Board will be held on the Wednesday following the fourth Tuesday of each alternate month of the year 1894, to-wit: January 24, March 28, May 23, July 25, September 26, and November 28.

Regulations.

I. A caveat may be entered against the granting of a warrant, acceptance of a survey or granting of a patent. It must be in writing and addressed to the Secretary of Internal Affairs. A particular form is not required; but the application, survey or other office right against which it is entered, together with the reason for filing the same, should be distinctly stated.

II. A caveat entered against the granting of a warrant, on any application on file bars the issuing of a warrant, unless, after hearing upon a citation, the Board should dismiss the same.

III. No caveat, note on survey, nor writing in the nature of a caveat, shall continue to bar the issuing of a patent to the person or persons against whom such caveat may be entered during a longer period than two years, unless the parties interested in the land shall within the term mentioned take out a citation thereon, in order to bring such dispute to a decision and prosecute the same to effect.

IV. A citation will be issued on a pending caveat on the application of any party in interest. Thirty days' notice must be given to the opposite party of the time at which the case will be heard by the Board, and either party desiring to take the depositions of witnesses

to be read at the hearing is required to give the other ten days' notice of the time and place for taking such depositions.

V. The party who enters a caveat becomes plaintiff in the issue joined, and at the hearing shall open the case and may make the concluding argument.

VI. A petition for the rehearing of a case that has been heard and decided will not be considered unless the party presenting the same shall furnish evidence that the opposite party has had at least ten days' notice of the intention to present said petition.

VII. A petition for an order of re-survey must recite the name of the warantee and date of warrant upon which the former survey was made, and state the reasons for such re-surveys.

VIII. Depositions of witnesses submitted to the Board become a part of the record and cannot be withdrawn.

IX. Citations must be returned to the Department of Internal Affairs on or before the days fixed therein for the hearing of the cases in which they are issued. All acceptances of notices and agreements to continue cases must be in writing.

X. Parties will be heard in person, or may be represented by counsel, as they may elect.

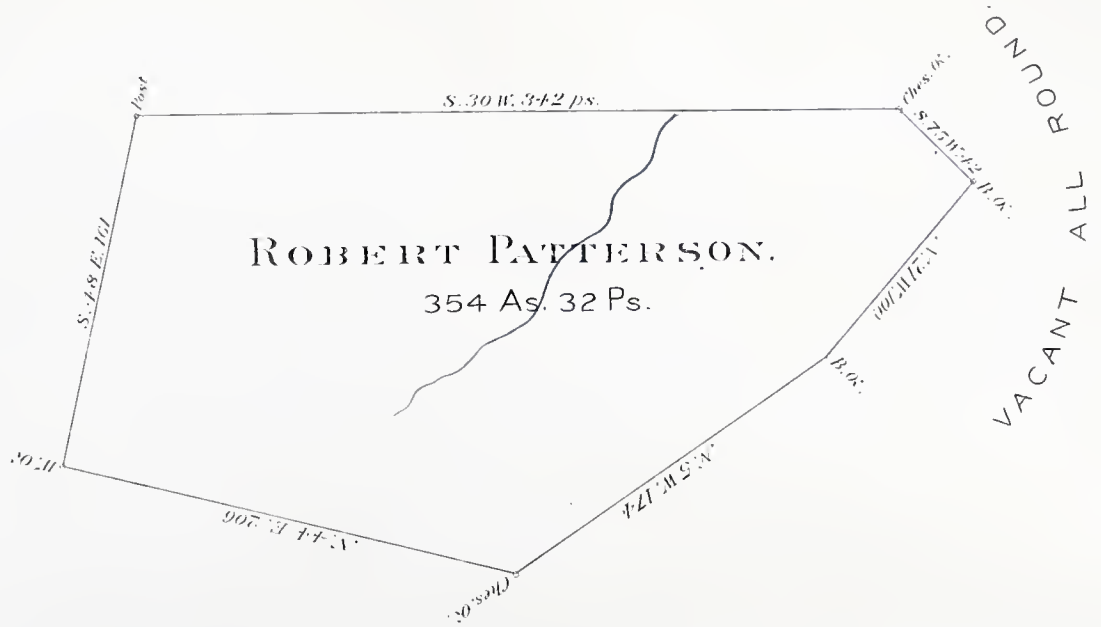
XI. The fees to be charged for the use of the Commonwealth in business relating to the Board are as follows:

Entering caveat,	$1 00
Issuing citation,	1 00
Recording application for re-survey,	1 00
Order of re-survey,	1 00
Copy of action or determination of board,	1 00

XII. All communications for the Board shall be addressed to the Secretary of Internal Affairs.

This Board existed many years before the Commonwealth was formed under the Federal Constitution, having been constituted under the Proprietaries, and was clothed with power to settle disputes arising between owners or claimants of land that had been granted by the "Penns." After independence had been achieved and the States united under the present Constitution, the Board of Property was reorganized in 1782. The Act under which it was reorganized named certain officers who should compose the Board and specific authority was given it to hear and determine all cases of controversy in which caveats were or should have been filed, and all matters of dispute or irregularity in the issuance of title papers by the Commonwealth. Many other duties were also specifically imposed upon the Board, but it always had authority to regulate the granting of original title papers from the Commonwealth, and wherever there were two or more claimants for the same tract of land, unless there was a question of preemption right, its action was generally con

sidered as final; although in the case of the granting of patents under the Act of 1792, provision was made by which action of ejectment under certain conditions could be commenced by the parties against whom the findings were made by the Board. The questions considered by the Board are among the most intricate known to the legal profession, for it is well known that questions affecting original titles, such as location, preemption, rights existing between contemporary surveys, together with the contests regarding the granting of patents, are among the most difficult of solution. The Board has been constituted generally of State officers, designated by law, which has been charged from time to time; though since the adoption of the Constitution of 1874, it has been composed of the Attorney General, Secretary of the Commonwealth and Secretary of Internal Affairs. Its meetings are held every alternate month, and while the list of cases is usually not very lengthy, the questions to be considered, as before indicated, require the closest and most careful attention, in order that no injury may be done the Commonwealth or to rival claimants. In the report for last year an extended account was given of the history of the Board, its consideration of the different questions brought before it on caveats and citations, and the most important cases were also reviewed at length. Some of the cases then referred to are still pending, either on motions for rehearing or on account of re-argument and additional consideration to be given them by the Board. Probably the most important case before the Board during the year was one arising from an application made by Thomas W. Moore, for vacant land in Blair county. The question involved the location of a warrant granted to Robert Patterson, in 1785. If the Patterson tract were located as claimed by the caveators against the granting of a warrant to the said Moore, the land applied for by him would be within the limits of the Patterson tract. The caveatorsfound it difficult to determine the exact location of the Patterson, either by marks upon the ground, showing the work of the original survey, or calls for adjoiners or by any natural evidences, such as streams, etc. It was shown in evidence that if the Patterson were located where it was claimed by the caveators it should be, none of its several corners could be found and no evidence that they had ever been seen; and although timber was standing where the lines ought to have been indicated by marks upon the trees, no evidence of such marks could be found. It was also shown that the streams indicated on the return of survey of the Patterson flowed in almost a directly opposite direction to those on the ground, if the tract were located as claimed by the caveators. The caveators were compelled to rely upon a recent survey of an adjoining tract which called for the Patterson as an adjoiner, and also upon some deeds and conveyances which indicated that the lands described therein were in



Situate on the waters of Big Trough Creek, in Bedford County, Hopewell Township, about one mile from Walter Clark's Improvement, including the Beaver Dam, containing 354 Acres and 32 Perches, and the usual allowance of six per cent. for Roads. Surveyed the first day of March, 1786. In pursuance of a Warrant dated September 1st, 1785.

GEORGE WOODS, D. S.

To JOHN LUKENS, ESQ., S. G.

whole or in part covered by the Patterson tract, and upon oral proof that the land mentioned in these papers was located on the same territory applied for by Moore. In other words, there appeared to be no primary evidence to fix the location of the Patterson, for it has been a well settled principle of law for many years that marks upon the ground are the first evidence of location and the first to be considered; and second, that in the absence of marks upon the ground, calls for adjoiners are next to be considered, and third, in the absence of these proofs, the question is to be determined by the courses and distances. Applying these three rules of evidence on the question of location in the case of the Robert Patterson tract, the Board of Property found it exceedingly difficult to establish the location. As before stated, there were no marks upon the ground to indicate the original work of the surveyor, and no streams corresponding to those in the return of the deputy surveyor, and therefore none of the elements that are first to be considered in locating a tract could be found. The deputy's return of the tract gave no calls for adjoiners, and therefore the second rule could not be applied, except that the junior survey, made about one hundred years after the Patterson tract was surveyed, called for the Patterson as an adjoiner; but the courts have generally looked with much suspicion on any attempts to locate a senior survey by the calls of a junior, especially when there is a great disparity in the dates when the surveys of the tracts were made. It was therefore difficult to locate the tract by calls for adjoiners. The Board found it absolutely impossible to locate the Patterson by courses and distances, as no point of commencement could be found and no lines of contemporary or adjoining surveys could be fixed upon as a basis for location. There seems to be, therefore, no way under the well established rule of the Supreme Court by which the Robert Patterson could be located. The claimant for the warrant for vacant land attempted to locate the Patterson tract some few miles distant from the point claimed by the caveators, assuming that he could do so by the streams and the evidence of the existence at one time of a beaver dam called for by the return of survey of the Patterson tract. These were the only evidences produced by the claimants for the warrant to show any location of the tract. No original work, no calls for adjoiners, no lines of adjoining tract to correspond with those of the Patterson, and therefore the Board were compelled to depend upon these slight evidences of location on the part of the claimant for the warrant by showing the existence of streams where he claimed the tract was located, and the recitals of deeds and conveyances produced by the caveators and the call of the junior survey for the Patterson tract. Although the case has been before the Board for several months it is still at the close of the year undecided. It was argued and determined against the claimant for the warrant, but a motion

was made for a rehearing and the rehearing granted, and the case is still held for further consideration by the Board. It is an extremely intricate one and seems to involve new and unsettled questions. The necessity of adopting some new rules to determine locations in such cases is evident, for certainly none of the rules referred to, and which have been in force for from fifty to seventy-five years, can be applied satisfactorily to this case. There are several other important cases pending, which involve questions of preemption rights. One of these is especially interesting. A preemption right is claimed by a corporation, and the issue is as to whether the Act of 1874, and the previous Acts regarding preemption rights, give to any person save natural persons such rights. In other words, the question has arisen in this case, whether a corporation is entitled to preemption rights. Another question has also arisen in regard to the location of an island in the Susquehanna river in the county of Bradford. It seems that there are two islands situated only a few rods apart in the river, one comprising about thirty acres and the other about five acres. An application has been made for the larger one, and a caveat has been filed in which it is claimed that the island had been conveyed by the State many years ago. The question involved is one of fact as to whether the five-acre island was granted or the thirty-acre one. Evidence was submitted tending to show that the island which was heretofore granted by the Commonwealth was the thirty-acre one, but the return of survey calls for only about the number of acres in the smaller one. It would naturally be supposed that in the location of an island in a river, and the procurement of the title from the Commonwealth, such care would be taken that no question of identity could ever arise regarding the particular island. The case is still pending.

MAPS, ETC.

Under the Act of May 8, 1876, the following papers, relating to State and county lines, have been numbered and filed among the department records during the past year, to wit:

COUNTY LINES.

No. 129. Map of the boundary line between the counties of Wyoming and Sullivan. Filed April 24, 1893.

STATE LINES.

No. 130. Articles of agreement between the Secretary of Internal Affairs and the State Engineer of New York for the repairing, re-setting and re-placing of monuments on the line between Pennsylvania and New York. Filed August 28, 1893.

In pursuance of the agreement referred to Alan W. Corson, with his assistant, representing the Commonwealth of Pennsylvania, and Charles H. Flannigan, with his assistant, represented the State of New York, in making the examinations of the monuments. The report of the commission thus constituted is submitted herewith and shows that most of the monuments that mark the line between the two States are in good condition. Wherever it was necessary to reset any of the monuments pains were taken to locate them so deep as to be beyond the danger of impairment by frost, and each monument had been so completely described in the report that future commissions appointed to examine them should have no difficulty in determining their location. The fullness and conciseness of the descriptions should also make the cost of examination three years hence materially less than it was this year. We believe that the Legislature should make provisions for a triennial examination of the monuments on the part of Pennsyvania, or arrange the time so that it will correspond with the time in New York State. If this were done, the law providing for examinations every five years by the county commissioners could be repealed, as no necessity would exist for its continuance. The examinations could undoubtedly be made much cheaper and the results would be of much greater value to the Commonwealth.

New York and Pennsylvania Joint Report of the Boundary Line and Monuments Between the States of New York and Pennsylvania.

State of New York,
Office of the State Engineer and Surveyor,
Albany, N. Y., Dec. 12, 1893.

Hon. Martin Schenck, State Engineer and Surveyor, and Hon. Thomas J. Stewart, Secretary of Internal Affairs, Harrisburg, Pa.:

Sirs: We, the undersigned, have the honor to submit this our joint report on the boundary line between New York and Pennsylvania, and the condition of the monuments set thereon undertaken in accordance with the following articles of agreement:

(Copy.)

Whereas, By virtue of the provisions of chapter 421 of the laws of 1887, of the state of New York, the state engineer and surveyor is authorized and required during the year 1887, and every third year thereafter, to cause to be made an examination and inspection of the boundary line monuments between that state and the other states ad-

joining, and is further required to make a detailed report of such inspection and examination, and is further authorized and required to co-operate with the proper authorities of such adjoining states in the examination and inspection and in the restoring and replacing of boundary line monuments where they need to be restored or replaced, and is clothed with full authority to represent the state of New York in co-operating with other states in discharging the duties hereinbefore referred to regarding boundary line monuments; and,

Whereas, Similar duties are imposed upon the Secretary of Internal Affairs of the Commonwealth of Pennsylvania, by the second section of the Act of the General Assembly, approved May 4, 1889, entitled an Act "relative to the boundary lines and boundary line monuments," directing his co-operation with the proper authorities in any of the adjoining states in the re-establishing, by survey or otherwise, of the boundary lines, the erection of new monuments to mark their location, the repairing, re-setting or renewing of the old monuments when found necessary; and by virtue of said Act is fully empowered to represent and act for the Commonwealth of Pennsylvania, by the employment of such means as may be necessary in the premises, when from the reports of the county commissioners of said Commonwealth, or from other information satisfactory to him, it is found there is a necessity for the re-survey and re-location of said boundary lines in whole or in part, or whenever any of the boundary line monuments are in such condition as to require re-setting, replacing or renewing; and

Whereas, By virtue of the laws referred to in the two states named, the said state officers are required to co-operate with each other and act jointly in the examination and inspection, and when found necessary, in re-setting, replacing and renewing of monuments and in the re-establishing of the boundary lines between said States; and

Whereas, From the partial displacement of monuments which mark the location of the line between the states of New York and Pennsylvania, as disclosed by the reports of the engineers who were appointed to examine and inspect said monuments in the year 1890, which monuments were not then re-set or replaced, and from other information of a satisfactory character, it appears that the welfare of the two states named will be conserved by an examination and inspection of said boundary line monuments during the present year and by virtue of the duties imposed upon the officers named by the respective states, as appears from the enactments in part recited; therefore,

It is agreed, By and between the undersigned, acting in conformity with the authority conferred as hereinbefore stated, that Chas. H. Flanigan representing the state of New York, under appointment made by Martin Schenck, State Engineer and Surveyor of the said state of New York, and Alan W. Corson, representing the State of

Pennsylvania, under appointment made by Thos. J. Stewart, Secretary of Internal Affairs of the said State of Pennsylvania, shall be empowered, and by these presents are hereby empowered to cause to be repaired, reset and replaced any of the said boundary line monuments which in their judgment may need to be so repaired, reset or replaced; and it is further agreed, That the parties herein named shall have full authority to represent the respective states in the discharge of the duties herein imposed, limiting the scope of their authority, however, to the examination of the boundary line monuments between the two states, and to the replacing, re-setting and repairing of such monuments as in their opinion should be replaced, reset or repaired, and to the furnishing and setting of new monuments where the old ones are so far mutilated and destroyed as to render them unserviceable; it being understood that in case the examination and inspection to be made shall disclose the fact that there is a necessity for the re-surveying of any part of the said boundary line, for the purpose of determining its location, the engineers appointed as aforesaid shall have no authority to make such survey until they shall have first reported the conditions to the parties hereto, which conditions in their opinion render such a re-survey a necessity, nor until written authority signed by both of the parties hereto shall be given them, authorizing such re-survey; and

It is further agreed, That the engineers herein referred to and appointed under the authority mentioned shall proceed at once to the discharge of the duties as set forth and shall diligently prosecute the work of examination and inspection and the discharge of the other duties to be done and performed, in order that the work shall be completed at as early a day as practicable and,

It is further agreed, That upon the completion of the work provided for in this agreement a full report shall be prepared of their operations, which report shall give in detail the location and condition of each monument and other interesting data pertaining thereto, as well as a statement of such action as may have been taken in regard to the same, such reports to be made in duplicate, each to be signed by both the engineers, one to be filed with the State Engineer and Surveyor of the state of New York, at Albany, and the other to be filed with the Secretary of Internal Affairs of the Commonwealth of Pennsylvania, at Harrisburg; and

It is further agreed, That the actual expenses incurred in the discharge of the duties herein referred to shall be borne equally by the two states in interest, except so far as may relate to the compensation of the two engineers referred to, which compensation is to be arranged by each state separately, and that all expenses be accounted for in verified statements, and so far as practicable, supplemented by re-

ceipted vouchers from parties to whom disbursements have been made.

In witness whereof, Chapman L. Johnson, Deputy State Engineer and Surveyor of the State of New York, and Thos. J. Stewart, Secretary of Internal Affairs of the Commonwealth of Pennsylvania, have hereunto set their hands and caused the seals of their respective departments to be hereunto affixed this 22d day of August, A. D. 1893.

(Signed.) CHAPMAN L. JOHNSON,
Deputy State Engineer and Surveyor.

(Signed.) THOMAS J. STEWART,
Secretary of Internal Affairs.
(Seal.)

This line was monumented by a joint commission of the two states during the years 1881, 1882, 1883, 1884 and 1885. The monuments, with exception of the large initial monuments, are of Connecticut granite, of a reddish gray, coarse texture, quite hard and durable. They are of five classes, as follows:

FIRST CLASS—HIGHWAY MONUMENTS.

"These are placed at highways intersecting, or following the boundary. Milestones placed beside highways are of the first class. The monuments are 4½ feet long, the top dressed rectangular twelve inches by six inches, and at right angles across the centre, parallel with the edges, are cut two quarter-inch grooves; the upper end of each side to the depth of twelve (12) inches is dressed, and upon one broad (North) face are cut the letters 'N. Y.,' and upon the other (South), the letters 'PA.' A milestone of the first class has, in addition, the number of the original monuments, with the addition of the letter 'M.' These monuments weigh from 375 to 500 pounds.

"In setting monuments of this class, the longer groove was uniformly placed in the direction of the boundary.

"Monuments of the second, third and fourth classes are four (4) feet long; the top is six (6) inches square, and the upper end of each side is also dressed to the depth of six (6) inches. They weigh from 170 to 220 pounds.

SECOND CLASS—MILESTONES.

"These are placed at the original mile points, which are not marked by monuments of the first or fourth classes. Across the top, at right angles, and parallel with the faces, are cut two quarter-inch grooves. On opposite faces are cut the letters 'N. Y.' (North) and 'P A.' (South), and upon a third (East face) the number of the original monument with the letter 'M.'

THIRD CLASS.

"These are similar in all respects to monuments of the second class, with the exception that the number upon the third face is omitted, except in a few instances. They are placed at railway and river intersections, and at such other points as were necessary.

"Monuments of the second and third classes are set so that the faces containing the letters 'N. Y.' and 'P A.' are parallel with the boundary.

FOURTH CLASS.

"Diagonally across the top are cut two quarter-inch grooves, and the monuments are set so that one of the diagonal grooves is in the direction of the boundary. The faces are specially lettered. These monuments are generally mile stones, marking town or county corners, and the face of the stone toward the town or county is marked with the initial letter of the name.

FIFTH CLASS.

"Monuments of this class are placed to mark the astronomical stations of the United States Coast and Geodetic Survey, occupied in 1877 and 1879. Each monument is a block of granite of the general dimensions of twelve (12) inches square and eighteen (18) inches or more deep. The top is dressed and the station point is marked upon it in the center by a cross (X). Upon the top are also cut the name of the station, the letters 'U. S. C. & G. S.' and the year in which the station was occupied. Monuments of this class were not examined as they are all buried beneath the surface."

The monuments were generally found to be in good condition. Some of them were more or less chipped at the corners and sides, but not to a sufficient extent to affect their usefulness; others had heaved from 1 to 18 inches, due to the action of the elements. It was deemed unadvisable to reset every monument which might have heaved a trifle above its normal position; as such an undertaking would prove unduly expensive and be productive of no practical good. A limit of upheaval of twelve (12) inches was decided upon, and all monuments found to have upheaved to that amount or more were reset. It was shown in almost every instance that the monuments that required attention were those that were reset in 1890, and which had again heaved above the agreed upon limit.

After an examination, it was decided that their upheaval was due to the permeable condition of the ground in which they stood and the fact that the disturbed earth offered ready access to the frost.

In re-setting, a hole was dug three (3) feet square on top, with only a slight batter and the monument was then placed in the hole six (6)

inches vertically above the recorded disc, and the space between filled with vegetable matter, and a flat stone twelve (12) inches square, with a thickness of two (2) inches; the hole was then about half filled with sand and gravel, every shovelful of which was well tamped into place; on top of this was placed a puddle compactly rammed up to the surface of the ground.

Such a course, we believe, will prevent a recurrence of the upheavals heretofore noted.

The monuments reset are mentioned fully in the detailed description of monuments.

The other monuments which were noted in the report of 1890, as having heaved slightly were found to be in the same condition as then reported, showing that in the past three (3) years, at least, there has been no upheavel. The line as discovered by us was only discernable in those places where line fences exist; the most careful scrutiny in the woods failed to show any evidence of line trees or that any trees had been so marked when the monuments were set; the studs of underbrush which had been left standing after the cutting for the instrumental sighting in the original survey, and which proved of value in the previous examination have now nearly all disappeared, so that the only way at present for following the line is by aid of the compass. However it would be very laborious and quite tedious to have the line re-run possibly to no good end, for in those places the country is sparsely settled and the land of but little value.

In the immediate vicinity of each monument trees have been hacked as witnesses; in some cases these trees have been cut down purposely, it seemed to us, by the lumbermen, and in others the witness hacks had been almost obliterated by age; new witness trees were chosen and the indistinct blazes recut.

We spent hours and, in some cases, even a day looking for monuments which were poorly and imperfectly described; this defect we have endeavored to remedy by a complete detailed description in which the position of every monument is truly and faithfully described, so that in future examinations the time consumed should be considerably reduced and the expenses proportionately lessened.

The report of H. W. Clark, the surveyor who monumented the line, calls for several more monuments on the parallel boundary than we were able to find; where they are or what they mark we could discover neither on the line nor from the official "Record of Monuments," on file in the office of the Regents of University. By our close scrutiny and many inquiries we have every reason to believe that in the "Description of Monuments" hitherto annexed, the location of each and every monument on the boundary line is given and that we have not missed even one.

It is also demonstrated to our mind that the judgment expressed three years ago, viz: that three years should be the longest time between the examinations was very good, as in some cases that those monuments that were easily found the three years previous were extremely difficult to find this time; principally on account of the way the property owners lumbered along the line peeling the logs for the bark and leaving the lumber to lie and in most cases to rot there.

The following monuments are not shown on the map: 1, 5, 31, 48, 140, 299, 323, 354, 384, 420, 503, 506 and 508.

Very respectfully submitted,

ALAN W. CORSON,
C. H. FLANIGAN.

Detailed Description of Monuments on the Boundary Line Between New York and Pennsylvania.

MONUMENT No. 1. HIGHWAY STONE No. 1.

Is a highway monument standing on the south west side of the river road on the right hand bank of the Delaware river, and about 12 feet east of the large initial monument. It is on line between properties of Elias Mereness and John Ferris. This monument was found to be in good condition in every respect.

MONUMENT No. 2. LARGE INITIAL MONUMENT.

Is a large block of Rhode Island granite, $10\frac{1}{2}$ feet long, the upper six feet being dressed in the form of the flat oblesk, $2\frac{1}{3}$ feet wide and $1\frac{1}{3}$ feet thick. The words "Boundary Monument" and the date "1884" are cut on both sides. The north side is further marked—

NEW YORK
HENRY R. PIERSON,
ELIAS W. LEAVENWORTH,
CHAUNCEY M. DEPEW,
Commissioners.
500 feet West of the N. E. Corner of Pennsylvania.
H. W. CLARKE,
Surveyor.

The south side if further marked—

PENNSYLVANIA
JAMES WORNALL,
CHRISTOPHER M. GERE,
ROBERT N. TARRY,
Commissioners.
C. M. GERE,
Surveyor.

4-7-93.

This monument is situated about 20 feet west of the road on the right hand bank of the Delaware river. It is on line between properties of Elias Mereeness and John Ferris. The monument was found to be in good condition in every respect.

MONUMENT No. 3. MILESTONE 1.

Is a small monument standing 60 feet east of the road, which runs south easterly from the bridge over the Delaware river at Hales' Eddy; on the west side of a deep ravine 240 feet west of creek. The woods on the west side of the road where the lines crosses have been cleared on the south. It is on the property of J. C. Olds. This monument was found to be in good condition in every respect.

MONUMENT No. 4. MILESTONE 2.

Is a small monument standing on level ground 10 feet north of the left bank of Cequaga Lake brook, 60 feet west of a maple which stands almost on line and N. 46 deg. west, about 800 feet to Elisha Alexander's house. It is on the property of Elisha Alexander. This monument was found to be in good condition in every respect.

MONUMENT No. 5. HIGHWAY STONE 1.

Is a highway monument on the west side of a highway leading from Hales Eddy to Susquehanna 870 feet west of Monument No. 4, and about 200 feet south of Elisha Alexander's house. It is on the property of S. B. Alexander. This monument was found to be in good condition in every respect.

MONUMENT No. 6. MILESTONE 3.

Is a small monument in the west edge of thin woods 15 feet east of a lightly traveled road and 20 feet east of a 6-inch blazed poplar, nearly dead, which stands on the west edge of road, the ground here is thickly covered with brush. It is on the property of Harvey DeHaen. This monument was found to be in good condition in every respect.

MONUMENT No. 7. MILESTONE 4.

Is a highway monument on the north easterly side of a highway along the left bank of Oquaga Lake brook, leading from Sherman to Oquaga Lake. It is on line between the properties of William Gunder and J. H. Prom. This monument was found to be in good condition in every respect.

MONUMENT No. 8. MILESTONE 5.

Is a small monument in cleared land near the top of a south easterly slope about 800 feet north of George Lee's house, 250 feet north of a sugar maple, and north 20 deg. east of a white ash. It is on the property of George Lee. This monument was found to be in good condition in every respect.

MONUMENT No. 9. HIGHWAY STONE 1.

Is a highway monument on the west side of a highway leading from Danville to Sherman about 800 feet south of Tallmadge's house and 400 feet west of Oquaga Lake dam. It is on line between the properties of Leonard Sweet and J. E. Tallmadge. This monument has its N. E. corner chipped, otherwise it was found to be in good condition in every respect.

MONUMENT No. 10. MILESTONE 6.

Is a small monument in a small hollow at the foot of a steep easterly slope, 155 feet east of monument No. 11, and along the south edge of a clearing. It is on line between the properties of Thomas Arnica and Thomas Myrick. This monument has its top almost flush with the surface of the ground, otherwise it was found to be in good condition in every respect.

MONUMENT No. 11. HIGHWAY STONE 1.

Is a highway monument on the west side of the east fork of the highway leading from Danville to Stevens' Point, about 300 feet south of where road forks, and 600 feet south of Thomas Myrick's house. It is on line between properties of Thomas Myrick and John Hemingly. This monument has heaved three inches and has its S. E. and S. W. corners badly chipped, otherwise it was found to be in good condition.

MONUMENT No. 12. HIGHWAY STONE 2.

Is a highway monument on the South side of Boundary Line road and about 50 feet west of where it is intersected by the west fork of the highway leading from Danville to Stevens' Point. It is on line between the properties of Thomas Myrick and John Hemingly. This monument has its S. E. corner slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 13. HIGHWAY STONE 3, AND COUNTY STONE.

Is a highway monument on the south side of Boundary Line road near the point where the road turns to the south west. It marks the corners of Wayne and Susquehanna counties, Pa. It is on line between the properties of E. Alexander and David Dale. This monument was found to be in good condition in every respect.

MONUMENT No. 14. MILESTONE 7.

Is a small monument near the foot of a steep westerly slope, east of Deep Hollow, in land which was once cleared along side line fence. It is on line between properties of William Seamens and the Bishop estate. This monument was found to be in good condition in every respect.

MONUMENT No. 15. HIGHWAY STONE 1.

Is a highway monument on the south side of a clearing, on west side of Deep Hollow road. It is on line between properties of Elias Decker and Clinton Munford. This monument has heaved 4 inches, otherwise it was found to be in good condition.

MONUMENT No. 16. MILESTONE 8.

Is a small monument on very steep westerly slope 200 feet west of the summit and in a thick woods, heavily covered with briars. It is a little to the east of a small grove of hemlocks, two of which were blazed north 66 deg. east 12 feet from a hemlock, and north 36 deg. east 20 feet to another. It is on line between the properties of King and Mrs. John Cook. This monument was found to be in good condition in every respect.

MONUMENT No. 17. MILESTONE 9.

Is a small monument on steep easterly slope about 150 feet east of the summit 2600 feet east of monument 18, and about 200 feet west of the corner of William O. Day's property, which is about 50 feet east of the bottom of a ravine. The woods here have been cleared on both sides of the line, but more on the New York than on the Pennsylvania side. It is on line between the properties of Wray Kessler and Luther Buchanan. This monument was found to be in good condition in every respect.

MONUMENT No. 18. HIGHWAY STONE 1.

Is a highway monument on the east side of Pig Pen Run road, along side line fence and about eight feet east of gate which crosses the road. It is on line between the properties of H. Aldrich and J. Madden. This monument has its N. E. and N. W. corners slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 19. TOWN STONE.

Is a small monument with diagonal grooves, marking the corner of the towns of Sanford and Windsor Broome counties, New York. It is situated in cleared field on North side of line fence and 440 feet east of monument No. 20. It is on line between the properties of Patrick F. O'Rourke and H. Aldrich. This monument has heaved 6 inches, otherwise it was found in good condition.

MONUMENT No. 20. MILESTONE 10.

Is a small monument at the south edge of thick woods and just to the north of an abandoned wood road and 300 feet S. E. of a large upturned root. It is on line between the properties of P. F. O'Rourke and H. Aldrich. This monument was found to be in good condition in every respect.

MONUMENT No. 21. HIGHWAY STONE 1.

Is a small monument which was originally intended to mark a highway, but as the highway had never been opened, monument now stands in a very thick growth of bushes, 605 feet west of monument No. 26, and about 15 feet S. W. of a narrow path, which runs S. E. from the clearing. It is on line between the properties of O'Rourke and Lynes. This monument was found to be in good condition in every respect.

MONUMENT No. 22. MILESTONE 11.

Is a small monument at the foot of a steep north westerly slope in thick open woods about 150 feet east of the end of line fence. It is on line between property of Charles Vermilia and Charles Plunket. This monument was found to be in good condition in every respect.

MONUMENT No. 23. HIGHWAY STONE 1.

Is a highway monument on the west side of the east Cascade Valley road and about 300 feet North of Vermilia house. It is on line between the property of Charles Vermilia and Charles Plunkett. This monument has heaved 5 inches, and has its S. W. corner slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 24. HIGHWAY STONE 2.

Is a highway monument standing on the east side of the west Cascade Valley road about 700 feet south of Frazer House, and 20 feet North of an old line fence. It is on line between the property of Charles Vermilia and John Frazer. This monument has its four corners slightly chipped, otherwise it was found to be in good condition in every respect.

MONUMENT No. 25. RAILROAD STONE 1.

Is a small monument standing between the two tracks of the New York, Lake Erie and Western Railroad and about 100 feet west of monument 24. This monument was found to be in good condition in every respect.

MONUMENT No. 26. MILESTONE 12.

Is a small monument standing on the summit of the high narrow ridge between Cascade Valley and the Susquehanna River; it is about 500 feet west of Stone Quarry. It is on line between the property of John Frazer and G. E. McCune. This monument was found to be in good condition in every respect.

MONUMENT No. 27. HIGHWAY STONE 1.

Is a highway monument on the north side of road which leads from Windsor to Wainsboro, about 5 feet east from a large chestnut. It

is on line between the property of G. E. McCune and J. F. McCune. This monument has its four corners slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 28. RAILROAD STONE 1.

Is a small monument standing 3 feet west of the west track of the Delaware and Hudson Canal Co. R. R. and about 200 feet S. W. of C. C. Morses' house. This monument has its top flush with the surface of the road bed, and has its north side badly broken.

MONUMENT No. 29. RIVER STONE 1.

Is a small monument which marks the intersection of the boundary on the left hand bank of the Susquehanna river. It stands on level ground, in cleared field and about 50 feet east of the original monument, which stands at the edge of the river bank. It is on line between the property of J. F. McCune and N. F. Comfort. This monument was found to be in good condition in every respect.

MONUMENT No. 30. RIVER STONE 2.

Is a small monument which marks the intersection of the boundary on the right hand bank of the Susquehanna river. It stands on level ground in line fence about 20 feet west of the position of the original monument, no trace of which now remains. It is on line between the property of Herbert Beeber and George Pooler. This monument was found to be in good condition in every respect.

MONUMENT No. 31. HIGHWAY STONE 2.

Is a highway monument standing on the west side of the road on the right hand bank of the Susquehanna river, about 600 feet south of Pooler house. It is on line between the property of Herbert Beeber and George Pooler. This monument has its N. E. and S. W. corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 32. MILESTONE 13.

Is a small monument standing in cleared land about 1700 feet west of monument No. 31, and 10 feet north of stone line fence. It is on line between the property of H. Beebee and George Pooler. This monument was found to be in good condition in every respect.

MONUMENT No. 33. HIGHWAY STONE 1.

Is a highway monument standing on the west side of the Oquaga Mountain road on north edge of clearing and about 500 feet north of A. G. Matthews' house. It is on line between the property of H. Beebee and A. G. Matthews. This monument was found to be in good condition in every respect.

MONUMENT No. 34. SECTION STONE 1.

Is a small monument with diagonal grooves which marks the corner of Hooper Patent and the Third Tract in Windsor. It stands upon a very steep northerly slope in a laurel thicket in thick woods, about 600 feet east of monument No. 35. It is on line between the property of A. G. Matthews and the Pooler estate. This monument was found to be in good condition in every respect.

MONUMENT No. 35. MILESTONE 14.

Is a small monument standing on steep northerly slope in a laurel thicket in thick woods, 1647 feet east from monument No. 36. It is on line between the property of A. G. Matthews and C. C. Worden. This monument was found to be in good condition in every respect.

MONUMENT No. 36. HIGHWAY STONE 1.

Is a highway monument standing on south west side of a wood road on the summit of a ridge 3848 feet east of monument No. 38. It is on the property of Joshua Bevens. This monument was found to be in good condition in every respect.

MONUMENT No. 37. HIGHWAY STONE 2.

Is a highway monument standing on the west side of a road, leading from Hickory Grove and Windsor, about 500 feet south of Haxton house. It is on line between the property of Abe Haxton and Stephen Bevens. This monument was found to be in good condition in every respect.

MONUMENT No. 38. MILESTONE 15 AND TOWN STONE.

Is a small monument with diagonal grooves standing in cleared land under a wood fence on west side of valley and about 250 feet east of the foot of a steep easterly slope and 557.5 feet west of monument No. 37. This monument marks the corner of the towns of Great Bend and Oakland, Susquehanna county, Pa. It is on line between the property of Abe Haxton and Stephen Bevens. This monument is 18 inches out of ground, otherwise it was found in good condition.

MONUMENT No. 39. HIGHWAY STONE 1.

Is a highway monument standing on the north east side of a road which at this point follows the boundary line for a short distance. It is N. W. from Locust Hill church and 100 feet east of Small brook. It is on line between property of Elias Eighmy and Addison Brush. This monument has heaved two inches, otherwise it was found to be in good condition.

MONUMENT No. 40. MILESTONE 16.

Is a small monument standing in a wet meadow about 250 feet west of where the road leaves the boundary line and turns to the north and

672.7 feet west of monument 39. It is on line between the property of H. E. Brush and N. W. Stone. This monument has heaved 8 inches, otherwise it was found to be in good condition.

MONUMENT No. 41. HIGHWAY STONE 1.

Is a highway monument standing on east side of wood road on north east slope near the summit of the ridge in thick woods, four feet north west of blazed spruce. It is on the property of Martin Colville. This monument has heaved 2 inches and has its S. E. corner slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 42. HIGHWAY STONE 2.

Is a highway monument standing on south side of a highway leading from Windsor to great Bend. It is on the property of Marcus Colville. This monument was found to be in good condition in every respect.

MONUMENT No. 43. MILESTONE 17.

Is a small monument standing in cleared field about 40 feet from the brow, 10 feet south of line fence, and about 100 feet west from bottom of slope. It is on line between the property of A. Judd and Marcus Colville. This monument was found to be in good condition in every respect.

MONUMENT No. 44. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from Great Bend to Windsor on the west side of the Valley and 10 feet south of (line) fence. It is on line between the property of A. Judd and Marcus Colville. This monument has its N. W. corner slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 45. HIGHWAY STONE 2.

Is a highway monument standing on the east side and at the north end of a private road about 500 feet north of Keldar House. It is on line between the property of Yeager and Keldu. This monument has heaved three inches, otherwise it was found to be in good condition.

MONUMENT No. 46. MILESTONE 18.

Is a small monument standing in a bush lot near the S. W. corner of a piece of woods, west side of a rocky summit near the brow of a high steep north westerly slope, overlooking the valley of the east branch of Troubridge creek. It is on line between the property of G Andrews and Casey Keldu. This monument was found to be in good condition in every respect.

MONUMENT No. 47. HIGHWAY STONE 1.

Is a highway monument formerly standing on the east side of an old highway which follows the east branch of Troubridge creek. The

line of the highway having been changed, the monument was reset on the west side of the present highway 100 feet west of its original position and about 300 feet S. W. of B. J. Roosa's house. It is on line between the property of B. J. Roosa and F. Millard. This monument was reset in perfect condition.

MONUMENT No. 48. HIGHWAY STONE 2.

Is a highway monument standing on the west side of the main road leading from Great Bend to Windsor in at its junction with road running easterly. It is on line between the property of Amos Frank and Frank Millard. This monument was found to be in good condition in every respect.

MONUMENT No. 49. MILESTONE 19.

Is a small monument standing on a very steep easterly slope in thick woods 429 feet west of Trowbridge creek, 15 feet south west of 15 inch maple and five feet N. E. of 6 inch maple, and 165 feet east "Fan Tail Corner," which is a rough monument of native rock 16 inches high 10 inches wide and 4 inches thick, marking the corner of six Pennsylvania sub-divisions. It is on line between the property of Squire and Flynn. This monument was found to be in good condition in every respect.

MONUMENT No. 50. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a private road 75 feet south of Flynn's house and 250 feet east of a large barn. It is on line between the property of Squire and Flynn. This monument has heaved 2 inches, otherwise in good condition.

MONUMENT No. 51. TOWN STONE 1.

Is a small monument with diagonal grooves marking the corner of the towns of Kirkwood and Windsor in Broome county, New York. It stands in cleared field 442.4 feet west of monument No. 50 and 95.9 feet south westerly from Squire's large barn. It is on line between the property of Squire and Flynn. This monument was found to be in good condition in every respect.

MONUMENT No. 52. MILESTONE 20.

Is a small monument standing upon the Susquehanna river flats, 654.4 feet east of monument No. 53 and under a wire fence. It is on line between the property of John Clyne and G. A. Wilcox. This monument has heaved 3 inches, otherwise it was found to be in good condition.

MONUMENT No. 53. HIGHWAY STONE 1.

Is a highway monument standing on east side of river road on right hand bank of Susquehanna river. It is 256.3 feet south and 142.3 feet

east of the center of astronomical station, which is marked by a granite monument buried 2½ feet under ground, 97.6 feet north westerly from the north westerly corner of the foundation of the main part of James Finn's house. It is on line between the property of John Clyne and G. S. Wilcox. This monument was found to be in good condition in every respect.

MONUMENT No. 54. RAILROAD STONE 1.

Is a small monument standing between the two tracks of the New York, Lake Erie and Western Railroad. This monument has its top buried six inches below the surface of the road bed and its corner slightly chipped, otherwise it was in good condition.

MONUMENT No. 55. MILESTONE 20 3-8.

Is a small monument standing at the east side of the base of the First Latitude Stone on river flats 20 feet east of the right hand bank of the river and 60 feet west of a hickory tree. It is on line between the property of John Clyne and G. S. Wilcox. This monument was found to be in good condition in every respect.

MONUMENT No. 56. RAILROAD STONE 2.

Is a small monument standing between the two tracks of the Delaware, Lackawanna and Western Railroad and about 200 feet east of monument No. 37. It is badly broken on all sides, otherwise it was found in good condition.

MONUMENT No. 57. HIGHWAY STONE 2.

Is a highway monument standing on west side of river road on left hand bank of Susquehanna river about 150 feet north of Henry Forboss' house. It is on line between the property of Henry Forboss and William Schnediker. This monument was found to be in good condition in every respect.

MONUMENT No. 58. MILESTONE 21 AND TOWN STONE.

Is a small monument with diagonal grooves standing at the north end of the summit of the high ridge between the Susquehanna river and Snake creek. It is in thick woods, 20 feet S. E. of an 18 inch chestnut and 10 feet S. W. of a 12 inch chestnut. It is on line between the property of Henry Forboss and William Schnedicker. This monument was found to be in good condition.

MONUMENT No. 59. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway, which is now but little used, about 600 feet east of Snake creek. It is on the property of Daniel English. This monument has heaved 2 inches, otherwise it was found in good condition.

MONUMENT No. 60. MILESTONE 22.

Is a highway monument standing on the west side of the Montrose and Binghamton turnpike and about 300 feet north of Sullivan's house. It is on line between the property of Lanchicken and Sullivan. This monument has heaved 2 inches and has its N. E. and S. W. corners badly chipped, otherwise it was found to be in good condition.

MONUMENT No. 61. MILESTONE 23.

Is a small monument standing in a cleared field on level ground, about 300 feet south of a creek which runs south easterly and 10 feet east of a north and south fence. It is on the property of Frederick Kaufman. This monument has heaved five inches, otherwise it was found to be in good condition.

MONUMENT No. 62. MILESTONE 24.

Is a small monument standing in a cleared field in a shallow gully 330 feet east of monument 63 and 20 feet south of a wire fence. It is on the property of Charles Adams. This monument has heaved 3 inches, otherwise it was found to be in good condition.

MONUMENT No. 63. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from Brookdale and Conkling's Forks, about 800 feet north of Adams' house. It is on the property of Charles Adams. This monument was found to be in good condition in every respect.

MONUMENT No. 64. MILESTONE 25.

Is a small monument standing on the west edge of a swamp and on the east edge of a small poplar grove, 20 feet north of barb wire fence, and about 1000 feet northerly from Wilbur house. It is on line between property of Eugene Wille and F. J. Fish. This monument was found to be in good condition in every respect.

MONUMENT No. 65. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from Brookdale to Binghamton, about 20 feet north of line fence. It is on line between the property of Eugene Wilbur and T. J. Fish. This monument has its four corners slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 66. MILESTONE 26.

Is a small monument standing in thick woods, about 100 feet north of clearing and just below the top of a steep slope, W. & N. opposite and about 300 feet north of the bottom of a deep hollow in the road which runs nearly parallel with the line 398 feet west of the south east corner of the town of Binghamton. It is on line between the prop-

erty of T. J. Fish and George Buchanan. This monument was found to be in good condition.

MONUMENT No. 67. HIGHWAY STONE 1.

Is a highway monument standing on south side of boundary line road and just where the road turns to north east on south side of panel fence. It is on line between the property of J. Conte and Alphews Whipple. This monument was found to have heaved 13 inches. It was reset in its proper position September, 1893.

MONUMENT No. 68. MILESTONE 27 AND TOWN STONE.

Is a small monument with diagonal grooves standing on south side of boundary line road under panel fence, and 197 feet west of monument No. 67. It marks the corners of the towns of Liberty and Silver Lake in Susquehanna county, Pa. It is on line between the property of John Conte and Alphews Whipple. This monument was found almost entirely out of ground. It was reset in its original position September, 1893.

MONUMENT No. 69. HIGHWAY STONE 1.

Is a highway monument standing at the west end of boundary line road, 300 feet north of creek and 250 feet north of Coyle's house. It is on line between the property of Peter Brady and Michael Coyle. This monument was found to be in good condition in every respect.

MONUMENT No. 70. MILESTONE 28.

Is a highway monument standing about 20 feet west of the west edge of a highway leading northerly to Binghamton in the corner of line fence. It is on line between the property of James Chapman and Thomas Monihan. This monument was found to be in good condition in every respect.

MONUMENT No. 71. MILESTONE 29.

Is a small monument standing in cleared land upon westerly slope 100 feet west of Summit and three feet north of an old stone wall. It is on line between the property of B. Gagen and Thomas Gagen. This monument was found to be in good condition in every respect.

MONUMENT No. 72. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from Brackney to Sauelton, 125 feet westerly from Thomas Gayen's house, and 1415 feet west of monument No. 71. It is on line between the property of T. Wilcox and Isaac Gage. This monument was found to be in good condition in every respect.

MONUMENT No. 73. MILESTONE 30.

Is a small monument standing in cleared pasture land 75 feet west

of brook and 875 feet east of monument No. 74. It is on the property of T. Monihan. This monument was found to have heaved 12 inches and it was reset September, 1893, in its original position.

MONUMENT No. 74. HIGHWAY STONE 1.

Is a highway monument standing on the east side of Silver Lake road and near the N. W. corner of large barn. It is on the property of Thomas Monihan. This monument has heaved eight inches, otherwise it was found to be in good condition.

MONUMENT No. 75. HIGHWAY STONE 2.

Is a highway monument standing on the south side of boundary line road and at the point where it turns to the north east. It is on line between the property of Michael Gaunon and Frank Cameron. This monument has one side chipped, otherwise it was found to be in good condition.

MONUMENT No. 76. MILESTONE 31.

Is a highway monument standing on south side of boundary line road and close to fence, 124 feet east where brook crosses the road. It is on the property of William Laffy. This monument was found to be in good condition in every respect.

MONUMENT No. 77. MILESTONE 32 AND TOWN STONE.

Is a small monument with diagonal grooves standing on the west side of the summit of the high ridge east of Choconut Valley, about 75 feet west of summit and about 50 feet north of bend in fence. It is on line between the property of William Clarke and Samuel Lee. This monument has its corners chipped; otherwise it was found to be in good condition. This monument marks the corner of the towns of Silver Lake and Choconut, Susquehanna county, Pa.

MONUMENT No. 78. HIGHWAY STONE.

Is a highway monument standing on the west side of Choconut creek road about 200 feet north of John Hinckey's house. It is on line between the property of John Hinckey and Samuel Mead. This monument was found to be in good condition in every respect.

MONUMENT No. 79. MILESTONE 33.

Is a small monument standing on the easterly side of the mountain west of the Choconut Creek Valley, 935 feet west of creek and under "line" fence. It is on line between the property of Michael McGraw and F. Powell. This monument has heaved 6 inches; otherwise it was found to be in good condition.

MONUMENT No. 80. MILESTONE 34.

Is a small monument standing on rough easterly slope, covered with burnt woods about 80 feet west of west branch of small creek and

about 600 feet east of summit. It is on line between the property of John Deant and John Schnediker. This monument was found to be in good condition in every respect.

MONUMENT No. 81. HIGHWAY STONE.

Is a highway monument standing on the west side of a highway running northerly and southerly and just where it turns to the east. It is on the property of Joshua Underwood. This monument was found to be in good condition in every respect.

MONUMENT No. 82. MILESTONE 35.

Is a small monument standing in a cleared field at the top of a steep bluff sloping southeasterly, in corner of worm fence and on the west side of the road leading to Thomas Dean's residence. It is on line between the property of Waffles and Dean. This monument was found to be in good condition in every respect.

MONUMENT No. 83. HIGHWAY STONE.

Is a highway monument standing on the west side of a private road which runs southerly from Tracey creek road and about 800 feet south westerly of Eggleston's residence and along side of line fence. It is on line between the property of Eggleston and Weed. This monument has heaved 2 inches; otherwise it was found to be in good condition.

MONUMENT No. 84. MILESTONE 36.

Is a small monument standing in an extensive brier patch on level ground, 303 feet west of monument No. 83 and 4 feet north of line fence. It is on line between property of Eggleston and Weed. This monument was found to be in good condition in every respect.

MONUMENT No. 85. MILESTONE 37.

Is a small monument standing on a westerly slope in south edge of thick woods 300 feet east of a deep ravine and 1028 feet east of monument No. 86. It is on line between the property of Jinks and Crimmins. This monument was found to be in good condition in every respect.

MONUMENT No. 86. HIGHWAY STONE.

Is a highway monument standing on the West side of a highway leading from Little Meadows to Apalachian, about 900 feet north of Crimmen's residence. It is on line between property of Jinks and Crimmins. This monument was found to be in good condition in every respect.

MONUMENT No. 87. COUNTY STONE.

Is a small monument with diagonal grooves marking the corner of Broome and Tioga counties, New York. It stands on a gentle westerly

slope about 1600 feet west of summit of ridge in an open field under a stump fence running north and south, about 6 feet south of line fence and about 40 feet south of large stone pile. It is on line between property of Jinks and Barden. This monument was found to have heaved 17 inches. It was reset in its original position September, 1893.

MONUMENT No. 88. MILESTONE 38.

Is a small monument standing on westerly slope on the east side of an abandoned wood road and near north east corner of a clearing, 809.6 feet west of monument No. 87 and five feet north of line fence. It is on line between property of Jinks and Borden. This monument was found to be in good condition in every respect.

MONUMENT No. 89. HIGHWAY STONE.

Is a highway monument standing on south side of boundary line road, north east of the village of Little Meadows and about 100 feet east of Bowden's. It is on line between the property of Bowden and Borden. This monument has its four corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 90. MILESTONE 39.

Is a highway monument standing on the south side of fence on south side of boundary line road opposite the residence of Albert Card and 40 feet west of where boundary line is crossed by Jones' creek. It is on line between the property of S. A. Pitchard and Albert Card. This monument was found to be in good condition in every respect.

MONUMENT No. 91. HIGHWAY STONE.

Is a highway monument standing on north side of boundary line road and about 75 feet east of where it forks. It is on line between the property of Duell and Pitchard. This monument has heaved 5 inches, otherwise was found to be in good condition.

MONUMENT No. 92. MILESTONE 39 1-2.

Is a small monument standing on westerly slope on south side of rail fence. It is on line between the property of Duell and Pitchard. This monument was found to have heaved 12 inches. It was reset in its original position September, 1893.

MONUMENT No. 93. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Little Meadows to Apalachin, opposite the residence of D. Holland. It is on the property of John Giles. This monument has its north east corner chipped, otherwise it was found in good condition.

MONUMENT No. 94. MILESTONE 40 and COUNTY STONE.

Is a small monument with diagonal grooves standing on a steep northerly slope in the north east corner of a piece of woods just west of the summit of the north end of the ridge west of Apalachin creek and at the west end of a line fence. It marks the corner of Susquehanna and Bradford counties, Pa. It is on line between the property of Hall and Holland. This monument was found to be in good condition in every respect.

MONUMENT No. 95. HIGHWAY STONE 1.

Is a highway monument standing on north west side of a highway, 1000 feet north of Mayhew's house. It is on line between the property of P. Mayhew and Phoebie Stockwell. This monument was found to be in good condition in every respect.

MONUMENT No. 96. MILESTONE 41.

It is a small monument standing in a cove in the north side of a ridge near the foot of a steep northerly slope at the north east corner of a clearing and 6 feet south of an old stone wall. It is on line between property of Noteman and Keeler. This monument was found to be in good condition in every respect.

MONUMENT No. 97. MILESTONE 42.

Is a small monument standing on level ground, 1150 feet east of a summit of a ridge and about 1450 feet east of monument No. 98, and just to the north of line fence. It is on line between the property of Alexander Giles and Clarence Corbin. This monument was found to have heaved 12 inches and to have been broken off 2½ feet from the top. It was reset in this condition September, 1893.

MONUMENT No. 98. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading to Owego, at the N. E. corner of an apple orchard and 400 feet south of Alexander Giles' house. It is on line between property of Alexander Giles and Clarence Corbin. This monument has heaved 2 inches, otherwise it was found in good condition.

MONUMENT No. 99. MILESTONE 43.

Is a highway monument standing on the west side of Owego and Milford turnpike, at its intersection with Prince's Hollow road. It is on line between the property of Harrington and Colburn. This monument was found to be in good condition in every respect.

MONUMENT No. 100. MILESTONE 44.

Is a highway monument standing on a steep easterly slope, 120 feet west of brook, 25 feet east of road and two feet north of line fence,

It is on the property of A. R. Gifford. This monument has heaved 7 inches, otherwise it was found in good condition in every respect.

MONUMENT No. 101. MILESTONE 45.

Is a highway monument standing on west side of road leading from Cadis post office to Montrose turnpike on top of summit of ridge overlooking the valley of Babcock creek, about 500 feet north of Holmes' house and near the most southerly of 4 small maples standing on the west side of the road. It is on the property of Thomas Holmes. This monument has heaved three inches, otherwise it was found in good condition.

MONUMENT No. 102. HIGHWAY STONE 1.

Is a highway monument standing on the west side of the road which follows the valley of Babcock creek. It is on line between the property of Brown and F. C. Waite. This monument has its N. E. corner chipped, otherwise it was found in good condition.

MONUMENT No. 103. MILESTONE 46.

Is highway monument standing on the west side of a highway leading from Wait's settlement to Owego and just south of a sluiceway which crosses the road; it makes the corner of the towns of Warren and Windham, Bradford county, Pa. It is on line between property of Mrs. A. Brown and Amos Condon. This monument has heaved 2 inches, otherwise it was found to be in good condition.

MONUMENT No. 104. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading to Owego, about 200 feet north of the summit of a ridge. It is on line between property of Mrs. A. Brown and Amos Condon. This monument was found to be in good condition in every respect.

MONUMENT No. 105. HIGHWAY STONE 2.

Is a highway monument standing on the west side of a highway leading from Cliff market to Owego, about 200 feet south of Walter Cliff's house. It is on line between property of Jerry Waite and Anson White. This monument was found to be in good condition in every respect.

MONUMENT No. 106. MILESTONE 47.

Is a small monument standing in an open field on level ground just south of line fence and 660 feet west of monument No. 105. It is on line between property of Jerry Wait and Anson White. This monument was found to have heaved 12 inches. It was reset in its original position September 12, 1893.

5-7-93.

MONUMENT No. 107. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway, about 150 feet north east of Waite's barn. It is on the property of George Waite. This monument was found to be in good condition in every respect.

MONUMENT No. 108. MILESTONE 48.

Is a small monument standing on an easterly slope at west edge of clearing, 175 feet west of brook and 2356 feet east of monument No. 109. It is on line between the property of Fred. Olmstead and Thos. Lynch. This monument has heaved 3 inches, otherwise it was found in good condition.

MONUMENT No. 109. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from Linden to Waverly about 300 feet north of Olmstead's house. It is on line between the property of Fred. Olmstead and Thomas Lynch. This monument was found to be in good condition in every respect.

MONUMENT No. 110. MILESTONE 49.

Is a small monument standing in thick woods at north easterly edge of the nearly level summit of the ridge, east of the Wappasening valley, and about 3020 feet west of monument No. 109. It is on line between the property of James Olmstead and Isaiah Reynolds. This monument was found to be in good condition in every respect.

MONUMENT No. 111. MILESTONE 50.

Is a highway monument standing on the south side of boundary line road, close to a stone wall, and about 90 feet south of a barn. It is on line between the property of James Morey and Robert Howell. This monument was found to be in good condition in every respect.

MONUMENT No. 112. HIGHWAY STONE 1.

Is a highway monument standing on south side of boundary line road at its junction with road leading south to Raysville. It is on line between property of James Morey and Robert Howell. This monument was found to be in good condition in every respect.

MONUMENT No. 113. HIGHWAY STONE 2.

Is a highway monument standing on the north side of boundary line road, at junction with road running north along the east bank of Wappasening creek, and about 75 feet S. W. of J. H. Morey's house. It is on line between property of James Morey and Robert Howell. This monument has one of its corners chipped, otherwise it was found to be in good condition.

MONUMENT NO. 114. MILESTONE 51.

Is a small monument standing on easterly slope of the ridge west of Wappasening valley, 2000 feet east of the summit, on the south edge of woods and about 600 feet north of a road which runs parallel with the boundary line towards the west and at this point turns to the south and just south of line fence. It is on line between the property of Frank Briggs and Clinton Johnson. This monument was found to be in good condition in every respect.

MONUMENT No. 115. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Nichols to Rome, and about 300 feet north or Barnes residence. This monument has its N. W. and S. W. corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 116. MILESTONE 52 AND TOWN STONE.

Is a small monument with diagonal grooves standing about half way up the low bluff east of little Wappasening creek, 6795 feet east of monument No. 117. It marks the corner of the towns of Windham and Litchfield, Bradford county, Pa. It is on line between the property of Scott Bennett and Johnson Rogers. This monument was found to be in good condition in every respect.

MONUMENT No. 117. HIGHWAY STONE 1.

Is a highway monument standing on the west side of road along the west bank of Little Wapassening creek and about 50 feet northeast of Johnson Rogers' house. It is on line between the property of Scott Bennett and Johnson Rogers. This monument has its top 2 inches above the ground, otherwise it was found to be in good condition.

MONUMENT No. 118. HIGHWAY STONE 2.

Is a highway monument standing on the west side of the road which follows the left branch of Little Wappasening creek northerly into Nichols. This monument has its corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 119. MILESTONE 53.

Is a small monument standing under a stump fence in cleared land upon high ground, which is nearly level and northwest of the west branch of Little Wappasening creek, 3302 feet east of monument 120. This monument was found to be in good condition in every respect.

MONUMENT No. 120. HIGHWAY STONE 1.

Is a highway monument standing at the east end of boundary line road and on its south side. This monument was found to be in good condition in every respect.

MONUMENT No. 121. MILESTONE 54.

Is a highway monument standing on the south side of boundary line road; the northeast corner of C. Ellis' farm. It is on the property of C. Ellis. This monument has heaved 7 inches, otherwise it was found to be in good condition.

MONUMENT No. 122. HIGHWAY STONE 1.

Is a highway monument standing at the west end of boundary line road at its junction with a road running northerly and southerly 640 feet west of monument No. 121. It is on the property of C. Ellis. This monument was found to be in good condition in every respect.

MONUMENT No. 123. MILESTONE 55.

Is a small monument standing upon a southerly slope under fence about 110 feet south of barn and about 100 feet east of the point at which a short piece of the boundary line road turns towards the northeast. It is on the line between the property of A. D. Chandler and George Stauff. This monument was found to be in good condition in every respect.

MONUMENT No. 124. HIGHWAY STONE 1.

Is a highway monument standing at the west end of a short piece of boundary line road, just where it turns to the southwest, about 300 feet west of George Stauff's house. It is on line between property of A. D. Chandler and George Stauff. This monument has its southwest corner chipped, otherwise it was found to be in good condition.

MONUMENT No. 125. RIDGE STONE.

Is a small monument standing in a cleared field on the summit of high ridge overlooking the Susquehanna Valley, 15 feet north of line fence. It is on the property of A. Parks. This monument has its north side and east side badly chipped, and has heaved 3 inches, otherwise it was in good condition.

MONUMENT No. 126. HIGHWAY STONE 2.

Is a highway monument standing originally at the east end of Boundary line road; the road having been changed, the monument now stands on the easterly side of the road running southeast into Pennsylvania, about 28 feet west of Park's carriage house. It is on the property of A. Parks. This monument was found to be in good condition in every respect.

MONUMENT No. 127. MILESTONE 56.

Is a small monument standing a little to the north of the centre of the road, which follows the Boundary line road; it is 12.75 feet south of fence on north side of the road and north 60 deg. west from an

apple tree standing on the south side of a road and 1090 feet east of monument No. 128. It is on the property of A. Parks. This monument has its top 3 inches below the surface of the road and has its south side broken, otherwise it was found to be in good condition.

MONUMENT No. 128. HIGHWAY STONE 1.

Is a highway monument standing on the west side of the river road on the left hand bank of the Susquehanna river in front of a cemetery and at the west end of Boundary line road. It is on the property of A. Parks. This monument was found to be in good condition in every respect.

MONUMENT No. 129. RIVER STONE 1.

Is a small monument standing on the river flats about 30 feet east of the left hand bank of the Susquehanna river in cleared field, and under a barbed wire fence. It is on line between the property of Mercum Park and Albrans Park. This monument has its north side chipped, otherwise it was found to be in good condition.

MONUMENT No. 130. RIVER STONE 2.

Is a small monument standing on high ground about 50 feet west of the right hand bank of the Susquehanna river, and a little to the west of the north end of river road. It is on line between the property of Hill and Cook. This monument was found to be in good condition in every respect.

MONUMENT No. 131. MILESTONE 57.

Is a small monument standing in a cleared field on rolling ground, close to the north side of line fence, 2,175 feet west of monument 130 and 60 feet west of 24-inch oak, standing on a line. It is on line between the property of Hill and Walcott. This monument was found to be in good condition in every respect.

MONUMENT No. 132. RAILROAD STONE 1.

Is a small monument standing three feet east of the Southern Central Railroad track on south edge of clearing. This monument has its top almost flush with the surface of the roadbed and has its corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 133. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Ellison to Waverly, 15 feet south of line fence. It is on line between the property of Woodruff and Wilkinson. This monument was found to be in good condition in every respect.

MONUMENT No. 134. MILESTONE 58.

Is a small monument standing upon the steep west slope of a narrow gravel ridge in cleared field 1,550 feet east of Monument No. 135,

20 feet east of a wild cherry standing on northside of line fence and 165 feet east of a rough stone monument with a cross upon its top which marks the corner of sub-division of the Douglass Military patent. It is on line between the property of Woodruff and Wilkinson. This monument was found to be in good condition in every respect.

MONUMENT No. 135. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway leading from Sayre to Owego, 15 feet west of sluiceway. It is on line between the property of J. Bonnell and Charles Smith. This monument was found to be in good condition in every respect.

MONUMENT No. 136. RAILROAD STONE 1.

Is a small monument standing between the two tracks of the Delaware, Lackawanna and Western Railroad on a high embankment about 400 feet west of a cut, and slightly east of a small creek running northerly and southerly. This monument has its top about 2 inches above the surface of the roadbed, otherwise it was found to be in good condition.

MONUMENT No. 137. MILESTONE 59.

Is a small monument standing in an open cultivated field about 100 feet north of the high embankment of the Delaware, Lackawanna and Western Railroad, and about 70 feet east of the Geneva, Ithaca and Sayre Railroad. This monument was found to be in good condition in every respect.

MONUMENT No. 138. RAILROAD STONE 1.

Is a small monument standing between the two easterly tracks of the Geneva, Ithaca and Sayre Railroad and about 150 feet north of the Delaware, Lackawanna and Western Railroad crossing. This monument has its north side slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 139. HIGHWAY STONE 1.

Is a highway monument standing on the west side of Cayuga avenue in the village of Sayre along the east side of a board walk, 30 feet south of Connel's grocery store. It is on the property of Connell. This monument has its southwest corner slightly chipped, otherwise it was found in good condition.

MONUMENT No. 140. RAILROAD STONE 2.

Is a small monument standing between the two main tracks of the Lehigh Valley Railroad and about 600 feet north of the Delaware, Lackawanna and Western Railroad crossing. This monument has heaved 2 inches and has its corners slightly chipped, otherwise it was found in good condition.

MONUMENT No. 141. HIGHWAY STONE 2.

Is a highway monument standing on the east side of Wilcox avenue in the village of Waverly, about 150 feet south of Doyle street and 10 feet west of fence. It is on line between property of Frank Hart and Mrs. McCarthy. This monument was found to be in good condition in every respect.

MONUMENT No. 142. HIGHWAY STONE 3.

Is a highway monument standing on the west side of Henry street in the village of Waverly, about 200 south of Erie street, and 10 feet east of fence. It is on the property of Mrs. Noonan. This monument has its east side slightly chipped, otherwise it was found in good condition.

MONUMENT No. 143. HIGHWAY STONE 4.

Is a highway monument standing on the west side of Pennsylvania avenue in the village of Waverly, 150 feet south of bridge over the Erie railroad tracks and 10 feet east of fence. It is on the property of P. R. Atley. This monument was found to be in good condition in every respect.

MONUMENT No. 144. MILESTONE 60.

Is a small monument standing in the rear end of a garden which fronts north on Railroad avenue in the village of Waverly, about 210 feet east of Fulton street, on the property of Mrs. Kinney. This monument was found to be in good condition in every respect.

MONUMENT No. 145. HIGHWAY STONE 1.

Is a highway monument standing on the east side of Fulton street in the village of Waverly, 150 feet south of the Erie Railroad tracks, 10 feet west of Genung's Sash and Blind Factory. It is on the property of Genung. This monument was found to be in good condition in every respect.

MONUMENT No. 146. HIGHWAY STONE 2.

Is a highway monument standing on the east side of Loder street, in the village of Waverly, 15 feet west of the Erie House and 100 feet south of the Erie Railroad. This monument has its edges slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 147. HIGHWAY STONE 3.

Is a highway monument standing on the top of cut of the Erie Railroad, 5 feet east of Bridge Crossing street, in the village of Waverly and near a P. C. It is on the property of Erie Railroad, otherwise it was found in good condition.

MONUMENT No. 148. HIGHWAY STONE 4.

Is a highway monument standing on the south side of Bradford street in the village of Waverly, about 390 feet east of monument 149.

It is on line between the property of the Erie road and Delaware, Lackawanna and Western Railroad. This monument was found to be in good condition in every respect.

MONUMENT No. 149. RAILROAD STONE 1.

Is a small monument standing between the two tracks of the Delaware, Lackawanna and Western Railroad, about 60 feet northwest from the northwest corner of Gaff's icehouse. This monument has heaved 4 inches and is badly chipped.

MONUMENT No. 150. SPANISH HILLS MONUMENT.

Is a highway monument standing on a small knoll extending northerly from the Spanish Hills 60 feet south to cut on Delaware, Lackawanna and Western Railroad, and 15 feet east of the old Spanish Hill monument which is set at 60 3-5 miles. It is on the property of Delaware, Lackawanna and Western Railroad. This monument was found to be in good condition in every respect.

MONUMENT No. 151. MILESTONE 60 7-8.

Is a small monument standing upon the river flats about 50 feet south of the high embankment of the Delaware, Lackawanna and Western Railroad at the east end of the river bridge and almost 25 feet east of the left hand banks of the Chemung river. It is on the property of the Delaware, Lackawanna and Western Railroad. This monument was found to be in good condition in every respect.

MONUMENT No. 152. MILESTONE 61.

Is a small monument standing on the right hand bank of the Chemung river in the foot of the slope of a high embankment of the Delaware, Lackawanna and Western Railroad. It is buried under a pile of loose rock which has been used to strengthen the embankment. It is 21.1 feet south of the west abutment of the Delaware, Lackawanna and Western Railroad bridge and in line with a point 6 inches east of the face of the abutment above the bridge seat. This monument was found to be in good condition in every respect.

MONUMENT No. 153. RAILROAD STONE 1.

Is a small monument standing between two tracks of the Delaware, Lackawanna and Western Railroad on the high embankment west of the Chemung river, 294.9 feet east of whistle post, standing on north side of road bed. This monument has its top buried 6 inches beneath the surface of the roadbed and has its corners chipped. otherwise it was found to be in good condition.

MONUMENT No. 154. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading westerly from the village of Waverly, about 300 feet north of

Delaware, Lackawanna and Western Railroad in corner of fence. It is on property of Delaware, Lackawanna and Western Railroad. This monument was found to be in good condition.

MONUMENT No. 155. MILESTONE 62.

Is a small monument standing on level ground, north side of a thick growth of bushes under line fence 2,335 feet east of monument 156. It is on line between property of Olmstead and Rogers. This monument was found to be in good condition in every respect.

MONUMENT No. 156. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from the village of Waverly to Willawanna, just where road turns sharply to the south. It is on line between property of Olmstead and Rogers. This monument was found to be in good condition in every respect.

MONUMENT No. 157. RIVER STONE 1.

Is a small monument standing on the right hand bank of the second intersection of the Chemung river, about 50 feet east of river and under a line fence. It is on line between the property of Olmstead and Shepard. This monument was found to be in good condition in every respect.

MONUMENT No. 158. MILESTONE 63.

Is a highway monument standing on east side of private road, about 500 feet south of Wynkoop creek and about 950 feet west of the left hand bank of Chemung river and under line fence. It is on the property of Shepard. This monument was found to be in good condition in every respect.

MONUMENT No. 159. MILESTONE 64.

Is a small monument standing on level ground in cleared land 4 feet south of a stone wall and 704 feet east of monument 160. It is on the property of William Hulbert. This monument was found to be in good condition in every respect.

MONUMENT No. 160. HIGHWAY STONE 1.

Is a highway monument on west side of a road leading southerly from the village of Chemung about 30 feet west of an apple tree which stands alongside the fence on the east side of the road, about 250 feet northwest from Hulbert's house. It is on line between property of J. R. Hulbert and H. Baker. This monument was found to be in good condition in every respect.

MONUMENT No. 161. HIGHWAY STONE 2.

Is a highway monument standing on west side of River road, leading from the village of Chemung to Williwanna, about 100 feet south-

easterly from Purcell's house. It is on line between property of Sarah McDuff and A. Purcell. This monument was found to be in good condition in every respect.

MONUMENT No. 162. MILESTONE 65.

Is a small monument with diagonal grooves standing in cultivated ground under line fence, about one-fourth of a mile west of monument No. 161. It marks the corner of the town of Athens and Ridgebury, Bradford county, Pa. It is on line between property of Sarah McDuff and A. Purcell. This monument was found to be in good condition in every respect.

MONUMENT No. 163. RAILROAD STONE 1.

Is a small monument standing between the two tracks of the Delaware, Lackawanna and Western Railroad. This monument has its top buried 5 inches beneath the surface of the roadbed and its four corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 164. MILESTONE 66.

Is a small monument standing in a thick woods on a steep northeasterly slope, 396 feet east of the northeast corner of a small clearing east of the summit of a ridge. It is on line between the property of Davidson and Herrick. This monument was found to be in good condition in every respect.

MONUMENT No. 165. HIGHWAY STONE 1.

Is a highway monument standing on southwest side of a road which is now but little used and at the northeast corner of a wire fence. It is on line between property of Davidson and Herrick. This monument has its edges slightly chipped, otherwise it was found to be in good condition.

MONUMENT No. 166. MILESTONE 67.

Is a small monument standing in thick woods upon a northwesterly slope, about 250 feet west of an abandoned woods road, and about 340 feet east of a brook in a deep ravine. It is on line between the property of Davidson and Herrick. This monument was found to be in good condition in every respect.

MONUMENT No. 167. HIGHWAY STONE 1.

Is a highway monument standing in the centre of a road running southwesterly and just where it turns sharply to the south. It is on line between property of James Burke and Mrs. Case. This monument was found to be in good condition in every respect.

MONUMENT No. 168. MILESTONE 68.

Is a small monument standing on the south edge of a thick young woods in the northeast corner of a bush lot, 5 feet north of a worm

fence, and at the northeast corner of Rayne's farm. It is on the line between property of Rayne and Burke. This monument was found to be in good condition in every respect.

MONUMENT No. 169. HIGHWAY STONE 1.

Is a highway monument standing on the east side of road leading southerly from Wellsburg on southwest slope. It is on line between the property of Daniel Caldwell and John O'Brien. This monument was found to have heaved five inches, otherwise it was in good condition.

MONUMENT No. 170. MILESTONE 69.

Is a small monument standing in thick woods on a steep northeasterly slope, about 635 feet west of a brook in deep ravine. It is on line between the property of Daniel Caldwell and Samuel Caldwell. This monument was found to be in good condition in every respect.

MONUMENT No. 171. HIGHWAY STONE 1.

Is a highway monument standing on the east side of the Bentley creek road on a steep westerly slope, and at south edge of a clearing. It is on line between property of Joseph Prescott and David Burt. This monument was found to be in good condition in every respect.

MONUMENT No. 172. HIGHWAY STONE 2.

Is a highway monument standing on east side of a highway leading from Wellsburg to Troy, Pa., along the west edge of Bentley creek, about in front of the residence of Lyman Dewey. It is on property of Lyman Dewey. This monument was found to be in good condition in every respect.

MONUMENT No. 173. MILESTONE 70.

Is a small monument standing in an open field high up on a steep easterly slope overlooking the valley of Bentley creek, 279 feet east of monument No. 174. It is on property of Lyman Dewey. This monument was found to be in good condition in every respect.

MONUMENT No. 174. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a steep road near the summit of a high ridge west of the valley of Bentley creek. It is on line between property of Ellsworthy and Arnot. This monument was found to be in good condition in every respect.

MONUMENT No. 175. HIGHWAY STONE 2.

Is a highway monument standing on the west side of a telegraph road, which at this point runs southwesterly. It is on line between property at Ellsworthy and Arnot. This monument has its south side slightly chipped, otherwise it was found in good condition.

MONUMENT No. 176. HIGHWAY STONE 3.

Is a highway monument standing on the east side of a telegraph road and about 500 feet north of Coleman's house. It is on line between property of Coleman and Elliott. This monument was found to be in good condition in every respect.

MONUMENT No. 177. MILESTONE 71.

Is a small monument standing in cleared land on a gentle southerly slope just south of the corner of stump fence, close beside a small hickory tree and 1,175 feet west of monument 176. It is on line between property of Charles Coleman and Richard Coleman. This monument was found to be in good condition in every respect.

MONUMENT No. 178. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway running southerly, and about 450 feet south of a road which, up to this point, parallels the boundary line for about three-fourths of a mile from the east. It is on line between property of James Suffern and Gilbert Coleman. This monument was found to be in good condition in every respect.

MONUMENT No. 179. MILESTONE 72.

Is a small monument standing in a gap in a stone wall, south side of a piece of woods, north side of a lane on a steep northwesterly slope, and about 800 feet west of the summit of the ridge east of South creek. It is on the property of James Suffern. This monument was found to be in good condition in every respect.

MONUMENT No. 180. HIGHWAY STONE.

Is a highway monument standing on the east side of the main road leading from Fassett to Elmira and 60 feet northeast of Kretty's residence. It is on the property of James Suffern. This monument has heaved two inches and is slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 181. RAILROAD STONE.

Is a small monument standing on the west side of the Northern Central Railroad track. This monument is badly chipped; otherwise it was found to be in good condition.

MONUMENT No. 182. MILESTONE 73.

Is a small monument standing on the east edge of a summit of the high steep ridge west of South creek valley, 1,650 feet west of creek, and at south end of barb wire fence which runs along the east edge of summit of ridge. It is on line between property of Costello and Miles Rouskey. This monument was found to be in good condition in every respect.

MONUMENT No. 183. MILESTONE 74.

Is a small monument standing in a narrow place swamp in a deep valley in cleared land about 15 feet west of brook and under a stump fence. On line between property of Ira Woods and Mrs. Ray Managon. This monument heaved 6 inches; otherwise in good condition.

MONUMENT No. 184. HIGHWAY STONE 1.

Is a highway monument standing at east end of boundary line road on the north side, under a stump fence, and 1,180 feet west of monument No. 183. It is on line between property of Joshua Shearer and James Hunt. This monument was found to be in good condition.

MONUMENT No. 185. HIGHWAY STONE 2.

Is a highway monument standing on north side of Boundary line road, at its junction with road running northerly to Elmira. It is on line between property of Shearer and Brewer. This monument has its northeast and southeast corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 186. MILESTONE 75 AND TOWNSTONE.

Is a highway monument standing on the north side of Boundary line road, on the left bank of ravine, 33 feet west of the original milestone which is at the bottom of a ravine close to the north side of road embankment. The original milestone marks the corner of the towns of South Creek and Wells, Bradford county, Pa. It is on the property of Benjamin Seitzer. This monument was found to be in good condition in every respect.

MONUMENT No. 187. HIGHWAY STONE 1.

Is a highway monument standing at the west end of Boundary line road. It is on line between property of A. D. Grisnold and Benjamin Seitzer. This monument has heaved four inches, and all corners slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 188. MILESTONE 76.

Is a small monument standing on a westerly slope in cleared field, about 700 feet west of the summit and 15 feet south of worm fence. It is on line between the property of Palmer and Eaton. This monument has heaved 8 inches; otherwise it was found to be in good condition.

MONUMENT No. 189. HIGHWAY STONE 1.

Is a highway monument standing on the west side of Bird Creek road, 125 feet south of where brook crosses road and about 100 feet north of Smith's house. It is on line between property of Mrs. Smith and Cowe. This monument has its four corners slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 190. MILESTONE 77.

Is a small monument standing in cleared level land in bottom of Bird Creek valley, 204.5 feet west of monument No. 189. It is on the property of Mrs. Smith. This monument was found to be in good condition in every respect.

MONUMENT No. 191. HIGHWAY STONE 1.

Is a highway monument standing on west side of the Nichols road, 4 feet north of stone wall. It is on line between the property of Norman Davy and Columbus Nichols. This monument was found to be in good condition in every respect.

MONUMENT No. 192. MILESTONE 78.

Is a small monument standing in a small hollow in cleared land, about 700 feet east of the summit of the very high, steep ridge, east of Seely creek, on north side of line fence. It is on the property of Reuben Berry. This monument has heaved two inches; otherwise it was found to be in good condition.

MONUMENT No. 193. HIGHWAY STONE 1.

Is a highway monument standing on east side of the Elmira plank road, 150 feet south of State Line Hotel. It is on line between property of Mary Weeks and A. J. Pedrick. This monument was found to be in good condition in every respect.

MONUMENT No. 194. RAILROAD STONE 1.

Is a small monument standing on east side of the track of the Tioga branch of New York, Lake Erie and Western Railroad, about 200 feet north of State Line Railroad station. This monument was found to be in good condition in every respect.

MONUMENT No. 195. MILESTONE 79.

Is a highway monument standing on the west side of lightly traveled road upon a bank 450 feet west of monument No. 194, 75 feet south of gate in road and at east end of stone wall. It is on line between property of Wilson and Roy. This monument was found to be in good condition in every respect.

MONUMENT No. 196. HIGHWAY STONE 1.

Is a highway monument standing about 20 feet east of the north end of a highway leading south into Millerton in cultivated field. It is on the property of Nathaniel Wilson. This monument has its south side chipped, otherwise it was found to be in good condition.

MONUMENT No. 197. MILESTONE 80.

Is a highway monument standing in a narrow swamp upon the south side of a highway laid out along the boundary line, but not

worked, and about 1,150 feet west of monument 196. It marks the corners of Bradford and Tioga counties, Pa. It is on line between property of James McSolly and Alvin Miller. This monument has heaved 3 inches; otherwise it was found to be in good condition.

MONUMENT No. 198. HIGHWAY STONE 1.

Is a highway monument standing at west end of boundary line at its junction with road running southerly to Millerton. It is on line between property of Alvin Miller and Thaddeus Mitchell. This monument was found to be in good condition in every respect.

MONUMENT No. 199. MILESTONE 81.

Is a small monument standing on the east side of the narrow summit of the high ridge at the southeast corner of a piece of woods along side of worm fence and 990 feet west of monument 198. It is on line between property of Alvin Miller and Alexander Lewis. This monument was found to be in good condition in every respect.

MONUMENT No. 200. HIGHWAY STONE.

Is a highway monument standing on east side of highway on steep southerly slope, about 150 feet west of the residence of Mrs. Russel. It is on line between the property of Samuel Josh and Charles Bly. This monument was found to be in good condition in every respect.

MONUMENT No. 201. MILESTONE 82 AND COUNTY STONE.

Is a highway monument standing on east side of a road running south about 500 feet south of the summit. It marks the corner of the counties of Chemung and Steuben, New York. It is on line between property of Samuel Miller and Frank Allen. This monument has its four corners slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 202. MILESTONE 83.

Is a small monument standing about 10 feet north of line fence in cleared land upon the summit of a low ridge which crosses the boundary line diagonally. This monument was found to be in good condition in every respect.

MONUMENT No. 203. MILESTONE 84.

Is a small monument standing in an open field south of fence in the rear (north) of a dwelling house, and 825 feet of the point at which the boundary line turns to the southeast. It is on the line between the property of Simon Nichols and Mrs. N. Comfort. This monument was found to be in good condition in every respect.

MONUMENT No. 204. HIGHWAY STONE 1.

Is a highway monument standing on north side of Boundary line road about 300 feet east of the residence of Albert Buchanan. It is

on line between the property of Simon Nichols and Mrs. Anna Comfort. This monument has its northwest corner slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 205. HIGHWAY STONE 2.

Is a highway monument standing on south side of Boundary line road at its junction with road running northerly, and about 150 feet southeast of a small frame school house. It is on line between property of Eugene Tobey and S. L. Kelly. This monument was found to be in good condition in every respect.

MONUMENT No. 206. MILESTONE 85.

Is a small monument standing on south side of Boundary line road, about 350 feet east of brook, which crosses road, and 15 feet north of wire fence on south side of road. It is on line between property of Eugene Tobey and Christopher Tobey. This monument was found to be in good condition in every respect.

MONUMENT No. 207. HIGHWAY STONE 1.

Is a highway monument standing on south side of Boundary line road at its junction with road running southwesterly into Pennsylvania. It is on line between the property of Patrick Mahar and Christopher Tobey. This monument was found to be in good condition in every respect.

MONUMENT No. 208. HIGHWAY STONE 2.

Is a highway monument standing at west end of Boundary line road. It is on line between the property of Patrick Mahar and Christopher Tobey. This monument was found to be in good condition in every respect.

MONUMENT No. 209. MILESTONE 86.

Is a small monument standing on a westerly slope 800 feet west of summit at south edge of thick woods under a stump and stone fence. It is on line between property of Charles Andrews and David Hulsander. This monument was found to be in good condition in every respect.

MONUMENT No. 210. MILESTONE 87.

Is a small monument standing near the bottom of a bluff at the east side of a narrow swamp, 237.4 feet east of monument No. 211. It is on line between property of Niles and Rockwell. This monument has its southeast corner badly broken; otherwise it was found to be in good condition.

MONUMENT No. 211. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway about 300 feet south of Niles residence. It is on line between property of

Niles and Rockwell. This monument was found to be in good condition in every respect.

MONUMENT No. 212. MILESTONE 88 AND TOWN STONE.

Is a small monument with diagonal grooves standing in the southeast corner of a piece of woods, northwest corner of a brush lot, and at south end of a stump fence. It is on line between property of Garry Schumaker and Andrew Maxwell. This monument marks the corners of Caton and Lindley, Steuben county, New York. This monument was found to be in good condition in every respect.

MONUMENT No. 213. HIGHWAY STONE 1.

Is a highway monument standing on west side of road leading from Lawrenceville to Elmira. It is on line between property of Harrison Sizer and Albertus Paliff. This monument was found to be in good condition in every respect.

MONUMENT No. 214. MILESTONE 89.

Is a small monument standing in cleared field on southeasterly slope of the ridge east of the Tioga river, 600 feet from summit and at southeast corner of fence. It is on line between property of John Tillon and Mrs. Ellison. This monument was found to be in good condition in every respect.

MONUMENT No. 215. HIGHWAY STONE 1.

Is a highway monument standing on west of a highway leading from Lawrenceville to Elmira, and just where the highway turns sharply to the south. It is on line between property of Sam Coons and A. Ward. This monument was found to be in good condition in every respect.

MONUMENT No. 216. RAILROAD STONE 1.

Is a highway monument standing at the northwest corner of the Erie Railroad station in the village of Lawrenceville. This monument is slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 217. RIVER STONE 1.

Is a small monument standing upon the river flats about 100 feet west of the left hand bank of the Tioga river in a garden, 75 feet northeast of the residence of W. S. Smith and 3 feet south of line fence. It is on line between property of W. S. Smith and B. H. Parkhurst. This monument was found to be in good condition in every respect.

MONUMENT No. 218. MILESTONE 90.

Is a small monument standing about 100 feet north of State street in the village of Lawrenceville, at the northeast corner of Hallenback's barn, and about 1,260 feet east of monument 219. It is on line be-

tween property of Kuehl and Harraway. This monument was found to be in good condition in every respect.

MONUMENT No. 219. HIGHWAY STONE 1.

Is a highway monument standing on west side of Main street, in the village of Lawrenceville, about 500 feet south of bridge crossing the Cowanesque river. It is on line between property of Parkhurst and Hill. This monument was found to be in good condition.

MONUMENT No. 220. RIVER STONE 1.

Is a small monument standing on the river flats, about 100 feet of the Cowanesque river, 75 feet north of the residence of Niles Freeling, and 15 feet east of a large elm tree. It is on line between property of Niles Freeling and B. H. Parkhurst. This monument has heaved 6 inches, otherwise it was found to be in good condition.

MONUMENT No. 221. HIGHWAY STONE 2.

Is a highway monument standing on northwest side of Cowanesque river road, northwest of Grist Mill. It is on line between property of Eaton and Ellison. This monument has its southeast corner badly chipped; otherwise it was found to be in good condition.

MONUMENT No. 222. MILESTONE 91.

Is a small monument standing on a steep southerly slope in open woods, about 250 feet west of the crest of the ridge, and about 250 feet south of a clearing on the summit, on line between property of Eaton and Austin. This monument was found to be in good condition in every respect.

MONUMENT No. 223. HIGHWAY STONE 1.

Is a small monument standing in thick woods on the northeast side of abandoned wood road on line between property of Wood and Watson. This monument was found to be in good condition in every respect.

MONUMENT No. 224. HIGHWAY STONE 2.

Is a small monument standing on east side of lately abandoned wood road on line between property of Wood and Watson. This monument was found to be in good condition in every respect.

MONUMENT No. 225. MILESTONE 92.

Is a small monument standing in thick woods on a gentle westerly slope, 125 feet west of a clearing on line between property of Ford and Stewart. This monument was found to be in good condition in every respect.

MONUMENT No. 226. HIGHWAY STONE 1.

Is a highway monument standing at the east end of Boundary line road on south side of road at north edge of woods and 150 feet east

of Baker's residence, on line between property of Lagrana Brant and S. A. Baker. This monument has heaved 8 inches; otherwise it was found to be in good condition in every respect.

MONUMENT No. 227. MILESTONE 93.

Is a highway monument standing on the east edge of bushy woods on south side of boundary line road, near top of a westerly slope, and about 150 feet southwest of Sliter's residence. It is on line between property of Ruth Sliter and Charles Baker. This monument was found to be in good condition in every respect.

MONUMENT No. 228. HIGHWAY STONE 1.

Is a highway monument standing on the north side of Boundary line road at its junction with road running southerly. It is on line between property of Daniel Stoddard and George Star. This monument has its northeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 229. MILESTONE 94 AND TOWN STONE.

Is a highway monument standing on north side of Boundary line road, about 275 feet east of the summit of the ridge. It marks the corner of the towns of Lindley and Tuscarora, Steuben county, New York. It is on line between property of Samuel Morehouse and Edwin Baker. This monument was found to be in good condition in every respect.

MONUMENT No. 230. HIGHWAY STONE 1.

Is a highway monument standing on north side of Boundary line road on steep westerly slope and at junction with road running northerly. It is on line between property of Alvin O'Dell and Edwin Thomas. This monument was found to be in good condition in every respect.

MONUMENT No. 231. MILESTONE 95.

Is a highway monument standing on north side of Boundary line road, 30 feet east of the southeast corner of a grove of pines which stands about on the summit. It is on line between property of William Price and Augustus Cluago. This monument was found to be in good condition in every respect.

MONUMENT No. 232. HIGHWAY STONE 1.

Is a highway monument standing on north side of Boundary line road at its west end and at the junction of road leading southwest into the village of Nelson, 203 feet west of monument 231, on line between property of William Pierce and Augustus Senago. This monument has its southeast and southwest corners chipped, otherwise it was found in good condition.

MONUMENT No. 233. MILESTONE 96.

Is a small monument standing on gentle westerly slope south side of a piece of woods under a stump fence, 1,354 feet east of monument 234 and at Pennsylvania farm corner. It is on line between property of Baxter and Hoyt. This monument was found to be in good condition in every respect.

MONUMENT No. 234. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway running northerly from the village of Nelson on top of the summit. It is on the property of Harry Baxter. This monument has its southwest corner chipped, otherwise it was found to be in good condition in every respect.

MONUMENT No. 235. HIGHWAY STONE 2.

Is a highway monument standing on the east side of a highway which followes the east bank of Baldwin's creek. It is on the property of Harry Baxter. This monument was found to be in good condition in every respect.

MONUMENT No. 236. MILESTONE 97.

Is a small monument standing in a clay swamp, at bottom of deep valley, about 225 feet west of monument 235 and 230 feet west of brook and about 25 feet north of fence. It is on line between property of Harry Baxter and H. S. Bristol. This monument has heaved 5 inches, otherwise it was found to be in good condition.

MONUMENT No. 237. RAILROAD STONE 1.

Is a small monument standing on the west side of the track of the Addison and Northern Pennsylvania (narrow gauge) Railroad. This monument was found to be in good condition in every respect.

MONUMENT No. 238. MILESTONE 98.

Is a small monument standing in a small cleared field, gentle southeasterly slope, 3 feet north of line fence and 158 feet east of woods. It is on line between the property of T. Cummings and C. M. Preston. This monument was found to be in good condition in every respect.

MONUMENT No. 239. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading northerly from Elkland to Addison, and 300 feet south of Summit. It is on line between property of John Cummings and Daniel Tubbs. This monument has its northwest corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 240. MILESTONE 99.

Is a small monument standing on steep westerly slope in cleared field, 30 feet west of west edge of woods and 152 feet east of monu-

ment 241. It is on line between property of A. H. Patterson and D. H. Bates. This monument was found to be in good condition in every respect.

MONUMENT No. 241. HIGHWAY STONE 1.

Is a highway monument standing on the west side of the main road leading northerly from Elkland to Addison, and about 500 feet north of Bridge Crossing brook. It is on line between property of O. H. Patterson and D. H. Bates. This monument was found to be in good condition in every respect.

MONUMENT No. 242. MILESTONE 100 AND TOWN STONE.

Is a small monument standing originally in the bed of a brook, having been carried away on several occasions by the freshets. It was set October 4, 1893, 100 feet east of its original position on the west side of a highway leading northwest from the village of Elkland. An iron bar 6 feet long and 1 1-2 inches in diameter was placed in the original position of milestone 100, driven in the ground about 5 feet. This bar marks the corners of towns of Tuscarora and Woodhull, Steuben county, New York. This milestone was left standing in perfect condition. The highway monument, which stood just to the west, was removed because it stood on road which is now abandoned.

MONUMENT No. 243. MILESTONE 101.

Is a small monument standing in cleared land on south side of an apple orchard on gentle southerly slope, 221.4 feet east of monument No. 244. It is on line between property of Hoyt Tubbs and Mrs. L. D. Mack. This monument has its northwest corner chipped, and has heaved 6 inches; otherwise it was found to be in good condition.

MONUMENT No. 244. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading southerly to Osceola, and about 100 feet southwest from Mack's house. It is on line between property of Hoyt Tubbs and Mrs. L. D. Mack. This monument was found to be in good condition in every respect.

MONUMENT No. 245. HIGHWAY STONE 2.

Is a highway monument on the west side of a highway 25 feet east of creek and 50 feet southwest of James Whitmore's house. It is on the property of James Whitmore. This monument has its edges slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 246. MILESTONE 102 AND TOWN STONE.

Is a small monument with diagonal grooves, standing in a small grove of saplings, about 150 feet east of an open field, 900 feet west

of the summit of a high ridge, and about 10 feet north of thick woods. It marks the corner of Osceola and Durfield in Tioga county, Pa. It is on line between property of Ed. Tubbs and Reter Spears. This monument was found to be in good condition in every respect.

MONUMENT No. 247. HIGHWAY STONE 1.

Is a highway monument standing on east side of a highway on slight westerly slope, about 400 feet east of the residence of J. Baker. It is on line between property of E. Baker and Ed. Tubbs. This monument was found to be in good condition in every respect.

MONUMENT No. 248. MILESTONE 103.

Is a small monument standing in cleared field at the foot of a steep westerly slope, 240 feet east of brook and under line fence. It is on line between the property of Russell and Taylor. This monument has heaved 11 inches, but stands firmly, otherwise it was found to be in good condition.

MONUMENT No. 249. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway which leads northerly along the west bank of Catlin creek and about 300 feet west of creek. It is on line between property of Robert Baker and G. Catlin. This monument has heaved 7 inches, otherwise it was found in good condition.

MONUMENT No. 250. MILESTONE 104.

Is a small monument standing on an easterly slope under line fence and at junction of fence running south 568.8 feet west of monument No. 249. It is on line between property of Baker and Humphreys. This monument has heaved 7 inches; otherwise it was found in good condition.

MONUMENT No. 251. MILESTONE 105.

Is a small monument standing on level ground on the northeast side of a summit of a high, steep ridge in young woods, northwesterly from 8 pine trees. It is on line between the property of J. W. Hammond and G. W. Bowman. This monument was found to be in good condition in every respect.

MONUMENT No. 252. MILESTONE 106.

Is a small monument standing on a steep northeasterly slope in a wilderness of bushes and dead trees, about 125 feet north of woods road and north 51 deg. west, 21.5 feet west of a living hemlock 24 inches in diameter, and about 475 feet west of lower road in a narrow cleared strip about 30 feet wide. It is on line between property of Moonhouse and J. W. Hammond. This monument was found to be in good condition in every respect.

MONUMENT No. 253. SUMMIT STONE.

Is a small monument standing on level ground on top of summit of very high ridge, about 50 feet south of the brow of the summit, overlooking the boundary 20 miles to the east. It is on line between property of Billings and Gardner. This monument was found to be in good condition in every respect.

MONUMENT No. 254. MILESTONE 107.

Is a small monument standing on the south edge of cleared land and north edge of grove of young saplings. It is on line between property of Hurst and Billings. This monument has heaved 7 inches; otherwise it was found to be in good condition.

MONUMENT No. 255. HIGHWAY STONE 1.

Is a highway monument standing at the east end of Boundary line road and south end of road running northerly. It is 16.5 feet east of the corner of the towns of Woodhull and Troupsburg, in Steuben county, New York. It is on line between property of C. M. Woods and Daniel Billings. This monument was found to be in good condition in every respect.

MONUMENT No. 256. HIGHWAY STONE 2.

Is a highway monument standing on northwest side of a road running southwesterly, about 25 feet southwest of the west end of Boundary line road. It is on line between property of Irving Jordan and Henry McFall. This monument was found to be in good condition in every respect.

MONUMENT No. 257. MILESTONE 108.

Is a small monument standing in cleared land on a steep southerly slope and about 800 feet north of road running southwesterly. It is on line between the property of M. B. Jordan and William Lattimore. This monument has heaved 3 inches and has its northwest corner chipped; otherwise it was found in good condition.

MONUMENT No. 258. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from Austinbury to Addison. It is on the property of R. P. Schoonher. This monument was found to be in good condition in every respect.

MONUMENT No. 259. MILESTONE 109.

Is a small monument standing in cleared land at the west edge of the summit of a gravel bluff, north of Troup's creek, 978 feet west of monument No. 258. It is on line between property of H. Murdock and Ed. Murdock. This monument was found to be in good condition in every respect.

MONUMENT No. 260. HIGHWAY STONE 1.

Is a highway monument standing on westerly side of a highway leading from South Troupsburg to Austinburg. It is on line between property of H. B. Murdock and Ed. Murdock. This monument was found to be in good condition in every respect.

MONUMENT No. 261. MILESTONE 110.

Is a small monument standing on the southerly slope between two small knolls' spurs of the main bluff, about 150 feet north of a road running into Pennsylvania. It is on line between property of Edward Murdock and Rhen Cowan. This monument was found to be in good condition in every respect.

MONUMENT No. 262. MILESTONE 111.

Is a small monument standing near the foot of a northwesterly slope of a high ridge bounding a semicircular cove on the south in cleared land. It is on line between property of H. Card and W. C. Seeley. This monument has heaved 4 inches and has its four corners slightly chipped, otherwise it was in good condition.

MONUMENT No. 263. MILESTONE 112.

Is a small monument standing on south edge of open woods on nearly level ground and about 1,000 feet north of highway, paralleling the boundary into Pennsylvania. It is on line between the property of Cynthia Dougherty and T. Hubbard. This monument was found to be in good condition in every respect.

MONUMENT No. 264. MILESTONE 113.

Is a small monument standing on the north edge of thick woods on a little knoll just south of a swampy brook on a southeasterly slope and about 200 feet east of a large, heavy woods in New York. It is on line between property of Hiram Morton and A. J. Myntine. This monument was found to be in good condition in every respect.

MONUMENT No. 265. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading northerly from Brookfield. It is on line between the property of Mrs. E. G. Cady and Mrs. Melvine. This monument has heaved 3 inches; otherwise it was found to be in good condition.

MONUMENT No. 266. MILESTONE 114.

Is a small monument standing near the top of a southeasterly slope, 1,528.5 feet east of monument 267. It is on line between property of Ralph McCullough and Robert Ramsey. This monument was found to be in good condition in every respect.

MONUMENT No. 267. HIGHWAY STONE 1.

Is a highway monument standing on the west side of the west highway leading north from Brookfield postoffice. It is on line between property of Ralph McCullough and Melvin Baker. This monument was fonnd to be in good condition in every respect.

MONUMENT No. 268. MILESTONE 115 AND COUNTY STONE.

Is a small monument with diagonal grooves standing on a steep northwesterly slope on north edge of thick woods, about 100 feet west of the summit of the ridge. It marks the corners of Potter and Tioga counties, Pa. It is on line between properties of C. P. Gill and Ralph McCullough. This monument was found to be in good condition in every respect.

MONUMENT No. 269. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading northerly from North Fork P. O. It is on line between the properties of Daniel Chase and George Lewis. This monument has its four corners chipped; otherwise it was found in good condition.

MONUMENT No. 270. MILESTONE 116.

Is a small monument standing on steep westerly slope about 500 feet east of monument 271. It is on line between property of George A. Carr and William P. Chase. This monument has heaved 6 inches and has its northwest corner slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 271. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading up the valley of the North Fork of the Cowanesque river. It is on property of George A. Carr. This monument was fonnd to be in good condition in every respect.

MONUMENT No. 272. TOWN STONE.

Is a small monument with diagonal grooves marking the corner of the towns of West Union and Troupsburg, Steuben county, New York. It is on line between property of Reuben Stiles, George A. Carr and Nathan Allen. This monument was found to be in good condition in every respect.

MONUMENT No. 273. MILESTONE 117.

Is a small monument standing on southwesterly slope in open woods about 200 feet east of woods road, and about 400 feet east of the corner of a clearing. It is on line between property of A. Saxton and Walter Sathen. This monument was found to be in good condition in every respect.

MONUMENT No. 274. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from North Fork to Rexfield. It is on line between property of A. Saxton and Walter Sathen. This monument has heaved 4 inches and has its southwest corner slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 275. MILESTONE 118.

Is a small monument standing in thick woods on a very steep northerly slope, about two-thirds down the ridge, and about where the ridge slopes east and west, about 400 feet east of a clearing, and about 500 feet south of creek. It is on the property of J. N. Gill. This monument was found to be in good condition in every respect.

MONUMENT No. 276. HIGHWAY STONE 1.

Is a highway monument standing on the east side of an abandoned woods road, about 2,000 feet west of monument No. 275. It is on line between the property of Stetson and R. Smith. This monument has heaved 4 inches; otherwise it was found to be in good condition.

MONUMENT No. 277. HIGHWAY STONE 2.

Is a highway monument standing on west side of a highway leading from Whitesville to Harrison Valley. It is on line between the property of John Riley and R. Smith. This monument was found to be in good condition in every respect.

MONUMENT No. 278. MILESTONE 119.

Is a small monument standing at the south side of a garden among a few scattering maples, and about 70 feet southwest of a dwelling, and 174.75 feet west of monument No. 277. It is on line between property of Yocum and John Reilly. This monument was found to be in good condition in every respect.

MONUMENT No. 279. SECTION STONE.

Is a small monument with diagonal grooves, standing 1,283.7 feet west of monument No. 278, and marking the southeast corner of the Elice tract. It is on line between property of Laranch Yocum and John Riley. This monument was found to be in good condition in every respect.

MONUMENT No. 280. MILESTONE 120.

Is a small monument standing upon a short easterly slope near the foot, about 250 feet west of a small rivulet which crosses the line into New York and on the north side of an open grove of beach and maple. It is on the property of William Warren. This monument has its southeast corner slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 281. MILESTONE 121 AND TOWN STONE.

Is a small monument with diagonal grooves standing on level, cleared land on the summit, west of Rose Brook valley, about 1,500 feet west of the brook. It marks the corner of the towns of Harrison and Bingham in Potter county, Pa. It is on line between property of B. W. Lawrence and O. D. Hubbard. This monument has heaved four inches and had one of its corners slightly chipped; otherwise it was found in good condition.

MONUMENT No. 282. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a highway leading from White's Corners to Wellsville, on line between property of T. M. Lawrence and R. B. Cutler. This monument was found to be in good condition.

MONUMENT No. 283. MILESTONE 122.

Is a small monument standing in cleared land on very slight westerly slope, north side of line fence. It is on the property of T. M. Lawrence. This monument was found to be in good condition in every respect.

MONUMENT No. 284. COUNTY STONE.

Is a small monument with diagonal grooves standing upon level ground a short distance west of a low bluff sloping east, and 699.6 feet west of monument No. 283. It marks the corner of the towns of Steuben and Allegheny counties, New York. It is on the property of P. W. Richards. This monument has its southeast side chipped; otherwise it was found to be in good condition.

MONUMENT No. 285. HIGHWAY STONE 1.

Is a highway monument on west side of a highway leading from Springs Mills into Pennsylvania. It is on the property of William Cobb. This monument has its four corners chipped; otherwise it is in good condition.

MONUMENT No. 286. MILESTONE 123.

Is a small monument standing on a gentle westerly slope in cleared land, 473 feet west of monument No. 285. It is on the property of Wm. Cobb. This monument was found to be in good condition in every respect.

MONUMENT No. 287. MILESTONE 124.

Is a small monument standing in a gap in a stone wall in southeast corner of a narrow clearing upon a high summit southwest from the village of Spring Mills. It is on the property of L. B. Howe. This monument has its northwest corner slightly chipped; otherwise it was found to be in good condition.

MONUMENT No. 288. MILESTONE 125.

Is a small monument standing in a clump of small beaches and cherries on slight southwesterly slope, on south edge of thick woods, about 1,000 feet northeast of Brigg's residence, and 1,500 feet east of Ainsworth creek. It is on the property of the Briggs estate. This monument has its four corners chipped; otherwise it was found in good condition.

MONUMENT No. 289. HIGHWAY STONE 1.

Is a highway monument standing on the west side of Ainsworth Creek road leading from Spring Mills south into Pennsylvania. It is on the property of Anson Richmond. This monument has heaved 7 inches; otherwise it was found to be in good condition.

MONUMENT No. 290. HIGHWAY STONE 2.

Is a highway monument standing on south side of Boundary line road about 500 feet east of milestone 126. It is on the property of Anson Richmond. This monument was found to be in good condition in every respect.

MONUMENT No. 291. MILESTONE 126.

Is a highway monument standing on south side of road running on the line of New York state, about 15 feet north of the northwest corner of Theodore Potter's barn. It is on the property of Theodore Potter. This monument was found to be in good condition in every respect.

MONUMENT No. 292. HIGHWAY STONE 1.

Is a highway monument standing on the north side of Boundary line road, and while the road turns to south. It is on the property of Theodore Potter. This monument was found to be in good condition.

MONUMENT No. 293. MILESTONE 127 AND TOWN STONE.

Is a small monument with diagonal grooves, standing upon a steep northwesterly slope 5 feet west from a line drawn from Warren Kenyon's barn through Harvey Richmond's white house. On the New York side the woods have lately been cut off, and on the Pennsylvania side 10 or 15 years' growth. It is in thick briars. It marks the corners of the towns of Bingham and Genesee, Potter county, Pennsylvania. It is on the property of Ida Paine in New York and no owners in Pennsylvania. This monument was found to be in good condition in every respect.

MONUMENT No. 294. HIGHWAY STONE 1.

Is a highway monument standing on east side of Cryden creek road. It is on the property of G. W. Pierce. This monument has its south and north sides badly chipped; otherwise it was found to be in good condition.

MONUMENT No. 295. MILESTONE 128.

Is a small monument standing on slight southerly slope about 30 feet north of fence, 75 feet west of where the fence turns to the south, 525.7 feet west of monument No. 294, and about 300 feet west of a small brook. It is on the property of G. W. Pierce. This monument has its northwest corner slightly chipped; otherwise it was found to be in good condition in every respect.

MONUMENT No. 296. RAILROAD STONE 1.

Is a highway monument standing on the northeast side of Pine Creek, Wellsville and Condersport Railroad, 1,150 feet west of monument No. 295, and about 50 feet east from the right hand bank of the Genesee river. This monument was set in perfect condition October 24, 1893.

MONUMENT No. 297. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Genesee Forks northerly along the west branch of the Genesee river. It is on line between property of Cobb estate and G. W. Pierce. This monument was found to be in god condition in every respect.

MONUMENT No. 298. HIGHWAY STONE 2.

Is a highway monument standing on the west side of a highway leading from Genesee Forks to Shongo. It is on line between the property of Cobb estate and G. W. Paine. This monument was found to be in good condition in every respect.

MONUMENT No. 299. MILESTONE 129.

Is a small monument standing upon a steep northwesterly slope covered with briars, fallen logs, treetops and burnt timber, about 60 feet above the ground and 1,180.3 feet west of monument 298. It is on the property of D. W. Kane. This monument was found to be in good condition in every respect.

MONUMENT No. 300. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from O'Donnell's Mills to the Irish settlement. It is on line between property of F. R. McHale and Patrick O'Hagen. This monument has heaved 4 inches; otherwise it was found to be in good condition.

MONUMENT No. 301. MILESTONE 130.

Is a small monument standing upon a short northerly slope in cleared land about 150 feet southeast of a brook and 27½ feet west of Bryan McGinnis' southwest corner. It is on line between property of Bryan McGinnis and J. D. McHale. This monument was found to be in good condition in every respect.

MONUMENT No. 302. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway leading to the Irish settlement, 690 feet west of monument No. 301. It is is on line between property of Bryan McGinnis and J. D. McHale. This monument was found to be in good condition in every respect.

MONUMENT No. 303. MILESTONE 131.

Is a small monument standing in cultivated land upon a slight southerly slope, about 2,000 feet north of highway. It is on line between property of McCabe and O'Donnell. This monument has its northwest corner slightly chipped; otherwise it is in good condition.

MONUMENT No. 304. HIGHWAY STONE 1.

Is a highway monument standing on west side of an abandoned wood road leading to the Irish settlement. It is on line between property of James O'Hara and Patrick Hart. This monument has its four corners slightly chipped; otherwise it was found in good condition.

MONUMENT No. 305. HIGHWAY STONE 2.

Is a highway monument standing on southeast side of ore bed, Creek road, about 4 feet above level of road. It is on line between property of James O'Hara and Patrick Hart. This monument has its southwest corner chipped; otherwise it was found in good condition.

MONUMENT No. 306. MILESTONE 132.

Is a small monument standing in a small depression in thick woods about 40 feet south of wood road, 60 feet southeast of broken elm, 35 feet in height, and about 100 feet east of clearing in Pennsylvania. It is on line between property of James O'Hara and Patrick Hart. This monument was found to be in good condition in every respect.

MONUMENT No. 307. HIGHWAY STONE AND TOWN STONE.

Is a highway monument standing on the west side of a highway leading from the Irish settlement on the second summit west of monument 306. This monument marks the corner of the towns of Alma and Willing, in Allegheny county, New York. This monument was found to be in good condition in every respect.

MONUMENT No. 308. TOWN STONE.

Is a small monument with diagonal grooves standing on a westerly slope, about 1,200 feet west of monument No. 307, about 430 feet east of milestone 133. This monument has heaved 2 inches, and marks the corners of the towns of Genesee and Oswago, Potter county, Pa.; otherwise it was found to be in good condition.

MONUMENT No. 309. MILESTONE 133.

Is a small monument standing in cultivated land on a steep westerly slope, 426.6 feet east of monument 310. This monument has its top almost flush with the surface of ground, otherwise it was found to be in good condition.

MONUMENT No. 310. HIGHWAY STONE 1.

Is a highway monument standing on east sideof a road in bottom of valley. This monument has heaved 2 inches; otherwise it was found to be in good conditon.

MONUMENT No. 311. HIGHWAY STONE 2.

Is a highway monument standing on west side of highway leading from Wellsville to Coudersport. It is on line between property of Thomas Hart and Peter Nolan. The monument has its northeast and northwest corners slightly chipped; otherwise it was found in good condition in every respect.

MONUMENT No. 312. MILESTONE 134.

Is a small monument standing upon level top of a knoll between two shallow ravines of Red Water Creek on level cultivated ground about 30 feet east of a small rivulet and 350 feet west of monument 311. It is on line between property of Patrick Marley and Peter Nolan. This monument was found to be in good condition in every respect.

MONUMENT No. 313. MILESTONE 135.

Is a small monument standing in thick open woods on a gentle northwesterly slope at the forks of two wood roads, one nearly northwesterly, the other southwesterly. The timber surrounding the milestone is of hard wood. This monument is on line between property of John Tomany and Mary O'Brien. This monument was found to be in good condition in every respect.

MONUMENT No. 314. MILESTONE 136.

Is a small monument standing on a steep westerly slope, slightly northerly, in thick woods, 950 feet east of a brook in a deep ravine, south 50 degrees west from an 18-inch hemlock and north 15 deg. east 25 feet from a 6-inch beech. It is on line between property of Empire Gas Company and James and John O'Donnell. This monument was found to be in good condition in every respect.

MONUMENT No. 315. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway leading from Alma to Irish settlement, about 75 feet northerly from southeast corner of the residence of M. H. Dutton. It is on the property of M. H. Dutton. This monument has its southeast and northwest corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 316. MILESTONE 136 5-8.

Is a small monument standing on west edge of the original sixth latitude stone, in thick woods on a steep northeasterly slope, about 480 feet west of the south branch of Crandall creek. It is on line between property of Weston Bros. and C. M. Weybull. This monument was erroneously marked by the stone cutter $136\frac{1}{8}$ mile; otherwise it was found in good condition in every respect.

MONUMENT No. 317. MILESTONE 137.

Is a small monument standing in thick open woods on a northeasterly slope, about 50 feet from a foot of a steep pitch, 600 feet east of the summit of the ridge and about 2,000 feet west of monument 316. It is on line between property of Weston Bros. and Wallace Jones. This monument was found to be in good condition.

MONUMENT No. 318. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway leading southerly from along postoffice about 300 feet north of oil derrick, and 15 feet west of wagon track. It is on line between property of James Shields and John Shields. This monument was found to be in good condition in every respect.

MONUMENT No. 319. MILESTONE 138.

Is a small monument standing on a steep westerly slope thickly covered with wind-falls and briars, about 250 feet west of the summit of the ridge, 75 feet east of an abandoned road, and 1,173 feet west of monument 318, in the vicinity of three or four dead hemlocks and just to the north of four or five live hemlocks. It is on line between property of James Shields and John Shields. This monument was found to be in good condition in every respect.

MONUMENT No. 320. TOWN STONE.

Is a small monument marked on top " " , standing at the south side of monument which was set in 1798 to mark the southeast corner of the Holland Land Purchase Company. The north edge of the new monument indicates the line. It stands upon a steep northeasterly slope, about two thirds up the hill, 600 feet west of a deep ravine, and it marks the corner of the towns of Bolivar and Alma, in Allegheny county, New York. It is on line between property of J. J. Elliott and the Mushrow estate. This monument was found to be in good condition in every respect.

MONUMENT No. 321. MILESTONE 139.

Is a small monument standing on steep northerly slope about 500 feet south of where the slope begins to descend very rapidly, about 150 feet north of the summit and directly south of the residence of S. E. Stratton. It stands on the highway leading from Alma postoffice

to South Bolivar, 1,148.6 feet west of monument 320. It is on line between property of George Ball and S. E. Stratton. This monument was found to be in good condition in every respect.

MONUMENT No. 322. TOWN STONE.

Is a small monument with diagonal grooves, and marks the corner of the towns of Oswago and Sharon. It is on steep, northerly slope, about 1,800 feet east of monument 323, south edge of cleared land, about 30 feet north of road following the line, and 75 feet west of Shaggy beech. It is on property of William Mushrow, and James Dotley in Pennsylvania, and J. C. Gladsly in New York. This monument was found to be in good condition in every respect.

MONUMENT No. 323. HIGHWAY STONE 1.

Is a highway monument standing on south side of abandoned woods road. It is on property of Wm. M. Hyatt and P. W. and Ezekiel Griffith. This monument was found to be in good condition in every respect.

MONUMENT No. 324. MILESTONE 140.

Is a small monument standing at foot of a steep northerly slope, about 10 feet above elevation of level of the swamp in thick woods, beech and hemlock small trees in New York within 30 feet of the line and about 800 feet west of monument 323. It is on property of Gilbert Chaple and W. T. Lawes. This monument was found to be in good condition in every respect.

MONUMENT No. 325.

Is a small monument standing on southeast edge of the Howeoye flats at northwest side of a flood water channel of the creek, about 50 feet south of fence on property of Ezekiel Griffith. This monument was found to be in good condition in every respect.

MONUMENT No. 326. MILESTONE 141.

Is a small monument standing in cleared land 2 feet north of line fence and 1,150 feet east of monument 320 and about 200 feet west of land. It is on line between property of George Yeakel and Croger's estate. This monument was found to be in good condition in every respect.

MONUMENT No. 327. HIGHWAY STONE.

Is a highway monument standing on southeast side of State Line road leading from South Bolivar to Shingle House. It is on property of Nathan Hayward and A. F. Smith. This monument has its southwest corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 328. MILESTONE 142.

Is a highway monument standing on west side of road leading from Goldsmith's corner. It is on line between property of H. Berdic and Mrs. Blakely. This monument has its southwest corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 329. HIGHWAY STONE 1.

Is a highway monument standing on east side of road which is little used, under board fence which is about 15 feet north of brook. It is on property of Mrs. Blakely. This monument was found to be in good condition in every respect.

MONUMENT No. 330. MILESTONE 143.

Is a small monument standing in thick underbrush on very steep southerly slope, 150 feet south of top of slope and about 300 feet east of Summit. East Sharon school house bears about south 50 deg. east from the stone. It is on property of Augustus Wheeler. This monument was found to be in good condition in every respect.

MONUMENT No. 331. HIGHWAY STONE 1.

Is a highway monument standing on east side of road leading from East Sharon to Bolivar, on property of Charles Burback. This monument has its southwest corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 332. MILESTONE 144.

Is a small monument standing on north side of short part of woods following the boundary line about 370 feet west of where the run crosses the line. It is on property of M. A. Nichols. This monument was found to be in good condition in every respect.

MONUMENT No. 333. HIGHWAY STONE.

Is a highway monument standing on east side of the main road leading from Bolivar to Shingle House, about 75 feet south of Bolivar M. E. church. It is on line between property of M. A. Nichols and George Barnes, This monument has all four corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 334. MILESTONE 145.

Is a small monument standing on westerly slope 270 feet east of monument 335 in stone wall. It is on line between property of A. Sullivan and M. Vanlowe, of Pennsylvania, and George Sherwood of New York. This monument was found to be in good condition in every respect.

MONUMENT No. 335. HIGHWAY STONE 1.

Is a highway monument standing on east side of road leading from Genesee to Shingle House, about 100 feet southeast of George Sher-

wood's house. It is on line between property of George Sherwood and M. Vanlowe. This monument was found to be in good condition in every respect.

MONUMENT No. 336. COUNTY STONE.

Is a small monument with diagonal grooves, and marks the corner of Potter and McKean counties, Pa., on steep westerly slope in thick woods, 25 feet north of brow of hill, 15 feet north of large stump, and 40 feet east of several one-foot hemlocks. It is on property of George Sherwood. This monument was found to be in good condition in every respect.

MONUMENT No. 337. MILESTONE 146.

Is a small monument in thick woods on steep westerly slope, 575 feet east of a brook in a deep ravine. It is on line between property of George Case and John Sherwood. This monument was found to be in good condition in every respect.

MONUMENT No. 338. MILESTONE 147.

Is a small monument standing about 100 feet west of a small brook running southerly, and 10 feet south of a huge pine stump, and about 100 feet south of woods road which nearly parallels the line. It is on line between property of L. J. Carrier and C. G. Chandler. This monument was found to be in good condition in every respect.

MONUMENT No. 339. HIGHWAY STONE 1.

Is a highway monument standing on west side of road leading from Myrtle to Little Genesee. It is on line between property of George Case and C. G. Chandler. This monument was found to be in good condition in every respect.

MONUMENT No. 340. MILESTONE 148.

Is a small monument standing in cultivated land 60 feet south of old B. E. and C R. R., defunct, and 150 feet southeast of large clump of woods, 60 feet south of fence running east and west on property of B. E. and C. R. R. Co. This monument was found to have all corners slightly chipped; otherwise it was in good condition.

MONUMENT No. 341. RAILROAD STONE 1.

Is a small monument standing about 20 feet north of B. E. and C. R. R., about 5 feet south of lumber pile, and 800 feet east of monument 342. It is on property of B. E. and C. R. R. Co. This monument has its four corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 342. HIGHWAY STONE 1.

Is a highway monument standing on west side of road leading south from Main street, Ceres, about 100 feet southeast of the New York

Central and Western Railroad station in village of Ceres. This monument is on property of B. E. and C. R. R. Co., and was found to be in good condition in every respect.

MONUMENT No. 343. HIGHWAY STONE 2.

Is a highway monument standing on south side of Main street, Ceres, at a point where Main street bends into New York easterly, and southeast corner of a cemetery in Pennsylvania. It is on property of Charles Bell. This monument was found to be in good condition in every respect.

MONUMENT No. 344. MILESTONE 149.

Is a highway monument standing on south side of Main street, Ceres, immediately south of Empire school building in Genesee, New York, and 100 feet west of cemetery. It is on property of Charles Bell. This monument was found to be in god condition in every respect.

MONUMENT No. 345. HIGHWAY STONE 1.

Is a highway monument standing on south side of Main street, Ceres, where it turns north and westerly into New York. It is on property of Charles Bell. This monument was found to be in good condition in every respect.

MONUMENT No. 346. RAILROAD STONE 1.

Is a small monument standing on south side of New York Central and Western Railroad track, midway between the tracks of the two railroads. It is on property of B. E. & C. R. R. Co. This monument was found to be in good condition in every respect.

MONUMENT No. 347. MILESTONE 150.

Is a small monument standing in a low, swamp ground, about 540 feet due south of V. P. Carter's barn, north edge of large timber; small growth of saplings to the north, 275 feet east of Daniel Grandall's land. It is on the property of V. P. Canter and William King. This monument has heaved two inches; otherwise it was found to be in good condition.

MONUMENT No. 348. RIVER STONE 1.

Is a small monument standing on cultivated land, 30 feet from the left hand bank of river, 5 feet south of barbed wire fence. It is on line between property of Myron Walters and Mrs. Koons. This monument was found to be in good condition in every respect.

MONUMENT No. 349. COUNTY STONE 1.

Is a small monument with diagonal grooves, and marks the corners of Allegheny and Cattaraugus counties in New York, in cleared land, five feet south of line fence. It is on the line between property of

Mrs. Maxsen and Miner Walton. This monument has heaved 3 inches; otherwise it is found in good condition.

MONUMENT No. 350. MILESTONE 151.

Is a small monument standing on south bank of the Osawayo where it last leaves Pennsylvania, about 1,000 feet west of monument 349. It is on line between property of Mrs. Maxsen and William Hornblower. This monument has its northeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 351. HIGHWAY STONE 1.

Is a highway monument standing on east side of a highway leading from Portville to Ceres. It is on line between property of Barber and Remington. This monument has it southeast, southwest and northwest corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 352. MILESTONE 152.

Is a small monument standing in scattered open woods upon a steep northerly slope at the easterly side of a cove and about 850 feet east of the summit of a high ridge between the valleys of the Osawayo and the Allegany. It is on line between property of Mrs. H. Kahoe and E. Shiver. This monument has heaved 5 inches; otherwise it was found to be in good condition.

MONUMENT No. 353. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway leading from Portville to Bullis Mills. It is on line between property of Mrs. Kahoe and John Archibald. This monument was found to be in good condition in every respect.

MONUMENT No. 354. RAILROAD STONE 1.

Is a small monument situated in cleared land about 150 feet west of monument 353 and about 4 feet east of where the track of the defunct B. E. & C. R. R. originally stood. This monument has heaved six inches and has all its corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 355. RAILROAD STONE 2.

Is a small monument standing about 400 feet west of monument 354 on a field of the W. N. Y. & P. R. R. This monument has its southeast and southwest corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 356. HIGHWAY STONE 2.

Is a highway monument standing on east side of a highway leading from Bullis Mills to Mill Grove. It is on line between property of Stetson and Smith. This monument was found to be in good condition in every respect.

MONUMENT No. 357. MILESTONE 153.

Is a small monument standing in a narrow dyke between the Allegany river and slough flood water channel, 36 feet west of a dead hemlock standing on edge of left bank of river. It is on line between property of Stetson and Smith. This monument has its northeast corner chipped; otherwise it was found in good condition.

MONUMENT No. 358. HIGHWAY STONE 1.

Is a highway monument standing on west side of a highway leading from Portville to Eldred. It is on line between property of E. P. Vaugh and the Lennon estate. This monument has its northeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 359. MILESTONE 154.

Is a small monument standing in thick woods under a large fallen hemlock, which is marked with three blazes, about 50 feet west of the east branch of wood road, 28 feet east of brook in ravine, and about 75 feet north of where it is joined by a brook from the northeast. It is on line between property of Mrs. Burnham and Hostetter estate. This monument was found to be in good condition in every respect.

MONUMENT No. 360. TOWN STONE 1.

Is a small monument with diagonal grooves and stands upon a gentle easterly slope on north edge of partially cleared land along side of a mass of fallen logs, about 300 feet west of Loops Creek and 1,196.6 feet east of monument No. 361. This monument marks the corner of the towns of Portville and Olean in Cattaraugus county, New York. It is on line between property of Dusenberry and Wheeler. This monument has heaved 5 inches; otherwise it was in good condition.

MONUMENT No. 361. MILESTONE 155.

Is a small monument standing in thick open woods on a steep easterly slope, about 600 feet east of the summit of the ridge west of Loops Creek valley. The trees in the vicinity of the monument are chiefly large beech. It is on line between property of Dusenberry and Wheeler. This monument was found to be in good condition in every respect.

MONUMENT No. 362. MILESTONE 156.

Is a small monument standing in young growth of trees on steep westerly slope in a wet spot about 700 feet east of Meek's creek and 845 feet east of monument 363. It is on line between property of Wheeler and South Pennsylvania Oil Company. This monument was found to be in good condition in every respect.

MONUMENT No. 363. HIGHWAY STONE 1.

Is a highway monument standing on east side of a highway leading from Benton's Mills to Haymaker. It is on line between property of Wheeler and South Pennsylvania Oil Company. This monument has all its corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 364. MILESTONE 157.

Is a small monument standing on a narrow terrace in thick open woods, about 175 feet northeast of the first oil derrick on the north side of the road nearest the summit, and about 225 feet east of the summit of the high ridge between Meeks and Indian creek, on general slope, quite steep northeasterly on property of South Pennsylvania Oil Company. This monument was found to be in good condition in every respect.

MONUMENT No. 365. HIGHWAY STONE 1.

Is a highway monument standing on east side of a highway along the east side of the east branch of Indian creek, on line between property of A. W. Dodd and W. Mushrow. This monument has its south side chipped; otherwise it was found to be in good condition.

MONUMENT No. 366. MILESTONE 158.

Is a small monument standing in open woods on a low bluff. Steep southeasterly slope to a brook in ravine flowing east northeast, about 60 feet distant, about 1,200 feet west of the north branch of Indian creek and 1,593 feet west of monument 365. It is on line between property of A. W. Dodds and A. W. Mushrow. This monument was found to be in good condition in every respect.

MONUMENT No. 367. HIGHWAY STONE 1.

Is a highway monument standing on east side of a road leading north from the hamlet of Wigwam. It is on property of Miles Loup. This monument has its southeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 368. TOWN CORNER.

Is a small monument with diagonal grooves standing near top of a bluff on a steep easterly slope south of thick woods, 222 feet west of monument No. 367. It marks the corner of the towns of Otto and Eldred. It is on line between property of H. Bulot and F. Newman. This monument was found to be in good condition in every respect.

MONUMENT No. 369. MILESTONE 159.

Is a small monument standing in thick open woods on a gentle southerly slope in a clump of 10-inch pines and about 700 feet north of road, and 1,752.2 feet east of monument 370. It is on line between property of D. E. Quinlan and Lewis Loop's estate. This monument has heaved 4 inches; otherwise it was found in good condition.

MONUMENT No. 370. HIGHWAY STONE 1.

Is a highway monument standing on southwesterly side of highway leading from Wigwam to Knapp's Creek station on line between property of D. E. Quinlan and Lewis Loup's estate. This monument has its four corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 371. MILESTONE 160.

Is a small monument standing in thick woods upon a steep northeasterly slope, about 300 feet directly south of Derrick No. 9 of the Bradford Oil Company, 700 feet east of an immense rock near summit of the ridge, 1,330 feet east of monument 372. It is on property of South Pennsylvania Oil Company. This monument has its southwest corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 372. HIGHWAY STONE 1.

Is a highway monument standing on northeasterly side of a highway leading from Knapp's Creek station to Dukes Centre, on the summit of the ridge southwest of Indian creek. It is on property of South Pennsylvania Oil Company. This monument has all corners chipped and has heaved 5 inches; otherwise it was found in good condition.

MONUMENT No. 373. HIGHWAY STONE 2.

Is a highway monument standing on east side of a road leading from Knapp's Creek station to Moretown. It is on property of Angel Oil Company and the Barse tract. This monument has its four corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 374. MILESTONE 161.

Is a small monument standing upon a steep westerly slope cleared for oil purposes and partially buried over, surrounded by bushes, stumps and logs, 93.85 feet west of monument No. 373, and about 275 feet east of the middle branch of Knapp's creek. It is on property of Angel Oil Company and Barse estate. This monument was found to be in good condition in every respect.

MONUMENT No. 375. HIGHWAY STONE AND RAILROAD STONE.

Is a highway monument standing on west side of highway leading from Duke's Centre to State Line station, and on the east side of the track of the W. N. Y. and P. R. R. (narrow gauge) and about 100 feet south from railroad depot. This monument has its northeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 376. HIGHWAY STONE 2.

Is a highway monument standing on east side of main road leading from Bradford to Olean, and 200 feet south of where road from State

Line station intersects main road. It is on property of Mrs. M. Smiley and William Meachlin. This monument was found to be in good condition in every respect.

MONUMENT No. 377. MILESTONE 162.

Is a small monument standing in woods and bushes on a gentle southerly slope, about 125 feet northeast from derrick No. 5 of the South Pennsylvania Oil Company, and 490 feet west of Pembroke run. It is on line between property of Mrs. N. E. Smiley and South Pennsylvania Oil Company. This monument was found to be in good condition in every respect.

MONUMENT No. 378. TOWN STONE.

Is a small monument with diagonal grooves standing in thick young woods on a steep southeasterly slope, about 400 feet southeasterly from derrick No. 7 on the hill of the Angel Oil Company, and 2,354 feet west of monument 377. It marks the corner of the towns of Otto and Bradford, in McKean county, Pennsylvania. It is on line between property of Angel Oil Company and E. T. Johnson. This monument was found to be in good condition in every respect.

MONUMENT No. 379. MILESTONE 163.

Is a small monument standing in thick young woods on level ground southeast side of the summit of a ridge, north of the head of Chipmunk run, about 150 feet south of derrick No. 3 of J. T. Jones, and about 300 feet southwest of the residence of M. P. Weaver. It is on line between property of J. T. Jones and E. T. Johnson. This monument was found to be in good condition in every respect.

MONUMENT No. 380. MILESTONE 164.

Is a small monument situated in open space in woods about 125 feet north of derrick No. 90 of W. O. Co., which is on south side and very close to Harrisburg run in the middle of a large cove looking directly north about one mile to a summit of a cove. It is on line between property of Thomas Curwin and Franchott Bros. This monument was found to be in good condition in every respect.

MONUMENT No. 381. MILESTONE 165.

Is a small monument standing in thick open wood in a small terrace, steep westerly slope, 888 feet west of the southeast corner of Carrollton, Cattaraugus county, New York, which is on the west side of the summit of high ridge on State Line run. It is on property of Enterprise Transit Oil Company. This monument was found to be in good condition in every respect.

MONUMENT No. 382. MILESTONE 166.

Is a highway monument standing in a narrow opening cut for a skiduary in thick woods 166 feet east of a small brook near the northeast side of State Line run road, which is now abandoned, on property of Enterprise Transit Oil Company. This monument was found to be in good condition in every respect.

MONUMENT No. 383. HIGHWAY STONE 1.

Is a highway monument standing on north side of deserted State Line run road, 12 feet south of line fence, about 700 feet east of monument 384. This monument has all corners badly chipped; otherwise it was found in good condition.

MONUMENT No. 384. HIGHWAY STONE 2.

Is a highway monument standing on west side of road in valley of Tuna creek, leading from Limestone into Bradford. This monument has its southeast and southwest corners chipped, and has heaved four inches; otherwise it was found in good condition.

MONUMENT No. 385. RAILROAD STONE 1.

Is a small monument standing on east side of track of B. R. & P. R. R. This monument has its four corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 386. RAILROAD STONE 2.

Is a small monument standing on east side of track of the Bradford Branch of the New York, Lake Erie and Western Railroad. This monument has its four corners chipped and has heaved 5 inches; otherwise it was found to be in good condition.

MONUMENT No. 387. MILESTONE 167.

Is a small monument standing upon Tuna flats on the southeast side of a narrow slough, about 200 feet east of Tuna Unguant creek, and 139 feet west of monument No. 386. This monument was found to be in good condition in every respect.

MONUMENT No. 388. MILESTONE 167.1.

Is a small monument standing upon Tuna flats at the east edge of the seventh latitude stone on north side of line fence, and about 250 feet west of Tuna Unguant creek. This monument was found to be in good condition in every respect.

MONUMENT No. 389. HIGHWAY STONE 1.

Is a highway monument standing on west side of road at the west side of Valley of Tuna creek. It is on line between property of William Beasley and Phoebe Carpenter. This monument was found to be in good condition in every respect.

MONUMENT No. 390. MILESTONE 168.

Is a small monument standing upon a little knoll in thick young woods on steep northeasterly slope, west side, at the head of a cove in the mountain, about 200 feet west of a brook and about 525 feet east of the narrow summit of the high ridge on west side of Tuna valley. It is on line between property of William Beadsley and Freedley. This monument was found to be in good condition in every respect.

MONUMENT No. 391. MILESTONE 169.

Is a small monument standing in thick open woods upon a gentle westerly slope, on northeast side of a valley opening out upon Bolivar brook, about 865 feet west of the west side of the summit of the main ridge on line between properties of Bingham estate and the Bradford Land Company. This monument has heaved two inches; otherwise it was found in good condition in every respect.

MONUMENT No. 392. HIGHWAY STONE 1.

Is a highway monument standing on the east side of an abandoned woods road which follows the valley of Bolivar brook and on line between properties of Bingham estate and the Bradford Land Company. This monument has its northwest corner chipped; otherwise it was found in good condition in every respect.

MONUMENT No. 393. MILESTONE 170.

Is a small monument standing on partially cleared space in thick woods upon a very steep easterly slope, about 600 feet west of Bolivar brook and 613.2 feet west of monument 392. On line between properties of Limestone Tannery Company and the Bradford Land Company, and was found to be in good condition in every respect.

MONUMENT No. 394. HOLLAND LAND CO.'S PURCHASE STONE.

Is a small monument with diagonal grooves, and marks the corner of sections 54 and 66 of township range 6 of Holland Land Company's purchase, standing in thick open woods on a gentle easterly slope, 485 feet west of monument 393. It is on line between the properties of the Limestone Tannery Company and the Bradford Land Company, and was found in good condition in every respect.

MONUMENT No. 395. HOLLAND LAND CO.'S PURCHASE STONE.

Is a small monument with diagonal grooves set at the south end of the western transit meridian of the Holland Land Company's purchase, standing in thick open woods on nearly level ground, 5 feet west of large wind-fall and is on line between the properties of the Limestone Tannery Company and the Bradford Land Company. This monument was found in good condition in every respect.

MONUMENT No. 396. MILESTONE 171.

Is a small monument standing in thick open woods (beech and maple) on level ground 584 feet west of monumeut 395. It is on property of the Bradford Land Company. This mouument was found in good condition in every respect.

MONUMENT No. 397. MILESTONE 172.

Is a small monument stauding on gentle southeasterly slope ou east side of woods road, about 50 feet northwest of brow of steeper slope, southeast to Beuuett brook, about 800 feet southwest of Dougherty's house. It is on property of Bradford Land Company. This monument was fouud to be in good condition iu every respect.

MONUMENT No. 398. HIGHWAY STONE 1.

Is a highway monumeut stauding on east side of old Bradford Trail, now abandoned, 800 feet west of monument No. 397. It is on property of Bradford Land Company. This monument has its southeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 399. HOLLAND LAND CO. PURCHASE STONE.

Is a small monument with diagonal grooves and marks the southwest corner of the Willink strip in thick woods surrounded by briars, fallen logs and upturned roots, 60 feet south of old Bradford trail, and 1,539 feet west of monument 397. It is on property of E. R. Schoonmaker and Bradford Trail Company. This monument was found to be in good coudition in every respect.

MONUMENT No. 400. MILESTONE 173.

Is a small monumeut standing in thick hemlock woods on level ground southwest of a gentle slope and northwest to Red House creek, and about 2,000 feet southwest of a abandoned lumber camp on Red House creek, kuown as Cass Duell's old shanties. It is on property of Bradford Land Company. This monument was found to be in good condition in every respect.

MONUMENT No. 401. HOLLAND LAND CO. PURCHASE 3 M. POST.

Is a small monument with diagonal grooves standing upon steep northerly slope surrounded by rocks and fallen logs, 10 feet west of a small spring brook. The letters "N. Y." and "Pa." have been reversed, as it set upon the south line of township 1, range 7, of the Holland Land Compauy purchase. It is on line between property of Bradford Land Company and Stone's estate. This monument was found to be in good coudition in every respect.

MONUMENT No. 402. MILESTONE 174.

Is a small monument standing on a northerly slope buried at the last end of a large windfall 275 feet west of where the Allegany and

Kinzua Railroad crosses the line 1,050 feet west of monument 401. This monument is on property of Bradford Land Company, and has heaved 4 inches; otherwise it was found to be in good condition.

MONUMENT No. 403. MILESTONE 175.

Is a small monument standing on a southerly slope 500 feet northeast of Yager's old saw mill and about 300 feet north of Quaker run, and 12 feet south of road which parallels the line running easterly. It is on property of Bradford Land Company. This monument was found to be in good condition in every respect.

MONUMENT No. 404. HIGHWAY STONE 1.

Is a highway monument standing on west side of an abandoned woods road about 500 feet west of Yager's old mill. It is on line between property of Bradford Land Company and ..... This monument was found to be in good condition in every respect.

MONUMENT No. 405. MILESTONE 176.

Is a small monument standing on a very steep southerly slope in thick woods, 300 feet south of the summit of the ridge, and about 1,300 feet west of brow of slope on State line. It is on line between property of Bradford Land Company and .....This monument was found to be in good condition in every respect.

MONUMENT No. 406. HIGHLAND LAND CO. PURCHASE 5 1-2 M. P.

Is a small monument with diagonal grooves standing in thick, bushy woods on narrow terrace of steep southwesterly slope, about 200 feet from foot of slope, 1,411 feet west of monument No. 405. It is on property of Bradford Land Company. This monument was found to be in good condition in every respect.

MONUMENT No. 407. HIGHWAY STONE 1.

Is a highway monument standing on west side of road on south branch of Quaker run. It is on property of Bradford Land Company. This monument has all corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 408. MILESTONE 177.

Is a small monument standing in thick open woods on slight easterly slope, 455.6 feet west of monument No. 407, and 125 feet west of a clearing on Pennsylvania side. It is on property of Bradford Land Company. This monument was found to be in good condition in every respect.

MONUMENT No. 409. TOWN STONE.

Is a small monument with diagonal grooves standing in open woods, steep, short northerly slope, south side of a narrow ravine, 10

feet east of a brook running westerly 600 feet west of the summit of the ridge west of 408, 2,753 feet east of 410. It is on property of Bradford Land Company. This monument was found to be in good condition in every respect.

MONUMENT No. 410. MILESTONE 178.

Is a small monument standing on north edge of burnt slashing, covered with fallen firs and bushes, about 150 feet south of thick open woods on a steep northeasterly slope 330 feet east of the summit of the ridge, east of valley of Wolf Run, 167 feet west of large maple which stands on brow of very steep north easterly slope, and 1,170 feet west of west branch of Quaker Run. This monument was found to be in good condition in every respect.

MONUMENT No. 411. MILESTONE 179.

Is a small monument standing in thick open woods on level ground on north bank of shallow ravine, about 225 feet east of Wolf Run, and 968 feet east of highway monument on southwest side of Wolf Run road. It is on property of Bradford Land Company. This monument has its southeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 412. HIGHWAY STONE 1.

Is a highway monument standing on southwest side of road leading from Wolf run to Willow creek. It is on property of Bradford Land Company and ..... This monument was found in good condition in every respect.

MONUMENT No. 413. MILESTONE 180.

Is a small monument standing in thick open woods on steep northwesterly slope, 66 feet east of a brook in a deep ravine. It is on property of Bradford Land Company. This monument has heaved 2 inches; otherwise it was found to be in good condition.

MONUMENT No. 414. MILESTONE 181.

Is a small monument standing on the south side of a large oak log in thick open woods on the southwesterly slope about 200 feet north from the northwest corner of a clearing which has now grown up to bushes, overlooking the valley of a branch of Willow creek, 1,000 feet east of the brow of a steep northwesterly slope. It is on line between property of Bradford Land Company and Bingham Estate. This monument was found to be in good condition in every respect.

MONUMENT No. 415. MILESTONE 182.

Is a small monument standing in a small opening in thin, bushy woods on a steep southerly slope north of Willow Creek valley, 1,742

feet east of a brook in a deep ravine and about 300 feet north of the summit of a ridge. It is on line between property of Bradford Land Company and Bingham estate. This monument was found to be in good condition.

MONUMENT No. 416. COUNTY STONE.

Is a small monument with diagonal grooves standing in thick young woods on a steep southwesterly slope, 297 feet west of monument 415. This monument marks the corners of the towns of Warren and McKean, Pennsylvania. It is on property of Bradford Land Company. This monument was found to be in good condition.

MONUMENT No. 417. MILESTONE 183.

Is a small monument standing in thick open woods on gentle southerly slope, about 40 feet west of line fence, about 800 feet east of the wedge of woods and between the two branches of Willow creek, one 800 feet east and the other 400 feet west. It is on line between property of John Wayne and Perry Root. This monument was found to be in good condition in every respect.

MONUMENT No. 418. HIGHWAY STONE 1.

Is a highway monument standing on east side of a road leading northerly from Corrydon on line between the properties of John Warren and Perry Root. The northwest corner of this monumentt was found to be chipped; otherwise it was found in good condition in every respect.

MONUMENT No. 419. ALLEGHENY INDIAN IRON MONUMENT.

Is an iron monument in the middle of the road leading from Corrydon to Wolf Run and stands out of ground about 6 inches, and 15 feet west of monument 418, and is six and a half inches south of line and set by U. S. commission in 1878 to mark the southeast corner of the Allegheny Indian Reservation; on line between John Warren and Perry Root. This monument is in good condition in every respect.

MONUMENT No. 420. RAILROAD STONE 1.

A small monument standing on the east side and 15 feet distant therefrom of the W. N. Y. & P. R. R. Co.'s track centre. This monument has its south side badly chipped; otherwise was found in good condition in every respect.

MONUMENT No. 421. MILESTONE 184.

A small monument standing in cleared cultivated land under stump fence and about 50 feet east from the west end of stump fence and about 600 feet east of monument 422. It is on line between properties of Allegheny Indian Reservation and Daniel Root. This monument was found to be in good condition in every respect.

MONUMENT No. 422. HIGHWAY STONE 1.

It is a highway monument on the east side of a river road leading from Carrydon to Indian Reservation, on line between the properties of the Allegheny Indian Reservation and Daniel Root. This monument was found to be in good condition in every respect.

MONUMENT No. 423. HIGHWAY STONE 2.

It is a highway monument on the west side of the West river road on Allegheny river on line between the properties of the Allegheny Indian Reservation and J. K. Webb. This monument was found in good condition in every respect.

MONUMENT No. 424. MILESTONE 185.

Is a small monument standing in a small cleared spot, in thick, bushy pasture on a northeasterly slope south of thick woods, 290 feet west of a small brook, in a shallow ravine, and just south of a very steep northerly slope, nearly 500 feet south of State Line run, on line between the property of Allegheny Indian Reservation and J. K. Webb. This monument was found to be in good condition in every respect.

MONUMENT No. 425. ALLEGHENY INDIAN IRON MONUMENT.

Is an iron monument about 18 inches high standing up a gentle easterly slope in a thick growth of briars, south side of a large hemlock stump. It was temporarily placed in 1878 to mark the southwest corner of the Indian Reservation. It is on line between property of Indian Reservation and J. K. Webb. This monument was found in good condition in every respect.

MONUMENT No. 426. HIGHWAY STONE 1.

Is a highway monument standing outside of monument 425, just south of the brow of steep northerly slope towards State Line run, about 500 feet south of the run. It is on line between property of the Indian Reservation and J. K. Webb. This monument was found to be in good condition in every respect.

MONUMENT No. 427. HIGHWAY STONE 2.

Is a highway monument standing on the west side of a highway leading southwesterly from State Line road. It is on line between property of Sylvester Birch and Munsen Bliss. This monument has all corners chipped; otherwise it was found in good condition.

MONUMENT No. 428. MILESTONE 186.

Is a highway monument standing on west side of State Line Run road 35 feet north of creek and at point where State Line Run road runs southerly into Pennsylvania in cleared land, under fence, which

runs north and south. It is on line between property of Sylvester Birch and Munsen Bliss. This monument was found to be in good condition.

MONUMENT No. 429. MILESTONE 187.

It is a small monument standing on very steep southerly slope in woods grown up to bushes about 100 feet east of woods road running northwest, 850 feet east of monument No. 430, and 500 feet north of State Line Run. It is on line between property of Hiram Scott and Thomas Quamtanto. This monument has heaved 3 inches; otherwise it was found to be in good condition.

MONUMENT No. 430. HIGHWAY STONE 1.

Is a highway monument standing on the east side of woods road, now abondoned, about 300 feet north end of State Line Run. It is on the property of Hiram Scott. This monument was found to be in good condition in every respect.

MONUMENT No. 431. HIGHWAY STONE 2.

It is a highway monument standing in shallow ravine, 1,014 feet east of 432, and marks the corner of sections 34 and 49 of township 1, range 9, of the Holland Land Company's purchase. It is on line between the properties of Voley Vickery and the Quain estate, and was found in good condition in every respect.

MONUMENT No. 432. MILESTONE 188. HIGHWAY MONUMENT.

It is a highway monument standing in thick woods on a gentle southeasterly slope, surrounded by fragments of rock, about 50 feet north of an abandoned woods road and 450 feet east of State Line run below an old bridge. It is on line between the property of E. D. March and the Quain estate, and has all its corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 433. TOWN STONE.

It is a small monument with diagonal grooves standing on slight easterly slope on east side of summit of Robbins' Hill, in open field 292.3 feet east of monument 434. It marks the corner of the townships of Elk and Pine Grove, in Warren county, Pa. It is on the property of Andrew Anderson. This monument was found to be in good condition in every respect.

MONUMENT No. 434. HIGHWAY STONE 1.

It is a highway monument standing on the east side of Quaker Hill road leading from South Valley to Ackerly, on line between property of William Robinson and L. Burke. This monument was found in good condition in every respect.

8-7-93.

MONUMENT No. 435. MILESTONE 189.

It is a small monument standing on westerly slope in cleared land about 5 feet northwest of large, burnt stump and 90 feet west of woods road, and 700 feet west of monnment 434, and about 100 feet west of the sontheast corner of clearing on the property of Sqnire L. Burke. This monnment was found to be in good condition in every respect.

MONUMENT No. 436. COUNTY STONE.

Is a highway monument standing in cleared land on sontherly slope about 5 feet north of Rail (county) line fence and marks the corners of the counties of Cattaraugus and Chautanqua, New York. It is on line between the property of F. Burke and William Robins and has heaved five inches and was fonnd otherwise in good condition.

MONUMENT No. 437. HIGHWAY STONE 1.

It is a highway monnment standing on the west side of a highway leading from a county line of Cattaraugus and Chantauqna to Ackerly. It is on line between property of Davis and Bullock. This monument has all corners chipped; otherwise it was found to be in good condition.

MONUMENT No. 438. MILESTONE 190.

Is a small monument standing on nearly level ground in a small narrow gulley covered with briars and fallen trees about 5 feet sonth of north branch of brook which flows westerly, partially cleared land, up to line, north 1 deg. 30 min. east about $\frac{1}{4}$ of a mile from the residence of W. F. Atkins. It is on line between property of W. Wilson and W. F. Atkins. This monument has heaved 5 inches; otherwise it was found to be in good condition.

MONUMENT No. 439. HIGHWAY STONE 1.

Is a highway monument standing on about 15 feet east of the road leading from Freesbnrg to Atley station, and about 30 feet south of Riverside Creamery. It marks the corner of sections 9 and 17, in township 1, range 10, of the Holland Land Company's purchase. It is on line between property of William Colliton, C. Cole, G. G. Anderson and E. E. Herick. This monument was found to be in good condition.

MONUMENT No. 440. MILESTONE 191.

Is a small monument standing in cleared land north of a piece of woods upon a southeasterly slope under line fence, 1,635 feet west of the monument No. 439. It on line between property of William Colliton and G. G. Anderson. This monument was found to be in good condition in every respect.

MONUMENT No. 441. 4 MILE POST. H. L. CO. PURCHASE.

Is a small monument standing upon a steep bluff on the west side of a deep ravine, 100 feet west of brook on south side of line fence, and 1,107 feet west of monument 440. It is on property of John Lundburg. This monument has heaved five inches, otherwise it was found in good condition.

MONUMENT No. 442. MILESTONE 192.

Is a small monument standing in an open chestnut grove, south side of thick woods, on a westerly slope south east side of small ravine, and 395 feet west of the summit of a ridge, west side of a deep ravine. It is on line between property of A. H. Lake and Harrison Fenton. This monument was found to be in good condition in every respyect.

MONUMENT No. 443. HIGHWAY STONE 1.

Is a highway monument on the east side of road, leading from Pine Grove to Fentonville and on line between the property of Richardson and Mrs. Noyce, and was found to be in good condition in every respect.

MONUMENT No 444. MILESTONE 193.

It is a small monument standing on a narrow gravel ridge, between two small swamps on Coneqango Flats, on north side of line stump fence; and about 150 feet east from west end of fence. It is on the property of Woodruff Allen, and was found to be in good condition in every respect.

MONUMENT No. 445. RAILROAD STONE 1.

It is a small monument standing on the east side of the Dunkirk, Allegany Valley and Pittsburg Railroad. It was found to be in good condition in every respect.

MONUMENT No. 446. RIVER STONE 1.

It is a small monument standing on the left hand bank of the Conewango fiver in cleared land under board fence and 30 feet east of the bank of the river, on the property of Martha Allen; and was found to be nearly flushed with the top of the ground, and otherwise was in good condition in every respect.

MONUMENT No. 447. RIVER STONE 2 AND HIGHWAY STONE 1.

It is a highway monument standing on the west bank of the Conewango river, on the north side of an abandoned road, and about 40 feet west of the river; on line between the property of H. Cox and Charles Durand, and was found to be in good condition in every respect.

MONUMENT No. 448. MILESTONE 194.

It is a highway monument standing on the west side of a road leading from Jamestown, New York, to Warren, Pennsylvania, about

3,575 feet west of Conewango river, and 125 feet southerly from the residence of Henry Cox, and was found to be on line between properties of Henry Cox and G. Townsend, and to be in good condition in every respect. A large sandstone monument set by A. T. Pendergast in 1871, and stands at the west edge of the milestone 194.

MONUMENT No. 449. MILESTONE 195 AND TOWN STONE.

Is a small monument with diagonal grooves standing in cleared field 5 feet south on line fence, and about 365 feet east of monument 450. It is on the property of William Townsend. This monument was heaved three inches, and has its south side chipped, otherwise it was found in good condition.

MONUMENT No. 450. HIGHWAY STONE 1.

Is a highway monument standing on the west side of a road leading from Kiantone to Russell. It is on property of William Townsend. This monument was found to be in good condition in every respect.

MONUMENT No. 451. MILESTONE 195 1-8.

Is a small monument standing at the east edge of the Eighth Latitude Stone on the north edge of thick woods, and the west brow of a narrow ravine, just south of rail and bush fence on line between property of Brewster and William Townsend. This monument was found to be in good condition in every respect.

MONUMENT No. 452. MILESTONE 196.

Is a small monument standing on a gentle northerly slope north side of thick woods, and about 50 feet east of an abandoned woods road, 242 feet east of the southwest corner of a clearing on line between property of Robert Jackson and J. Standish. This monument has heaved four inches; otherwise it was found in good condition.

MONUMENT No. 453. MILESTONE 197.

Is a highway monument standing on cleared land on gentle northerly slope 30 feet east of a road. It is on property of T. Gustafson. This monument was found to be in good condition in every respect.

MONUMENT No. 454. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a road leading from Warren to Jamestown on property of Martin Beck. This monument has its west edge chipped; otherwise it was found to be in good condition.

MONUMENT No. 455. MILESTONE 198.

Is a small monument standing on level ground on the north side of a clearing in the edge of woods about 70 feet west of monument 454, and under rail and brush fence. It is on property of Jasper Cole. This monument was found to be in good condition in every respect.

MONUMENT No. 456. HOLLAND LAND CO.'S PURCHASE 2 1-2 M. P.

It is a small monument standing in open woods on a westerly slope about 300 feet west of the summit of ridge and 2,475 feet west of monument 455, and marks the 2½ M. P. of the Holland Land Company's purchase; on the south line of township 1, range 11, on the property of Jasper Cole, and was found to be in good condition in every respect.

MONUMENT No. 457. MILESTONE 199.

It is a highway monument standing on the west side of a road, leading from Jamestown to Warren; on line between the property of H. A. Nelson and L. A. Coleman. This monument has its northside and south side chipped, and otherwise was found to be in good condition.

MONUMENT No. 458. HIGHWAY STONE 1.

Is a highway monument standing on the north side of a road leading from Busti to Warren, on line between the property of W. Stanford and W. H. Holcomb; and was found to be in good condition in every respect.

MONUMENT No. 459. MILESTONE 200.

It is a small monument standing on south edge of a woods on southerly slope north of a ravine at the corner of two Pennsylvania farms which is also the corner of Pennsylvania warrants Nos. 242 and 291; about 100 feet east of the head of a long westerly slope; on line between property of W. H. Holcomb and W. Stanton; and was found to be in good condition in every respect.

MONUMENT No. 460. TOWN STONE.

It is a small monument with diagonal grooves, standing on a level ground in a little cove, on a low bluff, which slopes southerly 13 feet south of foot of slope, and about 2,500 feet west of monument 459, and marks the corner of the townships of Sugar Grove and Farmington; and on line between property of W. H. Holcomb and W. Stanton, and was found to be in good condition in every respect.

MONUMENT No. 461. MILESTONE 201.

It is a highway monument standing on the west side of a road east of Stillwater creek, leading from Busti to Chandlers Valley, on line between the properties of Stanford and Simmons; and was found with all corners chipped; and otherwise in good condition in every respect.

MONUMENT No. 462. HIGHWAY STONE 1.

Is a highway monument standing on the west side of Stage road leading from Jamestown to Sugar Grove. It is on line between property of W. Weld and the Ricker estate. This monument was found to be in good condition in every respect.

MONUMENT No. 463. MILESTONE 202.

Is a small monument standing in an open field north of a garden in orchard on easterly slope about 240 feet west of monument 462. It is on line between property of William Weld and Ricker estate. This monument was found to be in good condition in every respect.

MONUMENT No. 464. MILESTONE 203.

Is a small monument standing in thick woods on nearly level ground, 2,205 feet west of the southeast corner of J. Boswell's farm, about 500 feet east of brook in deep ravine, and about 2,083 feet east of monument 465. It is on line between property of Boswell estate, and S. Bamet. This monument has heaved five inches, otherwise it was found to be in good condition.

MONUMENT No. 465. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Jamestown to Sugar Grove. It is on line between property of Boswell estate and S. Barnet. This monument was found to be in good condition in every respect.

MONUMENT No. 466. MILESTONE 204.

Is a small monument standing north edge of thick open woods about 15 feet east of the southwest corner of a clearing 75 feet east of brook flowing northerly in shallow ravine. It is on line between property of Birklain and Catlin. This monument has all corners chipped, otherwise it was found to be in good condition.

MONUMENT No. 467. HIGHWAY STONE 1.

Is a highway monument standing on the east side of highway leading from Meadville to Sugar Grove. It is on line between property of S. M. Seabury and J. Toolfire. This monument was found to be in good condition in every respect.

MONUMENT No. 468. MILESTONE 205.

Is a small monument standing on gentle slope, westerly, in open woods 360 feet west of a brook flowing southerly in shallow ravine, about 2,404 feet east of monument 469, and at a junction of a board and worm fence. It is on line between property of Madison and Lopes. This monument has its corners slightly chipped, otherwise it was found in good condition in every respect.

MONUMENT No. 469. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Ashville to Sugar Grove. It is on line between property of Madison and Lopes. This monument was found to be in good condition in every respect.

MONUMENT No. 470. MILESTONE 206 AND TOWN STONE.

It is a small monument with diagonal grooves standing in cleared land on northeasterly slope, north of a thin piece of wood, about 200 feet west of the west end of worm line fence. It is on line between property of William Gates and C. Lopes. This monument was heaved four inches; otherwise it was found to be in good condition. (Also marks the corners of the towns of Sugar Grove and Freehold in Warren county, Pa.)

MONUMENT No. 471. HIGHWAY STONE 1.

Is a highway monument standing on the east side of a highway leading from Stillwater to Watts' Flats. It is on the line between properties of Spooner and Bindley. This monument was found to be in good condition in every respect.

MONUMENT No. 472. MILESTONE 207.

Is a small monument standing at the northwest corner of a triangular piece of woods upon nearly level ground, at the junction of two worm fences, 492 feet west of monument 471. It is on line between property of David Spooner and C. S. Woodburn. This monument has heaved six inches; otherwise it was found in good condition.

MONUMENT No. 473. MILESTONE 208.

Is a small monument standing on level ground in thick open woods 10 feet west of top of low bluff, on the west bank of a hollow ravine, about 45 feet west of Deerly Creek and 462 feet east of same creek, where it again crosses boundary flowing southwesterly. It is on line between property of Cross and Allen. This monument was found to be in good condition in every respect.

MONUMENT No. 474. HIGHWAY STONE 1.

It is a highway monument standing on east side of road leading from Wrightsville to Mayville. It is on line between the properties of Effie A. Cross and DeWitt Allen. This monument has its corners badly chipped, and otherwise was found to be in good condition in every respect.

MONUMENT No. 475. MILESTONE 209.

It is a small monument in level cleared land 30 feet east of the right bank of Little Broken Straw creek about 5 feet north of rail fence, and 6 feet west of north end of board fence. It is on line between properties of Aaron Cornish and Ho. Crouse. This monument was found to be in good condition in every respect.

MONUMENT No. 476. HIGHWAY STONE 1.

It is a highway monument standing on east side of road leading from Panama to Lottsville on line between the property of Aaron Cornish and J. Ness. This monument was found to be in good condition in every respect.

MONUMENT No. 477. RAILROAD STONE 1.

It is a small monument standing on an enbankment of the N. Y. P. and O. R. R., 986 feet east of monument 478. This monument has its top almost flush with surface of ground; otherwise in good condition in every respect.

MONUMENT No. 478. MILESTONE 210.

It is a small monument standing in open space in woods on a low knoll in a swamp under brush line fence and at corner of Pennsylvania brush fence, about 22 feet south of large hemlock stump about 2 feet high which shows witness hacks. It is on line between the properties of Aaron Cornish and William Robinson. This monument was found to be in good condition in every respect.

MONUMENT No. 479. HIGHWAY STONE 1.

It is a high monument standing on west side of road leading from Lottsville to Panama. It is on line between the properties of Chapman and Mrs. Morgan. This monument was found to be in good condition in every respect.

MONUMENT No. 480. MILESTONE 211.

It is a small monument standing in cleared land on south west slope about 150 feet east of brook in shallow ravine and at north end of a fence which indicates the line between Penna. Warrants Nos. 103 and 392, and about 2,000 feet east of a large boulder with a cross upon its top, standing in cleared field, under and at the end of New York board line fence. The cross on the boulder marks the line between sections 41 and 49 in township 1, range 13, of the Holland Land Company's purchase. It is on line between the property of James Hartshorn and P. Cooper. This monument has heaved five inches, and otherwise was found to be in good condition.

MONUMENT No. 481. HIGHWAY STONE 1.

Is a highway monument standing on east side of a road leading from Bear Lake to Panama. It is on line between property of J. Bordwell and James Hartshorn. This monument was found to be in good condition in every respect.

MONUMENT No. 482. HIGHWAY STONE 2.

Is a highway monument standing on east side of a highway leading from Panama to Corry. It is on line between property of H. Howard and James Hartshorn. This monument has heaved eight inches; otherwise it was found to be in good condition in every respect.

MONUMENT No. 483. MILESTONE 212 AND TOWN STONE.

It is a small monument with diagonal grooves, standing on level ground at north edge of line fence and at north end of Pennsylvania

fence in woods near the northeast corner of a partial clearing about 750 feet east of a brook and 1,017 feet west of monument 482. It marks the corner of the towns of Freehold and Columbus in Warren county, Pa. It is on line between property of H. Howard and James Hartshorn. This monument was found to be in good condition in every respect.

MONUMENT No. 484. HIGHWAY STONE 1.

Is a highway monument standing on east side of a road leading from Kings Corners to Bear Lake, opposite the residence of Alfred Whipple. It is on property of Alfred Whipple. This monument has heaved four inches; otherwise it was found to be in good condition.

MONUMENT No. 485. MILESTONE 213.

It is a small monument standing in open cultivated land on south side of boundary line road on gentle westerly slope, 738 feet west of monument 484, and about 20 feet east of a six-inch cherry tree. It is on the property of Alfred Whipple. This monument has its top three inches above surface of ground; otherwise it was found to be in good condition.

MONUMENT No. 486. HIGHWAY STONE 1.

It is a highway monument standing on south side of boundary line road, at its junction with road leading to Columbus. It is on line between property of Alfred Whipple, and B. Chadwick. This monument was found to be in good condition in every respect.

MONUMENT No. 487. MILESTONE 214.

It is a highway monument standing in level cleared field, on north side of boundary line road, about 80 feet west of a Net snail, and five feet north of a line fence. It is on the property of B. Chadwick. This monument was found in good condition.

MONUMENT No. 488. HIGHWAY STONE 1.

It is a highway monument standing at the junction of two roads leading to Columbus, 458.8 feet west of monument 487, on the property of B. Chadwick. This monument was found to be in good condition in every respect.

MONUMENT No. 489. HIGHWAY STONE 2.

It is a highway monument standing on southwest side of road leading to Clymer station, at end of barbed wire fence, on line between the property of S. Barber and C. Cooley. This monument has its northeast corner chipped; otherwise it was found in good condition in every respect.

MONUMENT No. 490. MILESTONE 215.

Is a small monument standing in open woods upon rolling land on gentle easterly slope about 30 feet east of brow of a deep ravine, and about 1221 feet west of monument 489. It is on line between the property of S. Cooley and Ewers. This monument was found to be in good condition in every respect.

MONUMENT No. 491. HIGHWAY STONE 1.

It is a highway monument standing in level wet ground at south edge of thick woods near the northeast corner of a clearing at the southeast end of road laid out and cut through the woods but now abandoned and marks the corners of sections 17 and 25 in township 1, range 14, of the Holland Land Company's purchase. It is on line between the property of Cooley and Ewers. This monument was found to have its southwest corners lightly chipped, and otherwise in good condition in every respect.

MONUMENT No. 492. MILESTONE 216.

It is a small monument standing in open field on a westerly slope on south side of line fence, 747.7 feet east of monument 493. It is on line between the property of Cooley and Walton, and was found to be in good condition in every respect.

MONUMENT No. 493. HIGHWAY STONE 1.

Is a highway monument standing at east end of boundary line road at its junction with road running from Columbus to Clymar station. It is on line between property of S. Cooley and C. Walton. This monument has heaved two inches; otherwise it was found to be in good condition in every respect.

MONUMENT No. 494. MILESTONE 217.

It is a highway monument standing on north side of boundary line road, about 750 feet west of the west side of the summit of the ridge of Broken Straw creek. It is on line between property of Brown and Gillett. This monument has its northeast corner chipped; otherwise it was found in good condition in every respect.

MONUMENT No. 495. COUNTY STONE.

It is a highway monument standing on north side of boundary line road upon a westerly slope, 48 feet west of a large maple, and 462.6 feet west of monument 494. It marks the corner of the counties of Warren and Erie, Pa. It is on line between property of Gillett and King. This monument was found to be in good condition in every respect.

MONUMENT No. 496. HIGHWAY STONE 1.

It is a highway monument standing at the west end of boundary line road on property of William Brown. This monument was found to be in good condition in every respect.

MONUMENT No. 497. RAILROAD STONE 1.

It is a small monument standing on west side of W. N. Y. and P. R. R. track, about 30 feet west of same. This monument has its top three inches above the surface of the ground; otherwise it was found to be in good condition in every respect.

MONUMENT No. 498. HIGHWAY STONE 2.

It is a highway monument standing on east side of a road leading from Columbus to Clymar. It is on property of Michael McFarlin. This monument has its northwest and southwest corners chipped; otherwise it was found in good condition in every respect.

MONUMENT No. 499. MILESTONE 218.

Is a small monument standing in a maple grove, north of an orchard, on a northeasterly slope 786.6 feet west of monument No. 498. It is on the property of M. McFarland. This monument was found to be in good condition, in every respect.

MONUMENT No. 500. HOLLAND LAND COMPANY STONE.

Is a small monument, with diagonal grooves, standing midway upon a very steep northwesterly slope on the southeast side of a deep ravine, in a bushy piece of woods. It marks the corner of sections 49 and 57, in township 1, range 14, of the Holland Land Company's purchase. It is on the property of Michael McFarland. This monument was found to be in good condition in every respect.

MONUMENT No. 501. HIGHWAY STONE 1.

Is a highway monument, standing on north side and at east end of boundary line road. It is on the property of Michael McFarland. This monument was found to be in good condition in every respect.

MONUMENT No. 502. HIGHWAY STONE 2.

Is a highway monument standing on the north side of boundary line road at junction of road running southerly to corner in front of residence of George Beebe and W. Licters. This monument was found to be in good condition in every respect.

MONUMENT No. 503. TOWN STONE.

Is a highway monument standing on the north side of boundary line. It marks the corner of the towns of French Creek and Clymer, in Chautauqua county, New York, about 200 feet west of a ravine. It is on the property of D. Howells. This monument was found to be in good condition in every respect.

MONUMENT No. 504. MILESTONE 219.

It is a highway monument, standing on the north edge of wagon track of boundary line road upon level ground, upon second summit

west of Big Broken Straw Valley, and about 700 feet west of monument No. 503. It is on property of D. Howell's. This monument was found to be in good condition, in every respect.

MONUMENT No. 505. HIGHWAY STONE 1.

Is a highway monument, standing on the north side running southerly to Corry. It is on line between the property of John Rickers and D. Howell. This monument has moved eight inches, otherwise it was found in good condition.

MONUMENT No. 506. No. 5 1-2 M. P.

Is a highway monument, standing on the north side of boundary line road, about 1,000 feet west of monument No. 505. It is on the property of John Rickers. This monument was found to be in good condition, in every respect.

MONUMENT No. 507. HIGHWAY STONE 2.

Is a highway monument standing on the north side of boundary line road, at junction of road, running northerly to Clymer. It is on line between the property of H. Haybink and John Rickers. This monument has its northeast corner chipped; otherwise it was found to be in good condition.

MONUMENT No. 508. MILESTONE 220.

Is a highway monument, standing on the north side of boundary line road upon the east slope of the second knoll, west of a deep ravine, east of the valley of Hare creek. It is on the property of H. H. Haybink. This monument was found to be in good condition in every respect.

MONUMENT No. 509. HIGHWAY STONE 1.

It is a highway monument, standing at west end of boundary line road. It is on line between the property of G. R. Condon and Barney Raymond. This monument was found to be in good condition in every respect.

MONUMENT No. 510. MILESTONE 221.

Is a highway monument, standing on the south edge of woods, west of a ravine, on the north side of boundary line road, and at west end above the summit of a steep easterly slope. It is on line between property of Austin and Condon. This monument was found to be in good condition in every respect.

MONUMENT No. 511. HIGHWAY STONE 1.

Is a highway monument, standing on the north side of boundary line road at junction of road leading southerly to Corry. It is on property of the School District No. 3. This monument was found to have heaved four inches but otherwise to be in good condition in every respect.

MONUMENT No. 512. MILESTONE 222.

Is a highway monument, standing on the north side of boundary line road, 760.7 feet west of monument No. 511, on cultivated land on a westerly slope. It is on line between the property of Lloyd and Howard. This monument has heaved six inches, and inclines to the west; otherwise it was found to be in good condition in every respect.

MONUMENT No. 513. HIGHWAY STONE 1.

Is a highway monument, standing on the north side of boundary line road, about 50 feet west of where bridge crosses stream, at its junction with road running northwesterly. It is on line between the property of Gensling and Weizer. This monument was found to be in good condition in every respect.

MONUMENT No. 514. MILESTONE 223. HIGHWAY STONE.

Is a highway monument, standing on the north side of boundary line road, on south edge of thick woods on easterly slope a short distance east of the summit of the ridge between two branches of Herrick creek, 397.8 feet west of monument No. 513. It is on line between the property of Gensling and Weizer. This monument was found to be in good condition in every respect.

MONUMENT No. 515. HIGHWAY STONE.

Is a highway monument, standing in wagon track of boundary line road, in the Meridian of Astronomical Station "Clark," 69.32 feet north from centre of station, and about 984 feet east of monument No. 516. It is on line between the property of L. B. Clark and ..... Reynolds. This monument was found to be in good condition in every respect, except, it is set flush with the surface of the ground.

MONUMENT No. 516. HIGHWAY STONE. (MILESTONE 224.)

Is a highway monument, standing on the north side of boundary line road, upon the second summit east of the valley of French creek, and about 150 feet southeast of the residence of Mrs. Clark. It is on line between the property of Mrs. Clark and L. D. Moore. This monument was found to be in good condition in every respect.

MONUMENT No. 517. HIGHWAY STONE.

It is a highway monument, standing on north side of boundary line road, at junction of road running southerly to Carter Hill. It is on line between property of D. Marts and Ottoway estate. This monument has its southeast side chipped; otherwise it was found to be in good condition.

MONUMENT No. 518. TOWN STONE.

Is a big highway monument, standing on the north side of boundary line road on a steep westerly slope, 376.3 feet east of the monu-

ment at the southwest corner of New York. It marks the corner of the township of Wayne and Amity, in Erie county, Pa. It is on line between the property of Simons and Bisbee. This monument has its top flush with surface of ground; otherwise it was found to be in good condition.

MONUMENT No. 519. CORNER STONE.

Is a small mounment with diagonal grooves, standing in the wagon track of the boundary line road, upon level ground at the foot of a long westerly slope east of the Valley of French creek. About 4,496 feet west of milestone No. 224, and 825 feet east of the probable position of original milestone No. 225. It is 20 feet south of monument No. 1, standing on the north side of boundary line road, and 98.5 feet south of the south side of the base of the large initial monument standing in the meridian boundary. It is set at the intersection of the parallel and meridian boundary and marks the southwest corner of New York. It is set on line between property of Bennet and Simmond. This monument has all its corners chipped; otherwise it was found to be in good condition.

MERIDIAN BOUNDARY.

The monuments upon this boundary are similar, in all respects, to those on the parallel boundary. They are marked on the east side "N. Y.," and on the west side "PA." None of the fourth and fifth classes were set. The milestones which are not highway monuments, with one exception, are marked with the appropriate number on the north face.

MONUMENT No. 1. HIGHWAY MONUMENT.

Is a highway monument, standing on the north side of road which follows the parallel. It is on line between the property of Simons and Bennettt. This monument was found to be in good condition in every respect.

MONUMENT No. 2. LARGE REFERENCE MONUMENT.

Is a large block of Rhode Island granite similar in all respects to the large initial monument on the right hand bank of the Delaware river, except that its east and west faces are marked: "100 feet north of the southwest corner of New York." It stands on level ground in cleared field on the east side of line fence, and in the meridian of the corner monument, which is 98.5 feet south from the south side of its base. It is on lines between the property of Simons and Bennet. This monument was found to be in good condition in every respect.

MONUMENT No. 3, MILESTONE 18.

Is a small monument, standing on the east edge of clearing in level ground just north of thick open woods, 5 feet west of line fence, 3,520 feet north of the monument at the southwest corner. It is on line between the property of the Sweet's estate, and Charles Black. This monument was found to be in good condition in every respect.

MONUMENT No. 4. HIGHWAY STONE 1.

Is a highway monument, standing on the north side of a road leading from Wattsburg to Jamestown. It is on line between the property of the Sweet estate and F. M. Foote. This monument was found to be in good condition in every respect.

MONUMENT No. 5. MILESTONE 17.

Is a small monument, standing on the south edge of thick open woods, 135 feet south of the summit of the ridge, 50 feet north of the top of a steep bluff, north side of the valley of the east branch of French creek, and about 1,300 feet north of creek, on line between the property of F. M. Foote and McGill. This monument was found to be in good condition in every respect.

MONUMENT No. 6. H. L. CO.'S PURCHASE. 2 M. P.

Is a small monument, standing on the southwest side of a short narrow ravine, crossing the line towards the southeast on a steep northeast slope, in thick open woods, 1,794 feet north of monument No. 5. It is on line between properties of F. M. Foote and Henry Goethen. This monument was found to be in good condition in every respect.

MONUMENT No. 7. MILESTONE 16.

Is a small monument, standing on a narrow terrace near the bottom of a northeasterly bank of a narrow ravine, about 600 feet northwest of where the creek branches to the northeast, and 9 feet east of large boulder which lies on east bank of brook, which flows southeasterly on line between the property of J. Gilmore and J. Hadley. This monument was found to be in good condition in every respect.

MONUMENT No. 8. HIGHWAY STONE 1.

Is a highway monument, standing on the south side of road leading from Wattsburg to Clymer. It is on line between the properties of J. Gilmore and J. Hadley. This monument was found to have all of its corners badly chipped.

MONUMENT No. 9. H. L. CO.'S PURCHASE, 3 M. P.

Is a small monument standing on the east edge of a meadow a short distance south of a deep ravine, and 245.5 feet north of monument No. 8. It is on line between properties of J. Gilmore and J. Hadley. This monument was found to be in good condition in every respect.

MONUMENT No. 10. H. L. CO.'S PURCHASE, 3 1-2 M. P.

Is a small monument in thick open woods, upon a gentle southwesterly slope 744.5 feet south of monument No. 11. It is on line between properties of J. Gilmore and J. Hadley, and was found to have its southeast corner badly chipped, and in every respect this monument, otherwise, was found to be in good condition.

MONUMENT No. 11. MILESTONE 15.

Is a small monument, standing on level ground in the bottom of a deep ravine, in thick open woods, about 6 feet from the foot of the south bluff, and 20 feet south of the channel of a brook flowing westerly. It is on line between property of ..... This monument was found to be in good condition in every respect.

MONUMENT No. 12. H. L. CO.'S PURCHASE, 4 1-2 M. P.

Is a small monument standing on level ground thickly covered with bushes and fallen trees, 743 feet south of monument No. 13. It is on line between property of Dugan and King. This monument was found to be in good condition in every respect.

MONUMENT No. 13. MILESTONE 14.

Is a small monument, standing upon level ground thickly covered with briars, bushes and fallen logs, 20 feet north and 20 feet east from channel of brook which flows northwesterly. It is on line between property of Dugan and King. This monument was found to be in good condition in every respect.

MONUMENT No. 14. MILESTONE 13.

Is a small monument standing upon the brink of southeast bank of a narrow ravine, about 20 feet deep in partially cleared land on north side of post in barbed wire fence. The figures "13 M," were erroneously cut on the south face of the stone. It is on line between property of ..... This monument was found to be in good condition in every respect.

MONUMENT No. 15. HIGHWAY STONE AND TOWN STONE 1.

Is a highway monument, standing on north side of road, leading into Pennsylvania. It marks the corners of the towns Venango and Greenfield, in Erie county, Pa., and Mina and French Creek in Chautauqua county, New York. It is on the property of.....

This monument was found to be in good condition.

MONUMENT No. 16. HIGHWAY STONE 2.

Is a highway monument, standing on the north side of a highway running southeasterly about 15 feet east of Brook, in shallow ravine. It is on line between property of ..... This monument was found to be in good condition in every respect.

MONUMENT No. 17. MILESTONE 12.

Is a small monument standing in cultivated land on a narrow knoll, north of a shallow ravine, 208.5 feet north of monument No. 16. It is on the property of ..... This monument was found to be in good condition in every respect.

MONUMENT No. 18. HIGHWAY STONE 1.

Is a highway monument standing on west side of a short piece of boundary line road just where it turns to the southwest into Pennsylvania. It is on line between the properties of Franklin Haskins and Nehemiah Lathrop, and was found to be in good condition in every respect.

MONUMENT No. 19. HIGHWAY STONE 2.

Is a highway monument, standing on west side of boundary line road, just where it turns easterly into New York. It is on line between the properties of Nehemiah Lathrop and Franklin Haskins. This monument was found to be in good condition in every respect.

MONUMENT No. 20. MILESTONE 11.

Is a small monument, standing in level meadow land 781 feet north of monument No. 19, and about 200 feet east of Alvira Lewis's barn on line between the properties of Alvira Lewis and Nehemiah Lathrop. This monument was found to be in good condition in every respect.

MONUMENT No. 21. HIGHWAY STONE 1.

Is a highway monument, standing on the north side of road leading easterly to Findley's Lake. It is on the property of Joseph Rockwell. This monument was found to be in good condition in every respect.

MONUMENT No. 22. MILESTONE 10.

Is a small monument standing upon a terrace in a steep southwesterly side of a deep ravine, 487.8 feet south of a large Hemlock with "N X I I I" cut on it, and is supposed to indicate the southeast corner of Warrant No. 13 in the township of Greenfield, Pa., and about 2,000 feet north of monument No. 21, and 40 feet south of where the creek crosses the line, on the property of Joseph Rockwell. This monument was found to be in good condition in every respect.

MONUMENT No. 23. HIGHWAY STONE 1.

Is a highway monument standing at south end of boundary line road. It is on line between property of A. Haskins and J. McIntosh. This monument was found to be in good condition, in every respect.

MONUMENT No. 24. MILESTONE 9.

Is a highway monument standing on the east edge of boundary line road, on level ground at northeasterly edge of low bluff, and 160 feet

south of Black Brook, a branch of French creek. It is on line between properties of Douglass and Greenman. This monument was found to be in good condition in every respect.

MONUMENT No. 25. HIGHWAY STONE 1.

Is a highway monument, standing on the west side of boundary line road at its junction with road running southeasterly to Findley's Lake. It is on line between properties of Douglass and Greenman. This monument has heaved four inches; otherwise it was found to be in good condition.

MONUMENT No. 26. MILESTONE 8.

Is a highway monument standing in cultivated ground, 645.3 feet south of the northeast corner of the town of Greenfield, Erie county, Pa., and on the west side of boundary line road and 950.7 feet north of monument No. 25. It is on line between property of Douglass and Greenman. This monument was found to be in good condition in every respect.

MONUMENT No. 27. TOWN STONE.

Is a highway monument standing on the west side of boundary line road, 10 feet east of the end of Pennsylvania farm fence, and 15 feet south of where brook crosses the line. It is on line between property of Douglass and Greenman. This marks the corner of the township of Greenfield, northeast, Erie county, Pa. This monument has its top two inches above surface of ground; otherwise it was found to be in good condition.

MONUMENT No. 28. HIGHWAY STONE 1.

Is a highway monument standing on the west side of boundary line road, opposite Mina school house, No. 13, and at junction with road running to Grahamville. It is on line between property of Chasely and Greenman. This monument was found to be in good condition in every respect.

MONUMENT No. 29. HIGHWAY STONE 2.

Is a highway monument standing on the west side of boundary line road, at its junction with road running southeasterly to Findley's Lake. It is on line between property of Chacely and Greenman, and was found to be in good condition in every respect.

MONUMENT No. 30. MILESTONE 7.

Is a highway monument, standing on the west side of boundary line road, upon a southwesterly slope on cultivated land opposite the centre of a private road leading east to the residence of Charles Stetson, and 1,858 feet north of monument No. 29. It is on the property of the Stetson estate. This monument was found to be in good condition in every respect.

MONUMENT No. 31. HIGHWAY STONE 1.

Is a highway monument standing on the north side of boundary line road at its junction with road leading westerly to the borough of North-East, about 600 feet of monument No. 32. It is on line between properties of J. Cardot and J. C. Pitt. This monument was found to have its southeast corner chipped, and otherwise was in good condition, in every respect.

MONUMENT No. 32. MILESTONE 6.

Is a highway monument standing on level cleared land, on west side of Boundary line road, 431.7 feet south of monument 33. It is on line between properties of Chance Cordon, and C. Sigby. The monument was found to be in good condition in every respect.

MONUMENT No. 33. HIGHWAY STONE 1.

Is a highway monument, standing at north end of boundary line road at its junction with road running westerly to borough of North-East. It is on line between the property of Chance Cordon and C. Sigby, and this monument was found to be in good condition in every respect.

MONUMENT No. 34. MILESTONE 5.

Is a small monument standing in level cultivated land, under worm fence, and about 1,200 feet south of monument 35. It is on line between properties of E. Stone and J. Burden. This monument was found to be in good condition in every respect.

MONUMENT No. 35. HIGHWAY STONE.

Is a highway monument standing on north side of road leading from North-East to Sherman. It is on line between properties of J. Tripp and E. Stone. This monument has heaved three inches; otherwise it was found to be in good condition.

MONUMENT No. 36. MILESTONE 4.

Is a small monument standing in cleared land on a gentle northwesterly slope east of line fence and in narrow opening between two pieces of woods on the New York side of the line. It is on line between properties of E. Stone and the Tripp estate. The monument was found to be in good condition in every respect.

MONUMENT No. 37. GULF STONE.

Is a small monument standing in thick open woods, on left bank of steep gorge, about 30 feet south from edge of bluff, and 936 feet north of monument No. 36. It is on the property of J. Simonds. This monument was found to be in good condition in every respect.

MONUMENT No. 38. HIGHWAY STONE.

Is a highway monument standing on the north side of a highway leading from Ripley to North-East. It is on the property of J. Simonds. This monument was found to be in good condition in every respect.

MONUMENT No. 39. MILESTONE 3.

Is a small monument standing in open cultivated land on level wet ground in bottom of broad shallow ravine in worm fence 100 feet south of Pennsylvania east and west fence, and 2,300 feet north of monument No. 38. It is on property of J. Simonds. This monument was found to be in good condition in every respect.

MONUMENT No. 40. GULF STONE 1.

Is a small monument standing on level ground in thick young woods about 40 feet south of south bank of canon of Twenty Mile Creek, and on south side of line fence, on property of J. Simonds. This monument was found to be in good condition in every respect.

MONUMENT No. 41. GULF STONE 2.

Is a small monument standing in thick woods on level ground in a small depression 40 feet west of the low bluff, and about 30 feet north of the north bank of canyon of Twenty Mile Creek. This monument was found to be in good condition in every respect.

MONUMENT No. 42. HIGHWAY STONE 1.

Is a highway monument standing on the south side of road, which in the vicinity of this point is but little used. This monument was found to be in good condition in every respect.

MONUMENT No. 43. RAILROAD STONE 1.

Is a small monument standing between the tracks of the New York, Chicago and St. Louis Railroad (Nickel Plate); this monument has its east side badly chipped; otherwise was found to be in good condition in every respect.

MONUMENT No. 44. MILESTONE 2.

Is a small monument standing in open cultivated field on a gentle northerly slope, about 150 feet west of fence running nearly north and south, and 443.8 feet south of monument No. 45. It is on the property of ..... This monument was found to be in good condition in every respect.

MONUMENT No. 45. RAILROAD STONE 1.

Is a small monument standing on an embankment of the Lake Shore and Michigan Southern Railroad. Has its top buried about a foot below the surface of the road-bed. Otherwise this monument was found to be in good condition in every respect.

MONUMENT No. 46. HIGHWAY STONE 1.

Is a highway monument standing in south end of boundary line road, under the northwest corner of porch of the store of H. W. Palmer & Son, which is on the south side of the main road leading to North-East. It is on the property of W. H. Palmer estate. This monument was found to be in good condition in every respect.

MONUMENT No. 47. HIGHWAY STONE 2.

Is a highway monument standing at north end of boundary line road on its east side where it turns westerly into Pennsylvania. It is on line between the property of Perry Wolf and William Wolf. This monument was found to be in good condition in every respect.

MONUMENT No. 48. MILESTONE 1.

Is a small monument standing in partially cleared marshy land the east edge of brush fence 849.8 feet north of monument No. 47, and about 20 feet north of a small maple branching near the spot, standing about 10 feet west of line in the thickest. It is on property of Garrett Felton. This monument has heaved three inches; otherwise it was found to be in good condition.

MONUMENT No. 49. HIGHWAY STONE 1.

Is a highway monument standing on north side of highway leading along shore of Lake Erie. It is on the line between property of Garret Felton and J. Conley. This monument was found to be in good condition in every respect.

MONUMENT No. 50. INITIAL MONUMENT.

Is a large monument of Quincy granite, cut in the form of a flat obelisk, with its broad faces set in direction of the line.. It stands four feet out of ground with a cross section of 2 feet by $\frac{2}{3}$ of a foot. It is lettered on the east face as follows:

MERIDIAN
OF THE WEST END OF
LAKE ONTARIO
STATE OF
NEW YORK.
18 MILES, 52.5 CHAINS N. FROM
THE NORTH BOUNDARY OF
PENNSYLVANIA.
AUGUST 23rd.
1790.

The west face is marked as follows:

TERRITORY ANNEXED
TO
THE STATE OF
PENNSYLVANIA
NORTH
LATITUDE 42 deg. 16' 13"
VARIATION 25"
WEST.

The north side is marked as follows:

1869.
LATITUDE
THIS STONE
42 deg. 15' 57 79-100"
LONGITUDE
THIS STONE
45 deg. 54' 4"
MERIDIAN
35'
WEST.

This monument was set in 1869, 440 feet south of the original monument in 1790. It was readjusted in alignments in 1885. It stand clear in cultivated land, level ground 150 feet north of monument No. 49. It is on line between property of J. Connor and Garrett Felton. This monument was found to be in good condition in every respect.

MONUMENT No. 51. BLUFF STONE.

Is a small monument, standing upon the bluff overlooking Lake Erie, 40 feet south of site of the original Initial monument of 1790, about 40 feet south of the edge of the bluff, 400 feet north of monument No. 49. It is on line between property of Garrett Felton and J. Connor. This monument was found to be in good condition in every respect.

CIRCLE OF NEW CASTLE.

Under the first section of the Act of May 4, 1889, among other things it was provided, as follows: "It shall be the duty of the Governor to appoint three competent persons as commissioners, representing this Commonwealth, who are hereby authorized to act in con-

junction with a similar commission from the State of Delaware, to examine, survey and reestablish the boundary line that separates this Commonwealth from the State of Delaware, and when said line shall have been properly relocated, to mark its location by the erection of enduring monuments. It shall also be the duty of the said commissioners to make a detailed report of their operations, which, together with the field notes of surveys, description of monuments, maps and other items of interest connected with their work, shall be filed immediately after the performance of the duties imposed by this Act, with the Secretary of Internal Affairs, who shall cause a proper record of the same to be made, and shall place the same among other papers and documents relating to the boundary lines and boundary line monuments."

Soon after the approval of this Act the Governor appointed three commissioners to represent the Commonwealth of Pennsylvania, who were to act jointly with a similar commission from the State of Delaware in the discharge of the duties imposed by said Act. An Act of similar import having been passed by the latter State, the Governor appointed Thomas F. Bayard, J. H. Hoffecker and B. L. Lewis. The commission appointed on the part of Pennsylvania were Wayne MacVeagh, Robert E. Monaghan and William H. Miller. The report of the commission was filed in this department January 29, 1894, sometime after the close of the fiscal year covered by this Department report, but we have decided to include the larger portion of it in this publication, in order that it may be preserved for public information. Some of the minor details are omitted, but the map and the general work of surveying and locating the circle are included. It is no doubt well known that the line between the two states is called the Circle of New Castle. This circle was determined by the establishment of a radius 12 miles long, the centre being the court house at New Castle, and this 12 miles radius was made to describe the arc of a circle from the Delaware river to the Maryland line which marks the limits between that State and Pennsylvania. For many years there had been great difficulty to determine just where the circle was located. It is said that much confusion has arisen on account of the assessment and payment of taxes, as some lands in the limits of Pennsylvania have been assessed and taxes paid thereon as belonging to the State of Delaware, and, indeed, conveyances for these lands recorded among the records of that State. Trouble has also arisen regarding the territory extending southerly to the point of intersection of the circular line with the line marking the eastern limits of Maryland. A reference was made to this matter in the report of this Department a few years ago and an estimate made of the amount of land contained in this triangular shaped track. It is said that the titles by which this land is held are recorded in the State of Dela-

ware, and that the people living thereon vote and pay taxes in that State; but under the lines as originally established it would seem that the territory unquestionably belongs to the State of Pennsylvania. While the commission to which reference has been made was authority by law to re-survey and re-establish the Circle of New Castle, it does not appear to have had any specific instructions as to the disposition of this triangular tract of land. From their report filed in this Department it would seem that they had at least attempted to cede the land to the State of Delaware. An examination of the map submitted shows that they have described the Circle on a twelve mile radius from the Delaware river to a point on Mason and Dixon's line extended. In other words, to a point immediately east of the northeast corner of the State of Maryland, instead of continuing the arc of the circle around to the point of intersection with the eastern line of the State of Maryland. The result of this change in the location of the line between the States of Delaware and Pennsylvania would be to cede to the former State several hundred acres of land. It is claimed by some persons that the commission under the Act referred to had the power to make such transfer of territory, but that position would hardly seem to be tenable in the absence of specified authority in that direction, for it can never be claimed that the Mason and Dixon line, extended from the northeast corner of the State of Maryland to intersect the Circle of New Castle, was ever considered the boundary line between the States of Delaware and Pennsylvania. Indeed, we know of no evidence to indicate that such a line was ever run prior to its establishment by this commission. If, however, the Legislature of both States should pass a law adopting this line as indicating the boundary between the two States, and the Act should be approved by Congress, it would undoubtedly settle for all time the limits of the territory of the two States with reference to each other. This matter is no doubt of sufficient importance to demand the attention of the next Legislature.

The only records on file in the Department that show anything in relation to the New Castle Circle are the compromise survey, made in 1739, to fix the temporary jurisdiction of Pennsylvania and Maryland, and the report and map of Colonel Graham, of 1849. The report of the recent commission refers to a survey of the Circle as having been made in 1701 by Isaac Taylor and Thomas Pierson. If such survey were made there is no record of it here, or anything to show by whose authority it was made.

West Chester, Pa., January 26, 1894.

Hon. Robert E. Pattison, Governor of Pennsylvania:

Dear Sir: The Commissioners on part of Pennsylvania, to determine and make division line between Pennsylvania and Delaware, made and signed our report on the same, on yesterday, the 25th inst. We also approved and signed map of the line thus marked. We placed in the hands of our Secretary, Mr. Benjamin H. Smith, one report, the map* and the report of Major W. C. Hodgkins, of the Coast Survey, and field notes, to be filed in the office of Secretary of Internal Affairs, with instructions to forward these reports and papers to you,

I am, very truly yours,

R. E. MONAGHAN,

One of Pennsylvania Commissioners.

Philadelphia, Pa., January 25, 1894.

To His Excellency, Robert E. Pattison, Governor of Pennsylvania:

Sir: The undersigned Commissioners were appointed by your Excellency to represent this Commonwealth in conjunction with a similar Commission from the State of Delaware, under Section 1 of an Act of the General Assembly, approved the fourth day of May, A. D., 1889, entitled "An Act relative to the boundary lines and boundary line monuments," requiring said Commissioners "to examine, survey and re-establish the boundary line that separates this Commonwealth from the State of Delaware, and when said line shall have been properly re-located, to mark its location by the erection of enduring monuments." The Act further provided: "It shall also be the duty of the said Commissioners to make a detailed report of their operations, which, together with the field notes of surveys, descriptions of monuments, maps and other items of interest connected with their work, shall be filed immediately after the performance of the duties imposed by this Act, with the Secretary of Internal Affairs, who shall cause a proper record of the same to be made, and shall place the same among other papers and documents relating to the boundary lines and boundary line monuments."

We now have the honor to report, that in pursuance of said recited Act, the said Commissioners, in the month of November, 1891, met the Hon. Thomas F. Bayard, Hon. J. F. Hoffecker, and Dr. B. L. Lewis, the three Commissioners duly authorized and appointed by the State of Delaware, and organized a joint commission, of which the Hon. J. H. Hoffecker was elected chairman, Mr. Daniel Farra was appointed Surveyor on the part of Delaware, and Mr. Benjamin H. Smith, Surveyor, on the part of Pennsylvania.

---

*The map referred to above will be found in a pocket of the cover.

After the surveyors had secured, for the use of the joint commission, all the available data that would be of service in the determination of the line upon the ground, they were instructed to make a preliminary survey to determine a curve, which, beginning at the intersection of a true twelve mile circle from the spire of the court house at New Castle, with a due east line extended from the northeast corner of Maryland, would pass, as near as practicable, through well authenticated points in the line of 1701, and intersect the Delaware river at a point previously identified as being on the original boundary line.

The duty thus imposed upon the surveyors involved the accurate determination of the relative positions of several widely seperate points, which it was decided could be most economically effected by making use of the triangulation stations of the United States Coast and Geodetic Survey, in the vicinity. The positions, with descriptions of several convenient stations, were furnished by Prof. T. C. Mendenhall, the Superintendent of the United States Coast and Geodetic Survey, who also offered to detail an assistant engineer for service with the Commission, together with the necessary instruments. This offer was cheerfully accepted by the Joint Commission. The officer detailed for this service was Assistant W. C. Hodgkins, who took the field in April, 1892, and completed the field work in January, 1893.

The preliminary survey developed the fact that, owing to the inaccuracy of the original survey, no single curve could be made to pass through all of the points previously agreed upon. A compound curve to be composed of two arcs of nearly equal lengths, was suggested by the surveyors, and when marked upon the ground was found to conform very closely with the old line of 1701, and to follow the lines of existing holdings and jurisdictions in the two States as near as was believed to be practicable. This line was formally inspected by the Joint Commission, and on the 11th of April, 1893, was unanimously approved.

The line has been marked with enduring monuments as required by the Act of Assembly, full descriptions of which shall be found in the report of the surveyor.

The Superintendent of the United States Coast and Geodetical Survey, at the request of the Joint Commission, prepared and furnished two certified copies of the map, report, field notes and computations of the boundary line, as described and surveyed by Assistant W. C. Hodgkins, under the supervision of the surveyors—one copy for each State.

We transmit, herewith, for filing with the Secretary of Internal Affairs, a copy of the joint resolutions, adopted April 11, 1893, (marked A), the report of the survey on the part of Pennsylvania

(marked B), that part of the report of Assistant W. C. Hodgkins, to the Superintendent of the United States Coast and Geodetic Survey, which includes the field notes and computations of the boundary survey, (marked C), and the certified copy of the map, showing the line as marked upon the ground and approved by the Commission.

All of which is respectfully submitted,

WAYNE MacVEAGH,
R. EMMET MONAGHAN,
WM. H. MILLER.

Pennsylvania and Delaware Boundary Survey.

At a meeting of the Joint Commission held in Philadelphia, April 11, 1893, all of the members being present, on motion of the Hon. Thomas F. Bayard, the following resolutions were unanimously adopted:

1. Resolved, That the Boundary Line between the State of Delaware on the north, and the State of Pennsylvania, shall be held to commence at the northeast corner and boundary stone of the State of Maryland, as fixed and inscribed, and as it appears in the map and report of Lieutenant Colonel J. D. Graham, United States Topographical Engineer, to the Joint Commissioners of the States of Pennsylvania, Delaware and Maryland, dated February 27, 1850, and extending thence due east four thousand one hundred and sixty-nine feet to the monument now fixed and agreed upon by this Joint Commission as the western terminus of the Circular Boundary Line between the said States, said monument being at the distance of twelve English statute miles from the spire of the Court House at New Castle.

2. Resolved, That the monuments as inscribed and set under the direction of this Joint Commission at the eastern and western termini, respectively, of the said Circular Boundary Line, be, and are hereby adopted, approved and confirmed as the true and just terminal points of the said boundary line, and that the intermediate line of boundary, being twenty-two miles and fifty-seven hundredths between the terminal points aforesaid, as surveyed and delineated by W. C. Hodgkins, an Assistant Engineer of the United States Coast and Geodetic Survey, (detailed for that service), under the supervision of Benjamin H. Smith, of Pennsylvania, and Daniel Farra, of Delaware, the surveyors thereunto duly authorized and appointed by the Joint Commission, and as the same appears by the sketch or plat made and returned by the said Assistant Engineer Hodgkins, and furnished to the joint commission, be adopted and approved, and that the Circular Boundary Line aforesaid shall be held further to extend from the said easterly terminal monument to low water

mark on the Delaware river, and continuing to low water mark on the opposite shore of said river.

3. Resolved, That the points ascertained and noted upon the said sketch, and marked by stakes upon the said line by the said Assistant Engineer under the personal supervision and approval of the said Surveyors Smith and Farra, are hereby adopted as the points at which the said mile and half mile boundary stones, as marked and numbered, shall be set and established.

4. Resolved, That the Superintendent of the United States Coast and Geodetic Survey be requested to have prepared and furnished, as soon as possible, for the use of the Joint Commission, two certified copies in full of all the field notes and records of the said survey, together with maps or plats of the said line, as described and surveyed by the Assistant W. C. Hodgkins.

From the minutes.

BENJ. H. SMITH,
Secretary.

To the Hon. Wayne MacVeagh, Robert E. Monaghan and Wm. H. Miller, Commissioners on the part of Pennsylvania:

Gentlemen: I have the honor to submit herewith copies of the field notes, computations and map of the Survey of the Circular Boundary line dividing the States of Pennsylvania and Delaware, certified by the Superintendent of the United States Coast and Geodetic Survey, said survey having been made under the supervision of the surveyors duly authorized and appointed by the Commissioners of the respective States, and adopted and approved by resolution of the Joint Commission, April 11, 1893.

The following brief account of the execution of the survey is respectfully submitted for your information.

After my appointment as surveyor on the part of Pennsylvania, it became my first duty under your instructions, to collect all available data of record that would be of service in the determination of the line upon the ground. This information was derived from three sources:

First, The survey of the Circular Line dividing the counties of Chester and New Castle by Isaac Taylor and Thomas Pierson, executed in 1701, the field notes and map of which are preserved in the library of the Historical Society of Pennsylvania.

The notes of this survey record distances along the boundary to intersections with roads, paths, streams and a few plantation lines, but the only two topographical points that might be expected to be of service to our survey were, first, the remarkable bend in the Brandywine at the southeast corner of Pennsbury township, Chester

county, Pennsylvania. And second, the site of the "old house of Nathaniel Lamplugh, at Chichester." The line was described as marked "with three notches on each side of the tree," but it is not likely that these marks could have been verified twenty years after the date of survey, and now, after the lapse of nearly two centuries, the trees so marked have doubtless all disappeared.

Second, The surveys for patents which were closed upon the Circular Line soon after it was run, the lines of which have been preserved to the present time as farm boundaries. These surveys extended from Beaver creek, a tributary of the Brandywine, eastward along the curve, about nine hundred perches, and were mostly executed between 1701 and 1718. Some of them were made by Isaac Taylor, who had so recently assisted in running the county line, and who used the "Chords" of the original circle in his patent surveys. This portion of the line formed the north boundary of "The London Tract" in New Castle county, resurveyed in 1718, to Henry Goldney and others, and the south boundary of six tracts in Chester county, (now Delaware county,) granted to Joseph Robinson, John Chandler and Joseph Cloud, in Birmingham, Nathaniel Newlin and George Lea, in Concord, and Richard Sanderson, in Bethel. The lands in Chichester, Bethel and the adjacent parts of New Castle county, were surveyed prior to the survey of the Circular Line, but subsequent re-surveys often connected with the original line and thus aided in preserving its location.

West of the Brandywine the circle traversed for several miles a tract of thirty thousand acres, which had been surveyed the previous year to William and Lartitia Penn, children of William Penn. This tract comprised the present township of New Garden, the greater part of Kennett, a portion of London Britain, Chester county, Pennsylvania, and several thousand acres in New Castle county, Delaware. The eastern half was granted by patent to Laetitia Penn, October 23, 1701, and at the same time erected into a Manor called "Staneing." By deed dated November 16, 1713, four hundred acres thereof were conveyed to George Harlan, described as "beginning at a small hickory in the eastern line of the said Manor, thence with the division line of the said county, three hundred and fifty-seven perches, etc." This hickory tree is recited in all subsequent conveyances of the adjoining tracts to the present day. It became the corner to the township of Kennett and Pennsbury and formed an important point in our survey, being the only point west of the Brandywine that could be identified, from the records, as being in the line of 1701. The tree was blown down a few years ago, but the stump, which is very large, is still in a good state of preservation. Subsequent surveys within the Manor, and along the Circular Line westward, made no connection therewith. The progress of settlement was slow in that di-

rection, and it is highly probable that the temporary marks along the line so hastily run, had all disappeared in advance of such surveys.

Third, The report of Lieutenant Colonel J. D. Graham, to the Joint Commissioners of the States of Pennsylvania, Delaware and Maryland, in relation to the junction or intersection of the Boundary Lines of those States, dated February 27, 1850, and published in 1887, in the report of the Secretary of Internal Affairs on the State Boundary Surveys, p. 339. The map accompanying the report locates the circular boundary between Pennsylvania and Delaware for a distance of about three and three-quarters miles northeastward from the junction of the three States, and shows the computed distance at which a due east line from the northeast corner of Maryland will cut a twelve-mile circle described from the spire of the New Castle Court House. Early in the deliberations of the Joint Commission, this point was selected for the Initial monument of the present survey, and the site of the "old house" at Chichester above mentioned, for the Terminal monument.

In November, 1891, by direction of the Commission, I made a joint reconnoisance of the line with Mr. Daniel Farra, the surveyor on the part of the State of Delaware. Our instructions required us to identify points on the line of 1701, ascertain the knowledge of the people in the vicinity of its existence on the ground, and collect other information that might be serviceable to the Joint Commission.

The supposed site of Nathaniel Lamplugh's old house at Chichester was shown to us by Mr. George Thompson. Only a few stones remained, but Mr. Thompson stated that the ruins of the foundation were quite evident fifteen or twenty years ago. He could recollect the house when a boy, sixty years back, and described it as being of frame on a stone foundation, about fourteen by sixteen feet, one story high, with a loft. At that time it was used as a saloon, kept by a disrespectable proprietor who was frequently in trouble with the authorities, and at such times claimed to be in Pennsylvania or Delaware as best suited his protection from arrest. The site was subsequently identified by an old resident of the neighborhood, named Grover Lock, who had lived in the house when a boy. In further confirmation, the records show that by deeds of lease and release dated March 13-14, 1682, Wolla (or William) Rawson granted to Nathaniel Lamplugh the land at this place described as "one close of pasture or arable land, lying at the west end of Chichester next the swamp, abutting on the Delaware river in the front," etc. The swamp back of the site of the old house, and its relative location with the King's Road and Naaman's Creek, all agree with the map of Taylor and Pierson of 1701.

From this point westward along the south boundary of Lower and Up-

per Chichester and part of Bethel townships, no marks could be found to definitely identify the old line, but the inhabitants on either side were in close agreement as to the position of an imaginary line, which was probably not far from that of the original curve. From the west side of Ebright's farm in Bethel, almost to the crossing of Beaver Creek, near Tally's grist mill, the land owners on either side trace their titles back to the patents before mentioned which bounded on the Circular Line, and thence for over two miles, the fences and stone walls are probably identical with that line, as originally run.

The great bend in the Brandywine, and the stump of the old hickory tree at the corner of Kennett, were easily identified. From this place westward no points could be verified as identical with the original line, although we were shown several trees, buildings, etc., that were said to be on or near it. The necessity for a division of jurisdiction had invented a line which temporarily answered the purposes of the inhabitants and county officials, but its location on the ground was exceedingly vague, ill defined and irregular. The stone at the northeast corner of Maryland was easily recognized. We found the impression still prevailing in this neighborhood that the Circular Line was several hundred feet west of the due east point thereon, as computed by Colonel Graham, and that the wedge-shaped portion of Pennsylvania extending to the junction of the three States, still continued under the jurisdiction of Delaware.

The initial and terminal points having been agreed upon, we were directed by the Joint Commission to make a preliminary survey to determine a curve that would conform as near as practicable with the well recognized points on the line run by Taylor and Pierson, in 1701.

This problem involved the determination of the relative position of several points along that line, which we agreed could be most economically and accurately effected by conecting them with the existing triangulation stations of the United States Coast and Geodetic Survey, in the vicinity. The positions and descriptions of several stations in the neighborhood of the initial and terminal points and in and around New Castle, were readily obtained from the Superintendent, who also offered to detail an assistant engineer, and furnish the necessary instruments for the execution of the field work. This offer was accepted by Mr. Bayard on behalf of the Joint Commission, and on March 8, 1892, we were notified by the Superintendent of the detail of Assistant W. C. Hodgkins, who was directed to confer with us relative to the choice of methods and other details.

This conference was held at my office in Philadelphia, March 16, 1892, at which time we advised Mr. Hodgkins of the nature of the preliminary survey required by the Joint Commission, and the general plan of field operations was discussed and agreed upon. On

being subsequently advised of the regulations of the Department concerning estimates in advance, of the field expenses, on April 18, we requested the engineer to determine the geodetic positions of the following points: The site of the old house at Chichester, the corner on line common to the townships of Bethel and Concord, a point on line in the vicinity of Beaver Creek, the bend in the Brandywine, the southeast corner of Kennett township, the stone at the northeast corner of Maryland, and the spire of the Court House at New Castle, and prepare for the use of the Joint Commission a plat and field notes of the survey.

These instructions gave rise to a correspondence with the Superintendent, with whom we held a conference on April 27, with regard to the extent of the work which his office was expected to perform. He explained that the meaning of his offer was to execute the field work to the extent of marking the line upon the ground, but as our instructions were limited at that time to the execution of a preliminary survey only, we referred the matter to the Joint Commission. At a meeting held May 5, the following resolution was adopted:

"Resolved, That Messrs. Smith and Farra be instructed to secure the survey of the line as soon as possible in accordance with the suggestions of the Superintendent of the United States Coast and Geodetic Survey, so as to enable them to report the line, approved by them, to the Commission as soon as feasible."

Mr. Hodgkins thereupon continued the field work, commenced in April, and on July 29 following filed a tracing showing the proposed triangulation scheme, and the relative positions of some of the points previously agreed upon. It was at once apparent that a circular arc could not be made to pass through all of the required points, and that a true twelve-mile circle from the spire of New Castle Court House would not pass through any of them, except the Initial point. It would fall entirely within the State of Delaware, and intersect the Delaware river near the mouth of Naaman's Creek, over three thousand feet below the point agreed upon for the terminal monument, and thus cut off nearly five thousand acres of land claimed and recognized as belonging to Delaware. A curve from the Initial point through the stump at the corner of Kennett, and a line hickory tree near the corner of Concord would also intersect the river several hundred feet below the terminal point, and a curve from the terminal point through the Concord tree and corner of Kennett, would intersect the east and west line near the northeast corner of Maryland, and transfer several hundred acres from Pennsylvania to Delaware.

Being limited by our instructions to the Initial and terminal points above mentioned, and the verified and accepted points along the line of 1701, we instructed the engineer to mark upon the ground and re-

port a compound curve, to be composed of two arcs, one of them to pass from the "old house" at the river through the line hickory tree near the corner of Concord, to the hickory stump at the southeast corner of Kennet, and the other, with a common tangent at the last named point to extend thence to the point agreed upon for the Initial monument.

It was expected that the survey and inspection of the proposed line could be completed before the end of the year, but the field work was for various reasons greatly delayed, and the temporary marking of the line upon the ground was not completed until January 20, 1893. In the meantime, by direction of the Joint Commission, the Terminal monument near the Delaware river, was set under my supervision, December 12, and the Initial monument was set December 20, 1892, under the supervision of Mr. Farra and Mr. Hodgkins. By that time the mile and half-mile stones had been distributed along the line from the Initial monument as far as the Brandywine, when further work had to be suspended until the following spring on account of the delay in the field work, and the severity of the winter.

The delivery of the stones was completed by the contractors, April 6, 1893. The entire line was then inspected by the Joint Commission, and at a meeting held in Philadelphia, April 11, was formally accepted and approved. The setting of the mile and half-mile stones, under the supervision of the surveyors, was completed April 26, 1893.

The Initial monument is of Brandywine granite from the State of Delaware. All of the other stones are from the Gneiss quarries of Leiper & Lewis, on Ridley Creek, near Chester, Pennsylvania.

The stones marking the Initial and Terminal points are each 9 feet, 6 inches long, by 18 inches square, the portion above ground tapering from 18 inches square at the ground line to 12 inches square at the top. They are each marked with the names PENNSYLVANIA and DELAWARE, on the north and south faces respectively, together with the names of the three Commissioners and Surveyor of each State, the words "Field work executed by the United States Coast and Geodetic Survey," on the west face, and 1892 on the east face. A circle is cut on top of each stone, with lines indicating the direction of the boundary. Each stone is set 4 feet 6 inches in the ground, and surrounded, to near the surface, on all sides, by 2 feet of rubble masonry set in cement.

The twenty-two mile stones are each 6 feet 6 inches long, by 12 inches square set 4 feet in the ground, a portion above the ground tapering from 12 inches square at the surface, to 10 inches square at the top. Each stone is marked P on the north, D on the south, 1892 on the east, and the consecutive figures 1, 2, 3, etc., on the west faces.

The twenty-two half-mile stones are each 6 feet long by 10 inches square, set 4 feet in the ground, the portions above ground tapering

from 10 inches square at the surface, to 8 inches square at the top. Each stone is simply marked ½ on the west face. All of the mile and half-mile stones have lines graved on top, indicating the direction of the boundary line and radius.

Prior to the inspection of the line by the Joint Commission, the Superintendent deemed it necessary to include Mr. Hodgkins in a party for duty in Alaska, whereby the preparation of his field notes and reports were greatly delayed.

Very respectively,

BENJ. H. SMITH,
Surveyor on the part of Pennsylvania.

Philadelphia, January 20, 1894.

Pennsylvania and Delaware Boundary Survey.

Extract from the report of Assistant W. C. Hodgkins to the Superintendent of the United States Coast and Geodetic Survey detailing the methods of observation, computation and location of monuments.

* * * * * * * * *

Having thus reviewed the principal features of my survey, I will proceed to explain with some detail the methods of observation, of computation, and of location of monuments.

As already stated, the reconnoisance was made with the planetable, supplemented by other instruments. The angular measures were made with Repeating Theodolite No. 153, an excellent instrument, having an eight-inch horizontal circle, divided to five minutes of arc and provided with three equidistant verniers which read to five seconds of arc. The telescope, which is lifted from the Y's in reversal, has an object glass of two inches diameter, a focal length of sixteen inches, and a magnifying power of about twenty-two diameters. Another eye-piece, of higher power, was provided, but was rarely used. All of the principal angles were measured in sets of six repetitions, direct and reverse, the telescope being reversed in the middle of each set. The explement (or the difference between the angle and 360 degrees) was always measured immediately after the angle itself and the two results were combined in one by applying the correction necessary to make the sum of the two equal 360 degrees. In general, all the possible angles at each station were measured and the results were combined to give an approximate station adjustment. The excellence of the instrument is shown by the small corrections required in this adjustment, as well as by the small errors in closing the triangles.

The signals were carefully centered, and gas pipe poles of two inches diameter were used on the shorter lines, as combining economy

and clearness of definition. After measuring the angles, the sides of the triangles were successively computed, starting from the line "Londonderry" to "Meetinghouse Hill," used as a base. The length of this line is 22,194.9 metres, equal to 72,818.7 feet or about 13.8 miles. It is the longest line observed in the work, except that between "Grays Hill" and "Centerville," which is over three miles longer, being 27,753.6 metres or 91,055.8 feet. The shortest line of the regular scheme, "Smith to northeast corner of Maryland," is only 168.1 metres or 551.5 feet. The whole number of triangles in the scheme is one hundred and four, twenty-two of which belong to the river triangulation of Assistant R. Meade Bache, executed about twelve years before.

In thirty-six of the principal triangles of my work, the largest error of closure is five and four-tenths seconds, the smallest error zero, and the mean error was one and sixty-six hundredths second.

The triangle sides are computed by the usual formulae

$$b = A.\ \text{Sin B.}\ \text{cosec A};\quad c = a.\ \text{Sin C cosec A};$$

after applying the corrections for spherical excess and for error of closure.

The lengths of the triangle sides having been computed, the latitude and longitude of each station were obtained by the geodetic formulae.

$-dL = K.\cos Z.B + K^2 \sin^2 Z.\ C + (\delta L)^2.\ D - h.K^2.\sin^2 Z.\ E.$ or $-dL = K.\cos Z.B + K^2 \sin^2 Z.\ C + h^2 D$, for short lines;

$$d\,M = \frac{K.\sin Z.\ A'}{\cos L'} \quad \text{and} \quad -d\,Z = \frac{d\,M \sin \varkappa}{\cos \frac{1}{2}\, d\,L}$$

or $-d\,Z = d\,M.\sin\varkappa$, for short lines; the derivations of which formulae, together with the factors A, B, C, D, E, are given in the appendix No. 7 of the report of the Superintendent of the Coast and Geodetic Survey for the year 1884.

These position computations depend on the standard data for "Meetinghouse Hill" and "Londonderry," furnished by the Computing Division of the Coast and Geodetic Survey. Each station was twice computed by independent determinations from different points already known, in order to obtain a comparison and avoid errors.

The number of stations so computed was fifty-four. Next, from these geographical positions, I computed by the "inverse solution" of the geodetic formulae the position of the point which, having the same latitude as the northeast corner of Maryland, should be exactly twelve miles from the spire of Newcastle courthouse. In a precisely similar way I found the distance and asimuth of this initial point of the curve from the neighboring triangulation point "Whiteman," established for this special purpose; and with these values known, the initial point was marked on the ground.

By the same inverse solution were obtained the distances and di-

rections of the lines joining the standard points of the curve, as follows: "Initial Point to Kennett-Pennsbury," "Kennett-Pennsbury" to "Concord-Bethel," "Concord-Bethel to Ruins," "Ruins to Kennett-Pennsbury." The triangle formed by the last three lines may be considered a plane triangle, its spherical excess being less than one-tenth of a second of arc.

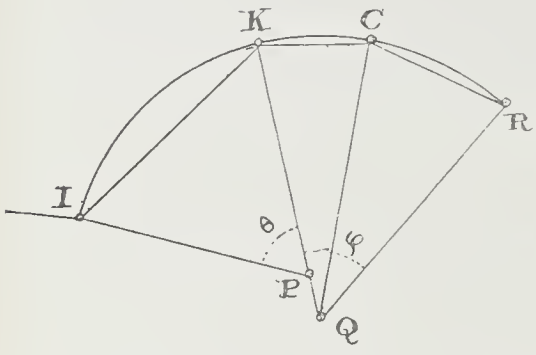
The radius of the circumscribing circle may then be computed by the formula.

$$r_1 = \frac{S}{4 \cos \tfrac{1}{2} A \cos \tfrac{1}{2} B \cos \tfrac{1}{2} C}$$

In which S is the half sum of the three sides, and A, B, C, are the three angles of the triangle.

The radius thus found for the eastern part of the curve is 20,620.44 metres, equal to 67,653 feet or 12.81 miles. The angle at the centre of the curvature between Kennett-Pennsbury and Ruins was found by the formula

$$\sin \tfrac{1}{2} \delta = \frac{\tfrac{1}{2} \text{ chord}}{r_1}$$



As will be seen by the accompanying figure, the equal angles at Kennett-Pennsbury and Ruins, between the chord and the radii, are then known, each being equal to 90 degrees $-\frac{1}{2}\delta$. These three angles must each be increased to obtain the true spherical angles. This correction, however, is only 0."3 for each angle. The asimuth of the centre of curvature from each extremity of the arc may next be obtained and the latitude and the longitude of that point may be computed.

We next wish to find the radius of the western part of the curve, which, starting from "Kennett-Pennsbury," with a tangent common to the eastern arc, must gradually approach the true twelve-mile circle until it cuts it at the initial point. Obviously, as the two arcs have a common tangent at "Kennett-Pennsbury," their centres of curvatures will lie in the same line perpendicular to that tangent. Referring once more to the figure, it will be seen that the angle at "Kennett-Pennsbury," between the chord of the arc and the centre of curvature is equal to the difference of asimuth of these two directions, and these asimuths are already known. The corresponding angle at the initial point has the same value and the angle at the centre will be

equal to the difference between 180 deg. plus the spherical excess (seven-tenths of a second), and the sum of the above angles. The chord and the three angles being thus known, the radius is readily computed by the formula

$$r = \frac{\frac{1}{2} \text{ chord}}{\sin \frac{1}{2} (-)}$$

It is equal to 18,640.3 metres, 61,156.3 feet or about 11.58 miles.

The latitude and longitude of this second centre of curvature are computed in the same way as for the first.

The length of each part of the curve was computed separately by the formula

$$\text{arc n deg.} = n \frac{2 \pi r}{360}$$

The western part is 10.8977 miles long and the eastern part 11.6749 miles. Thus the total length of the curve is 22.5726 miles, and if to this we add the distance from the initial point to the northeast corner of Maryland, which is 0.7893 mile, the whole length (on dry land) of the boundary between Pennsylvania and Delaware is found to be 23.3619 miles.

After reaching the Delaware, the circular boundary is supposed to continue to the New Jersey shore, as Delaware claims all of the water within the circle.

The angular value in each part of the curve of an arc one mile long may be found by dividing the number of degrees in that part by the length of the same in miles. For half-mile arcs the value will be one-half as great. As the boundary monuments are one-half mile apart, this last angle is equal to the angle of deflection from each chord to the next one. In the western arc it equals 2 deg. 28 min. 24 sec., and the eastern arc 2 deg. 14 min. 9 sec.

The chord of the half-mile arc is equal to twice the product of the radius, and the sine of one-half the angle subtended by the arc, i. e., $ch = 2 r. \sin \frac{1}{2}\delta$.

The chord is less than the half-mile by 0.20 foot in the western arc and by 0.17 foot in the eastern arc.

Fractional chords are computed by similar methods. The geographical positions of each of the points one-half mile apart throughout the curve, counting from the initial point, can now be computed by the aid of the data obtained as above. Then by the "inverse solution," the distances and directions of these monument stations from the triangulation points nearest to them can be computed.

All of the computations above described will be found in full in Part IV of this report.

For applying the results of these computations to the location upon the ground of the positions for the monuments, five methods were employed at different times, according to circumstances.

The first method was to put up a flag as near as possible to the probable point and so as to be visible from two stations of the triangulation. The flag being determined from these known points, the correction to the desired point of the curve was computed and applied.

The second method consisted in running out with the transit two computed azimuth lines from neighboring triangulation points to the desired point, which is fixed by their intersection.

The third method was to run out a single azimuth line as above and to lay off on that line by direct measurement, or by resection on signals, the computed distance to the desired point.

The fourth method was to run the curve by half-mile chords, making the constant deflection at the end of each chord.

In the fifth method, longer chords (of one and six miles) were run out and the intermediate points were determined by rectangular offsets.

The engineer's transit with which this work was done was, unfortunately, not a very good one, the transverse plate level being particularly unreliable, but it was sufficiently good for the preliminary purposes intended at the time.

The monuments, except the initial and terminal, the setting of which has been described, were put into the ground by contractors after I left the work.

In addition to the above work, necessary for the location of the boundary line, an opportunity was taken during hours unsuitable for other work, to determine the position of the monument at the "Tangent Point."

This determination was desirable in itself, as that of a point of the greatest importance, but my principal reason for wishing it made was the desire to explain, if possible, the discrepancy between the value given by Colonel Graham for the distance from the corner of Maryland to the twelve-mile circle and that which I found to exist.

The longitude of the tangent point was found to be almost identical with the longitude of the northeast corner of Maryland, showing that the line between those points is practically a meridian, as it was intended to be. The distance from the tangent point to Newcastle Courthouse proved to be considerably longer than it had been considered, being about 108 feet more than 12 miles and 110 feet more than the value obtained by Col. Graham. His results were apparently deducted from insufficient data, and, as he does not give his method, it is difficult to see how he obtained such figures for this line and for the other distances relating to the circle which he furnished.

The above correction in the distance from the courthouse to the tangent point, however, will no doubt account for a large part of the discrepancy.

From this it will be seen that the whole of the Maryland boundary is outside of the true 12-mile circle and that the Pennsylvania boundary touches that circle only at the initial point of the curve.

Geographical Positions given in Report of Pennsylvania and Delaware Boundary Line Survey by W. C. Hodgkins, Chief of Survey Party and Assistant on U. S. Coast and Geodetic Survey.

STATE WEATHER SERVICE BUREAU.

This Bureau was established by the Act of May 13, 1887. Its management, by the original Act, was imposed upon the Franklin Institute of Philadelphia, this department being required only to purchase such instruments and other supplies as might be needed, and to pay for them out of the appropriation made by the Legislautre. In 1891 the appropriation bill for the maintenance of the Bureau provided that the powers theretofore bestowed on the ranklin Institute be transferred to the Secretary of Internal Affairs; but the bill received Executive disapproval and the appropriation provided for in the same bill fell with the veto of the other portion. In the Act of 1893 an additional appropriation was made for the maintenance of this bureau, amounting to $6,000, which has enabled the Franklin Institute in charge of the Bureau to continue the work originally provided for, and observations are being made in the different counties of the Commonwealth relative to the atmospheric pressure, temperature, precipitation, wind, and other meteorological phenomena. It was evidently the purpose of those who had the original Act introduced to favor the agriculturists of the State by adopting a system whereby weather forecasts regarding storms and frosts could be given, or these phenomena predetermined in such a way as to be of benefit to this class of the population. Similar bureaus exist in some of the other states and they are generally in charge of an officer of the National Weather Service Bureau and work in harmony with the National Bureau. We are unable to determine to what extent the Bureau has been of service to the people of this State. It would seem proper, however, if it is to continue, that it should be placed in charge of one of the departments of the State government. It is somewhat remarkable that the present Bureau should be at all connected with this Department, and yet the Department exerts no control whatever over it. No supplies can be ordered, no instruments purchased, no action of any kind taken, no jurisdiction assumed, except by direction of the Franklin Institute. The Bureau is, therefore, practically a part of the Franklin Institute and subject entirely to its control, the Department having nothing to do with it except as herein indicated. The report of the Institute, with reference to the Bureau, is submitted herewith.

The Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts.

Hall of the Franklin Institute, Philadelphia, December 26, 1893.

To the Hon. Thos. J. Stewart, Secretary of Internal Affairs, Harrisburg, Pennsylvania.

Sir: I have the honor to report the operations of the Pennsylvania State Weather Service for the year ending November 30, 1893.

I enclose the report of Mr. T. F. Townsend, the assistant in charge, embracing details.

I also enclose a copy of a report made by his predecessor, Mr. H. L. Ball, to the U. S. Weather Bureau, showing the effect of the weather upon the crops in Pennsylvania. I hope that the great interest which the subject possesses will justify me in making it a part of my report.

After running the service for two years in an incomplete manner, without an appropriation, our supplies were exhausted and the instruments needed more than usual attention, so that the expenses for the first terms have been greater than the average. It is trusted, however, that an economical administration of the fund will enable us to accomplish designs for the improvement of the service which were interrupted by the failure of the appropriation in 1891.

Mr. H. L. Ball, the assistant detailed by the U. S. Weather Bureau for Pennsylvania, has been transferred to another post. His intelligence and zeal for the interest of the service enabled the committee to accomplish a task almost as difficult as making bricks without straw. We parted with him with regret.

His successor, Mr. T. F. Townsend, returned to his old position, and his services have been very efficient, as always.

The committee has pleasure to acknowledge the facilities afforded by the officers of the railroad companies who were fully sensible of the benefits they derive from the data collected and published by the Service.

The committee also acknowledges the assistance rendered by the newspapers throughout the State in publishing the data collected.

By order of the Committee on Meteorology of the Franklin Institute,

W. P. TATHAM,
Chairman.

WM. H. WAHL,
Secretary.

U. S. Department of Agriculture—Weather Bureau.

Philadelphia, Pa., Dec. 19, 1893.

To W. P. Tatham, Director Pennsylvania State Weather Service:

Sir: I have the honor to transmit the following report of the operations of the Pennsylvania State Weather Service during the year ending November 30, 1893.

But few changes have been made in the observers or location of stations previously established. Some new ones have been added.

Several stations were inspected, instructions given in the work, and corrections made when necessary in the manner of reading the instruments and recording observations.

In most cases the stations were found well maintained and the observers earnest and zealous in the work. As a class their work is very satisfactory and creditable, and some have reached a high standard of excellence.

Previous to the present available appropriation, the inspection of stations could not be made as frequent and as thorough as is necessary for the best interests of the service, but it is now intended to make these inspections as often as is deemed necessary to preserve uniformity and correctness in the work.

Notwithstanding the desire to have each county in the State properly represented in the Service, there are still a few counties in which it has been impossible to secure observers to make continuous reports. Strenuous efforts will be made during the coming year to fill up the gap so as to have complete and reliable data from all parts of the State, so that the student, whether he be a producer or consumer, may intelligently study the existing climatic conditions.

Some new instruments have been purchased and necessary repairs made to those worn and damaged.

Reports of temperature, rainfall, etc., are received from fifty-five stations and rainfall reports only, from 25 additional stations.

These reports are now printed instead of cyclostyled and have an issue of about 700 copies. They are also published in the journal of the Franklin Istitute, which gives them an additional large and desirable circulation.

Special attention has been given to the distribution of both local and Washington forecasts, and the State today stands second to none in the prompt and effectual dissemination of forecasts. In this work the service has been most ably aided by the officers of the prominent railroads in the State. The thanks of the Service are due them for their liberal support in this and other courtesies. At least five hundred railway stations in this State are now receiving and bulletining these reports daily, with a commendable promptitude. It is intended

to extend this system when practicable, along the lines of the shorter roads. Another system of distribution is being introduced by wiring the forecasts to postmasters, who print them on large postal cards by logotypes and mail them to postoffices that can be reached at an early hour, where they are posted for the benefit of the public.

The display of weather flags has been continued at a large number of stations, and this popular method of signaling forecasts will be continued and extended as widely as possible.

The "Weekly Crop Reports," containing the effects of the weather conditions on the staple crops of the State, were well maintained during the past season. Their popularity, constantly on the increase because of their reliability and practical information, will be an incentive for renewed efforts during the coming season to meet the demand for them that may be anticipated. These reports, beside being bulletined, are copied in the leading newspapers of the State and extracts taken from them and published by the press generally.

A copy of the report upon the weather crop season of 1893, by my predecessor, Mr. H. L. Ball, made to the Chief of Weather Bureau, Washington, D. C., accompanies this report.

Mr. Ball was recently assigned to duty in another state, and the present incumbent returned to assist the Meteorological Committee of the Franklin Institute in the conduct of this service.

The Chief of the National Weather Bureau continues his encouragement and valuable aid, and I anticipate the same liberal support from the corps of voluntary observers and crop correspondents that has been accorded in the past.

Very respectfully,
T. F. TOWNSEND,
L. F. O. and Assistant in Charge.

The Weather Crop Season.

Since at least one of the staple crops of Pennsylvania is seeded in the fall, it is necessary, in order to obtain a clear and comprehensive view of the crop season of any year, that a glance be taken at the weather conditions of the preceding winter. This observation is especially true of the season of 1893, for the reason that this single crop—wheat—was only one whose yield approached or exceeded the "average." Rapidly sketching the fall and winter of 1892-3, we see that the months of September and October were unusually dry, unfavorable to germination, though little if any injury resulted. At the close of November the wheat was said to be in good condition. From December 20, to January 20, an almost unprecedented period obtained. Fortunately the ground was well covered with snow and

the grain, except in some portions of the low-lying valleys was well protected. February was a succession of storms, while March was mild and had but little snow.

At the close of March some little farming had been done in the southern counties. Wheat looked well but had made small growth. Spring was late and on the first of May snow banks still lay in places in the northern counties. Plant growth had been greatly retarded by the cold, wet weather, but as yet no serious injury had been done. A large acreage of potatoes and some corn and oats had been planted in April, but had not sprouted well. The week ending May 8, was still more unfavorable and the continuous rains brought farm work to a standstill. Spring seeding was greatly delayed, but little corn or potatoes had been planted and much ground was still unprepared. In the northern counties, spring had scarcely more than appeared. However, grass and winter grain were in good condition, with some local complaints of having been drowned out. The second week of May was one of sunshine and warmth, and consequent vigorous activity in farming operations. Oats sowing and potato planting were about finished and corn planting well under way. Grain and grass were growing finely. In the more northern counties, operations were of course not so advanced but everything was favorable. During the third week of May disastrous floods occurred in the northwestern counties and a terrible hailstorm in the vicinity of Pittsburg. In all except the southeastern counties, the wet weather had retarded farm work; but little corn had been planted and much land was yet to be prepared. In the southeastern counties the crops, though still backward, were in a highly favorable condition. Normal weather conditions, during the fourth week of May were on the whole beneficial to crops, though the effect of the backward spring was still felt and germination of crops slow.

With the advent of June was ushered in one of the severest drouths ever known in Pennsylvania. The need of rain was not seriously felt until the middle of the month. Up to this time, crops made fairly good progress considering the bad effects following a late spring, and the ravages of insects. The wheat crop had sufficiently grown to be beyond serious danger; and, owing to its hardy growth, the result of a favorable winter, was able to withstand the ill effects of a drouth. Corn, potatoes, and especially grass, suffered severely and their growth was retarded. Fruit also felt the drouth, and frequent and loud complaints were made of it falling off. Local rains near the close of the month greatly benefited all crops, though in many counties the drouth continued unabated. A great deal of hay was made, but the yield except from clover, was generally light. This crop started out with excellent prospects, but was shortened by the drouth.

July opened with unfavorable weather for farming operations, but

the rains and cool weather benefited the crops, especially corn, potatoes and tobacca, though too late to be of much benefit to grass. During the first three weeks of July, the rainfall was light and badly distributed. Local showers brought relief to some sections, but in the northern central counties and in those in the mountains along the Maryland line the drouth was unbroken, and crops suffered greatly. Several local storms occurred doing considerable damage. At the close of the month, rain was badly needed in all sections and crops of all kinds were suffering. The wheat had been harvested under generally favorable conditions and with a satisfactory yield. A special report upon the tobacco crop showed that the acreage was below the average. The early planting set well, but was stunted in growth. The general opinion indicated about one-half an average yield.

The long continued drouth was partially relieved in Eastern Pennsylvania by the heavy showers of the 19th and 20th, and the heavy rains on the night of the 23d of August. The storm of the 23d, was accompanied by high winds which prostrated corn and blew off great quantities of fruit. Again on the 28th a severe storm passed over the State, and the accompanying rains effectually broke the drouth. Corn, in every section of the State, was leveled and badly tangled. The rains came too late to be of material benefit to the corn and tobacco, but wonderfully improved pastures which before were dry and brown. However, late planted corn improved under the more favorable weather conditions, and both this and the potato crop, was better than was expected. In some sections of the tobacco districts the crop was so poor it was ploughed under for fertilizer.

Fall seeding began about the first of September and was completed under favorable weather conditions. Corn cutting, owing to the badly tangled stalks, was slow and laborious. The irregularity in the growth of the tobacco crop, made the cutting a longer operation than usual, and some fields were uncut as late as the 25th of the month.

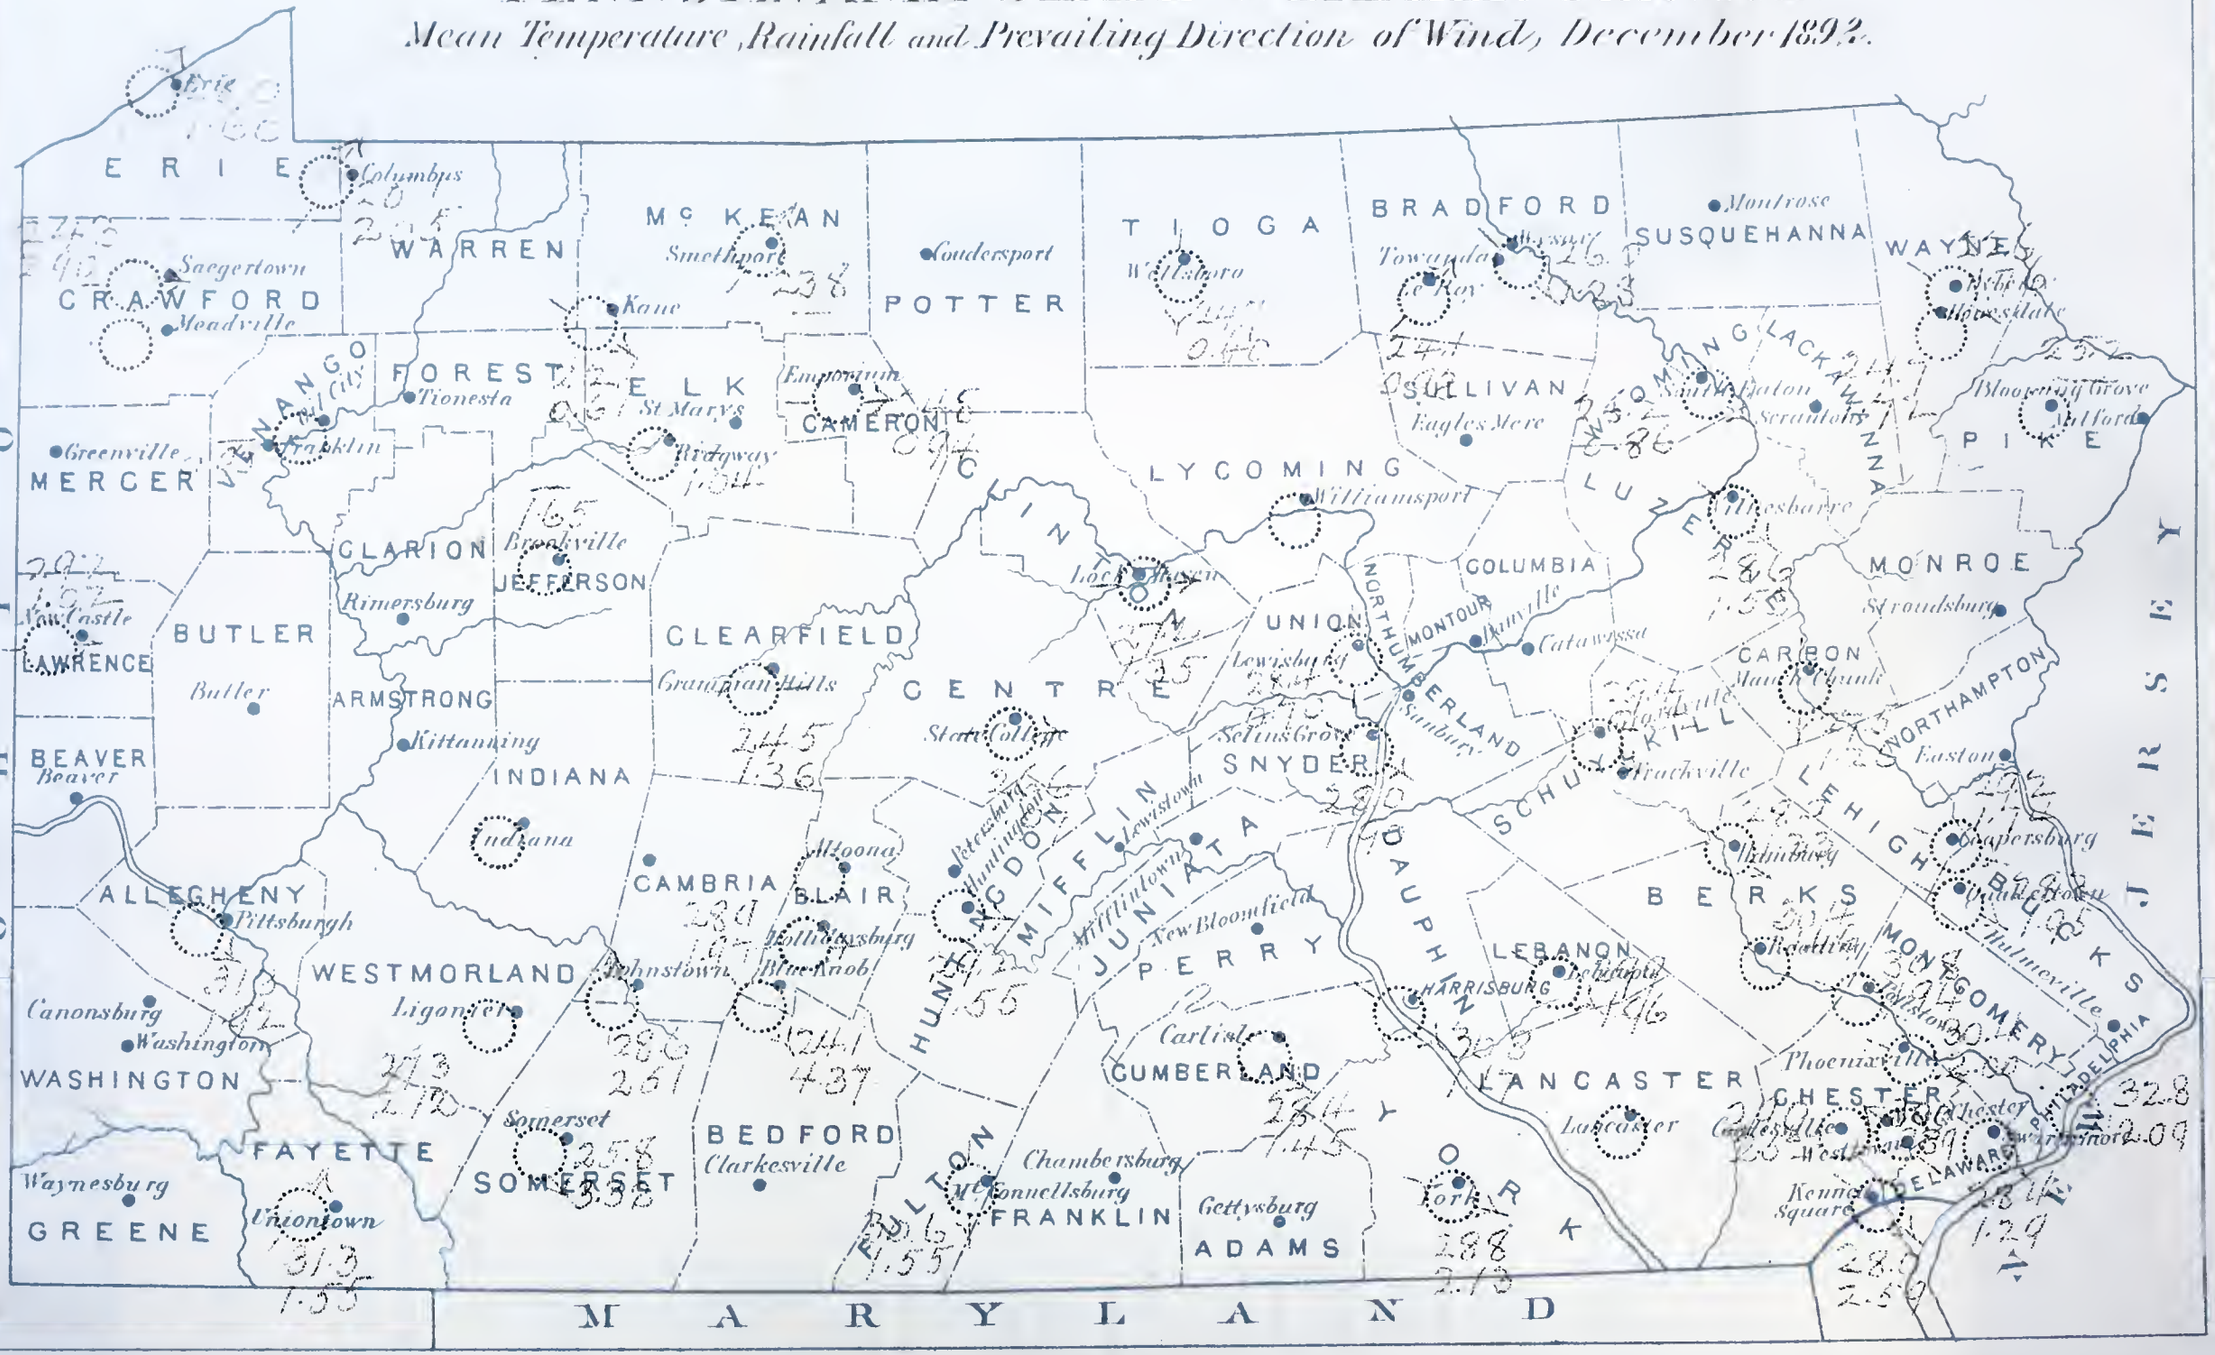
Summarizing the conditions at the close of the season, it may be said that on the whole the crops yielded better than was expected, considering the unusually unfavorable season. Excepting wheat, no crop approached an "average" yield, and most fell far below. Buckwheat seems to be the poorest crop of the season, and while potatoes were light, they were of fine quality. Corn, oats, hay and fruit all suffered too severely from drouth, storms and insects, to make a full average yield.

(Signed.) H. L. BALL,
Observer in Charge.

Philadelphia, Pa., October 28, 1893.

PENNSYLVANIA STATE WEATHER SERVICE.

Mean Temperature, Rainfall and Prevailing Direction of Winds, December 1892.



PENNSYLVANIA STATE WEATHER SERVICE BULLETINS.

[*Prepared under direction of the Committee on Meteorology of the Franklin Institute.*]

MONTHLY WEATHER REVIEW FOR DECEMBER, 1892.

Hall of the Franklin Institute, Philadelphia, December 31, 1892.

General Remarks.

Until the 20th., the weather was mild and pleasant. Very little freezing weather has occurred and the lack of snow was not injurious to the winter grain. During the third decade a protracted cold spell set in and continued through the month. Snow covered the ground, in most places, to a depth sufficient to protect grain.

The warmest days were the 7th and 8th., and the coldest the 27th, 28th and 29th.

Precipitation occurred on many days, but was generally light and the average for the month was considerably below the usual amount.

Following will be found a comparative statement of the monthly means of temperature and rainfall for each December since the establishment of the State Service, and a statment of the yearly departure at three stations. This latter is of value as showing whether or not there has been received during the year, as a whole, a greater or less amount of temperature and rainfall than is usually received.

Mean Temperature and Departure from Normal.

December, 1887, mean, 31.5, 1.5 degrees above normal.
December, 1888, mean, 32.6, 2.6 degrees above normal.
December, 1889, mean, 39.3, 9.3 degrees above normal.
December, 1890, mean, 27.5, 2.5 degrees below normal.
December, 1891, mean, 38.6, 8.6 degrees above normal.
December, 1892, mean, 27.9, 2.1 degrees below normal.

From January 1, 1892, to December 31, 1892, the deficiency in temperature at Philadelphia was 160 degrees, at Erie 359 degrees and at Pittsburg, 334 degrees; showing a cooler year than is usual.

Mean Precipitation.

December, 1887, 3.53 inches.
December, 1888, 3.14 inches.
December, 1889, 2.77 inches.
December, 1890, 3.97 inches.
December, 1891, 4.09 inches.
December, 1892, 1.68 inches.

From January 1, 1892 to December 31, 1892, the deficiency in precipitation at Philadelphia was 5.89, at Harrisburg, 7.18, Pittsburg, 4.91 and at Erie, 1.15 inches; showing considerably less than the usual amount.

Temperature.

The mean temperature for December, 1892, was 27.9 which is 2 degrees below the normal, and 10.7 below the corresponding month of 1891.

The mean of the daily maxima and minima temperatures, 34.6 and 21.0, gives an average daily range of 13.6 and a monthly mean or 27.8.

Highest monthly mean, 33.2 degrees at Philadelphia, (Centennial avenue.)

Lowest monthly mean, 22.1 degrees at Kane.

Highest temperature recorded during the month, 70.0 degrees on the 7th., at Pittsburg.

Lowest temperature, minus 13.0 degrees on the 27th., at Ligonier.

Greatest local monthly range, 82.0 degrees at Ligonier.

Least local monthly range, 43.0 degrees at Honesdale.

Greatest daily range, 37.0 degrees at Saegertown, on the 30th and 31st.; Columbus on the 30th., and Ligonier on the 27th.

Least daily range, 1.0 degree at Blue Knob, on the 13th., and Salem Corners on the 1st

Barometer.

The mean pressure for the month, 30.11 is about .05 inch above the normal.

At the United States Weather Bureau Stations, the highest observed was 30.63 at Pittsburg on the 11th, and the lowest 29.52 at Erie on the 7th.

Precipitation.

The average precipitation 1.69 inches for the month, is a deficiency of 1.31 inches.

The largest totals in inches were Blue Knob, 4.37; Somerset, 3.32 and Seagertown 2.90 inches.

The least were Wellsboro, 0.40; Kane, 0.61 and Lewisburg, 0.70 inches.

The greatest amount of snowfall occurred at Blue Knob and Saergtown, 2.90 inches.

The least were Wellsboro, 0.40; Kane, 0.61 and Lewisburg, 0.70 inches.

The greatest amount of snowfall occurred at Blue Knob and Saegertown.

Wind and Weather.

The prevailing wind was from the northwest.

Average number: Rainy days, 9; clear days, 7; fair days, 9; cloudy days, 15.

Miscellaneous Phenomena.

Thunder.—Emporium, 8; Coatesville, 8; Phoenixville, 8; Smethport, 5; Philadelphia, (Centennian Avenue, 8;) Columbus, 8.

Hail.—Grampian, 18, 20, 24; Lancaster, 13; York, 13.

Snow.—Blue Knob, 4, 9, 11, 18, 20, 21, 22, 23, 24, 25, 31; Hollidaysburg, 14, 20, 23, 24, 25, 31; L Roy, 4, 13, 20, 23, 25, 28, 29, 30; Johnstown, 10, 11, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, 31; Emporium, 10, 11, 13, 15, 18, 19, 21, 22, 23, 25, 26, 30, 31; East Mauch Chunk, 13, 20, 25; State College, 11, 13, 18, 20, 23, 26, 30; West Chester, 13, 20, 21; Coatesville, 13, 17, 20, 25, 31; Kennett Square, 13, 20, 25, 31; Phoenixville, 13, 20, 31; Grampian, 11, 13, 18, 20, 23, 24, 25, 31; Lock Haven, 10, 12, 13, 17, 19, 22, 25; Saegertown, 11, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27; Carlisle, 13, 20, 25, 31; Uniontown, 20, 25; McConellsburg, 20, Huntingdon, 13, 20, 31; Lancaster, 13; New Castle, 11, 18, 19, 20, 21, 23, 25, 26, 31; Lebanon, 11, 13, 20, 25, 31; Coopersburg, 11, 14, 20, 24, 25, 31; Drifton, 20; Wilkes-Barre, 6, 13, 14, 17, 20, 21, 23, 24; Pottstown, 13, 20, 25, 31; Philadelphia, 13, 19, 20, 23, 25, 31; (Centennial Avenue,) 13, 19, 20, 23, 24, 25, 31; (Haverford Street,) 13, 14, 20, 25, 31; Girardville, 13, 19, 20, 22, 24; Selins Grove, 1, 2, 3, 4, 5, 6, 10, 11, 12, 16, 18, 27, 28, 29, 30, 31; Somerset, 10, 18, 20, 22, 24, 29, 31; Wellsboro, 4, 10, 11, 15, 18, 20, 23, 28; Lewisburg, 22, 26, 28; Columbus, 18, 19, 20, 21, 22, 23, 24, 25, 29; Dyberry, 1, 2, 3, 4, 11, 18, 21, 25; Honesdale, 13, 25; Ligonier, 10, 19, 21, 23; South Eaton, 4, 20, 23, 27, 28, 29, 30; York, 13, 17, 20, 24, 25, 26, 29, 31; Bloomsburg, 3, 6, 11, 13, 18, 20, 23, 24, 25, 26, 29, 30, 31.

Sleet.—Blue Knob, 6, 13, 14, 15; Hollidaysburg 14; Emporium, 3, 13,; Coatesville, 13, 14; Lock Haven, 13, 19, 22, 24; Lancaster, 13; New Castle, 31; Coopersburg, 3; (Haverford Street), 13; Dyberry, 13; York, 13.

Aurora.—Phoenixville, 14; (Centennial Avenue,) 4.

Coronae.—Emporium, 1, 3, 5, 8, 26, 30; Saegertown, 1, 27, 28; Lebanon, 1, 16, 26, 27, 30; (Centennial Avenue,) 1; (Haverford Street,) 1; Lewisburg, 31; Dyberry, 3, 9, 27. 30.

Solar Halo.—Coatesville, 30; Huntingdon, 30; Lebanon, 16; Philadelphia, 6, 16, 23; (Centennial Avenue,) 16; Dyberry, 16.

Lunar Halo.—Quakertown, 3, 30; Emporium, 30; State College, 29, 30; West Chester, 30; Phoenixville, 27, 30; Lock Haven, 21, 23; Saegertown, 5; Carlisle, 1, 2, 5, 28, 30; Harrisburg, 27 ,30; Lebanon, 27, 30; Philadelphia, 2, 27, 30; Somerset, 28, 29, 30; Dyberry, 27, 30; York, 30.

MONTHLY WEATHER REVIEW FOR JANUARY, 1893.

Hall of the Franklin Institute, Philadelphia, January 31, 1893.

General Remarks.

January, 1893, will long be remembered. The cold spell, left over from December, continued with increasing intensity until the twentieth. While other years have given lower temperatures, the records do not show such long continued cold as this. Fortunately, the ground was covered with snow, and winter grain did not suffer severely. The observer in Snyder county says wheat is not doing well on account of alternate thawing and freezing after the twentieth of the month. Elsewhere the grain is in fairly good condition.

The warmest weather occcurred between the twenty-sixth and the twenty-ninth, and the coldest between sixteenth and eighteenth.

The monthly precipitation was below the usual amount and was well distributed.

Beginning with this month, the monthly normals of temperature and rainfall will be those recently obtained from the combined records of forty-three stations, the records at each station covering periods from ten to one hundred years.

These computations include the year 1892, and cannot fail to give very nearly if not quite the true normal.

Thus you see that the average or normal January temperature for the whole State is 27.5 degrees, and the precipitation 3.43 inches. These figures furnish reliable datum points from which to make comparisons of the temperature and rainfall of the current months. The data from each station will be published in full as soon as possible and will be furnished all persons interested.

Mean Temperature and Departure from Normal.	Mean Precipitation.
Jan., 1888, mean, 22.1 degrees; 5.4 degrees below normal.	4.19 ins.
Jan., 1889, mean, 31.9 degrees; 4.4 degrees above normal.	3.54 ins.
Jan. 1890, mean, 37.7 degrees; 10.2 degrees above normal.	3.04 ins.
Jan. 1891, mean, 30.6 degrees; 3.1 degree above normal.	3.64 ins.
Jan. 1892, mean, 26.3 degress; 1.2 degrees below normal.	4.77 ins.
Jan. 1893, mean, 19.3 degrees; 8.2 degrees below normal.	2.85 ins.

From January 1 to January 31, 1893, the deficiency in temperature at Philadelphia was 253 degrees; Pittsburg, 253 degrees, and Erie, 264 degrees.

From January 1, to January 31, 1893, the deficiency in precipitation at Philadelphia was 0.79; Pittsburg, 0.87, and Erie, 1.12 inches.

Temperature.

The mean temperature for January, 1893, was 19.3 degrees, which is 8.3 degrees below the normal, and 7.0 degrees below the corresponding month of 1892.

The mean of the daily maxima and minima temperatures, 26.8 and 11.2, gives an average daily range of 15.6, and a monthly mean of 19.0.

Highest monthly mean, 24.4 at Philadelphia (Centennial Ave.).

Lowest monthly mean, 13.3 at Saegertown.

Highest temperature recorded during the month, 57.0 on the 28th at Pittsburg.

Lowest temperature, minus 25.0 on the 15th at Saegertown.

Greatest local monthly range, 74.0, at Saegertown.

Least local monthly range, 49.0, at Harrisburg.

Greatest daily range, 40.0, at Hollidaysburg on the 26th.

Least daily range, 0.0, at Columbus on the 2d.

Barometer.

The mean pressure for the month, 30.00, is about one-tenth inch below the normal. At the United States Weather Bureau stations the highest observed was 30.47 at Philadelphia on the 28th, and the lowest 29.09 at Erie on the first.

Precipitation.

The average precipitation, 2.85 inches for the month, is 0.58 inch below the normal.

The largest totals in inches (including melted snow) were Wellsboro, 4.82; Blue Knob, 4.60, and Salem Corners, 4.43.

The least were Altoona, 1.65; McConnellsburg, 1.71; York, 2.76, and State College, 1.94.

The snowfall average for the State was about 18.0 inches.

The largest totals in inches were Blue Knob, 40.5; Grampian, 39.0; Columbus, 32.0; Saegertown, 33.8, and New Castle, 27.0.

Wind and Weather.

The prevailing wind was from the northwest.

Average number.—Rainy days, 12; clear days, 7; fair days, 10; cloudy days, 14.

Miscellaneous Phenomena.

Hail.—Emporium, 1; Grampian, 1; Dyberry, 1.

Snow.—Blue Knob, 1 to 15, 19, 20, 22 to 25. Hollidaysburg, 2 to 5, 9, 12, 14, 23, 24, 30. Wysox, 2, 5, 9, 12, 24, 28 to 31. LeRoy, 1, 3, 5, 6, 7 to 13, 15, 25, 27, 30, 31. Forks of Neshaminy, 2 to 6, 9, 10, 12, 14, 15 19, 23, 24, 25, 31. Johnstown, 2 to 16, 19, 20, 22 to 25, 27, 30, 31. Emporium, 1 to 10, 12, 14, 15, 19, 21 to 25, 27, 30. E. Mauch Chunk, 5, 6, 9, 10, 12, 15, 23, 31. State College, 1, 4, 5, 7, 9, 12, 14, 15, 17, 19, 21, 22 24, 30, 31. West Chester, 1, 5, 6, 9, 10, 12, 15. Coatesville, 4, 5, 6, 9, 10, 12, 14, 15, 19, 23. Kennett Square, 5, 6, 9, 12, 14, 19. Phoenixville, 5, 6, 8, 9, 12, 14. Grampian, 1, 2, 5, 9, 12, 19, 23, 25, 30. Lock Haven, 1, 5, 9, 12, 14, 22, 23, 30. Bloomsburg, 1, 3, 5, 9, 10, 12, 15, 19,

23, 24, 25, 30, 31. Saegertown, 2 to 12, 13, 15, 18, 19, 20, 22 to 25, 30. Carlisle, 9, 12, 14. Uniontown, 5, 9, 12, 14, 15. McConnellsburg, 4, 5, 12. Huntingdon, 1, 5, 7, 9, 12, 14, 15, 25, 30, 31. Lancaster, 4, 5, 9, 12, 14. NewCastle, 1, 2, 4 to 7, 9, 10, 12, 15, 19, 23, 25, 30. Lebanon, 1, 5, 6, 9, 12, 14, 15, 19, 23. Coopersburg, 1, 5, 6, 9, 10, 12, 14, 15, 19, 23, 31. Drifton, 3, 5, 6, 10, 12, 23, 31. Wilkes-Barre, 1, 5, 6, 10, 12, 15, 23, 25, 30. Kane, 1, 8, 17, 18, 24, 28, 30. Pottstown, 6, 10, 12, 15. Philadelphia, (Centennial avenue), 4, 5, 6, 9 to 12, 14, 15, 19, 23, 24. Girardville, 5, 6, 9, 10, 12, 15, 16, 25, 30. Somerset, 2, 3, 5, 6, 9, 12, 15, 19, 30. Wellsboro, 1, 3, 5, 6, 10, 12, 19, 25, 30, 31. Lewisburg, 6, 12, 25. Columbus, 2 to 5, 7 to 14, 18, 19, 25, 29. Dyberry, 1, 5, 6, 9, 10, 12, 14, 15, 25, 28. Honesdale, 1, 5, 9, 12, 14, 24, 27. South Eaton, 5, 6, 9, 10, 12, 25. York, 4, 5, 9, 11, 14, 17. Selins Grove, 1, 6, 9, 10, 23, 30.

Sleet.—1, 2, 25, 27, 29.

Solar Halo.—5, 14, 18.

Lunar Halo.—18, 24 to 26, 29, 31.

MONTHLY WEATHER REVIEW FOR FEBRUARY, 1893.

Hall of the Franklin Institute, Philadelphia, February 28, 1893.

General Remarks.

During the first decade the snow in the southern counties nearly all disappeared. After the thirteenth the ground was well covered until the close of the month.

River ice broke up about the 15th. After that date the large rivers were generally free. General and heavy snow fell on the 17th and 18th, and a severe storm, accompanied by gales, thunder and lightning and driving snow, occurred on the 19th. These storms were followed by another heavy fall of snow on the 21st and 22d. High winds drifted the snow very badly and caused serious delay to railroads.

The month, as a whole, was intensely disagreeable. Precipitation occurred on fourteen days and but six days were clear. Warm rains partially melted the snow and made roads slushy and muddy.

The warmest part of the month occurred in the second decade and the coldest days were the 20th and 21st.

Rain and snow storms followed each other in rapid succession, with scarcely more than one intervening day of fair weather.

Every station, except Wysox in Bradford, reports an excess of precipitation, and the monthly average is the greatest since the establishment of the Service.

The normal temperature for the month is 29.1 degrees, nearly, and the normal precipitation 3.19 inches.

Mean Temperature and Departure from Normal.

February, 1888, mean, 28.4 degrees; 1.0 below normal.
February, 1889, mean, 23.0 degrees; 6.0 below normal.
February, 1890, mean, 37.1 degrees; 8.0 above normal.
February, 1891, mean, 34 9 degrees; 6.0 above normal.
February, 1892, mean, 31.7 degrees; 2.6 above normal.
February, 1893, mean, 27.4 degrees; 1.7 below normal.

Mean Precipitation.

February, 1888, 2.50 inches.
February, 1889, 1.96 inches.
February, 1890, 4.32 inches.
February, 1891, 4.61 inches.
February, 1892, 1.75 inches.
February, 1893, 5.92 inches.

From January 1, to February 28, 1893, the deficiency in temperature at Philadelphia was 320 degrees; Pittsburg, 299 degrees, and Erie, 364 degrees.

From January 1, to February 28, 1893, the excess in precipitation at Philadelphia was 0.83; Pittsburg, 1.16; and Erie, 1.32 inches.

Temperature.

The mean temperature for February, 1893, was 27.4 degrees, which is nearly 1.7 degrees below the normal, and 4.3 degrees below the corresponding month of 1892.

The mean of the daily maxima and minima temperatures, 35.6 and 19.0 deegrees, gives an average daily range of 16.6 degrees and a monthly mean of 27.3 degrees.

Highest monthly mean, 34.4 degrees, at Uniontown.

Lowest monthly mean, 20.5 degrees, at Kane.

Highest temperature recorded during month, 60 degrees on the 15th, at Aqueduct.

Lowest temperature, minus 16 degrees on the 21st, at Saegertown.

Greatest local monthly range, 63 degrees, at Saegertown, Smethport, Aqueduct and York.

Least local monthly range, 39 degrees, at Kilmer.

Greatest daily range, 51 degrees, at Columbus on the 27th.

Least daily range, 1 degree, at Salem Corners on the 2d and 22d.

Barometer.

The mean pressure for the month, 30.15, is about .05 above the normal. At the U. S. Weather Bureau stations the highest observed was 30.87 at Pittsburg and Erie on the 4th, and the lowest, 29.25, at Harrisburg on the 19th.

Precipitation.

The average precipitation, 5.92 inches for the month, is 2.73 inches above the normal. The largest totals in inches (including melted snow) were Mahoning, 9.28; Clarion, 9.26; Somerset, 8.38; Saegertown, 8.23, and Oil City, 8.11 inches. The least were Wysox, 2.92; Altoona, 3.21, and Le Roy, 3.86 inches.

Wind and Weather.

The prevailing wind was from the northwest.

Average Number.—Rainy days, 14; clear days, 6; fair days, 8; cloudy days, 14.

Miscellaneous Phenomena.

Thunder Storms.—19, 20.

Sleet.—1, 2, 3, 6, 7, 9, 10, 11, 13, 17, 22, 28.

Hail.—1, 2, 6, 10, 26, 28.

Snow.—1, 2, 3, 4, 6, 7, 9, 10, 11, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 28.

Aurorae.—4, 5, 6, 12, 15, 28.

Coronae.—4, 8, 23, 24, 27, 28.

Solar Halo.—5, 12, 14, 16, 19, 21, 23, 25, 27.

Lunar Halo.—26, 27.

†U. S. Weather Bureau Stations.

MONTHLY WEATHER REVIEW FOR MARCH, 1893.

Hall of the Franklin Institute, Philadelphia, March 31, 1893.

General Remarks.

The weather during March was generally mild, though there was more than the usual amount of cloudiness.

The mean temperature was slightly below the normal, as was also the precipitation. The normal temperature of the State for March is 35.7 degrees, and the normal precipitation 3.14 inches.

Very little snowfall occurred, and that which fell melted away, except where drifted. In elevated districts snow drifts remained until nearly the end of the month.

Some farming was done in the southern counties, but not extensively. The weather at the end of the month was favorable for winter grain which was reported in good condition through the southern counties. In other sections but little growth was made.

Mean Temperature and Departure from Normal.

March, 1888, mean, 31.1 degrees; 4.6 below normal.
March, 1889, mean, 38.9 degrees; 3.2 above normal.
March, 1890, mean, 33.4 degrees, 2.3 below normal.
March, 1891, mean, 34.1 degrees; 1.6 below normal.
March, 1892, mean, 32.0 degrees; 3.7 below normal.
March, 1893, mean, 34.7 degrees; 1.0 below normal.

Mean Precipitation.

March, 1888, 3.55 inches.
March, 1889, 2.90 inches.
March, 1890, 5.15 inches.
March, 1891, 5.10 inches.
March, 1892, 4.14 inches.
March, 1893, 2.52 inches.

From January 1 to March 31, 1893, the deficiency in temperature at Philadelphia was 321 degrees; Pittsburg, 290 degrees, and Erie, 363 degrees.

January 1 to March 31, 1893, the excess in precipitation at Philadelphia was 0.25; Pittsburg, deficiency of 0.54, and Erie, excess of 0.26 inch.

Temperature.

The mean temperature for March, 1893, was 34.7 degrees, which is 1 degree below the normal and 2.7 degrees above the corresponding month of 1892.

The mean of the daily maxima and minima temperatures, 43.4 and 26.2 degrees, gives an average daily range of 17.2 degrees and a monthly mean of 34.8 degrees.

Highest monthly mean, 40.1 degrees, at Pittsburg.

Lowest monthly mean, 28.6 degrees, at Dyberry.

Highest temperature recorded during the month, 74 degrees, on the 24th at Ligonier.

Lowest temperature, 3 degrees, on the 5th at Kane.

Greatest local monthly range, 64 degrees, at Ligonier.

Least local monthly range, 38 degrees, at Bloomsburg.

Greatest daily range, 46 degrees, at Somerset on the 29th.

Least daily range, 0, at Hamburg on the 23d.

Barometer.

The mean pressure for the month, 30.07, is about .05 above the normal. At the U. S. Weather Bureau stations the highest observed was 30.63, at Harrisburg on the 29th, and the lowest 29.40, at Philadelphia on the 4th.

Precipitation.

The average precipitation, 2.52 inches for the month, is deficient 0.62 of an inch. The largest totals in inches, including melted snow, were Wellsboro, 5.09; Girardville, 4.82, and Salem Corners, 4.32 inches.

The least were Saltsburg, 0.71; Greensburg, 0.86; Uniontown, 0.98, and Pittsburg, 1.17 inches.

The greatest amount of snowfall for the month was 14 inches at Meadville and Girardville.

Wind and Weather.

The prevailing wind from the northwest.

Average Number.—Rainy days, 11; clear days, 9; fair days, 9; cloudy days, 13.

Miscellaneous Phenomena.

Thunder Storms.—9, 14, 24.

Hail.—14, 22, 23, 32.

Snow, 1, 2, 3, 4, 5, 7, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, 30.

Solar Halo.—6, 8, 14, 25, 27, 30.

Lunar Halo.—2. 21, 24, 25, 26, 27, 29.

MONTHLY WEATHER REVIEW FOR APRIL, 1893.

Hall of the Franklin Institute, Philadelphia, April 30, 1893.

General Remarks.

With this issue the State Weather Service begins again its monthly review, following the form adopted when the service was first organized in 1887. The review was regularly issued in printed form until May, 1891, when it was discontinued for want of funds. After that, and until the present, the data collected by the observers were published by a duplicating process, which, though laborious and utterly unfitted for that purpose, was the best at hand, and served little more than to preserve the summaries of the observations taken, in the hope that eventually they could be printed in a form suitable to the many purposes for which designed. If possible, the reviews issued by duplicating process will be printed in the usual form.

A series of charts, showing by isothermal lines the normal temperature of each month, will begin with April and be continued through the year. These isotherms were drawn by an expert, under the direction of the Chief of the United States Weather Bureau, from all available data, extending from the earliest known records down to and including the year 1892.

The normal temperature of Pennsylvania for April is about 48.0 degrees, and the normal precipitation, 3.27 inches. The temperature of the current month was slightly below the normal. The rainfall was unequally distributed, but was above the normal at all stations.

From January 1, 1893, to April 30, 1893, the deficiency in temperature at Philadelphia was 306 degrees, at Erie 356 degrees, and at Pittsburg 274 degrees.

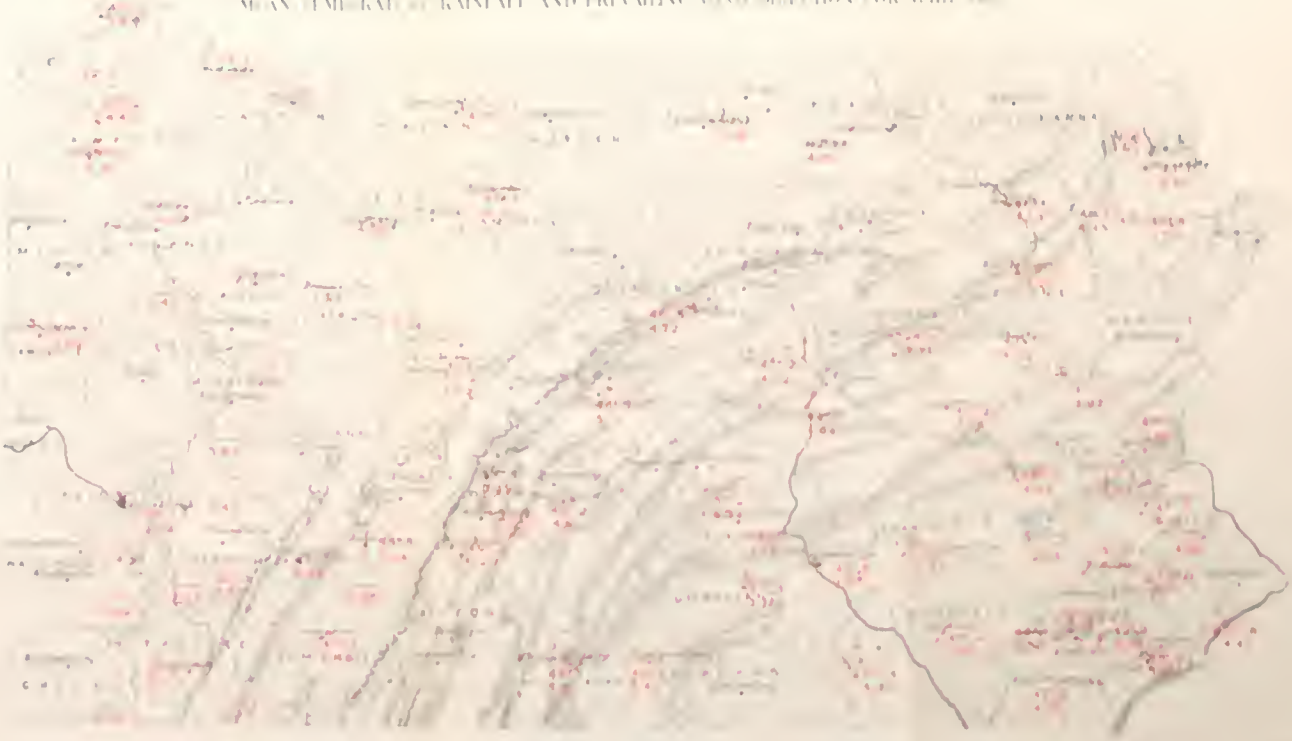
For the same period the departure in precipitation was, at Philadelphia, an excess of 1.86, Erie 1.28, and Pittsburg 1.63 inches.

	Mean Temperature. Degrees.	*Mean Precipitation. Inches.*
April, 1888,	46.5	2.52
1889,	48.7	4.50
1890,	48.7	3.46
1891,	49.8	2.08
1892,	47.0	2.04
1893,	47.6	4.74

Temperature.

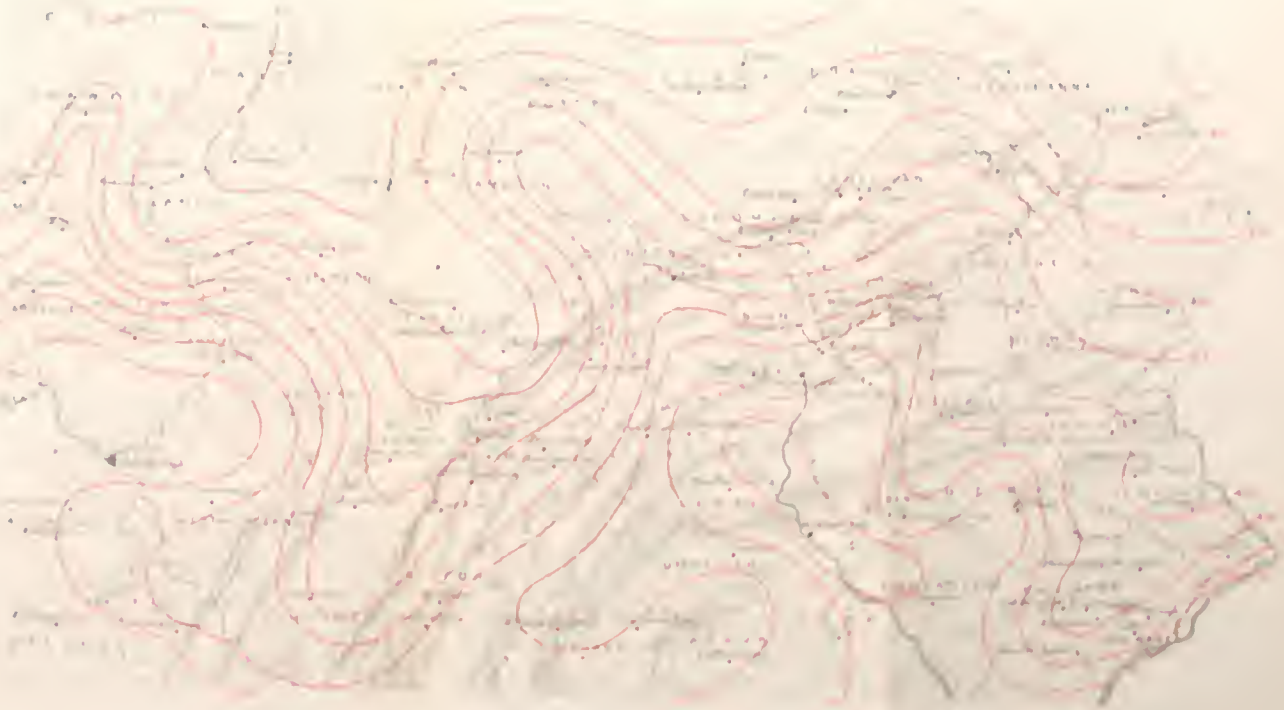
The mean temperature for April, 1893, was 47.6 degrees, which is 0.4 degree below the normal, and 0.6 above the corresponding month of 1892.

The mean of daily maxima and minima temperatures, 57.6 and 37.8 degrees, gives an average daily range of 19.8 degrees, and a monthly mean of 47.7 degrees.



ISOTHERMAL LINES

NORMAL TEMPERATURE OF PENNSYLVANIA FOR APRIL



Highest monthly mean, 53.5 degrees at Altoona.

Lowest monthly mean, 40.1 degrees at Wellsboro.

Highest temperature recorded during the month, 85 degrees on the 8th at Johnstown.

Lowest temperature, 16 degrees on the 16th at Columbus.

Greatest local monthly range, 58 degrees at Hollidaysburg.

Least local monthly range, 38 degrees at Harrisburg.

Greatest daily range, 51 degrees at Hollidaysburg on the 3d.

Least daily range, 1 degree at Blue Knob on the 7th, and at Aqueduct on the 15th and 20th.

Barometer.

The mean pressure for the month, 30.04 is about .04 above the normal. At the United States Weather Bureau Stations the highest observed was 30.51 at Philadelphia on the 6th, and the lowest 29.40 at Erie on the 1st.

Precipitation.

The average precipitation, 4.74 inches for the month, is an excess of 1.50 inches. The largest totals in inches (including melted snow) were Clarion, 6.91; Confluence, 6.37; Blue Knob and Pottstown, 6.20, and Uniontown, 6.11 inches. The least were Reading, 2.95; New Castle, 3.09; Wilkes-Barre, 3.27; Bloomsburg, 3.34, and Altoona, 3.48.

The largest monthly snowfall totals in inches were Le Roy, 7.0; Blue Knob, 6.0; Meadville and Dyberry, 5.0 inches.

Wind and Weather.

The prevailing wind was from the west.

Average Number.—Rainy days, 14; clear days, 7; fair days, 10; cloudy days, 13.

Miscellaneous Phenomena.

Thunder Storms.—Blue Knob, 7th, 8th, 12th, 20th, 29th, 30th; Hollidaysburg, 7th, 20th, 30th; Le Roy, 8th, 20th, 21st; Quakertown, 7th, 8th, 14th; Johnstown, 7th, 8th, 12th, 20th, 30th; Emporium, 7th, 8th, 20th; East Mauch Chunk, 7th; State College, 7th, 8th, 20th, 30th; Coatesville, 14th; Kennett Square, 14th; Phoenixville, 14th; Grampian, 20th; Lock Haven, 20th; Meadville, 7th, 8th; Saegertown, 7th, 8th; Harrisburg, 8th, 20th; Swarthmore, 14th; Chambersburg, 7th; Huntingdon, 7th, 8th; Kilmer, 7th, 8th, 20th, 21st; Lancaster, 14th, 20th; New Castle, 13th, 15th, 20th, 30th; Lebanon, 8th; Coopersburg, 7th, 8th, 14th; Smethport, 7th, 8th; Skippack, 14th; Aqueduct, 7th, 8th, 17th, 21st, 30th; Philadelphia, 7th, 14th; Centennial Avenue, 7th, 14th; Locust Street, 14th; Selins Grove, 7th, 8th, 17th, 18th, 20th, 30th; Somerset, 7th, 8th, 12th, 20th, 29th, 30th; Wellsboro, 7th, 8th, 17th, 20th; Easton, 30th; Lewisburg, 9th, 10th, 17th, 30th; Columbus, 7th, 8th, 20th, 22d; Dyberry, 18th; South Eaton, 8th, 21st; York, 14th, 20th.

Hail.—Blue Knob, 7th, 20th, 22d, 30th; Hollidaysburg, 7th, 20th; Johnstown, 23d; Emporium, 7th, 20th; Kennett Square, 7th; Grampian, 20th; Meadville, 7th; Saegertown, 7th, 8th; Lancaster, 7th; Lebanon, 7th; Girardville, 1st, 23d; Somerset, 30th; Wellsboro, 7th; Dyberry, 8th, 15th, 20th, 23d; South Eaton, 7th, 20th, 22d; Eaton, 10th; York, 7th.

Snow.—Blue Knob, 15th, 17th, 21st, 22d, 23d; Hollidaysburg, 22d; Le Roy, 6th, 7th, 10th, 20th, 22d; Quakertown, 7th, 10th; Johnstown, 15th, 22d, 23d, Emporium, 7th, 15th, 22d, 23d; State College, 7th; Coatesville, 7th; Grampian, 15th, 22d, 23d; Lock Haven, lege, 7th; Coatesville, 7th; Grampian, 15th, 22d, 23d; Lock Haven, 7th; Bloomsburg, 7th; Meadville, 15th, 21st, 22d, 23d; Saegertown, 15th, 22d; Carlisle, 7th; Chambersburg, 22d; Kilmer, 7th; Lancaster, 7th; New Castle, 15th, 22d; Lebanon, 7th; Drifton, 7th; Wilkes-Barre, 7th; Philadelphia, Centennial Avenue, 7th; Girardville, 7th; Selins Grove, 22d; Somerset, 22d; Dyberry, 6th, 7th, 17th, 20th; Honesdale, 7th, 20th.

Frost.—Pittsburg, 2d, 15th, 16th, 22d, 23d; Hollidaysburg, 2d, 3d, 18th, 19th; Quakertown, 11th, 19th, 22d, 23d, 24th; Emporium, 2d, 5th, 9th, 16th, 19th, 26th; East Mauch Chunk, 26th; State College, 2d, 6th, 18th, 19th; Coatesville, 24th; Grampian ,3d, 11th, 18th; Lock Haven, 16th, 18th, 24th, 26th; Bloomsburg, 3d; Meadville, 2d, 5th, 6th, 7th, 9th, 11th, 14th, 15th, 16th, 18th, 19th, 23d; Saegertown, 2d, 5th, 9th, 11th, 15th, 17th, 18th, 19th, 22d, 24th; Chambersburg, 2d, 3d, 7th, 16th; Huntingdon, 1st, 3d, 16th, 18th, 24th; Kilmer, 16th, 18th; New Castle, 1st, 2d, 3d, 5th, 11th, 15th, 16th, 17th, 18th, 19th, 22d, 23d, 24th; Lebanon, 18th; Aqueduct, 18th, 19th, 22d, 24th, 28th; Coopersburg, 7th, 26th; Philadelphia, 24th; Centennial Avenue, 24th; Girardville- 1st, 3d, 5th, 6th, 7th, 8th, 11th, 12th, 13th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22d, 23d, 24th, 26th, 28th; Columbus, 2d, 5th, 6th, 7th, 9th, 11th, 15th, 16th, 17th, 18th, 19th, 23d, 24th, 26th, 28th; Easton, 11th, 19th; York, 16th, 19th, 24th.

Coronae.—Emporium, 24th, 25th; Lebanon, 23d, 24th, 27th, 28th; Dyberry, 24th; York, 1st.

Solar Halo.—Le Roy, 11th, 13th, 14th; Saegertown, 1st, 6th; Harrisburg, 28th; Philadelphia, 6th, 11th, 17th, 19th; Centennial Avenue, 6th, 11th; Wellsboro, 28th; Lewisburg, 16th, 28th.

Lunar Halo.—Lock Haven, 29th; Meadville, 2d; Carlisle, 24th, 28th; Lancaster, 22d, 24th, 28th, 29th; Lebanon, 28th; Philadelphia, 22d; Centennial Avenue, 22d, 24th, 28th; Selins Grove, 21st; Wellsboro, 24th; Dyberry, 24th; York, 24th.

Meteors.—State College, 13th; Meadville, 5th, 8th, 15th, 18th.

Parhelias.—Le Roy, 16th, 28th.

MONTHLY WEATHER REVIEW FOR MAY, 1893.

Hall of the Franklin Institute, Philadelphia, May 31, 1893.

General Remarks.

The normal temperature for May is about 59.3 degrees, and the normal precipitation, 4.09 inches. The following tables will show the departures of both temperature and rainfall during the month of May since the State Service has been in operation.

During the first and second decade the weather was cool, the minimum temperatures nearly occurred during the first ten days, and at most stations in the mountains and in the northern counties the mercury fell to and below the freezing point. More or less heavy frost occurred, but no great damage was reported. The warmest days were the 22d and 23d.

The rainfall was excessive at all stations and was pretty evenly distributed, except in the extreme northwestern and southeastern counties. In the former, exceedingly heavy rains occurred on the 16th; in the latter, the total rainfall was lighter than in any other part of the State. Following are the dates on which excessive precipitation occurred (one inch in one hour or two and one-half in twenty-four hours):

Drifton, 3.10 inches, 24 hours, 4th.
Lancaster, 3.40 inches, 24 hours, 4th.
Lebanon, 3.01 inches, 24 hours, 4th.
Le Roy, 3.16 inches, 24 hours, 4th.
Selins Grove, 3.57 inches, 24 hours, 4th.
Erie, 3.68 inches, 24 hours, 16th.
Meadville, 3.32 inches, 24 hours, 16th.
Saegertown, 3.20 inches, 24 hours, 16th.
Dyberry, 1.25 inches, 30 minutes, 23d.

The heaviest hail storm ever experienced in that vicinity, occurred at Pittsburgh on the 20th, from 3.45 to 3.50 p. m. Hailstones, irregular in form; largest, size of a hen's egg; average, about one inch in diameter. Great damage was done to property in the city, apparently the storm being heaviest there. No serious injury to crops was reported.

From January 1, 1893, to May 31, 1893, the deficiency in temperature at Philadelphia was 353 degrees, at Erie 408 degrees, and at Pittsburg, 359 degrees.

For the same period the excess in precipitation at Philadelphia was 1.81, at Erie 5.76, and at Pittsburg 2.76 inches.

	Mean Temperature. Degrees.	Mean. Precipitation. Inches.
May, 1888,	57.6	4.24
1889,	62.0	5.91
1890,	58.8	6.71
1891,	57.5	2.12
1892,	59.5	5.70
1893,	58.0	5.54

Temperature.

The mean temperature for May, 1893, was 58.0, which is about 1.3 degrees below the normal, and 1.5 degrees below the corresponding month of 1892.

The mean of daily maxima and minima temperatures, 68.8 and 47.0 degrees, gives an average daily range of 21.8 degrees and a monthly mean of 57.9 degrees.

Highest monthly mean, 65.4 degrees at Kilmer.

Lowest monthly mean, 50.9 degrees at Wellsboro.

Highest temperature recorded during the month, 93.0 degrees on the 23d at Kilmer.

Lowest temperature, 26.0 degrees on the 8th at Wellsboro.

Greatest local monthly range, 60 degrees at Hollidaysburg.

Least local monthly range, 44 degrees at West Chester.

Greatest daily range, 57 degrees at Hollidaysburg on the 20th.

Least daily range, 2 degrees at Aqueduct on the 17th and Salem Corners on the 4th.

Barometer.

The mean pressure for the month, 29.91 is about .09 below the normal. At the United States Weather Bureau Stations the highest observed was 30.39 at Harrisburg on the 10th and the lowest, 29.34 at Erie on the 16th.

Precipitation.

The average precipitation, 5.54 inches for the month, is an excess of about one and one-half inches. The largest total in inches (including melted snow) were Blue Knob, 9.20; Drifton, 8.94; Saegertown, 8.89, and Girardville, 8.51. The least were Philadelphia (Weather Bureau), 2.92; Philadelphia (Centennial Avenue), 3.12; Westtown, 3.15, and Philadelphia (Locust Street), 3.37 inches.

Wind and Weather.

The prevailing wind was from the northwest.

Average number—Rainy days, 12; clear days, 11; fair days, 8; cloudy days, 12.

Miscellaneous Phenomena.

Thunder Storms.—Blue Knob, 5th, 12th, 13th, 20th, 23d; Hollidaysburg, 1st, 12th, 20th, 31st; Le Roy, 23d; Quakertown, 1st, 23d; Johnstown, 1st, 5th, 12th, 20th, 31st; Emporium, 23; E. Mauch Chunk, 16th; State College, 1st, 20th, 23d, 31st; Coatesville, 5th, 23d; Kennett Square, 5th, 21st, 23d; Phoenixville, 23d; Grampian, 23d; Lock Haven, 20th, 23d, 31st; Bloomsburg, 31st; Meadville, 1st, 15th, 20th, 31st; Carlisle, 5th, 20th, 23d; Edinboro, 12th, 15th, 20th, 28th, 31st; Chambersburg, 2d, 5th, 13th, 20th, 23d; Huntingdon, 1st, 5th, 20th, 31st; Kilmer, 1st, 5th, 20th, 23d, 31st; Lancaster, 23d; Lebanon, 1st, 13th, 20th, 23d; Coopersburg, 2d; Wilkes-Barre, 1st, 23d; Smethport, 12th, 20th; Easton, 10th, 14th, 23d; Aqueduct, 1st, 5th, 20th, 23d, 31st; Philadelphia, 23d; Centennial Avenue, 5th, 16th, 23d; Locust street, 21st, 23d; Girardville, 3d, 23d; Selins Grove, 5th, 31st; Somerset, 1st, 5th, 12th, 17th, 20th, 21st, 23d, 31st; Wellsboro, 23d, 31st; Lewisburg, 1st, 23d, 30th, 31st; Columbus, 15th, 23d, 31st; Dyberry, 23d, 30th, 31st; Salem Corners, 1st, 24th; Ligonier, 20th; South Eaton, 22d, 30th, 31st; York, 5th, 23d.

Hail.—Blue Knob, 4th; Le Roy, 23d; Edinboro, 15th; Huntingdon, 13th, 31st; Somerset, 5th, 31st; Lewisburg, 23d; Ligonier, 20th.

Snow.—Blue Knob, 4th.

Frost.—Blue Knob, 7th; Hollidaysburg, 7th, 8th, 18th, 19th, 20th; Johnstown, 7th, 8th, 19th, 20th; Emporium, 8th, 9th, 10th, 19th, 20th, 22d; State College, 8th; Coatesville, 8th, 9th, 20th; Kennett Square, 8th; Lock Haven, 19th, 20th; Meadville, 19th; Huntingdon, 7th, 8th, 19th, 20th; Kilmer, 7th, 20th; New Castle, 7th, 19th; Lebanon, 8th; Smethport, 19th, 20th; Girardville, 4th, 8th; Selins Grove, 6th, 8th, 20th; Somerset, 5th, 6th, 7th; Wellsboro, 5th, 7th, 8th, 19th, 20th, 22d, 29th, 31st; Columbus, 8th, 19th; Dyberry, 8th, 20th, 25th; Honesdale, 8th, 20th; York, 7th, 8th.

Aurorae.—Le Roy, 7th; Quakertown, 14th; Coatesville, 13th.

Coronae.—Blue Knob, 27th; Quakertown, 22d; Emporium, 27th; Lebanon, 21st, 22d, 23d, 30th; Philadelphia (Centennial Avenue), 22d, 30th; Dyberry, 19th.

Solar Halo.—Le Roy, 23d, 31st; Quakertown, 13th; Lock Haven, 15th; Philadelphia, 2d, 15th, 23d; Centennial Avenue, 2d, 15th, 23d; Wellsboro, 14th, 24th, 31st; Dyberry, 8th.

Lunar Halo.—Lock Haven, 20th; Meadville, 28th; Carlisle, 21st; Lancaster, 30th.

Meteors.—Meadville, 5th, 8th, 24th.

MONTHLY WEATHER REVIEW FOR JUNE, 1893.

Hall of the Franklin Institute, Philadelphia, Jnne 30, 1893.

General Remarks.

The normal temperature of Pennsylvania for Jnne is abont 68.9 degrees, and the normal rainfall 4.26 inches. June, 1893, is noteworthy because of the wide range in the temperature. The month opened cool, bnt the temperatnre did not vary greatly from the normal until the latter part of the second decade, when the increasing warmth culminated in the fierce heat of the 19th, 20th and 21st. June 20th was perhaps the warmest Jnne day ever recorded. The warm weather was followed by a period of cool weather which continued through the month. As an illustration of the great changes in temperatnre, it may be noted that at Philadelphia the mean temperature for the day on the 20th was 13 degrees above the normal, while on the 26th it was 15 degrees below—a range in mean daily temperatnre of 28 degrees within a week. The period of warm weather closed with generous rains, which were badly needed, none of consequence having fallen within the previous ten days.

The monthly rainfall was below the normal in nearly every section and was especially deficient in the Lehigh Valley, the central northern counties and in the area draining southward into the Potomac river. In these sections the dronth very seriously affected the crops, particularly the hay crop, which was materially shortened. In the Allegheny River Valley and at some stations in Bncks and Montgomery counties the rainfall was above the normal, the excess in the latter section being due to heavy local thunder showers. General rains occurred on the 2d, 6th, 21st to 23d and 25th to 27th, the last two periods giving the greater part of the month's rain.

Excessive precipitation (one inch in one honr or two and one-half inches in twenty-four honrs) was recorded:

Smith's Corner, 2.65 inches, 24 honrs, 22d.

Forks of Neshaminy, 1.44 inches, 0.50 minutes, 22d.

Kennett Sqnare, 1,25 inches, 0.17 minntes, 22d.

From January 1, 1893, to June 30, 1893, the deficiency in temperature at Philadelphia was 333 degrees, at Erie 332 degrees, and at Pittsbnrg 321 degrees.

For the same period the excess in precipitation at Philadelphia was 1.58, at Erie 4.80, and at Pittsbnrg 1.99 inches.

NORMAL TEMPERATURE OF PENNSYLVANIA FOR JUNE

	Mean Temperature. Degrees.	Mean Precipitation. Inches.
June, 1888,	68.6	3.04
1889,	66.5	5.43
1890,	70.3	3.42
1891,	68.7	4.50
1892,	71.7	5.64
1893,	69.6	3.12

Temperature.

The mean temperature for June, 1893, was 69.6 degrees, which is about 0.7 degree above the normal, and 2.1 degrees below the corresponding month of 1892.

The mean of the daily maxima and minima temperatures, 80.7 degrees and 58.8 degrees, gives an average daily range at 21.9 degrees, and a monthly mean of 69.8 degrees.

Highest monthly mean, 76.0 degrees at Kilmer.

Lowest monthly mean, 63.8 degrees at Wellsboro.

Highest temperature recorded during the month, 100 degrees on the 20th at Hamburg, Lock Haven, Carlisle, Aqueduct and Blooming Grove.

Lowest temperature, 38.0 degrees on the 20th and 21st at Drifton, and 20th at Smethport.

Greatest local monthly range, 56 degrees at Quakertown and Drifton.

Least local monthly range, 28 degrees at Erie.

Greatest daily range, 47 degrees at Hollidaysburg on the 19th.

Least daily range, 3 degrees at Drifton on 3d, Coopersburg on 26th, and Carlisle on 27th.

Barometer.

The mean pressure for the month, 30.00, is about .03 above the normal. At the United States Weather Bureau Station the highest observed was 30.32 at Harrisburg on the 8th, and the lowest 29.56 at Philadelphia on the 22d.

Precipitation.

The average rainfall, 3.12 inches, is a deficiency of about 1.14 inches. The largest totals reported in inches were Clarion, 6.50; Parker's Landing, 6.41; Columbus, 5.61; Frederick, 5.28; Smith's Corner, 5.08 inches.

The smallest were Blooming Grove, 1.20; Westtown, 1.30; Wellsboro, 1.42, and Wilkes-Barre, 1.43 inches.

Wind and Weather.

The prevailing wind was from the west.

Average number—Rainy days 9; clear days, 10; fair days, 11; cloudy days, 9.

Miscellaneous Phenomena.

Thunder Storms.—Blue Knob, 2d, 3d, 4th, 15th, 20th, 25th; Hollidaysburg, 4th, 19th, 26th; Le Roy, 22d, 25th; Forks of Neshaminy, 22d; Quakertown, 6th, 22d; Johnstown, 2d, 3d, 4th, 20th, 21st, 22d, 25th; Emporium, 21st, 22d; State College, 21st, 22d, 25th; Coatesville, 6th, 11th, 21st, 22d, 26th; Kennett Square, 4th, 6th, 11th, 21st, 22d, 26th; Phoenixville, 11th; Grampian, 25th; Lock Haven, 21st, 25th; Bloomsburg, 20th, 21st, 22d, 25th; Meadville, 3d, 16th, 21st; Saegertown, 16th, 25th; Carlisle, 2d, 4th, 22d, 26th; Harrisburg, 22d, 25th, 26th; Edinboro, 2d, 3d, 10th, 15th, 16th, 17th, 21st, 22d, 25th; Uniontown, 21st, 22d, 27th, 28th; Huntingdon, 26th; Kilmer, 4th, 15th, 20th, 22d, 25th; Lancaster, 17th, 21st, 26th; New Castle, 2d, 5th, 15th, 16th, 21st, 25th, 27th; Lebanon, 15th, 21st, 22d, 26th; Smethport, 3d, 16th, 22d, 25th; Pottstown, 6th; Easton, 6th, 11th, 21st, 22d; Aqueduct, 22d; Philadelphia (Weather Bureau), 6th, 11th, 21st, 22d; (Centennial Avenue), 6th, 11th, 21st, 22d, 26th; (Locust Street), 6th, 11th, 21st, 22d; Blooming Grove, 10th, 22d, 25th; Girardville, 2d, 22d, 25th; Selins Grove, 21st, 22d, 23d, 25th; Somerset, 2d, 21st, 23d, 26th, 27th; Wellsboro, 21st, 22d, 25th; Columbus, 3d, 16th, 25th; Dyberry, 4th, 10th, 11th, 21st, 22d, 25th, 30th; Salem Corners, 21st, 22d, 25th; South Eaton, 10th, 22d, 26th, 30th; York, 22d, 26th.

Hail.—Grampian, 25th; Meadville, 21st; Saegertown, 25th; Edinboro, 25th; New Castle, 15th, 25th; Philadelphia (Centennial Avenue), 11th.

Frost.—Somerset, 24th.

Solar Halo.—Philadelphia (Weather Bureau), 7th; (Centennial Avenue), 15th; Wellsboro, 22d.

Meteors.—Quakertown, 17th.

Notes from Observers.

York, Pa., Mrs. L. H. Grenewald, Observer.—Probably the most variable June of which York has record, with extremes of heat and cold. The closing week was unfavorable to agriculture. Hay was spoiled by the rains and the cool, wet weather has somewhat delayed harvesting.

Rainfall Record at Johnstown, Pa., During June, E. C. Lorentz, Observer.—Total rainfall, from January 1st to July 1st, 1893, 25.77 inches. Normal rainfall for same period 26.87 inches. Deficiency since January 1, 1.10 inches. Normal rainfall for June (twelve years' record, 5.28. Deficiency for the month, 3.25 inches.

Year.	Amount, Inches.	Year.	Amount, Inches.
1868,	3.40	1888,	3.55
1869,	11.01	1889,	—
1870,	4.02	1890,	2.72
1871,	4.05	1891,	9.22
1885,	3.25	1892,	5.18
1886,	7.25	1893,	1.93
1887,	7.72		

The rainfall of June, 1893, is the least amount on record. Streams and springs at the end of the month were as low as is usually seen in an exceptionally dry autumn.

Climatology in Relation to Childhood and Old Age.

As regards childhood, we may safely lay down the general laws that children respond more readily to change than their elders; that they commonly do very well at the seaside; that they often benefit most signally by a sea voyage, and do not suffer severely from the discomforts attending such a voyage; that they enjoy and benefit by a country life, that they suffer more than grown people from the depressing influences of city life, and that, as a rule, to which there are probably many exceptions, they do not specially benefit from the climate of high altitudes. Such, in brief, seem to be the leading principles of the climatology of childhood and early adolescence. That children love the sea, and that the sea very generally suits them, are familiar facts of observation. The explanation is to be found in such considerations as that children are commonly in a condition to bear stimulation, not having used-up nervous systems, that they are attracted by the sea and its products, and by the amusements natural to the seaside, and that some of their commonest ailments, such as struma and rickets are among the affections most amenable to marine influence.

It is very striking how happy children are, as a general rule, on shipboard; how readily they accommodate themselves to their novel condition of existence; how little they suffer from seasickness or the other inconveniences of the life at the sea; how deeply they are interested by the rather monotonous round of sights and sounds, and how astonishing is frequently their progress toward health under such conditions. The enjoyment and benefit which children derive from country life do not call for comment. That city life, especially under the insanitary and unwholesome conditions prevailing in many of our large centres of population, is prejudicial to the normal and healthy development of the child, is a fact sufficiently obvious, but for which it is difficult to find an adequate remedy. The question is too

large to be discussed incidentally in this connection, but it is not too much to say that the great problem in hygiene which the twentieth century will be compelled to solve will be how to reconcile the growth of great cities with the preservation of the national health.

That the mountain climates are not very suitable for children is probably a true general principle, but one upon which it would be rash to insist too rigidly. The explanation would appear to be that, upon the whole, the general conditions of climate and life which exist at high altitudes, although highly stimulating in certain morbid conditions, do not promote in a similar degree normal physiological development. We must admit, however, that this point has not been at all adequately worked out, and that any hard-and-fast rules are at least premature.

The climatology of old age may be roughly summed up as follows: Elderly people in general do well with equability and moderate warmth; bear cold badly; they benefit by abundant sunshine. The high altitudes are very rarely suitable to them and are usually decidedly injurious; they do best in level places, where there is abundant shelter. They may or may not benefit by the seaside or a sea voyage, but these measures cannot be recommended with at all the same confidence as in the case of children. Most of these principles become almost obvious upon a little consideration. The failing vitality, by which we mean impaired vigor of circulation, assimilation and excretion, which characterizes advanced years, and the special maladies most frequent at that time of life, such as rheumatism, cardiac disease, gout and renal affections, serve to determine the climatological problem. Moderate warmth, with fair equability, abundance of sunshine, with adequate shelter, and level walks, evidently meet the most obvious indications called for by these affections.

The unsuitability of the mountain climates to the aged is due partly to the cold, which depresses those in whom the circulation is feeble, either constitutionally or as the result of age, partly to the sudden changes, which are especially trying to the rheumatic or the subjects of renal disease, partly to the impossibility of obtaining sufficient easy exercise on the level ground, which is a serious difficulty in cardiac cases. A sea voyage, though by no means out of court at any period of life, is often a doubtful experiment for the old, who do not take kindly to such a revolution in their daily habits as life at sea necessarily involves, who often suffer severely on shipboard from seasickness and insomnia, and who may not possess sufficient elasticity of spirit to rise above the depressing influence of separation from home and friends. The elderly constitute the class most likely to benefit by the various spas, which now enjoy at least a sufficient vogue. The effect of mineral waters is in most cases to promote elimination, and this is often the first indication in the case of those ad-

vanced in years. It should never be forgotten, however, that vigorous eliminative measures are a great drain upon the system and may easily be abused.

We hardly need to say, in conclusion, that in nothing is the superior recuperative power of youth over age more apparent than in the greater readiness and certainty of its response to change of climate. We can confidently recommend to the young measures which we suggest dubiously to the old. In fact, change is rarely at fault in the earlier years of life, whereas it is very often a doubtful, and sometimes a most hazardous experiment for the aged. In the case of the latter we need to have solid reasons and tolerably definite prospects before we induce them to give up the comforts and safety of home for the uncertainties of travel.—London Lancet.

Instructions for Manipulating Wet-Bulb Thermometers.

Keep the cistern-well supplied with rain-water, when the temperature of the air is above the freezing point. The thin muslin cover and bulb of the thermometer should be kept clean and care taken that the muslin is firmly and smoothly applied. If the muslin should become dry in very dry weather, wet the wicking more freely by direct application of a few drops of water. Extra covers and wicking should be kept on hand.

When the temperature of the wet-bulb is below the freezing point, remove the cup of water entirely from its position in the shelter, and keep it full of cold water, as near the temperature of freezing as possible. Remove the muslin with the attached wicking from the bulb, and substitute a muslin cover without wicking. About twenty minutes before the time for making an observation, bring the cup of water underneath the thermometer, and wet the muslin by lifting the cup until the muslin cover is completely immersed. Then quickly lower it and remove the drop which will gather on the bottom of the bulb, by touching it with the edge of the cup. A thin coating of ice will form around the bulb, which should exist at the time of taking the observation. On a dry day, with a high wind, it may be necessary to repeat the wetting once or twice. Omit the wetting of the bulb if it has already a thin coating of ice, left from the preceding observation. The aim should be to have a thin film of ice upon the bulb for a sufficient length of time before the observation to insure that the thermometer has fallen to its lowest point, and is stationary at the time for making the observation. When the air is stagnant and the temperature is near freezing, the freezing may be accelerated by fanning the bulb.

When a thaw occurs, remove the ice on the bulb by immersing it in warm water at least an hour before an observation is made, and replace the muslin with the attached wicking.

A correct reading of the wet thermometer may be obtained by forming a thin film of ice on the bare bulb, but care must be taken to read the thermometer the instant it reaches its lowest point. This usually occurs in from five to ten minutes.

When proper care has been taken, if the wet thermometer reads the same or higher than the dry thermometer, record both exactly as they read and enter the dew point the same as the dry thermometer, and the humidity 100.

Be careful that the heat of the body does not affect the readings. Do not touch the instruments while making the observations.

Height of Our Atmosphere—Observations Show that it Probably Reaches 190 Miles.

One would hardly think of looking to the moon for information about the height of the earth's atmosphere. Yet it is just that way that evidence has recently been obtained that the atmosphere extends much higher than has commonly been assumed.

Observations of lunar eclipse, made at the celebrated observatory of Lord Rosse in Ireland, have shown that the amount of heat received from the moon, which heat is, of course, merely reflected sun heat, just as moonlight is only reflected sunlight, begins perceptibly to diminish several minutes before the shadow of the earth reaches the moon.

The inference is that the earth's atmosphere partially cuts off the sun's heat as it comes between the moon and the sun ahead of the edge of the solid earth, and calculations based upon the length of time during which the loss of heat from the moon is felt before the eclipse begins indicate that our atmosphere reaches a height of at least 190 miles.

How different this is from the height usually stated may be seen by consulting a popular school book on physical geography, published within a few years, in which it is affirmed that beyond a height of forty miles the amount of air remaining would be too small to affect the sun's rays perceptibly in any way.

So, in the most unexpected and sometimes wonderful ways we are constantly learning something new about this time-worn globe on whose surface we dwell.—Youth's Companion.

Flowers in South Africa.

In the spring, when rain has fallen for two months, the Karoo is a flower garden. As far as the eye can reach stretch blotches of white and yellow and purple fig flowers. Every foot of Karoo sand is broken up by small flowering lilies and wax flowers; in a space of a few feet square you may sometimes gather fifty kinds. In the

crevices of the rocks, little hard leaved flowering air plants are growing. At the end of two months the bloom is over, the bulbs have died back into the ground by millions, the fig blossoms are withered, the Karoo assumes the red and brown tints which it wears all the rest of the year.

Sometimes there is no spring. At intervals of a few years great droughts occur, when no rain falls. For ten or thirteen months the sky is cloudless. The Karoo bushes drop their leaves and are dry, withered stalks; the fountains fall and the dams are floored with dry, baked mud, which splits up into little squares; the sheep and goats die by thousands, and the Karoo is a desert. It is to provide for these long rainless periods that all the plant life in the Karoo is modified. Nothing that cannot retain life habitually for six months, and at need for twice that time, without rain, can exist here.—Fortnightly Review.

The Fruitful Season for Apples.

External circumstances somewhat determine lines of growth. The warm sun brings forward the blossoms. The stamens, which prepare the fertilizing dust, develop rapidly under unusual warmth, while the pistil, which has the responsibility of bringing forth the fruit, takes its own time. In this way the stamens often mature the pollen in advance of the needs of the pistil. When the pistil is mature there is no pollen, and hence no fertilization and no crop. The abundant seasons are when stamens and pistils mature contemporaneously. But even when the fruit is properly fertilized the tree has not stored up nutrition enough the past season, and then the ground under the tree is stored with fallen miniature fruit.—Thomas Meehan, in Philadelphia Ledger.

Why Sunsets Are Red.

A shower of a remarkable character occurred in Sicily on April 24, 1781. On the morning of that day every exposed place within an extensive district was found covered with a gray water, which, being evaporated, left a deposit of nearly a quarter of an inch in thickness. It was determined that this solid matter must have come from Mount Aetna. It is certain that vast quantities of solid substances are constantly afloat in the atmosphere. The sunsets all over the world are redder to this day on account of the dust from the mighty eruption in the Straits of Sunda years ago, which has not yet entirely settled.—Washington Star.

MONTHLY WEATHER REVIEW FOR JULY, 1893.

Hall of the Franklin Institute, Philadelphia, July, 31, 1893.

General Remarks.

The normal temperature of Pennsylvania for July is about 72.9 degrees, and the normal rainfall 4.27 inches.

The temperature of July, 1893, was only slightly below the normal, taking the State as a whole. The eastern portion of the State was apparently slightly warmer than that west of the mountains. At Philadelphia and York the total excess for the month was 15 degrees and 61 degrees respectively. The latter is probably a little too high owing to the fact that the "normals" for York are compiled from but five years of records. At Pittsburg and Erie there was a total deficiency, for the month, of 42 degrees and 27 degrees respectively.

The warmest weather occurred on the 25th and 26th. Cool weather immediately preceded and followed this warm spell, and most of the low temperatures were recorded on the 24th and 28th. The most marked change in temperature occurred on the 25th, as on that day most stations recorded their greatest daily range.

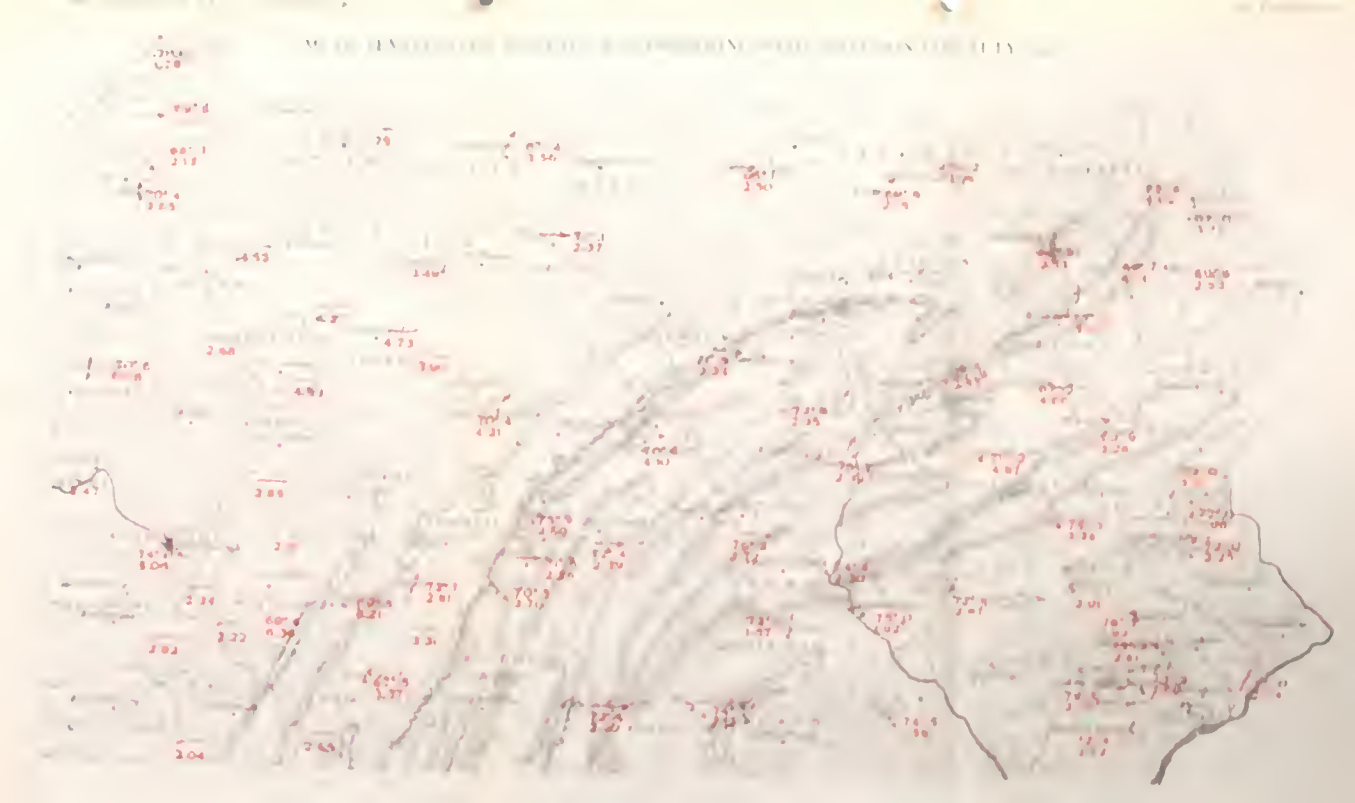
The monthly rainfall was below the normal at nearly all the stations, and especially deficient in the lower Susquehanna and Lake basins. It was above the normal at a few western stations. A protracted and serious drouth set in during the last decade, and by the close of the month rain was badly needed in all sections.

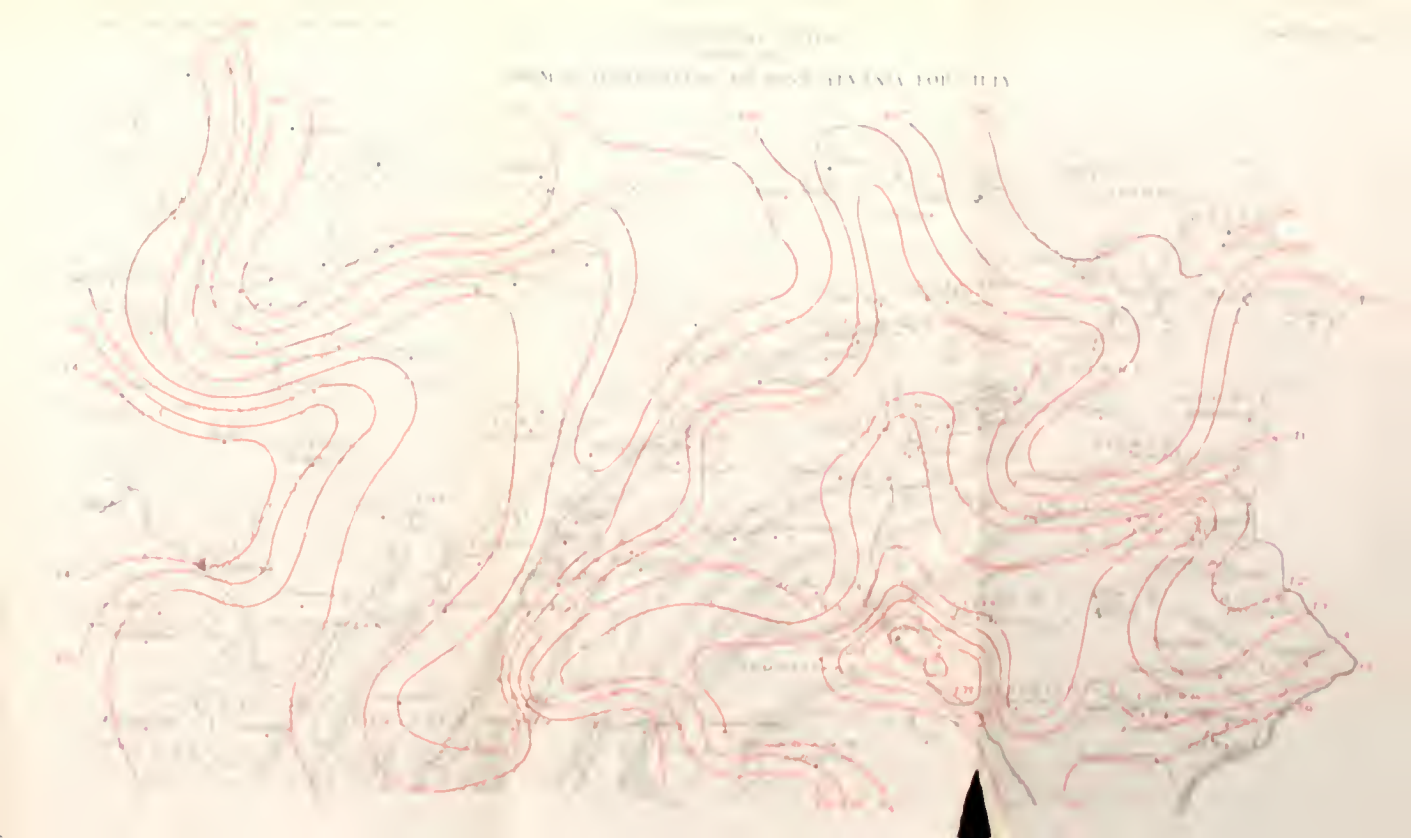
The deficiency in rainfall for the month at Philadelphia was 2.49, at York, 4.10, and at Harrisburg, 2.32 inches, that of York being probably too great owing to the normals having been obtained from but five years of records. At Pittsburg the monthly deficiency was not so great, the former stations having a deficiency of 0.23 and the latter 1.11 inches.

From January 1, 1893, to July 31, 1893, the deficiency in temperature at Philadelphia was 318 degrees, at Erie 3.59 degrees, and at Pittsburg, 362 degrees.

For the same period the deficiency in precipitation at Philadelphia was 0.91 at Erie an excess of 3.69 and at Pittsburg 2.22 inches.

	Mean Temperature. Degrees.	*Mean Precipitation. Inches.*
July, 1888, ...	69.4	3.45
July, 1889, ...	71.2	6.80
July, 1890, ...	70.8	3.52
July, 1891, ...	67.9	6.32
July, 1892, ...	72.0	3.93
July, 1893, ...	72.0	3.15





Temperature.

The mean temperature for July, 1893, was 72.0 degrees, which is about 0.9 degrees below the normal, and the same as the corresponding month of 1892.

The mean of the daily maximum and minimum temperatures, 84.2 degrees and 60.0 degrees, gives a monthly mean of 72.1 degrees, with an average daily range of 24.2 degrees.

Highest monthly mean, 77.0 degrees at Philadelphia. (Weather Bureau.)

Lowest monthly mean, 65.1 degrees at Wellsboro.

Highest temperature recorded during the month, 102 degrees on the 26th at Aqueduct and Quakertown.

Lowest temperature, 36 degrees on the 24th at Wellsboro.

Greatest local monthly range, 60.0 degrees at Lewisburg.

Least local monthly range, 36.0 degrees at Philadelphia. (Weather Bureau.)

Greatest daily range, 49.0 degrees at Lock Haven on the 30th.

Least daily range, 3.0 degrees at Hamburg on the 14th.

Barometer.

The mean pressure for the month, 29.98, is about .02 inch above the normal. At the United States Weather Bureau Stations, the highest observed was 30.25 at Philadelphia on the 11th, and Harrisburg on the 28, and the lowest 29.68 at Philadelphia on the 22d.

Precipitation.

The average rainfall, 3.15 inches for the month, is a deficiency of about 1.12 inches.

The largest monthly totals in inches were Clarion, 6.27; Immel Reservoir (Lycippus), 6.36; Ligonier, 6.21 inches.

The least were York, 1.58; Erie and Warren, 1.79; Harrisburg, 1.92; Coopersburg, 1.96; Pottstown, 1.99 inches.

Wind and Weather.

The prevailing direction of wind was from the west.

Average number: Rainy days, 10; clear days, 15; fair days, 12; cloudy days, 4.

Miscellaneous Phenomena.

Thunder storms.—Blue Knob, 3d, 5th, 6th, 7th, 8th, 13th, 14th, 15th, 16th, 17th, 18th, 26th, 29th, 31st; Hollidaysburg, 7th, 13th, 15th, 17th, 26th; Wysox, 22d; LeRoy, 3d, 15th, 18th, 26th; Forks of Neshaminy, 3d, 5th, 8th, 16th, 17th, 18th, 26th; Quakertown, 3d, 5th, 8th, 13th, 16th; Johnstown, 3d, 5th, 6th, 8th, 13th, 14th, 26th; Emporium, 3d, 8th, 15th, 26th; East Mauch Chunk, 3d; State College, 5th, 8th, 13th, 15th; West Chester, 3d, 8th, 18th, 26th; Coatesville, 3d, 5th, 8th, 13th, 16th, 17th, 18th, 26th, 29th; Kennett Square, 3d, 8th, 13th,

26th; Phoenixville, 3d, 5th, 8th, 13th, 16th, 26th; Lock Haven, 3d, 8th, 13th, 15th, 17th, 23d, 26th, 29th; Bloomsburg, 8th, 13th, 16th, 29th; Meadville, 3d, 6th, 8th, 15th, 17th, 22d; Saegertown, 3d, 8th, 17th; Carlisle, 5th, 6th, 7th, 8th, 15th, 31st; Harrisburg, 5th, 13th, 15th, 26th; Edinboro, 2d, 5th, 6th, 8th, 13th, 22d; Chambersburg, 6th, 8th, 13th, 26th, 31st; Huntingdon, 7th, 13th, 14th, 15th; Kilmer, 3d, 5th, 8th, 13th, 15th; New Castle, 26th; Lebanon, 3d, 5th, 8th, 23d, 26th, Coopersburg, 3d, 5th, 8th, 29th; Drifton, 9th, 13th, 15th, 26th; Wilkes-Barre, 3d, 8th, 13th, 15th, 18th, 23d, 29th; Smethport, 3d, 6th, 8th, 15th, 22d; Pottstown, 3d, 5th, 8th, 13th, 16th, 26th; Easton, 3d, 5th, 6th, 8th, 13th, 15th, 16th, 26th; Aqueduct, 3d, 4th, 5th, 7th, 8th, 13th, 15th, 23d, 26th; Philadelphia (Weather Bureau), 3d, 5th, 8th, 13th, 16th, 17th, 18th, 26th; (Centennial Avenue), 3d, 5th, 8th, 13th, 16th, 17th, 18th, 26th; Blooming Grove, 3d, 5th, 8th, 12th, 22d, 26th; Girardville, 3d, 5th, 13th, 15th, 16th; Selins Grove, 8th, 13th, 16th, 29th; Somerset, 7th, 8th, 13th, 15th, 26th; Wellsboro, 3d, 5th, 8th, 13th, 15th, 22d, 26th; Dyberry, 3d, 5th, 8th, 12th, 18th, 22d, 26th; Salem Corners, 3d, 8th, 12th, 13th, 15th, 18th, 22d, 26th; South Eaton, 2d, 3d, 5th, 8th, 13th, 18th, 26th; York, 3d, 5th, 8th, 13th, 26th, 31st.

Hail.—Phoenixville, 5th; Edinboro, 17th; Lebanon, 3d, 5th; Pottstown, 5th; Aqueduct, 3d; Philadelphia (Weather Bureau), 5th; (Centennial Avenue), 5th; Girardville, 3d; Somerset, 13th; Wellsboro, 22d.

Frost.—Smethport, 24th; Somerset, 24th; Wellsboro, 11th, 24th.

Aurora.—Coatesville, 15th, 19th; Carlisle, 15th; Salem Corners, 16th, 17th, 18th.

Coronae.—Blue Knob, 20th, 23d, 25th, 28th.

Lunar Halo.—Blue Knob, 23d.

Meteors.—Quakertown, 17th; State College, 28th.

Notes From Observers.

Johnstown, E. C. Lorentz, Observer.

Year.	Amount, Inches.	Year.	Amount. Inches.
1868,	5.76	1887,	4.81
1869,	5.59	1888,	3.33
1870,	4.47	1890,	1.87
1871,	3.45	1891,	6.81
1885,	3.06	1892,	3.70
1886,	7.10	1893,	2.81

Average rainfall, twelve years record, 4.40 inches.

Deficiency of rainfall during July, 1893, 1.59 inches.

Average rainfall from January 1, to August 1, 1893, 31.27 inches.

Actual rainfall from January 1, to August 1, 1893, 28.58 inches.

Deficiency rainfall from January 1, to August 1, 1893, 2.69 inches.

At the end of the month the river registered .6 of a foot, or but .3 of a foot higher than the stage prevailing during the latter part of October, 1892, when the deficiency of rainfall for the year amounted to nearly 8.00 inches. At that time the river was lower than ever recorded. Farmers from adjoining townships say that this is the dryest season they have seen for years.

Phoenixville, Knowles Croskey, Observer.

The country surrounding this station is badly in need of rain; the ground is baked. The rain that has fallen this month was in the form of showers, doing very little good. The streams are low and wells are drying up.

York, Mrs. L. H. Grenewald, Observer.

July, 1893, gave York county the lowest rainfall for this month on record, with a monthly deficiency of 4.10 inches and a deficiency since January 1, of 3.96 inches.

Monthly mean temperature 2 degrees above the normal, with a total monthly excess of 61 degrees, and a deficiency since January 1st of 396 degrees. The monthly extremes of temperature occurred at an interval of but two days; the highest 98 degrees, on the 26th, and the lowest, 48 degrees, on the 28th. This is the greatest monthly range on record for July, except in 1890, which had a maximum of 101 degrees min., 43.5 degrees, range 57.5 degrees. Storms during the month were very moderate, and caused little damage. Average monthly sunshine, 78 per cent. Force of wind ranged between 0 and 6.

Two Hundred Inches of Rainfall.

Cherra Punji, in the Khasi Hills, Assam, British India, is the "pole of the greatest known rainfall." In other words, it is the wettest region on the face of the earth. Mr. Blandford, at a meeting of the London Meteorological Society, read a paper, entitled "Rainfall at Cherr Punji," in which he presented incontestable proof of the extreme moisture of the country in question. The records go back for nearly sixty-five years, but prior to 1872 are rather incomplete, there being several whole years in which no record was kept. Carefully compiled data from these weather journals, however incomplete as they are, prove that quite frequently during the summer, say from May to September, the rainfall for a single month ranges from 100 to 212 inches. Think of it! Nearly eighteen feet of precipitation in thirty days. Colonel Sir Henry Yule's register for the year 1841 shows that there were 264 inches of rainfall during the month of August. That was something phenomenal, even for Assam, however, and is not taken into account in the deductions made above.—St. Louis Republic.

Approximate Hours of Possible Sunshine.

From 25 to 49 degrees North Latitude, inclusive.

[Use latitude nearest that of station, interpolating when necessary.]

Air, Its Composition and Contents.

Did you ever think, while deeply inhaling the life-giving fluid, of what your breath is composed? Ordinarily we are told that oxygen and nitrogen compose the aerial ocean in which we live and move. Closer observation will show that other chemical elements exist, though in much smaller quantities, as well as other matter that may not be considered as entering into the chemical composition of the air, but which is merely in suspension. By volume, oxygen occupies 20.96 and nitrogen 79.00 parts of the air, the remaining .04, representing the space filled by carbonic acid; and this proportion is found to be very nearly the same whether the air be taken from near the ground, or in the highest accessible regions. The last-named element, carbonic acid, varies in amount according to time and place. In the open country, the proportion is three parts in 10,000; in towns, five parts; while in overcrowded rooms, even thirty parts in 10,000 may be found. In some places the gas oozes from the earth, and

where this occurs its anaesthetic effects have made the place famous. Near Naples, in Italy, there is a grotto from which flows a constant stream of this mephitic gas. A man thrown in the grotto would perish in ten minutes, a cat in four, and a dog in three minutes. It has been strongly hinted, if not proved, that the ancient priests made good use of their knowledge of the properties of this gas in securing from pythonesses, the so-called "decrees of the gods."

Air, also contains other elements, the most important, as well as the most variable of all, being aqueous vapor. This element is invisible until condensation occurs, when it becomes visible as cloud, mist, dew, etc. The quantity present in the air varies with the seasons, time, temperature, altitude and latitude, and follows no law except that with the same temperature and atmospheric pressure the maximum amount of vapor the air can hold is always the same. In other words, the saturation point is the same in all volumes of air having the same temperature, and under the same pressure. A very small amount of ammonia is also present.

Besides these, there have been found in the air sulphuretted hydrogen gas, vapors of sulphuric and hydrochloric acid, and even carburetted hydrogen gas, these occurring as emissions from crevices in the earth. Even nitric acid has been found, and a certain quantity of iodine, which last probably comes from the washing by rain-drops of the dust suspended in the air. After these comes ozone, first discovered by Van Marum about 1780, which is produced artificially by the action of electricity upon oxygen. Finally, as to the chemical components, air has been found to contain a small amount of oxygenated water, this being intimately connected with the ozone and nitrate of ammonia and becomes separated from the air through the atmospheric deposits.

Now, if we feel faint when we think of the small-sized drug store we inhale at each breath, just think of the myriads of particles of dust and hosts of microscopical animals that are suspended in air. More than probably, you are now breathing relics of animals and plants that lived ages ago; perhaps the dust of the mummies of Egypt; as likely, the ashes of some remote ancestor—for the whirlwinds of the desert, the eruption of volcanoes, the burning of fuel, the cosmic dust of meteorites fill the air with a prodigerous number of motes, which from their lightness remain in the air for days, months and perhaps years.

The Mississippi river discharges annually at its mouth no fewer than 19,500,000,000,000 cubic feet of water. Of this prodigious quantity the 1-2900 part will be sediment, hence, the annual quantity of mud discharged into the Gulf of Mexico by that stream alone will be 6,700,000,000 cubic feet, or what would be enough to cover a square

mile of surface to a heighth of 240 feet. This, then, will also represent the annual loss to the river's drainage basin, whence the materials have been derived. The most competent authorities consider that the average annual waste or reduction of the Mississippi basin is about 1-6000 of a foot; in other words, that the entire area of square miles drained by the mighty stream is lowered on an average one foot in every 6,000 years. (Heilprin.)

The Aurora.

In the north polar regions, where thunderstorms are practically unknown, beautiful luminous effects are produced at night by the Aurora Borealis or Northern Lights. A similar appearance in the south polar regions is called Aurora Australis. The aurora forms an arch or ring of colored light over the magnetic pole at a great heighth in the atmosphere, from 50 to 150 miles. Colored fringes and streamers shoot from this arch in all directions, sometimes spreading over the whole sky, and again shrinking back with a pulsing motion. The aurora appears to be caused by electrical discharges in rare air, as it very closely resembles the glow seen when a current traverses a "vacum tube" containing a little highly rarefied air. This theory was recently conformed by the Finnish physicist, Prof. Lemstrom, who covered the top of Mount Oratunturi, in the north of Finland, with a network of wires, and found a true aurora produced when he sent a current of electricity from these wires to the earth. (Mill.)

If we could put the whole atmosphere into one side of a pair of scales, it would take 138,000 cubes of copper, each a mile in length, breadth and thickness, to balance it.

MONTHLY WEATHER REVIEW FOR AUGUST, 1893.

Hall of the Franklin Institute, Philadelphia, August 31, 1893.

General Review.

The most notable features of the month's weather were the drouth of the first two decades and the hurricanes on the 23d and 28th.

Of the temperature, no more need be said than that it was normal, considering the State as a whole, and that neither extremes of heat nor cold occurred. The greater part of the month gave fair and pleasant weather.

The rainfall during the first two decades was very light, and that which fell was badly distributed. Drouth, in its most serious form, existed. In the sections, of which Tioga in the north and Bedford in the south were the centres, no appreciable rainfall was received. In those sections it is said that during more than two months the ground had not been thoroughly wet. Over the whole State, rivers, springs and wells were low and the ground parched and hard. Crops of all kinds suffered severely and their yield materially shortened. Heavy local showers on the 6th brought relief, as well as destruction, to portions of Chester, Lancaster and York counties. On that date a terrible hail-storm passed over a part of York county, destroying all crops in its path. (A full account of this storm will be found in the notes of the York Observer, printed elsewhere.) The long prevailing drouth was partially relieved in Eastern Pennsylvania by heavy showers on the 19th and 20th, and the heavy rains on the night of the 23d. The hurricane of the 23d was of great severity but was confined almost entirely to the southeastern counties. While Bucks, Lehigh and neighboring counties received from five to eight inches of rainfall from the rains of the 19th, 20th and 23d, the counties west of the mountains had less than one-fourth of an inch. The path of the second hurricane, that of the 28th, lay through the central portion of the State and the accompanying rains terminated the drouth in all sections.

The high winds accompanying and following both of these hurricanes completely prostrated most of the standing crops and blew off great quantities of fruit.

Though the average rainfall was slightly above the normal, the distribution was very uneven. The counties along the Delaware and Lehigh, especially Bucks county, received far more rain than elsewhere, the excess over the normal at some stations being nearly four inches. From Philadelphia westward, and including all the southern and southwestern counties, the rainfall was below the normal. In the other sections about the usual amount was received.

At Philadelphia the total deficiency in rainfall for the month was

2.41, at York, 0.64, Harrisburg, 1.16, Pittsburg, 0.46, and at Erie an excess of 0.28 inch.

From January 1, 1893, to August 31, 1893, the deficiency in temperature was, Philadelphia 260 degrees, York 399 degrees, Pittsburg 378 degrees, and at Erie 367 degrees.

For the same period the deficiency in precipitation was, at Philadelphia 3.32, York 4.60, Harrisburg 7.01 inches, and at Pittsburg and Erie an excess of 1.76 and 3.97 inches, respectively.

Excessive Precipitation.

[One inch in one hour, or two and one-half inches in twenty-four hours.]

STATIONS.	Amount. (Inches and Hundredths.)	Time.		Date.

	Mean Temperature. Degrees.	*Mean Precipitation. Inches.*
August, 1888	69.5	7.05
August, 1889	67.4	3.24
August, 1890	68.4	5.76
August, 1891	69.7	5.09
August, 1892	71.3	3.77
August, 1893	70.2	4.50

Temperature.

The mean temperature for August, 1893, was 70.2 degrees, which is just the normal, and 1.1 degrees below the corresponding month of 1892.

The mean of the daily maximum and minimum temperatures, 82.7 degrees and 58.1 degrees, gives a monthly mean of 70.4 degrees, with an average daily range of 24.6 degrees.

Highest monthly mean, 76.0 degrees at Philadelphia. (Weather Bureau.)

Lowest monthly mean, 63.2 degrees at Wellsboro.

Highest temperature recorded during the month, 99 degrees on the 11th at Lock Haven, and on the 18th and 25th at Huntingdon.

Lowest temperature, 30 degrees on the 14th at State College.

Greatest local monthly range, 62 degrees at State College.

Least local monthly range, 35 degres at Philadelphia. (Weather Bureau.)

Greatest daily range, 50 degrees at Saegertown on the 3d, Ligonier 15th, Huntingdon, 16th, and State College on the 26th.

Least daily range, 2 degrees at Salem Corners (Hamlinton) on the 24th.

Barometer.

The mean pressure for the month, 29.99, is about .01 inch above the normal. At the United States Weather Bureau Stations, the highest observed was 30.25 at Erie on the 31st, and the lowest 29.38 at Harrisburg on the 29th.

Precipitation.

The average rainfall, 4.50 inches for the month, is an excess of over one-fourth of an inch.

The largest monthly totals in inches were Doylestown, 9.99; Point Pleasant, 9.71; Quakertown, 8.90, and Smith's Corner, 8.63 inches.

The least were Immel Reservoir (Lycippus), 1.68; Ligonier, 2.19; Lock No. 4, 2.42; and Philadelphia (Weather Bureau), 2.43 inches.

Wind and Weather.

The prevailing direction of the wind was from the northwest.

Average number: Rainy days, 8; clear days, 14; fair days, 10; cloudy days, 7.

Miscellaneous Phenomena.

Thunder-storms.—Blue Knob, 6th, 11th, 19th,27th; Hollidaysburg,6th; 11th; Wysox,27th; Le Roy,25th, 27th; Quakertown, 19th; State College, 19th,26th; Coatesville, 6th, 17th, 20th,; Kennett Square, 6th, 17th, 20th; Grampian, 29th; Lock Haven, 6th, 12th, 19th, 24th, 27th, 28th; Meadville, 4th, 5th, 11th, 16th, 18th; Carlisle, 6th, 12th, 19th, 29th; Harrisburg, 6th, 12th, 19th; Huntingdon, 19th; Kilmer, 6th, 19th, 20th; Lancaster, 6th, 17th, 24th; Lebanon, 6th, 19th; Coopersburg, 17th, 19th, 20th; Drifton, 7th, 18th, 19th, 21st, 24th, 29th; Wilkes-Barre, 12th, 17th, 19th, 24th, 29th; Smethport, 1st, 6th, 18th; Pottstown, 6th, 19h, 20th; Skippack, 5th, 20th; Easton, 6th, 12th, 17th, 19th; Aqueduct, 26th; Philadelphia, 6th, 12th, 17th, 20th; Centennial Avenue, 6th, 12th, 17th, 20th; Blooming Grove, 6th, 19th; Girardville, 19th; Selins Grove, 6th, 12th, 24th; Somerset, 23d, 26th; Dyberry, 6th, 17th, 19th, 20th; Salem Corners, 5th, 6th, 19th; South Eaton, 6th, 19th, 20th, 27th; York, 12th; Chambersburg, 6th, 28th; Wellsboro, 8th, 19th, 27th; Phoenixville, 6th; Johnstown, 6th, 26th; Emporium, 6th, 18th, 19th, 25th, 27th.

Hail.—Quakertown, 19th; Carlisle, 6th; Lancaster, 17th; York, 6th; Chambersburg, 6th.

Frost.—Blue Knob, 30th; Smethport, 14th; Blooming Grove, 15th; Somerset, 15th; Dyberry, 14th; Wellsboro, 14th, 15th, 16th, 31st.

Coronae.—Blue Knob, 24th; Wilkes-Barre, 7th; Dyberry, 4th.

Aurora.—Le Roy, 6th, 12th; Quakertown, 6th; Aqueduct, 6th, 8th; Selins Grove, 6th, 31st.

Solar Halo.—Le Roy, 31st; Philadelphia, 14th; Centennial Avenue, 3d, 11th, 14th; Dyberry, 4th.

Lunar Rainbow.—Wilkes-Barre, 27th.

October Weather.

From United States Weather Bureau Records.

The following data, compiled from the records of observations taken during the length of time given at each station, show the average and extreme conditions during that time, and also the range within which weather variations may be expected to keep in any future October.

	Philadelphia. (22 years.)	Pittsburgh. (22 years.)	Erie. (20 years.)
Mean or normal,	56 degrees.	54 degrees.	52 degrees.
Warmest October, Average,	1879 62 degrees.	1881 60 degrees.	1879 60 degrees.
Coldest October, Average,	1876 51 degrees.	1876 49 degrees.	1889 46 degrees.
Highest temperature recorded, Date,	87 degrees. 3d, 1879; 1st, 1881.	91 degrees. 3d, 1884	85 degrees. 7th, 1879
Lowest temperature recorded, Date,	31 degrees. 30th, 1873; 16th, 1876	20 degrees. 31st, 1887	26 degrees. 26th, 31st, 1887
Average date of first "killing" frost,	28th	21st	15th
Average precipitation (inches).	2.80	2.37	4.08

Formulas for Forecasting.

Prepared by L. M. Dey, Local Forecast Official, United States Weather Bureau, for Eastern Pennsylvania.

General Statement in Regard to Forecasting at Philadelphia.

Part 1.

First as to Topography.—In general forecasting the influence of topography can scarcely be taken into account.

The tendency of local storms to follow the large rivers of this district and their tributaries, and the movement of local storms along the valleys of this section of the State, has frequently been noted. But the surface topography does not in general appear to influence these movements in any other way.

There are few or no elevations in the immediate vicinity of Philadelphia sufficient for that purpose, but in the adjacent counties there are several ridges and hills which appear to have an influence on local storms, but their distance from this city is such that they cannot be taken into account in practical forecasting.

The construction of definite formulas, which may be taken as guides in making predictions of the changes of the weather of this district is difficult if not practically impossible, because of the ever-changing conditions which intervene before the event is reached; and because of the uncertainty as to combinations occurring in adjoining districts.

The coming on of areas of High or Low pressure cannot be reported or predicted positively, as there is nothing distinctive in the Climatology of this district which prevents these areas from being modified by the influence of changes to High or Low pressure forming elsewhere and passing so near as to disturb the conditions here.

Recourse is therefore had to be the apparent movement of these depressions here and in other districts, and to the probable forces connected with all their movements. The uncertainty of the nature of these forces and of the disturbing elements atending these combinations, necessitates a judgment by the observer based far more on a familiar experience in weather forecasting than on any deductions drawn theoretically.

The appearances of the sky preceding and following the areas of High and Low pressure also modify the significance they appear to have on the map, and the judgment of the observer drawn from his practical experience is again brought in requisition.

The movement of isobars, the change in their relative positions, cannot be exactly calculated, and must be forecasted rather by intuition, and by a consideration of the movement of the isotherms, which seem to lead the centres of the low-presure areas.

Changes in the direction of the wind must be considered as among the indications of a change in the weather, and the changing atmospheric currents as shown in the movements of the upper clouds are still more important, and among the most valuable indications.

Local observations must be the first to aid in forecasting, but to these must be added the best practicable interpretation to be derived from the weather map, and both are to be used in connection with the appearances in the upper atmosphere. To forecast finally from these evidences, however, or to give the complete results of any oncoming combination is rarely possible with certainty.

What is necessary to be studied, even in making a single forecast, involves a careful noting of the pressure areas, the temperature, humidity, winds and cloud formations immediately or at the time it is made. The greatest doubt arises from the possible approach of other storm areas to this district, and the passage of their centre at such distance as to render their influence sometimes great and at others only trifling. These external movements must be studied as far as they can be ascertained whether their influence proves to be positive or merely negative, such a negative result often being realized when the appearances wer strongly in favor of a positive disturbance.

In the present state of the science it is especially necessary to unite the most careful local observations with the best interpretation to be derived from the map; and for some general guide in applying these observations practically the following rules or suggestions may be offered:

(To be continued in September Bulletin.)

Notes from Observers.

York, Mrs. L. H. Grenewald, Observer.—The hail-storm of the 6th made a path of destruction, where literally nothing was left in a track fourteen or more miles in length and about one and a half miles wide. Hail was scooped up eighteen hours after it fell about Martinsdale and Grayleysville. The track of the storm was traced from Stony Brook Hill to Schenk's Ferry on the Susquehanna, northwest and southeast about fourteen miles, and shows utter destruction. This

hail-storm has no parallel in the records of the oldest inhabitants. The rains of the month were unevenly distributed and were followed by high winds, exhausting the moisture. Although the storm of the 29th fairly broke the drouth, the high winds levelled corn fields, stripped trees of their fruit, and nearly destroyed that which was left after the drouth and hail.

Average sunshine for month, 75 per cent. Force of wind, 0 to 5 in a scale of 6.

MONTHLY WEATHER REVIEW FOR SEPTEMBER.

Hall of the Franklin Institute, Philadelphia, September 30, 1893.

General Review.

September's normal temperature is about 63.1 degrees, and its normal rainfall 3.53 inches. The present month opened decidedly cool, light frosts occurring in elevated regions on the 2d and 3d. From this time until the 25th, the temperature ranged not far from the normal, excepting a few days of warm weather about the 20th. A decidedly cool wave overspread the State on the 25th, after which cool weather continued till the close of the month.

Throughout the Delaware and Susquehanna basins, excepting the mountain and valley districts along the lower Susquehanna, the rainfall was evenly distributed, though slightly below the normal. A marked deficiency of precipitation occurred in the Ohio, Lake and Potomac basins, the deficiency amounting at most stations to one and a half or two inches. Severe local storms occurred on the 7th and 15th, the latter accompanied by general rains throughout the State. That of the 7th was particularly severe in the northern counties, and especially so in Tioga, where great damage was done to property and not a few lives lost. Observers' reports show that the storm had the appearance of a tornado. The barograph at Emporium recorded a marked though not very great fluctuation. The storm of the 15th was more general and not so destructive, but was violent in some sections. Details of both these storms will be found under the heading "Notes from Observers."

At Philadelphia the total excess in rainfall for the month was 0.33; at York a deficiency of 2.41; Harrisburg, deficiency 2.77; Pittsburg, deficiency, 0.77, and Erie, deficiency, 3.01 inches.

From January 1, 1893, to September 30, 1893, the deficiency in temperature was, at Philadelphia, 315 degrees; York, 445 degrees; Pittsburg, 404 degrees, and at Erie, 403 degrees.

For the same period the deficiency in precipitation was, at Philadelphia, 2.99; York, 7.03; Harrisburg, 9.48, and at Pitsburg and Erie an excess of 0.99 and 0.96 inch, respectively.

Excessive Precipitation.

[*One inch in one hour, or two and one-half inches in twenty-four hours.*]

September, 1893, ...	60.9	2.67

Temperature.

The mean temperature for September, 1893, was 60.9 degrees, which is 2.02 degrees below the normal, and 1.4 degrees below the corresponding month of 1892.

The mean of the daily maximum and minimum temperatures, 71.7 degrees and 50.7, gives a monthly mean of 61.2 degrees, with an average daily range of 21.0 degrees.

Highest monthly mean, 66.0 degrees at Philadelphia. (Weather Bureau.)

Lowest monthly mean, 53.2 degrees at Wellsboro.

Highest temperature recorded during the month, 90 degrees on the 5th at Huntingdon, on the 19th at Carlisle, and on the 19th and 20th at Somerset.

Lowest temperature, 26 degrees on the 29th at New Castle, and on the 30th at Huntingdon.

Greatest local monthly range, 63 degrees at Hollidaysburg.

Least local monthly range, 41 degrees at Coopersburg.

Greatest daily range, 45 degrees at Huntingdon on the 22d.

Least daily range, 2 degrees at Chambersburg, on the 13th.

Barometer.

The mean pressure for the month, 30.04, is about .04 below the normal. At the United States Weather Bureau Stations, the highest observed was 30.38 at Harrisburg on the 27th, and the lowest 29.64 at Philadelphia on the 16th.

Precipitation.

The average rainfall, 2.67 inches for the month, is a deficiency of 0.86 inch.

The largest monthly totals in inches were Hamburg, 5.59; Kennet Square, 4,24, and Drifton, 4.19 inches.

The least were Saegertown, 0.72; Lock No. 4, 1.10, and Erie, 1.13 inches.

Wind and Weather.

The prevailing wind was from the West.

Average number: Rainy days, 8; clear days, 9; fair days, 12; cloudy days, 9.

Miscellaneous Phenomena.

Thunderstorms.—Blue Knob, 5th, 6th, 7th, 15th, 16th, 22d; Hollidaysburg, 6th, 7th, 15th, 22d; Le Roy, 7th, 14th; Quakertown, 7th, 15th, 16th; Johnstown, 5th, 16th, 22d; Emporium, 5th, 7th, 15th, Mauch Chunk, 15th, 16th; State College, 7th; Coatesville, 15th, 22d, 25th; Kennett Square, 7th, 15th, 22d; Phoenixville, 7th; Lock Haven, 7th, 15th; Blomsburg, 7th, 15th; Saegertown, 6th; Carlisle, 7th, 22d; Harrisburg, 5th, 6th, 15th, 16th; Uniontown, 22d; Chambersburg, 6th; Huntingdon, 6th, 7th, 15th; Kilmer, 5th, 6th, 15th, 16th; Lancaster, 15th; Lebanon, 7th, 15th; Drifton, 7th, 14th, 15th, 16th, 25th; Wilkes-Barre, 7th, 15th; Smethport, 7th, 15th; Pottstown, 7th, 15th; Skippack, 7th; Aqueduct, 5th, 7th, 15th; Philadelphia, 7th, 15th, 16th, 22d, 25th; (Centennial Avenue), 7th, 14th, 15th, 16th, 20th, 22d, 25th; Blooming Grove, 7th; Girardville, 7th, 15th, 16th; Selins Grove, 7th; Somerset, 7th, 19th; Wellsboro, 7th, 15th; Dyberry, 7th, 15th, 16th; Salem Corners, 7th, 15th; South Eaton, 7th, 15th; York, 15th, 22d.

Hail.—Blue Knob, 7th; Wysox, 7th; Emporium, 5th, 7th; Phoenixville, 7th; Lock Haven, 15th; Bloomsburg, 7th; Lebanon, 15th; Aqueduct, 15th; Blooming Grove, 7th; Girardville, 7th; Selins Grove, 7th; Dyberry, 7th, 15th.

Frost.—Pittsburg, 27th, 28th, 29th, 30th; Blue Knob, 2d, 21st, 26th, 27th, 28th, 29th, 30th; Hollidaysburg, 30th; Wysox, 30th; Le Roy, 26th, 27th; Quakertown, 28th; Johnstown, 27th, 28th, 29th, 30th; Emporium, 29th; State College, 27th, 30th; Grampian, 26th, 27th, 28th, Lock Haven, 29th, 30th; Blomsburg, 30th; Saegertown, 28th, 29th, 30th; Carlisle, 21st; Uniontown, 3d, 27th, 28th, 29th; Kilmer, 30th; New Castle, 25th, 26th, 27th, 28th, 29th, 30th; Lebanon, 18th, 27th, 28th; Coopersburg, 27th; Drifton, 3d, 26th, 27th; Wilkes-Barre, 28th, 29th, 30th; Smethport, 26th; Skippack, 7th, 28th, 29th, 30th; Aqueduct, 3d, 26th, 30th; Bloming Grove, 20th, 21st, 22d, 23d, 24th, 25th, 26th, 27th, 28th, 29th, 30th; Girardville, 3d, 6th, 21st, 26th, 27th, 28th, 29th, 30th; Selins Grove, 26th, 27th, 29th, 30th; Somerset, 3d, 4th, 28th, 29th, 30th; Welsboro, 3d, 9th, 21st, 26th, 27th, 28th; Lewisburg, 30th; Dyberry, 3d, 21st, 27th, 28th, 30th; Honesdale, 3d, 26th, 27th, 28th, 29th, 30th; Salem Corners, 26th, 27th, 28th, 29th; Ligonier, 29th, 30th; York, 3d, 28th, 29th, 30th.

Snow.—Girardville, 29th.

Aurora.—Johnstown, 8th; Coatesville, 21st; Dyberry, 8th; Salem Corners, 2d, 3d, 7th, 9th, 10th, 11th, 12th, 30th.

Coronae.—Emporium, 22d, 23d; Lebanon, 24th; Philadelphia, (Centennial Avenue), 26th; York, 26th.

Solar Halo.—Johnstown, 26th; Bloomsburg, 30; Saegertown, 30th; Philadelphia, 9th, 30th; (Centennial Avenue), 9th, 10th, 12th, 30th; Wellsboro, 17th, 30th; Salem Corners, 26th.

Lunar Halo.—Blue Knob, 24th; Saegertown, 29th; Somerset, 23d; Wellsboro, 22d.

November Weather.

From United States Weather Bureau Records.

The following data, compiled from the records of observations taken during the length of time given at each station, show the average and extreme conditions during that time, and also the range within which weather variations may be expected to keep in any future November.

	Philadelphia. (22 years.)	Harrisburg. (5 years.)	Pittsburgh. (23 years.)	Erie. (20 years.)
Mean or normal, ...	44 degrees.	42 degrees.	42 degrees.	41 degrees.
Warmest November, . Average, ...	1883 48 degrees.	1890 50 degrees.	1883 47 degrees.	1883 44 degrees.
Coldest November, . . Average, ...	1873 38 degrees.	1891 33 degrees.	1873 35 degrees.	1880 34 degrees.
Highest temperature recorded, ... Date, ...	77 degrees. 2d, 1876	74 degrees. 6th, 1888	79 degrees. 1st, 1876	74 degrees. 1st and 2d, 1888

Highest velocity, miles per hour. . . . . Date, ...	60 24th. 1877	54 23d, 1891	32 18th, 1886	54 23d, 1891

Notes from Observers.

Dyberry, Theodore Day, Observer.—7th, 4.30 p. m. Thunder north, in very black cloud. A little hail in beginning of storm, and wind. Long lightning flashes and heavy thunder. 15th, 1.35 p. m. Thunder, west. In ten minutes a very dark cloud came over, with heavy rain, and coarse hail at 1.50 p. m. Some hail one-half inch in diameter. Over an inch of rain from 1.40 to 2.10 p. m.

Emporium, T. B. Lloyd, Observer.—7th. Increasing cloudiness during afternoon. Thunder-storm, with little hail. 15th, at 8.05 a. m. Clouds moving slowly from south, warm and muggy, when a terrible clap of thunder came. House one square east of station was struck. Knocked off chimney and destroyed slate roof. Some bricks and slate thrown 50 or 60 feet. Bolt went down water-spouts, throwing dirt and mud up on porch ceiling. At same time horses and people three squares away dropped to the ground like dead. About 200 feet west of house a boy was knocked down, and all the feathers taken off the back of the neck of a rooster, killing it instantly. Only a little rain and no more lightning.

Salem Corners, T. B. Orchard, M. D., Observer.—7th, 5.15 p. m. Heavy thunder-storm, with .80 inch of rain in one hour and twenty-five minutes. Four barns in neighborhood struck and consumed. 26th and 27th. Heavy frosts, everything killed. Grapes frozen almost solid, though not yet ripe.

Smethport, Armstrong and Brownell, Observers.—15th, 10.15 a. m. Very heavy thunder-storm, lasting forty-five minutes. There was a little hail with the rain.

Wysox, Charles Beecher, Observer.—7th, 4 p. m. Very dark. Heavy thunder, constant lightning and rain for an hour. Hail for fifteen minutes, size of large peas.

Coatesville, W. T. Gordon, Observer.—15th. Very heavy thunder-storm, 5 to 7 p. m., accompanied by one of the heaviest rainfalls that ever visited this section.

Kennett Square, B. P. Kirk, Observer.—15th, 4.27 p. m. Very heavy thunder-storm. Trees blown down and fences levelled in southern edge of town.

Lebanon, G. W. Hayes, Observer.—15th, 2.30 p. m. Thunder-storm began, one quickly following another; the rain being very heavy. Hail at 2.30 p. m.; some hailstones as large as a chestnut.

York, Mrs. L. H. Grenewald, Observer.—The month, generally, has been as variable as April is usually accredited. The especial feature of the month was the storm of the 15th. About York, the storm was highly electrical and unusually awe-inspiring, but at Hanover it was terrible. The day had been ominously close and sultry. From 3.30 to 4 p. m., the heavens darkened, with occasional dropping of rain, ending in a brisk rain as great layers of clouds banked in the East. The West and Northwest showed a smooth cloud; colored green and rapidly advancing. From East and West they met over Hanover. The "very windows of Heaven" seemed opened as the clouds met and were forced downward until they appeared to touch the ground. Sheets of lightning flashed, like great flash lights emanating from the ground, and ran along fences like molten copper. About 5 p. m., the hazy clouds cleared sufficiently to allow a wider range of vision, and in the southwest terrible ball lightning could be seen running from the horizon nearly to the zenith, where it seemed to explode. Rain ended about 5 p. m. Total fall at Hanover, 2.01 inches.

Formulas for Forecasting.

Part II.

(1) Condition.—In which the pressure is above the normal, and with higher pressure central over the Lake region in the summer season.

Prediction.—Fair and very warm dry weather, with northwest winds likely to continue for several days.

(2) Condition.—Low in Lake region, with central area completely enclosed or depression V-shaped with considerable southern extension.

Prediction.—Showers, probably heavy, may be expected and likely to be followed rapidly by clearing.

(3) Condition.—Low pressure appearing in the northwest and passing eastward over the lake region, with high pressure in the Gulf and South Atlantic States.

Prediction.—Rising temperature and southwest winds, but with little or no rain in this district, especially during the cooler months.

(4) Condition.—Low area in the northwest moving southeastward, and Low area in the southwest, moving northeastward, converging near the middle Atlantic coast.

Prediction.—A storm with more pronounced disturbance than any storm likely for either movement taken by itself.

(5) Condition.—A well developed storm in the southwest moving northeastward over the interior.

Prediction.—Rising temperature, with probably a general and heavy easterly rain-storm.

(6) Condition.—Depression moving from the southwest eastward across the Gulf States, with high pressure at the northward and Lake region.

Prediction.—Cold northeast rain, or snow if in the colder months, with gales on the coast followed by clearing northwest winds.

(7) Condition.—Storm central on middle Gulf coast, with tendency to move northeast along the Atlantic coast.

Prediction.—Heavy rains, with northeast gales on the Atlantic coast. If storm is central in Alabama, this forecast is made to cover time within the next twelve hours.

(8) Condition.—With storm centre moving up from the Gulf stream and along the South Atlantic coast.

Prediction.—In summer, long continued heavy rains. In winter, rain on or near the coast, but seldom reaching this district, unless some disturbed condition crosses the continent at the same time.

(9) Condition.—An extensive anti-cyclone or High pressure off the Middle Atlantic and Southern New England coast, its Western edge forming a ridge of High pressure parallel with the coast line.

Prediction.—Easterly and southerly winds, with humid and oppressive weather, rains and showers, generally continuing for some days.

(10) Condition.—High pressure at northwest and High pressure at southeast, with a trough of Low pressure between them.

Prediction.—This condition favors the formation of storm centres, which may be independent in their future movement. Threatening weather on the northern border of the belt passing off from us northeastward, but with heavy disturbances forming in the southern portion of the trough and giving us severe storms, with easterly winds.

(11) Condition.—When the Barometer is below the normal over a large area east of the Mississippi, with diminishing pressure and rising temperature, in summer.

Prediction.—Generally cloudy and unsettled weather, with thundershowers, likely to continue for several days.

(12) Condition.—When sharp contrasts of pressure occur equal to an inch of the Barometer, with High pressure north of the Lakes and Low pressure southward of the Lakes, with severe storm attending.

Prediction.—Severe cold wave will almost certainly follow in the cold season. When the depression advances from the Gulf States under like conditions of contrast, an especially severe storm may be expected with snow attending the rain.

Local Points for Prediction.

(1) An obvious indication of change in the weather, is a high thin cirrus forming as cirro-stratus which will bring precipitation within twelve to twenty-four hours.

(2) Several types of cirrus clouds mingled, with cirro-cumulus prominent, indicate precipitation likely to follow within twenty-four hours.

(3) Steadily increasing temperature and humidity, with cumulus clouds increasing and strong southeast winds bring thunder showers.

(4) A steady and strong east-northeast, east or southeast wind usually brings rain within twelve hours.

(5) A storm indicated as approaching is seldom felt at this station unless the Barometer falls fifteen-hundredths of an inch in a period of twelve hours.

(6) A solar halo is usually observed from twelve to eighteen hours in advance of a storm from the southwest.

(7) When the sun sets in a bank of heavy cirro-stratus, rain is almost certain to follow within twelve hours.

Important General Indication.

When the barometer rises rapidly, from near the mean, to a point considerably above the mean, in twenty-four hours, with cloudless sky and very transparent atmosphere, a storm may be predicted with reasonable certainty within twenty-four hours to thirty hours from the time the pressure attains its maximum.

MONTHLY WEATHER REVIEW FOR OCTOBER, 1893.

Hall of the Franklin Institute, Philadelphia, October 31, 1893.

General Review.

October's normal temperature and rainfall is about 49.7 degrees and 3.47 inches. The present month has been 3 degrees warmer than the average, and the rainfall a quarter of an inch less.

The warmest period was between the 9th and the 11th, and the coldest occurred during the last three days of the month, when killing frosts were general throughout the State.

The centre of the cyclonic storm of the 13th and 14th passed nearly due north over the central portion of the State, attended by high winds and heavy rains. A large amount of damage was done at various points to buildings, fruit and shade trees, fences and telegraph poles.

The Philadelphia Record, of the 14th, says: "Ample warning of the approach of yesterday's storm was given by the Weather Bureau. One such timely notification is well worth the amount of cost of the weather observation service." Heavy and general rains occurred during the month, on he 4th, 7th, 13th, 14th, 23d, 27th and 28th.

From January 1, 1893, to October 31, 1893, the deficiency in temperature was, at Philadelphia, 282 degrees; Pittsburg, 401 degrees, and York, 364 degrees.

For the same period the deficiency in precipitation was, at Philadelphia, 2.61; York, 7.24; and excess at Pittsburg, 1.58 inches.

Excessive Precipitation.

[*One inch in one hour, or two and one-half inches in twenty-four hours.*]

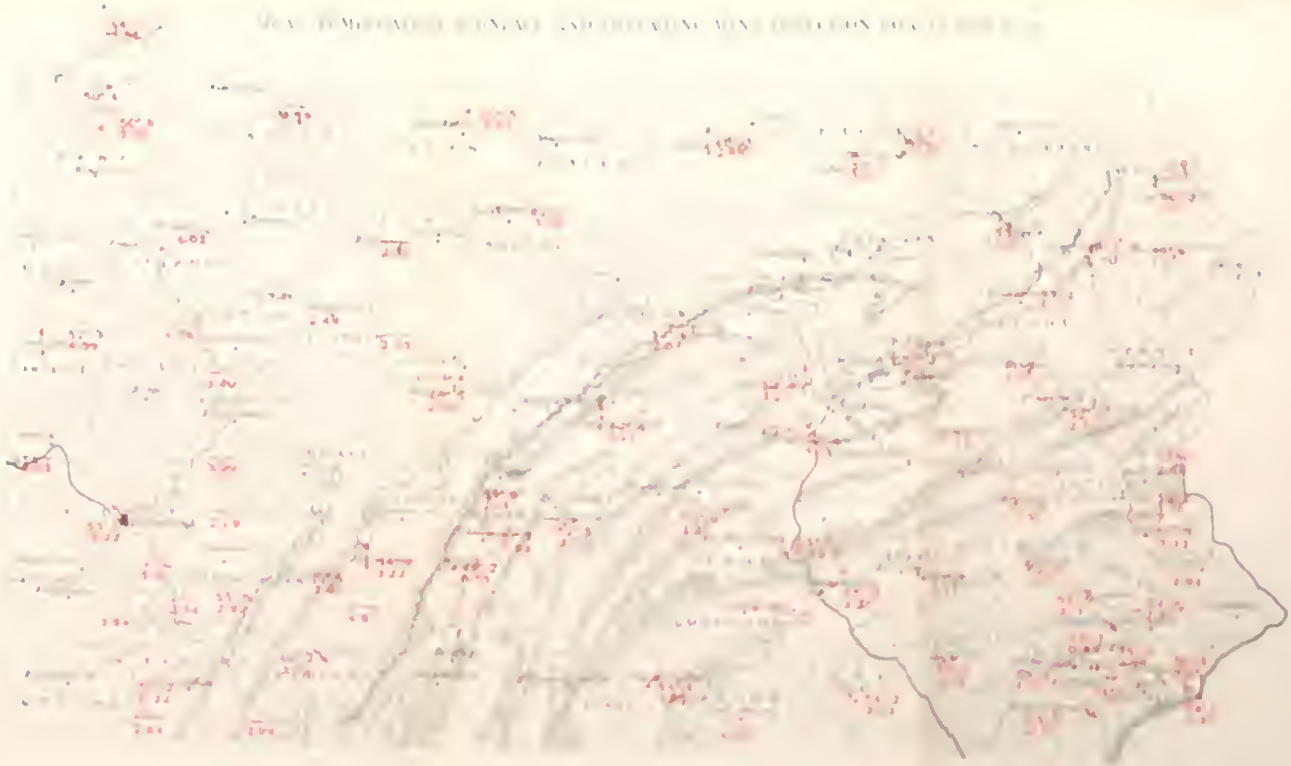
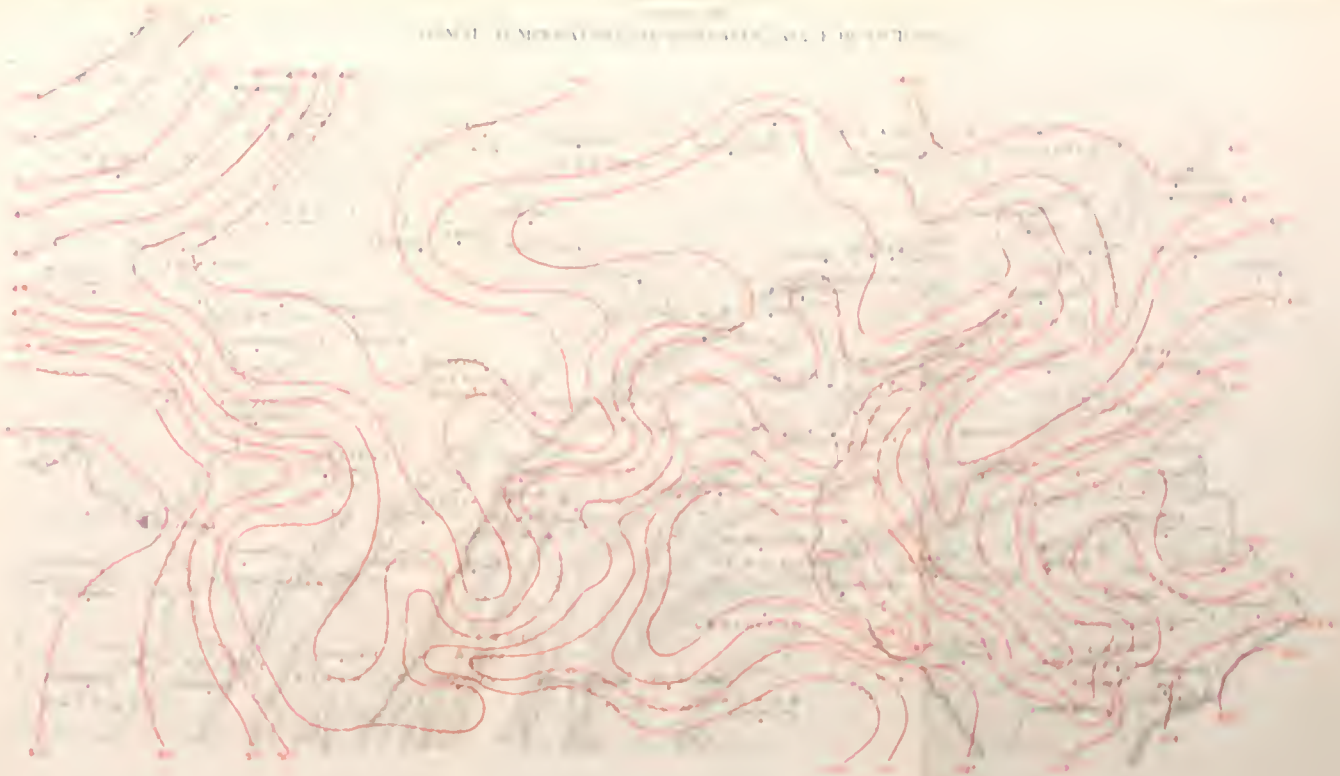
	Mean Temperature. Degrees.	*Mean Precipitation. Inches.*
October, 1888,	46.1	4.03
October, 1889,	47.3	3.85
October, 1890,	50.9	5.87
October, 1891,	50.4	3.06
October, 1892,	50.5	0.78
October, 1893,	52.8	3.26





Temperature.

The mean temperature for October, 1893, was 52.8 degrees, which is 3.1 degrees above the normal, and 2.3 degrees above the corresponding month of 1892.

The mean of the daily maximum and minimum temperatures,63.9 degrees, and 42.2, gives a monthly mean of 53.0 degrees, with an average faily range of 21.7 degrees.

Highest monthly mean, 58.0 degrees at Philadelphia. (Weather Bureau.)

Lowest monthly mean, 46.0 degrees at Wellsboro.

Highest temperature recorded during the month, 91 degrees on the 9th at Coatesville.

Lowest temperature, 17 degrees on the 31st at Hollidaysburg and Smethport.

Greatest local monthly range, 69 degrees at Coatesville and Ligonier.

Least local monthly range, 42 degrees at Altoona.

Greatest daily range, 53 degrees at Ligonier on the 11th.

Least daily range, 2 degrees at Coopersburg, 4th; Chambersburg, 5th; Blue Knob, 15th, and Dyberry, 23d.

Barometer.

The mean pressure for the month, 30.10, is about .03 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.53 at Pittsburg on the 17th, and the same at Philadelphia on the 19th, and the lowest 29.05 at Erie on the 14th.

Precipitation.

The average rainfall, 3.26 inches for the month, is a deficiency of 0.22 inch.

The largest monthly totals in inches were Blue Knob, 6.58; Beaver Dam, 5.63; Stoyestown, 4.61; New Castle, 4.59; and Kilmer, 4.41 inches.

The least were Bloomsburg, 1.18; Wysox, 1.33; Blooming Grove, 1.51, and Wilkes-Barre, 1.70 inches.

Wind and Weather.

The prevailing wind was from the northwest.

Average number: Rainy days, 8; clear days, 14; fair days, 8; cloudy days, 9.

Miscellaneous Phenomena.

Thunder-storms.—Blue Knob, 14th; Forks of Neshaminy, 27th; Emporium, 24th; Wellsboro, 24th.

Hail.—Blue Knob, 28th.

Snow.—Blue Knob, 15th, 16th, 28th, 29th; Le Roy, 16th, 19th, 30th; Forks of Neshaminy, 30th; Johnstown, 29th; Emporium, 29th, 30th;

Mauch Chunk, 30th; Coatesville, 30th; Bloomsburg, 29th; Saegertown, 28th; Coopersburg, 30th; Wilkes-Barre, 30th; Smethport, 28th, 30th; Pottstown, 30th; Philadelphia (Centennial Avenue), 30th; Girardville, 29th, 30th; Selins Grove, 29th; Wellsboro, 30th; Dyberry, 29th, 30th; Salem Corners, 16th; Ligonier, 29th; Phoenixville, 29th.

Frost.—Pittsburg, 18th, 19th, 30th; Blue Knob, 1st, 2d, 8th, 10th, 15th, 16th, 17h, 18th, 19th, 20th, 25th, 26th, 27th, 28th, 29th, 30th, 31st; Hollidaysburg, 1st, 2d, 17th, 18th, 26th, 30th, 31st; Wysox, 1st, 11th, 16th, 17th, 18th, 19th, 26th, 31st; Le Roy, 16th, 17th, 26th, 29th, 30th, 31st; Forks of Neshaminy, 11th, 16th, 17th, 20th, 26th, 30th, 31st; Emporium, 2d, 3d, 10th, 11th, 17th, 18th, 19th, 26th, 31st; Mauch Chunk, 17th, 18th, 26th, 30th, 31st; State College, 1st, 2d, 17th, 18th, 19th, 26th, 31st; Coatesville, 1st, 11th, 17th, 18th, 30th, 31st; Kennett Square, 1st, 11th, 12th, 15th, 18th, 19th, 20th, 23d, 29th, 31st; Westtown, 17th, 18th, 30th, 31st; Grampian, 2, 17th, 18th, 31st; Lock Haven, 11th, 17th, 18th, 19th, 20th, 26th, 30th, 31st; Bloomsburg, 17th, 18th, 26th, 30th, 31st; Saegertown, 1st, 2d, 3d, 9th, 11th, 12th, 18th, 19th, 27th, 28th, 31st; Carlisle, 1st, 30th, 31st; Harrisburg, 1st, 17th, 18th, 30th, 31st; Edinboro, 29th, 31st; Huntingdon, 2d, 31st; Lancaster, 17th, 26th, 30th, 31st; Lebanon, 1st, 17th, 18th, 26th, 30th, 31st; Coopersburg, 30th, 31st; Drifton, 16th, 17th, 18th, 28th, 30th; Wilkes-Barre, 9th, 17th, 26th, 31st; Easton, 1st, 17th, 18th, 26th, 30th, 31st; Philadelphia (Weather Bureau), 17th, 18th, 20th, 26th, 30th, 31st; (Centennial Avenue), 17th, 18th, 20th, 26th, 30th, 31st; Girardville, 8th, 9th, 11th, 12th, 16th, 17th, 18th, 20th, 26th, 28th, 29th, 30th, 31st; Somerset, 1st, 2d, 3d, 8th, 17th, 18th, 19th, 28th; Wellsboro, 1st, 2d, 8th, 11th, 17th, 18th, 19th, 29th, 30th, 31st; Lewisburg, 1st, 2d, 17th, 25th, 26th, 29th, 30th, 31st; Dyberry, 1st, 8th, 11th, 12th, 17th, 18th, 19th, 26th, 29th, 30th, 31st; Honesdale, 1st, 11th, 17th, 18th, 19th, 26th, 29th, 30th, 31st; Salem Corners, 17th, 26th, 30th, 31st; York, 1st, 17th, 18th, 26th, 30th, 31st; Phoenixville, 17th, 18th, 26th, 30th, 31st; Skippack, 1st, 2d, 12th, 16th, 17th, 18th, 20th.

Sleet.—Blue Knob, 21st.

Aurora.—Le Roy, 2d; Selins Grove, 24th; Salem Corners, 1st, 3d, 5th, 8th.

Coronae.—Emporium, 26th; Lebanon, 25th, 30th.

Solar Halo.—Philadelphia (Centennial Avenue), 12th; Wellsboro, 22d; Dyberry, 26th.

Lunar Halo.—Forks of Neshaminy, 19th; State College, 24th; Lancaster, 20th; Lebanon, 20th; Somerset, 21st; Wellsboro, 26th; Salem Corners, 20th.

Meteors.—State College, 31st; Philadelphia (Centennial Avenue), 17th, 30th.

Parhelias.—Dyberry, 26th.

December Weather.

From United States Weather Bureau Records.

The following data compiled from the records of observations taken during the length of time given at each station, show the average and extreme conditions during that time, and also the range within which weather variations may be expected to keep in any future December.

	Philadelphia. (22 years.)	Pittsburgh. (23 years.)	Erie. (20 years.)
Mean or normal,	35 degrees.	34 degrees.	32 degrees.

MONTHLY WEATHER REVIEW FOR NOVEMBER, 1893.

Hall of the Franklin Institute, Philadelphia, November, 30, 1893.

General Review.

November's normal temperature and rainfall is about 40.2 degrees and 3.33 inches. The present month has been 1.1 degree colder than the average, and the rainfall nearly half of an inch less.

The warmest period was during the first half, and the coldest occurred during the latter part of the month.

General rains prevailed on the 4th, 15th, 21st, 22d, and 28th, being heavy on 4th and 28th.

Light snows occurred on various days, but Saegertown, Carlisle and Girardville were the only stations that reported any on ground at the end of the month.

No unusual phenomena was noticed during November and the month was not exceptional.

From January 1, 1893, to November 30, 1893, the deficiency in temperature was, at Philadelphia, 324 degrees; Pittsburg, 486 degrees; Erie, 401 degrees, and York, 417 degrees.

For the same period the deficiency in precipitation was, at Philadelphia, 3.34; York, 7.35; Erie, 1.99, and excess at Pittsburg, 0.43 inch.

	Mean Temperature.	*Mean Precipitation. Inches.*
November, 1887, ...	39.2	1.80
November, 1888, ...	42.0	3.37
November, 1889, ...	41.0	6.72
November, 1890, ...	41.5	1.49
November, 1891, ...	39.6	2.65
November, 1892, ...	39.1	4.34
November, 1893, ...	39.1	2.93

Temperature.

The mean temperature for November, 1893, was 39.1 degrees, which is 1.1 degree below the normal, and the same as the corresponding month of 1892.

The mean of the daily maximum and minimum temperatures, 48.0 degrees and 30.5, gives a monthly mean of 39.2 degrees, with an average daily range of 17.5 degrees.

Highest monthly mean, 44.9 degrees at Altoona.

Lowest monthly mean, 33.5 degrees at Wellsboro.

Highest temperature recorded during the month, 68 degrees on the 2d at Pittsburg.

Lowest temperature, minus 4 degrees on the 26th at Saegertown.

Greatest local monthly range, 69 degrees at Saegertown.

Least local monthly range, 35 degrees at Girardville.

Greatest daily range, 43 degrees at Hollidaysburg on the 2d.

Least daily range, 0 degree at Hamburg on the 4th.

Barometer.

The mean pressure for the month, 30.12, is about .07 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.68 at Pittsburg and Harrisburg on the 26th, and the lowest 29.50 at Erie on the 21st.

Precipitation.

The average rainfall, 2.93 inches for the month, is a deficiency of 0.40.

The largest monthly totals in inches were Coatesville, 5.69; Browers Lock,, 4.81; Pottstown, 4.78; West Chester, 4.76; Phoenixville, 4.74, and Lansdale, 4.67.

The least were Somerset, 1.16; Davis Island Dam, 1.21; West Newton, 1.27; Lock No. 4, 1.35, and New Castle, 1.39.

Wind and Weather.

The prevailing wind was from the west.

Average number: Rainy days 8; Clear days, 8; fair days, 11; cloudy days, 11.

Miscellaneous Phenomena.

Thunder.—Saegertown, 2d.

Hail.—Emporium, 22d.

Sleet.—Blue Knob, 21st, 23d, 27th, 28th; Huntingdon, 21st.

Snow.—Altoona, 15th, 22d; Blue Knob, 4th, 14th, 15th, 18th, 21st, 23d, 24th, 25th, 28th, 29th; Hollidaysburg, 15th, 21st; Le Roy, 4th, 19th, 20th, 21st, 24th, 25th, 26th; Quakertown, 15th, 21st, 25th; Emporium, 4th, 15th, 16th, 19th, 20th, 21st, 23d, 24th, 25th, 28th; Mauch Chunk, 15th; State College, 15h, 21st; West Chester, 15th; Coatesville, 15th, 21st; Kennett Square, 15th; Grampian, 20th, 21st; Lock Haven, 19th, 21st; Bloomsburg, 15th, 19th, 20th, 22d, 25th; Seagertown, 15th, 16th, 19th, 23d, 24th; Carlisle, 15th, 22d; Huntingdon, 21st; Kilmer, 15th, 21st; Lancaster, 15th; New Castle, 15th, 26th; Lebanon, 15th, 21st; Coopersburg, 15th, 21st; Drifton, 15th, 19th, 20th, 21st, 22d, 25th; Wilkes-Barre, 15th, 20th, 21st, 25th; Skippack, 15th; Logania, 21st; Philadelphia (Centennial Avenue), 15th, 20th, 24th, 25th, 27th; Shingle House, 15th, 16th, 19th, 20th, 21st, 24th; Girardvilee, 15th, 19th, 21st; Selins Grove, 21st; Somerset, 15th, 24th, 28th; Dyberry, 4th, 15th, 21st, 22d; Honesdale, 15th, 21st; South Eaton, 22d; York, 15th, 21st.

Aurora.—Le Roy, 1st; Lebanon, 1st; Selins Grove, 1st; Dyberry, 1st.

Coronae.—Blue Knob, 26th; Emporium, 18th, 19th, 20th, 22d; Saegertown, 14th; Lebanon, 6th, 19th, 20th, 22d, 23d, 24th; Dyberry, 26th.

Solar Halo.—Le Roy, 1st; Westtown, 1st, 7th; Philadelphia (Weather Bureau), 1st, 7th, 29th; (Centennial Avenue), 1st, 7th; Wellsboro, 14th; Dyberry, 7th, 14th.

Lunar Halo.—Hollidaysburg, 18th, 26th; Lancaster, 26th; Philadelphia, (Centennial Avenue), 18th, 19th.

Meteors.—Blue Knob, 25th; Philadelphia (Centennial Avenue), 10th, 18th, 19th; Dyberry, 30th; State College, 1st, 10th, 16th.

January Weather.

From United States Weather Bureau Records.

The following data, compiled from the records of observations taken during the length of time given at each station, show the average and extreme conditions during that time, and also the range within which weather variations may be expected to keep in any future January.

	Philadelphia. (23 years.)	Pittsburg (22 years).	Erie (19 years.)
Mean or normal,	32 degrees.	31 degrees.	28 degrees.
Warmest January, Average,	1890 42 degrees.	1880 44 degrees.	1880 40 degrees.
Coldest January, Average.	1893 24 degrees.	1875 23 degrees.	1875 19 degrees.
Highest temperature recorded, Date,	72 degrees. 12th, 1890	71 degrees. 13th, 1890.	73 degrees. 1st, 1876
Lowest temperature recorded, Date,	Minus 5 degrees. 10th, 1875.	Minus 12 degrees. 10th, 1875	Minus 15 degrees 10th, 1875
Average date of first "killing" frost,	October 28th	October 21st	October 15th
Average precipitation (inches),	3.40	31.8	3.45
Average number of days with .01 inch or more,	12	16	20
Greatest monthly precipitation, Date,	5.84 1873	6.17 1888	6.20 1878
Least monthly precipitation, Date,	1.49 1872	1.54 1879	1.41 1875
Greatest amount in 24 hours, Date,	2.24 5th, 1873	2.34 8th, 1884.	1.62 27th and 28th, 188
Greatest amount snowfall in 24 hours, Date,	10.00 5th and 6th, 1893	16.50 8th, 1884.	9.00 8th and 9th, 1886

January Weather—Continued.

	Philadelpbia. (23 years.)	Pittsburg. (22 years.	Erie. (19 years.)
Average number clear days,	7	4	2
Partly cloudy,	12	10	10
Cloudy,	12	17	19
Prevailing direction of wind,	NW.	W.	SW.
Highest velocity, miles per hour,	52	36	56
Date,	31st, 1876; 17th, 1885	26th, 1882; 1st, 1888	9th, 1876

ASSESSMENTS AND TAXES.

ASSESSMENT RETURNS.

It will be understood that the assessments upon which these deductions are based, were made late in 1892, and in the early part of 1893, and that the values represented in them were estimated before the present financial depression took place.

Every citizen of Pennsylvania is vitally interested in the question of taxation. Recognizing this fact, the Department has from year to year put forth every effort to procure full assessment returns, so that the people might have annually placed before them all possible information on this question. While the means provided for the collection of these statistics is limited, yet the reports this year are more nearly complete than they have ever been before. It is believed that the general reports of this year will, in the main, be gratifying to the taxpayer, and from them the careful student of economics may gather evidences of advancement and prosperity.

In Part II, of this report, is published in full the assessment reports from every county in the State. Unfortunately in some instances the reports are not complete. County Commissioners should exercise great care and take great pride in having these reports made complete in every particular. Otherwise, they not only evade the law which requires a complete report under every branch of assessments, but they place their county in an unfair light when compared side by side with counties from which careful and complete reports have been received.

The blanks upon which these reports are made are furnished by this Department and are mailed to every county during the month of March. Perhaps, in some instances, it may not be convenient or possible to report promptly, yet by the first of September at the very latest, every county in the State should have its report filed in this Department. To delay them longer than September 1st, may interfere with the prompt publication of the Annual Report, which should be ready for distribution as early as possible. It is gratifying to add, however, that many of the counties are very prompt in making returns, and that from year to year, these delinquencies become less and less marked.

Elsewhere in this report, in the division of assessment reports, will be found tabular statements giving the following information, as reported by the several counties, their reports being printed in full.

1. Number of taxables.
2. The number of acres of cleared land.
3. The number of acres of timber land.
4. Value of all real estate as returned by the assessor.
5. Value of all real estate exempt from taxation.
6. Value of all real estate taxable.
7. Number and value of horses, mares, geldings, and mules, over the age of four years.
8. Number and value of neat cattle over the age of four years.
9. Value and salaries and emoluments of office, officers, posts of profit, professions, trades and occupations.
10. Aggregate value of all property taxable for county purposes.
11. Aggregate amount of county tax assessed.
12. Amount of money at interest including mortgages, judgments, bonds, notes, stocks, etc.
13. Value of stages, omnibuses, hacks, cabs, etc.
14. Aggregate value of property taxable for State purposes, at the rate of four mills on the dollar, including money at interest, stages, omnibuses, hacks, cabs, etc.
15. Aggregate amount of State tax assessed.
16. Debt of each county.

By means of the blanks above referred to, it has been the duty of the bureau of assessments to collect from the various counties the information outlined above, and to examine, verify and prepare these returns for publication in this part of the Annual Report of the Department of Internal Affairs. Following these in Part II, of this report, will be found a consolidated and comparative statement made from the reports from all the counties. It is a most comprehensive table and includes the totals of each of the above divisions from each county for the years 1892 and 1893. As is obvious, the total of this statement will represent the aggregate reported from the entire State. An examination of these, will perhaps be equally interesting to the tax payer and the statistician.

Some of the counties show peculiar increases, others decreases, which are equally astonishing; many of the latter can be explained or understood only on the ground of imperfect and incomplete assessments. It is also easily seen from the face of the returns, that there is a lamentable difference in the basis of valuation adopted by the assessors and commissioners. Most of our commissioners and assessors seem to forget that it is the sworn duty of the triennial assessors, when estimating the value of property for the purpose of levying a county tax, to assess and value every separate lot, or piece or

tract of land with the improvements thereon, at the rate or price which they, after due examination and consideration, believe the same would sell for if sold singly and separately, at a bona fide sale, after full public notice. Even a casual glance at the comparative statement will show that there is a great undervaluation of both real and personal property in many counties.

It must be remembered that in these deductions, when reference is made to the increases and decreases in taxables, valuations, taxes assessed, etc., greatest or least means, greatest or least in proportion to the size and valuation of the county cited. Philadelphia and Allegheny counties may have added more to their general wealth than any of the smaller counties, but the increase may not be so great in proportion to the population and wealth of the county.

Number of taxables in the State.

The entire number of taxables increased from 1,576,149, in 1892, to 1,662,956 in 1893, an increase of 86,447. Allegheny county increased from 153,636, to 197,225, or 43,589. Berks county increased from 40,813 to 46,974, or 6,161. Blair county made an increase of about fifty per cent. or from 19,940 to 29,527, or 9,587. This is the largest percentage of increase in the State and shows clearly that the number of taxables was not correctly reported in former years, particularly in 1892. Dauphin county increased from 28,623 to 34,573, or 5,950. Lackawanna from 49,044 to 53,864 or 4,821. These are the most and indeed the only remarkable increases in the State.

The counties showing the greatest decrease and the number as reported in 1892, and 1893, may be seen in the following table:

County.	1892.	1893.	Decrease.
Butler,	17,464	17,428	36
Clinton,	9,417	9,384	33
Forest,	2,192	2,151	41
Fulton,	3,424	3,088	336
Huntingdon,	10,827	10,668	159
Lycoming,	23,185	23,087	98
McKean,	11,936	10,863	1,073
Northampton,	31,314	30,785	529
Philadelphia,	296,078	272,918	23,160
Venango,	12,609	12,404	205
Warren,	11,252	10,814	438

The Number of Acres of Cleared Land.

The number of acres of cleared land has according to returns decreased from 15,574,295. to 14,872,864 or 701,431. Allegheny county

last year returned 347,512 acres of cleared land, while this year it returns but 22,422, showing a decrease in one county of 325,090 acres in one year. This from a densely populated county like Allegheny must either indicate a strong tendency towards forestry culture or a very great laxness among the assessors, the latter being most likely the cause. Beaver county last year returned 196,616 while this year it made no return under that heading. Cambria on the other hand returned 322,394, this year but nothing last year Cameron returned 44,072 last year and 34,072 this year. Lackawanna 222,057 last year and 237,622 this year. Lehigh decreased from 211,441 to 185,620. Luzerne from 330,642 last year to nothing this year. Lycoming and Schuylkill counties made no return under this head either year. York fell off from 511,914 to 430,213.

Timber Lands.

The acreage in timber land has decreased this year from 8,369,142, in 1892, to 8,296,112, in 1893, a falling off of 73,030 acres. It is strange indeed that the number of acres of cleared and timber land should both decrease; a decrease in one should show a corresponding increase in the other. This would be the case if accurate return were made by the assessors. The whole number of acres of land both cleared and timbered in the State, by actual survey including all space within the boundaries of the State, is 28,808,442. But the entire number of acres returned last year was 23,943,437, while this year it is 23,168,976, a falling off of 774,461 acres. This apparent discrepancy of 4,865,005 acres needs some explanation. The entire area of the State would include all cities and towns which are not returned to the assessor as cleared or timbered land. Then in the mountainous regions of the State, there are thousands of acres of land once covered with timber which has since been removed. The land is generally regarded as of little or no value, and in many cases no returns of such tracts are made to the assessor, for the reason that the land cannot be well classified as either cleared or timber land. Clearfield county, from the reports, has increased the timber land from 231,382 acres last year to 477,978 acres this year, or 246,596 acres in one year. These figures alone show how unreliable are the reports from the several assessment districts.

Value of all Real Estate.

The total value of all real estate in 1892, was $2,543,567,984, while for 1893, it is reported at $2,590,433,790, or an increase of $46,865,806. No one county showing any marked increase but the counties reporting decreases may be shown in the following table:

County.	1892.	1893.	Decrease.
Carbon,	3,780,875	3,664,467	116,408
Clearfield,	9,640,928	9,477,048	143,880
Clinton,	6,101,237	6,064,235	37,002
Fayette,	32,011,874	31,944,961	66,913
Forest,	2,051,544	2,000,247	51,297
Fulton,	878,425	873,216	5,209
McKean,	6,368,326	6,275,698	92,628
Monroe,	6,412,726	6,348,454	64,272
Potter,	2,794,904	2,721,401	73,503
Snyder,	4,922,957	4,743,606	179,351
Sullivan,	1,302,823	1,302,817	006
Union,	4,169,487	4,138,168	31,319

Value of Real Estate Exempt from Taxation.

The property in Pennsylvania that is exempt from taxation consists of municipal buildings of all kinds, school houses, churches and cemeteries. An increase in this direction, therefore, is particularly gratifying. In 1892 the entire valuation of property exempt from taxation was $234,801,553, while for 1893, it is $239,243,753, a small increase of $4,442,200. The counties showing the greatest increase are the following:

County.	1892.	1893.	Increase.
Armstrong,	650,804	949,162	298,358
Blair,	2,208,535	2,402,850	194,315
Carbon,	228,900	282,850	53,950
Dauphin,	4,661,150	4,795,050	133,900
Greene,	369,855	461,455	91,600
Lackawanna,	2,809,576	2,888,268	78,692
Lehigh,	1,982,390	2,045,415	63,025
Lycoming,	1,564,550	1,633,175	68,625
Montgomery,	4,293,275	4,556,820	263,545
Northampton,	4,449,703	4,606,290	156,587
Susquehanna,	294,934	331,281	36,347

Last year Wyoming county reported an increase in its property exempt from taxation from $9,500 of the year before to $138,000 for 1892, showing an increase of $129,500 in one year. But this year it has fallen off from $138,000 last year to $60,350, or a decrease of $77,650, in one year. The counties showing the most marked decrease in this direction are as follows:

County.	1892.	1893.	Decrease.
Allegheny,	48,200,254	47,704,350	495,900
Clearfield,	824,835	668,252	156,583
Fayetate,	1,547,955	1,248,173	299,782

County.	1892.	1893.	Decrease.
McKean,	362,250	284,460	77,790
Potter,	353,275	304,104	49,171
Warren,	605,654	545,604	60,050
Wyoming,	138,000	60,350	77,650

Value of Real Estate Taxable.

No alarming decrease nor unusual increase has been made in this division in any county. Every county reported and the increase is from $2,308,767,431, to $2,351,190,037, an increase of $52,422,606.

Horses and Mules over the Age of Four Years.

These animals when over the age of four years are taxed for county purposes. The act is practically a dead letter for it has long since become a common saying throughout the State that very few of them ever reach that age, and their undervaluation is equally well known. The number has increased in the last year from 544,910, to 561,368, but the total value has decreased from $33,361,391, to $32,585,620. In a like manner has the average value decreased; last year it was $61.62, while this year it is but $58.04. In Franklin county the number of horses increased from 11,169 to 14,868, the average value being $47.11, while this year the total value is $514,399, the average value being $35.28. By referring to the following table it will be seen that the valuation of these animals is decreasing while in many instances the number has increased. This might seem to indicate accuracy in the assessments of the State, for just in proportion to the decrease in the market price of these animals, will they remain on the farmer's hands, being held for higher prices.

County.	1892.	1893.	Decrease.
Adams,	377,451	375,358	2,098
Armstrong,	250,590	241,078	9,512
Beaver,	425,722	360,094	65,628
Bedford,	414,164	360,476	53,690
Berks,	1,433,016	1,429,908	3,108
Blair,	351,146	332,062	19,084

Union,	110,149	104,119	6,030
Venango,	303,461	297,538	5,923
Warren,	312,127	291,046	21,081
Washington,	846,046	794,966	51,080
Wayne,	126,380	125,760	628
York,	1,147,837	1,043,022	103,835

All the counties, save Lebanon which returned the same number for both years, show small increases.

The Number and Value of Neat Cattle.

The total number subject to assessment in the State has decreased from 707,995 to 692,259, and their total value has decreased from $12,384,879, to $12,148,429. The average value last year was $17.49, while this year it is $17.53. In most counties there is a small falling off both in number and value, showing doubtless that the assessors are not as careful as they should be and that the law is every year becoming more and more a dead letter. But a few counties show special increases or decreases. Monroe county had 4,036 neat cattle last year while this year it reports 3,584, while their total value has increased from $72,128, to $111,171. Their average value last year

was $17.87, while this year it is $31.02. Wayne county fell off in numbers from 19,752 to 11,902, and the total valuation from $147,020, to $87,007, or $60,013.

Salaries, Emoluments of Office, Trades, Etc.

The aggregate value of salaries and emoluments of office, officers, posts of profit, professions, trades and occupations has increased from $104,881,902, to $111,014,967, or $6,133(065. The greatest increase is in the following counties:

County.	1892.	1893.	Increase.
Allegheny,	$39,636,670	$44,952,725	$5,316,055
Blair,	1,887,347	1,991,981	104,634
Cambria,	1,495,028	1,692,910	197,882
Dauphin,	2,674,075	2,883,725	209,650
Delaware,	2,080,400	2,129,800	49,400
Lackawanna,	2,153,485	2,381,676	228,191

Fulton county fell off from $20,747 to $8,765, while York fell off from $2,270,594, to $1,438,550. Lancaster county made no report under this division either last year or this.

Property Taxable for County Purposes.

The aggregate value of property taxable for county purposes has increased from $2,459,538,840, to $2,507,066,937, or $47,528,097. No county in the State shows any marked increase in this direction, but the following counties show decreases, viz: Armstrong, Bedford, Butler, Carbon, Centre, Clinton, Forest, Fulton, Lawrence, McKean, Montour, Potter, Snyder, Union and York.

Amount of County Tax Assessed.

The aggregate amount of county tax assessed in 1892, was 19,829,-680.78, while for 1893, it is $18,851,798.73, or a decrease in the year of $977,882.05. The counties showing the most marked decreases in this direction are the following:

County.	1892.	1893.	Decrease.
Allegheny,	$736,162 08	$544,858 72	$191,303 36
Bedford,	61,435 61	52,506 11	8,929 50
Blair,	131,862 20	121,182 76	10,679 44
Bradford,	88,321 06	66,604 01	21,717 05
Bucks,	119,787 25	80,443 21	39,344 04
Butler,	65,186 04	51,988 35	13,197 69
Cambria,	104,736 66	75,306 90	29,429 76
Clarion,	35,710 54	26,789 75	8,920 79
Crawford,	124,213 72	107,375 60	16,838 12
Cumberland,	69,908 41	58,547 75	11,360 66

County.	1892.	1893.	Decrease.
Huntingdon, ...	85,056 19	75,392 39	9,663 80
Montour, ...	19,149 97	14,877 27	4,272 70
Washington, ...	123,686 47	85,134 11	38,552 36

The counties of Adams, Beaver, Berks, Cameron, Chester, Clearfieeld, Columbia, Dauphin, Elk, Erie, Fayette, Mercer, Indiana, Jefferson, Lackawanna, Lancaster, Lebanon, Lehigh, Luzerne, Lycoming, Mifflin, Montgomery, Northampton, Philadelphia, Pike, Potter, Schuylkill, Somerset, Sullivan, Susquehanna, Tioga, Venango, Wayne, Westmoreland and Wyoming, all made slight increases in their county tax assessments this year over last year. Some of the above counties, while they have increased their county taxation, have reduced their county debt, but the counties of Lycoming, Philadelphia and Schuylkill have increased both.

The Amount of Money at Interest.

The aggregate amount of money at interest, belonging to the people of a county or State, by some is construed as an index of their prosperity. For some years past the annual increase in the amount reported has been very marked, the result doubtless of the Act of Assembly passed in 1885, which among other things, provides for a more efficient means of compelling a true return of the amount of money at interest upon which a State tax is payable. Last year the increase was about ten millions while the year before showed an increase of nearly seventy millions. This year the amount returned has increased from $590,882,560, to $607,664,408, or $16,781,848. The counties showing the largest increase in proportion to their population are the following:

County.	1892.	1893.	Increase.
Allegheny, ...	$60,548,402	$67,317,716	$6,769,314
Bedford, ...	1,388,093	1,532,402	144,309
Luzerne, ...	7,038,718	7,650,605	611,887
Philadelphia, ...	289,626,954	299,027,152	9,400,199
Venango, ...	2,519,423	2,949,298	429,875

The counties decreasing in their returns under this branch are Adams, Armstrong, Bradford, Bucks, Cambria, Carbon, Clarion, Lancaster and Lawrence.

Aggregate Value of Stages, Omnibuses, Hacks, Etc.

The aggregate value of stages, omnibuses, hacks, cabs, etc., has decreased from $627,179, in 1892, to $589,204, in 1893. The most casual glance at these figures is sufficient to prove that the average tax payer is not overly careful about reporting this branch of property to the assessor. The law providing for this branch of taxation should either be repealed or rigidly enforced by all assessors.

Allegheny has reduced her valuation in this branch of property from $103,630 to $84,985, yet no one at all familiar with its great cities will doubt for a moment that it has annuallly increased its property in this direction. Berks reports $2,290, worth of property under this branch, including, it will be remembered, the wealthy and industrious city of Reading. Carbon reports $1,690. Elk, $1,460. Forest, $495. Greene, $1,690. Huntingdon, $1,320. Juniata, $1,835. Lebanon, including the city of Lebanon and many other large towns, reported $890 worth. Montour, $972. Susquehanna, $125. Sullivan, $710. Wayne, $280 and Wyoming, $255. It must not be forgotten that Centre county increased her valuation in this direction from $50 last year to $3,225 his year. Why do assessors disregard this duty by assessing so few of the many thousands of these articles which are the subject of taxation?

Property Taxable for State Purposes.

The aggregate value of property taxable for State purposes has increased from $591,497,404, to $608,253,612, an increase of $243,792. This branch of property includes money at interest, such as mortgages judgments, bonds, notes, stocks, etc., and all stages, omnibuses, hacks, cabs, etc. By the Act of Assembly of 1885, a State tax of three mills on the dollar was placed on this property, and by the Act of 1891, it was raised to four mills. The taxation of money at interest has resulted in a vast revenue to the State, while that of hacks, cabs, etc., as has been shown elsewhere, is practically a failure.

The following table gives the counties showing the greatest increase or decrease in their reports for 1893, as compared with those of 1892:

County.	1892.	1893.	Increase.	Decrease.
Adams, ...	$2,452,871	$2,380,487	.....	$72,384
Allegheny, ...	60,652,031	67,402,701	$6,750,669	
Armstrong, ...	1,621,143	1,455,209	.....	167,934
Bedford, ...	1,394,008	1,537,457	143,449	
Berks, ...	15,618,206	16,073,544	455,338	
Blair, ...	2,608,588	2,782,261	173,673	
Bradford, ...	3,552,860	3,353,776	.....	199,,084
Butler, ...	2,626,528	2,720,742	94,214	
Cambria, ...	1,411,299	1,280,769	.....	130,530
Carbon, ...	1,595,213	1,325,431	.....	269,782
Centre, ...	2,371,272	2,560,946	189,674	
Clarion, ...	2,123,234	1,944,828	.....	178,406
Clearfield, ...	1,481,877	1,610,197	128,320	
Clinton, ...	987,387	970,938	.....	16,449
Erie, ...	8,184,358	8,604,298	419,940	
Fayette, ...	3,399,327	4,201,660	802,333	

County.	1892.	1893.	Increase.	Decrease.
Forest, ...	128,559	156,598	28,039	
Fulton, ...	215,821	253,104	37,283	
Huntingdon, ...	1,475,326	1,641,255	165,929	
Indiana, ...	1,731,693	1,590,284	.....	141,409
Lancaster, ...	22,991,859	22,195,834	.....	796,025
Lawrence, ...	2,267,669	2,132,464	.....	135,205
Lycoming, ...	3,489,102	3,761,234	272,132	
McKean, ...	1,986,077	1,607,224	.....	378,853
Monroe, ...	990,961	891,048	.....	99,913
Sullivan, ...	223,512	272,077	48,565	
Venango, ...	2,526,148	2,954,898	428,750	
Westmoreland, ..	4,992,033	5,548,209	556,176	

Aggregate Amount of State Tax Assessed.

In dealing with these figures representing the aggregate amount of State tax assessed, it must be remembered that this does not include the State tax paid by railroads and other corporations. It will be remembered that the State appropriation to the school fund alone for last year was five and a half millions of dollars, or more than twice as much as is levied by all the city, borough and township assessors in the State for State purposes. This is the second assessment under the Act of 1891, raising the rate of State tax assessed on this branch of property from three to four mills on the dollar, and consequently the increase in the amount of State tax assessed is not as great this year over last as it was last year over the previous year. This year, however, it has increased from $2,365,989.61, to $2,433,011.84, or $67,-032.23. The counties showing the greatest increase in this direction are shown in the following table:

County.	1892.	1893.	Increase.
Allegheny, ...	$242,608 12	$269,610 81	$27,002 69
Bedford, ...	5,576 03	6,149 79	573 76
Berks, ...	62,472 82	64,294 25	1,821 43
Blair, ...	10,434 35	11,129 04	694 69
Clearfield, ...	5,927 51	6,440 78	573 27
Dauphin, ...	24,859 63	25,713 96	854 33
Erie, ...	32,737 43	34,417 18	1,679 75
Fayette, ...	15,597 31	16,806 68	1,209 37
Forest, ...	514 24	626 39	112 15
Fulton, ...	863 28	1,012 41	149 13
Huntingdon, ...	5,901 30	6,565 02	663 72
Lehigh, ...	24,903 89	25,969 29	1,065 40
Luzerne, ...	28,181 26	30,629 16	2,447 90
Lycoming, ...	13,956 41	15,046 94	1,090 53
Schuylkill, ...	12,833 69	13,439 12	605 43

County.	1892.	1893.	Increase.
Snyder,	2,700 64	2,789 42	88 78
Sullivan,	894 04	1,088 31	194 27
Venango,	10,104 59	11,819 59	1,715 00
Westmoreland,	19,968 13	22,192 71	2,224 58

Small decreases were shown in the counties of Adams, Bradford, Bucks, Cambria, Carbon, Chester, Clarion, Clinton, Columbia, Crawford, Cumberland, Delaware, Elk, Indiana, Jefferson, Juniata, Lancaster, Lawrence, Lebanon, McKean, Mercer, Mifflin, Monroe, Montgomery, Montour, Northumberland, Perry, Pike, Tioga, Union, Warren, Washington, Wyoming and York. Armstrong county fell off from $8,484.57, to $5,820.84.

Debt of Counties.

The total of all county debt has increased this year from $63,602,502.43 to $63,982,537.24, an increase of $380,,034.81, which on such a large sum is practically not worth considering; last year, however, there was a decrease of over twenty-one millions in the total county indebtedness.

The following table shows which of the counties have increased their county debt during the last year:

County.	1892.	1893.	Increase.
Adams,	$10,000 00	$14,800 00	$4,800 00
Forest,	15,000 00	32,000 00	17,000 00
Fulton,	No debt.	1,990 00	1,990 00

The following counties have reported no debt: Bradford, Butler, Centre, Clarion, Erie, Franklin, Greene, Lawrence, Lehigh, Luzerne, Northumberland, Pike, Sullivan, Susquehanna, Venango, Washington and Wyoming. Clinton made no report under this division.

TAX RETURNS.

During the session of the Legislature of 1889, a law was passed authorizing the Secretary of the Internal Affairs to gather from the several counties of the Commonwealth, the total amount of taxes collected for all purposes, specifying the amount collected for the support of the poor; for the construction and repairs of streets, roads and bridges; for school purposes; the amount collected on personal property, occupations and licenses; the amount collected on the real estate of railroad corporations, as well as the amount collected on corporations other than railroads. Provisions have been made for the payment of the expenses connected with the collection of these statistics, but notwithstanding this fact several counties have failed to comply with the law, and the Department has not, therefore, been able to obtain from them the desired information. Returns have been received this year from all but six counties, three more than reported last year. Those failing to report last year were Berks, Carbon, Cumberland, Delaware, Luzerne, McKean, Schuylkill, Snyder and Tioga,

nine in all. The six delinquent counties this year are Berks, Carbon, Luzerne, McKean, Schuylkill and Tioga. Some of these counties have ignored the law from the first, thereby failing to give the required information, notwithstanding the fact that the commissioners have been repeatedly and earnestly requested to do so by this Department.

Blank forms, accompanied with the proper instructions, are forwarded each year to the commissioners of all the counties in the State, and towards the close of the year the tardy counties are reminded of their delinquency by letters and telegrams. The returns of the sixty-one counties making report this year are fairly complete, and the information they contain will be found interesting to those who may have the time and inclination to refer to them.

The returns from the several counties of the State, together with a consolidated table, will be found in Part II of this report.

Taxes Collected for the Support of the Poor.

From the returns made by thirty-three counties out of the sixty-one making report, it appears that the amount collected for the support of the poor was $1,319,939.08. This however, does not include the amounts appropriated by the commissioners in the twenty-eight counties where the poor are a county charge. In the last mentioned counties the tax for this purpose is raised by a general levy with other county taxes; and the amount thus appropriated makes a total of $566,643.93, which, added to the amount reported as collected makes the sum of $1,886,583.01, that has been paid in the sixty-one counties for the support of the poor during the year. The total amount reported last year was $1,659,640.35, being an increase this year of $226,942.66. This increase is partly accounted for by the counties of Cumberland, Delaware and Snyder having reported this year and failing to do so last year.

The most marked increase in the amount collected for the support of the poor was in Lackawanna county, that county last year returning $105,753.85, while this year the amount is $137,248.56, an increase of $31,494.71. In thirteen counties there is a slight decrease in the amount of poor tax collected, while the remaining counties show an increase.

Construction and Repair of Streets, Roads and Bridges.

In the sixty-one counties reporting there has been collected for the construction and repairs of streets, roads and bridges the sum of $7,634,526.37, to which add $234,997.09, appropriated by the commissioners of counties for the same purpose, making a total of $7,869,523.46, as against $6,586,020.72 last year, an increase of $1,283,502.74. Some marked changes are noted in the amounts reported from different counties as compared with last year. In the report of last year,

the figures of Allegheny county are given at $1,151,853.87, while this year the amount is $1,602,708.00, an increase of $450,854.13. The returns of Lycoming county show an increase of $74,135.81, over last year. Philadelphia last year was $886,124.00; this year it is $1,145,428.88. A number of other counties show an increase, while some show a decrease.

Taxes Collected for School Purposes.

There was collected for school purposes in the sixty-one counties reporting $10,268,293.79. The amount collected last year in fifty-eight counties was $9,105,,068.63, an increase of $1,163,225.16. This increase is partly due to the fact that three more counties are included in this report than was given in that of last year. The fact that an appropriation of $5,000,000.00 is now made annually by the State for school purposes does not seem to diminish the amount of taxes collected. In Allegheny county there is an increase of $490,805.81 over last year, and in Philadelphia an increase of $557,562.22. There are increases in many other counties, while some report a decrease.

Taxes on Personal Property.

The sixty-one counties returned as the total tax collected on personal property $2,690,499.20. The amount last year was $2,246,830.84, showing an increase of $443,668.36 for this year.

Taxes on Occupations.

The amount of taxes collected on occupations is given at $898,685.88 against $829,346.42 last year, showing an increase of $69,339.46.

Taxes from Licenses.

The total amount reported from licenses this year is $4,532,667.84, while last year it was $3,533,657.26, an increase of $999,010.58. The increase in Philadelphia was $266,077.68, while in the county of Allegheny it was $630,574.02.

Local Taxes Paid by Railroad Corporations.

The returns show that the railway corporations of the State have paid, this year, $669,887.67. Last year the amount was $609,231.67. These are local taxes. The taxes paid by the railway corporations for State purposes are given in the reports of the Auditor General and State Treasurer.

Taxes Collected on the Real Estate of Corporations Other than Railways.

The total amount reported this year is $1,182,133.08, as against $1,109,958.12 last year, showing an increase of $72,174.96.

Taxes Collected for all Purposes.

In the consolidated table, which appears in Part II of this report, will be found, by counties, the total amount of taxes collected for all purposes, including that collected for the maintenance of State, county, city, township or ward governments, as well as for the support of the poor, and the amount collected from liquor and other licenses. In the sixty-one counties the total amount of taxes collected is $42,265,275.52. The fifty-eight counties reporting last year gave the total amount at $43,478,090.38, or $1,212,814.86 more than reported for the present year, and this in the face of the fact that three more counties reported this year than last. This decrease, however, is accounted for in the return from Philadelphia. The total amount of taxes reported from that city last year was $21,828,253.86, while this year it is only $14,791,220.75, a decrease of $7,037,033.11. This disparity of the Philadelphia return is explained by the clerk of the board of revision of taxes for that city by stating that the taxes collected for gas and water purposes were included in the return for last year, but omitted in the report of the present year. Outside of Philadelphia thirty-five counties show an increase, and twenty-one a decrease, in the total amount of taxes collected for all purposes.

ASSESSMENT VALUATIONS *versus* ACTUAL VALUATIONS.

Having made the foregoing observations in regard to the returns procured by the Department from the county authorities relative to the taxes collected for the different purposes indicated, we deem it proper to make some observations as to the inequalities of assessments, and in order to make the matter so clear that any student of the subject may understand it, the Department has undertaken to collect from several of the counties information showing as nearly as possible the percentage which assessment valuation bears to the actual valuation, and also showing that in one assessment district property is assessed at a much lower percentage of actual valuation than

in another district in the same county. In order to determine this question in the most certain and reliable manner, a plan of operation was devised and the Department sent its representatives to make examination of the records of the counties from which information was to be procured. Great difficulty has always been experienced in fixing the figures at which real estate should be assessed. It is well known that the law requires the assessor in fixing the assessment of property to do so with reference to its actual value. It is also well known that this law is substantially a dead letter. It is safe to say that in all counties the rates of assessment are below 80 per centum of the actual valuation, and in many cases the percentage of assessment valuation does not exceed 40 per centum of the actual value, while in other counties there is still greater disparity between actual and assessed valuation.

How, then, was the Department to determine the proportion that assessed and actual valuation bore to each other? A man owning a property may claim it to be worth $10,000. Another man's estimate may be $8,000. The assessor, when he makes his investigations, may deem it worth $7,000, and fixes his assessment at that figure. These are but the opinions of three men, one owning the property, who, if he desires to sell it, is interested in fixing the valuation high, but if he is consulting with the assessor he will be interested in having the figures adjusted as low as possible. The assessor, no matter what he thinks, by some unknown process, fixes the value at $7,000. The third man, who is disinterested, guesses at $8,000 as the approximate figure. Which amount is most nearly right? If the man who owns the property offers to sell it for $10,000, we may assume that that price indicates the maximum valuation; and if a man is found who would offer to purchase it at $7,000, we may assume that his price indicates the minimum valuation. In the one case the man desiring to sell is trying to have it placed at as high a figure as possible, and in the other the man desiring to buy is trying to have it placed at as low a figure as possible. If the property is sold under these circumstances, and the men who are conducting the transaction are men of judgment, the point or figures at which their opinions meet would seem to furnish the most reliable evidence of the actual value of the property. Assuming, of course, that there are no questions involved that would affect the value of the property, such as incumbrances, which might make it necessary for the owner to sell it in order to get something out of it, and in the absence of any influences outside of the usual sale and purchase of real estate, it would seem that we might rely with confidence on the figures so obtained as indicating the true or substantially correct value of the property; therefore, deciding that the best way to get at the actual value of a piece of property was to ascertain the consideration for which it was sold. Blanks

were prepared and representatives sent to the different counties to examine the records of deeds and assessments. The examination was made with care and the figures taken from the records can be relied upon as indicating indisputable facts. For instance, to state a case, it was found that one of the latest deeds of record described a house and lot which were sold for $10,000. No incumbrance of any kind was found that might have affected the sale, and after having taken a description of the property, its location, area, the date of sale and the consideration received—an examination was made of the assessment rates to ascertain the assessed valuation of this same property. When this was done the percentage of the assessed valuation to the actual valuation was easily determined. This line of investigation was extended to the examination of about one hundred sales in each of the counties where investigations were made, and after having classified the property with reference to farm lands, city and town lots, and unseated lands, a general average was ascertained to show the percentage of assessed valuation to the actual valuation not only on each class of property, but in each county, and an aggregate average in all the counties wherein examinations were made. We believe that this investigation will disclose information of importance to the legislator and all persons interested in the question of taxation. Much complaint has been made by many of our people regarding the inequality of taxation, and there is no question about which people are so captious as that of taxation. There are many who claim that the railway and other corporations are not bearing their share of the public burdens; and, however true this may be, the information we have obtained from these investigations shows that the most extreme, unjust and unreasonable inequalities exist with reference to the local assessments and levy of taxes. A most marked disparity exists between assessments in the same county where property is all subject to the same levy for county purposes, and the result is that a portion of the people pay a much higher amount of taxes than the others in proportion to the value of the property they own. Also, many disparities in the same asssessment district are found to exist, showing a most flagrant violation of law or disregard of duty. For instance, in a certain county we find conditions about as follows: A property worth $10,000 was assessed at $8,000, while in another assessment district of the same county a property worth the same amount was assessed for $4,000. Both these properties are subject to the same levy for county purposes, which, we will say, is ten mills. In the first case the owner of the property will pay $80 taxes for county purposes, and in the second only $40. In other words, on account of the inequality existing in the appraised valuation of real estate for taxable purposes one man is made to pay twice as much tax for the support of the county government as an-

other man whose property is equal to his in value. The case cited has substantially its parallel in every county of the Commonwealth and brings to the surface evidence of inequalities that are simply astounding. To what extent this is the result of favoritism, or if improper influences, we are unable to say; we speak of the matter only as we find it from the investigations made. Certainly there is a very faulty discharge of duty in the way of assessing property, and the blame must rest upon the chosen representatives of the people, who are sworn to obey the laws they violate. What can be done to correct the abuses that exist is a matter for the Legislature to determine. It is certain, a severe penalty should be imposed upon any officer who, in the remotest degree, attempts to use favoritism in determining the assessed valuation of property, and whenever it appears that an officer is incompetent to discharge the duties imposed upon him by law as an assessor, the courts should have authority to promptly remove him and to appoint someone to execute the law in a satisfactory manner.

In the publication of these consolidated reports compiled from the investigations made we omit the names of the grantor or grantee appearing on the original records, but the different properties are indicated by numbers, so that it will be very easy to verify the statistics submitted, by reference to the numbers indicating the names of grantors and grantees. We understand that the revenue commission have made investigations on about the same lines as those indicated herein, but we are not advised as to the extent of the difference between their returns and ours. There was no intimation on the part of the revenue commission that they contemplated making an investigation and we presume they had no knowledge of our intention to work on the same lines. Of course, if both the commission and the Department proceeded on exactly the same plans there would not be any marked difference in the general results, although certain classes of property may have been excluded from their investigations that were included in ours, and vice versa. At all events, it would seem that the general average of assessment valuation, as compared with the actual valuation, as gleaned from the two investigations, should not vary materially the one from the other, and should be, as before indicated, of valuable assistance in enabling the Legislature to pass the necessary laws for the correction of existing evils.

From these investigations we make some observations in reference to the returns from each county, pointing out some of the glaring discrepancies which are found to exist. For a closer examination of the work and existing conditions found, reference is made to the tabulations also published herewith. Our investigation published herewith comprise twenty-one counties.

Armstrong County.

Of the one hundred and two sales of property taken in this county, it will be seen that forty-one of them were from lands, comprising 3,256 acres and 47 perches, the total consideration for which was $109,332.56, or an average of $33.57 per acre, and that the total assessment was $59,220, or an average of $18.18 per acre, a difference of $15.39 per acre, and that the ratio of assessed valuation to actual valuation was 54.16 per cent.

The range of assessed to actual value will be found to be very wide, being from 16.6 per cent. to 121.9 per cent. The remaining 61 properties taken in this county were lots, or houses and lots, and show a ratio of assessed valuation to actual valuation of 44.3 per cent., or 9.84 per cent. less ratio than farm lands. The extreme range in this class of property is still greater than in farm lands, being from 6.6 per cent. to 166.6. A close analysis of the work will show that in one assessment district alone the range was from 6.6 per cent. to 101.8 per cent. In another, 13.3 per cent. to 70.8 per cent. Thus showing not only a wide disparity in the county, but great inequalities in the same district where the assessment is done by the same parties. Total ratio assessed to actual valuation in the county is 49.5.

Beaver County.

Our record shows 103 sales in this county, 37 of farm lands, and 66 of lots, or houses and lots. The farm lands comprise 1,971 acres, 24 perches, at a consideration of $118,172.62—an average of $59.95 per acre. The corresponding assessment is $76,035, an average of $38.57 per acre, which is 64.3 per cent. of value. The consideration of the lots, or houses and lots, was $123,475, and the corresponding assessment $86,092, or 69.7 per cent. of their value.

The total ratio of assessed to actual value in the county is 67 per cent.

The highest assessment of farm lands is 88 per cent. The lowest, 15 per cent. Perhaps, strictly speaking, this sale should have been classed with lots; if it were so classified, we should have the lowest assessment of farm lands 33.8 per cent.

The highest assessment of lots, or houses and lots, is 138 per cent., and the lowest, excluding the sale referred to (being No. 13 on the list), is 30 per cent. Notwithstanding this wide range, there is less disparity in this county than in many others. An examination of the work will show that not more than one-tenth of the properties are assessed under 50 per cent.

Bedford County.

One hundred and two sales were taken in this county, 47 of which were farm lands, 2 unseated lands, and 53 lots, or houses and lots.

Of the former land there were 4,079 acres and 121 perches, with a total consideration of $101,342.61, or $24.84 per acre, of which the assessed valuation was $58,509, or $14.34 per acre; showing a ratio of assessed to actual valuation of 57.7 per cent. ranging from 16.9 per cent. to 130 per cent. Only 175 acres 88 perches are of unseated lands, comprising two sales, with a proportionate assessment of 43.8 per cent. and 37.5 per cent., or an average ratio of 40.1 per cent. of actual valuation. The 53 lots show a total valuation of $74,226.75, and an assessed valuation of $35,870, or a ratio of 48.3 per cent. assessed to actual valuation, and 9.4 per cent. less than farm lands. In this class of property the lowest ratio of assessed to actual valuation was 5 per cent. and the highest 100 per cent.

The total ratio in the county of assessed to actual valuation we find to be 53.65 per cent.

Disparities between the assessed and actual valuation, in this county as in others, is not the work alone of one assessor as compared with another, but is found in the same assessment district. In one district we find farm lands with assessments ranging from 26 per cent. to 72.8 per cent. of actual valuation. And in another, town lots ranging from 33.3 per cent. to 100 per cent.

As indicated, in reference to other counties, it seems impossible to account for such remarkable discrepancies in the same asssessment district.

Butler County.

In this county we have 97 sales, 69 of which are farm lands, a total of 4,181 acres and 141 perches, aggregating in value $174,138.94, or $41.64 per acre. The assessed valuation was $79,290, or $18.96 per acre, and the ratio of assessed to actual valuation 45.5 per cent. The remaining sales, 27 lots, or houses and lots, show a total actual valuation of $49,167.50, and an assessed valuation of $21,079—a ratio of assessed to actual valuation of 42.8 per cent.—2.7 per cent. less than farm lands. Total ratio of assessed to actual valuation in the county, 44.5 per cent. In farm lands we find the range to be from 15.5 per cent. to 110 per cent. In town property, from 14 to 96.7 per cent.

The extreme range, or the lowest and highest assessment of farm lands (15.5 and 110 per cent.), we find in one township.

Clarion County.

We have a record for this county of 107 sales, 44 farm lands, 2 unseated lands, and 61 lots, or houses and lots. The consideration for 2,367¼ acres of farm land was $67,217.24, or $28.42 per acre, and the corresponding assessment was $41,813, or $17.66 per acre, being 62.6 per cent. of the consideration or value.

There being only 81 acres in the two unseated lands sold, but little significance can be attached to them as indicating the percentage of

assessed to actual valuation of this class of property in Clarion county. They show an assessment of 30 per cent. of their value.

The consideration of the 61 lots, or houses and lots, was $70,510.50, the corresponding assessment $37,276, showing an assessment of 52.86 per cent. of the actual value.

The ratio of assessed to actual value in the county is 57.3 per cent. The highest assessment of farm lands was 130.6 per cent., the lowest 18 per cent.

The highest assessment of lots, or houses and lots, was 186.6 per cent. The lowest, 6.6 per cent.

It will be seen that farm lands were assessed nearly 10 per cent. higher than lots, or houses and lots.

We find, in one assessment district, a range of assessments from 15.1 per cent. to 111.6 per cent.

It seems absolutely impossible to give any satisfactory reason for such remarkable disparities as are found in the same assessment districts where the assessments are made or are under the control of one officer.

Clearfield County.

Our work shows 107 sales, 29 of which are farm lands and 78 lots, or houses and lots. The farm lands aggregate 1,712 acres, 61 perches, with a total consideration of $42,152.94, or $24.61 per acre, the assessed valuation of which is $18,754, or $10.95 per acre, and the ratio of assessed to actual valuation 44.4 per cent. The total valuation of lots, or houses and lots, is $92,238.45, and the assessed valuation $26,825. The ratio of assessed to actual valuation 29 per cent., 15.4 per cent. less than that of farm land. And the total ratio of assessed to actual value in the county is 33.8 per cent. The lowest relative assessment to actual value is 8.7 per cent.; the highest, 116.6 per cent., both found in town lots. In farm lands the disparity is not so great, the range being from 23 per cent. to 73.4 per cent.

Crawford County.

Our table shows 102 sales, 43 of farm lands and 59 of lots, or houses and lots. The farm lands show a total of 2,286 acres, 127 perches, with an aggregate consideration of $75,668, or $33.09 per acre, and an assessed valuation of $42,012, or $18 37 per acre, giving a ratio of assessed to actual valuation of 55.5.

The town property shows a consideration of $55,138.50, and an assessment of $24,816, or a ratio of assessed to actual value of 45 per cent.; 10.5 per cent. less than farm land.

Total ratio in the county of assessed to actual valuation, 51 per cent.

In farm lands we find the lowest ratio of assessed value to actual consideration to be 20 per cent., and the highest 103.5 per cent. In town lots, or houses and lots, the lowest, 8 per cent.; the highest, 147 per cent., and these extremes represent the greatest disparity in our work of the county.

In one assessment district it will be seen that the ratio of assessed to actual value varies from 8 per cent. to 100 per cent.

Elk County.

Of the 103 sales taken for this county, 26 were treated as farm lands, 12 were unseated, and 65 were lots, or houses and lots. In speaking of the lands, we say "treated" as such, for the reason that sale No. 62, while representing 700 acres of seated and 550 of unseated land, there being no means of ascertaining the proportion of the consideration which applies to these classes. The entire sale was classed, therefore, with the unseated. The same was true as to No. 53, the 210 acres being found in the seated list. The farm land shows 5,701 acres, 18 perches, a total consideration of $124,465.12, and $21.83 per acre. The corresponding assessment was $20,059, or $3.41 per acre. The ratio of assessed to actual value is 16.1 per cent. The unseated lands show 25,518 acres, 80 perches, at a total valuation of $430,389, or $16.86 per acre. The corresponding assessed valuation was $93,073, or $3.64 per acre, and the ratio of assessed valuation to actual valuation was 22 per cent.

The lots, or houses and lots, show a total consideration of $141,771 and a total assessed valuation of $28,134, and a ratio of assessed valuation to actual valuation of 19.8 per cent. The total percentage of assessed valuation of the entire work, to the actual valuation, being 20.28 per cent., while the highest percentage of assessed to actual value of farm lands is shown to be 100, or full value, yet this sale should hardly be classed as a representative one, as 113 acres, with a consideration of only $100, can scarcely have much significance. The next sale to this one was 55.5 per cent., and the lowest percentage was 5 per cent. In unseated lands the highest percentage was 38.8 per cent., and the lowest 7.9 per cent. In lots, or houses and lots, the highest percentage was 99.3 per cent., and the lowest 5.4 per cent. It will be observed by a careful examination of the table for Elk county that few sales of any class show a ratio of over 50 per cent., the bulk being below 40 per cent.

Greene County.

This county shows 99 sales—65 farm lands and 34 lots, or houses and lots.

The farm lands show a total of 4,885 acres, 102 perches, with a consideration of $212,495.16, or $43.49 per acre. The corresponding as-

sessment shows a total of $156,841, or $32.12 per acre. And the ratio of assessed to actual value is shown to be 73.8 per cent. The lots, or houses and lots show a consideration of $52,230 and a corresponding assessment of $36,690, or 70 per cent. of the consideration or ascertained actual value. And the entire work of the county shows a ratio of assessed to actual value of 73 per cent. The highest assessment of farm lands is No. 95, at 140 per cent., or 40 per cent. above the consideration at which it was sold. And the lowest, number 25, at 33.3 per cent. of the consideration. The highest assessment of houses and lots, is No. 91, at 108 per cent., and the lowest No. 30, the assessment being 30 per cent. of the consideration.

It will be noticed that there are but few assessments in this county above 90 per cent., and but few below 50 per cent., and over two-thirds of the properties are assessed at 60 per cent. and upwards of the actual value. The table is worthy a careful examination.

Huntingdon County.

In this county we have taken 102 sales—39 farm lands, 1 unseated, and 62 lots, or houses and lots. The farm lands show 4,268 acres, 5 perches, a consideration of $78,767.45, and an average value per acre of $18.41. The corresponding assessments show $29,755, an average of $6.97 per acre, with the ratio of assessed to actual value 37.7 per cent.

The one unseated sale is at $1.80 per acre, and the corresponding assessment is $1.25 per acre.

The lots, or houses and lots, show a consideration of $63,487 and a corresponding assessment of $26,071, a ratio of assessed to actual value of 41 per cent. The total ratio of assessed to actual value in the county is shown to be 39.3 per cent. The highest assessment of farm lands is 101 per cent., but this will be seen to be a notable exception, as few properties are assessed at over 55 per cent. The lowest, 10.5 per cent. The highest assessment of lots, or houses and lots, is 150 per cent. This, too, is a notable exception, as but few reach the hundred per cent. mark. The lowest is 13 per cent. In the district in which this 13 per cent. assessment is found, the assessments are uniformly low, the highest being 48 per cent.

Indiana County.

Our table shows 105 sales in this county—55 farm lands, 1 unseated, and 49 lots, or houses and lots.

Of the former lands there are 4,281 acres, 40 perches, and a consideration of $129,147.45, or $30.15 per acre. The corresponding assessment is $47,812, or $11.16 per acre, 37 per cent. of the consideration at which sold.

The one small tract of unseated was assessed at 18.4 per cent. of its consideration or value. The house and lots, show a consideration of $55,304.60, and a corresponding assessment of $23,220, or 41.9 per cent. of their value. The total ratio of assessed to actual value in the county is 38.5 per cent. The extremes are found in the assessment of farm lands, in one, its full value, and the other but 3.3 per cent.

In houses and lots the highest assessment is 42 per cent. in excess of the consideration at which sold, and the lowest 86.7 below, this property being assessed at only 13.3 per cent. of the consideration at which sold.

Jefferson County.

We have a record in this county of 101 sales; 33 of farm lands, 1 of unseated, and 67 lots, or houses and lots.

We have 2,010 acres, 99.7 perches of farm lands, for which a consideration was paid of $62,489.22, or $31.07 per acre, and a corresponding assessment of $31,259, or $15.54 per acre, being 50 per cent. of the actual value as indicated by the sales.

The consideration of the lots, or houses and lots, was $102,299.96, and the corresponding assessment $65,325, or 63.85 per cent. of the consideration; showing for this class of property 13.85 per cent. higher than farm lands.

The total percentage of assessed to actual value is shown to be 58.9. The highest assessment of farm lands is shown to be 162, or 62 per cent. above the consideration. The lowest 7.8, or 92.2 per cent. below the consideration. The highest assessment of lots, or houses and lots, is shown to be 125, or 25 per cent. above the consideration; the lowest 16.3, or 83.7 per cent. below the consideration, and in the same assessment district the highest assessment is 111 per cent. In some districts of this county will be found an absence of these pronounced inequalities.

Lawrence County.

In this county we have taken 101 sales; 40 of farm lands and 61 of lots, or houses and lots.

The table will show 1,977 acres, 3 perches of farm land, at a consideration of $145,528.08, or $73.61 per acre, with a corresponding assessment of $80,816, or $40.87 per acre, being 55.5 per cent. of the actual value.

The lots, or houses and lots, show a consideration of $79,308 and a corresponding assessment of $44,756, 56.4 per cent. of the consideration. The total ratio of assessed to actual value is found to be 55.8 per cent.

The highest assessment of farm lands is 131, or 31 per cent. above the consideration. The lowest 6.1, or 93.9 per cent. below the consideration. The highest assessment of lots, or houses and lots, is 109.

or 9 per cent. above the consideration; the lowest 13.7, or 86.3 per cent. below the consideration. It is but just to call attention to the fact that 70 or more of these 101 properties were assessed at 50 per cent. and upwards of the consideration named in the sale, and that the widest disparity in the assessment of farm lands was found in the same township.

Lycoming County.

We have a record in this county, 105 sales; 33 farm lands, 4 unseated lands, and 68 lots, or houses and lots. Of the farm lands, we have 2,910½ acres, at a consideration of $131,475, or $45.17 per acre, and a corresponding assessment of $59,865, or $20.50 per acre, being 45.39 per cent. of the consideration.

We have in unseated lands, 5,827 acres, at a consideration of $96,900, or $16.63 per acre, and a corresponding assessment of $13,622.50, or $2.34 per acre, or 13.7 per cent. of the consideration. And in lots, or houses and lots, a consideration of $100,095, with a corresponding assessment of $40,900, or 40.8 per cent. of the consideration. The total ratio of assessed to actual value we find to be 34.18 per cent.

The highest assessment on farm lands is 77.5 per cent. of the consideration, and the lowest 12.5, while the highest assessed of the unseated is 31 per cent. of the consideration; the lowest 6.6. Of the lots, or houses and lots, the highest assessment is 133.3, and the lowest 6.25 per cent.

Mercer County.

In this county we have 102 sales; 51 farm lands and 51 lots, or houses and lots. We find the sales of farm lands represent 2,414 acres, 149 perches, at a consideration of $104,741.10, or $43.37 per acre; we also find that the corresponding assessment amounts to $80,722, or $33.42 per acre, being 77 per cent. of the consideration, or ascertained actual value.

The lots, or houses and lots show a consideration of $57,187, and the assessment for the same, $39,160, or 68.47 per cent. of the consideration.

The total ratio of the county of assessed to actual valuation is shown by our figures to be 74 per cent.

The highest assessment of farm lands is shown to be 130 per cent. or 30 per cent. more than the consideration at which sold, and the lowest, while it appears to be 46 per cent. of the consideration at which sold, yet as the acreage is small, it should scarcely be classed with farm lands. No. 92, showing an assessment of 49.7 per cent. of the consideration at which sold, should in justice be regarded as the lowest assessment proper of farm lands. The highest assessment of lots, or houses and lots, is found to be 120 per cent., or 20 per cent. above the consideration, and the lowest is found to be 10 per cent., or

90 per cent. less than the consideration. This assessment is a remarkable exception, as there are but three other properties in the entire list below 46 per cent. Little of the disparity, found in most of the counties, exists here. Of the entire 102 sales, over 70 of them are assessed at 60 per cent. and upwards, and fully the one-half at 70 per cent. and upwards.

Potter County.

In the summary for Potter county we find, of the 110 properties taken, 45 sales were of farms, 7 sales were of unseated lands, and the balance, 58 sales, were of town lots, or houses and lots, which are classified under one head. The average value of farm land per acre we find to be $13.96, while the assessed value for the same is $3.33, or 23.85 per cent. of the actual value. The highest percentage of assessed to actual value for this class of property is 57.78 while the lowest percentage of assessed to actual value for the same class of property is 9.28. In the sales of lots, or houses and lots, we find the highest percentage of assessed to actual value to be 50, while the lowest percentage of assessed to actual value for the same class of property is 5. The average percentage of assessed to actual value for this class of property we find to be 20.73.

In the sales of unseated lands we find even more discrepancies than in either of the above mentioned classes. The highest percentage of assessed to actual value is 53.77 in the sale of 20,715 acres on March 29, 1893, while the lowest percentage of assessed to actual value is 9.31 in the sale of 973 acres on March 9, 1893. The average percentage of assessed to actual value for the same class of property is 37.19. As there are only seven sales of unseated lands in the statistics of Potter county it can readily be understood that this average of 37.19 per cent. of assessed to actual value would not be considered a safe average as it was influenced largely by the sale of 20,715 acres, the percentage of assessed value of which to the actual value was 53.77. Therefore, if we eliminate entirely from our computation the unseated land in this county we find the total percentage of assessed value to actual value would be 23.44. Or, if we eliminate only the sale of 26,715 acres from our computation, we find the total percentage of assessed value to actual value would be 18.85 instead of 32.52 per cent., as we have given it in the resume. We think this percentage of 23.44 is a closer approximation to the correct figures than 32.52, for the reason that the result of 32.52 was obtained by taking the unseated land as it appears, which, as already shown, is not accurate enough to be of much value for practical use.

The commissioners of Potter county informed the collector who secured this data from their office that it had been the custom of former commissioners to assess all classes of property at one-fifth of

the actual value, but they asserted that this rule would be changed by them in the coming assessment, as they proposed to have all properties assessed hereafter at the full value.

Somerset County.

We find recorded in our list from Somerset county the sales of 47 farms, the average price of which is $24.82 per acre while the assessed valuation per acre is $11.59, or 46.7 per cent. The highest percentage of assessed to actual valuation on farm lands being 151.2, while the lowest percentage of assessed to actual valuation on the same class of property is only 6 per cent. There is but one sale of unseated land recorded in our list from this county, and we find the percentage of assessed to actual valuation on this sale to be 13 per cent. We have recorded the sales of 53 lots, or houses and lots, and find the highest percentage of assessed to actual value is 200 per cent., while the lowest percentage of assessed to actual value is only 10.6. The average percentage of assessed to actual value on this kind of property is 49.2. The total percentage of assessed to actual valuation for the county is 44.5. It is scarcely necessary for us to call attention to the wide range existing between the highest and lowest percentage of assessed to actual valuation in this county; for, as we have just shown on farm lands the highest is 151.2, and the lowest 6, or a difference of 145.2. We can make no deductions on the unseated land as there was but one sale; however, on the lots, or houses and lots, which are classified under one head, we find even greater differences than on farm land as the highest percentage of assessed to actual valuation is 200. And we find three different properties have been sold which bore this same percentage of assessed to actual valuation, while the lowest percentage of assessed to actual valuation on the same class of property is 10.6; showing a difference between highest and lowest of 189.4 per cent. It will be seen from an examination of the table of this, as well as those from other counties, that there are only a few sales where the consideration is less than the assessed valuation.

Tioga County.

In the summary for Tioga county we find of the 109 properties taken, 58 sales were of farm lands, four sales were of unseated lands, and 47 sales were of lots, or houses and lots. The average value of farm land, we find, is $28.44 per acre, while the assessed value of the same is $18.55 per acre, or 65.21 per cent. The highest percentage of assessed to actual value for farm land is 15.2, while the lowest percentage of assessed to actual value for this class of property is 19.60.

The average value of unseated land per acre is $5.89, while the assessed value for the same is $5.08. The highest percentage of assessed to actual value for unseated land is 140, while the lowest percentage

of assessed to actual value for the same class of property is 60. The average percentage of assessed to actual value for unseated land being 86.36. There are so few sales of unseated lands that the average percentage on this class of property cannot be relied upon as indicating the correct percentage, especially when one of the properties sold shows an assessed valuation at a figure beyond the actual valuation. We find the highest percentage of assessed to actual value for lots, and houses and lots, to be 118.42, while the lowest percentage of assessed to actual value for the same is 25, the average percentage of assessed to actual value for this class of property being 60.2. The total percentage of assessed to actual value on all classes of property for this county is 63.52.

This is an average county, so far as discrepancies are concerned, and while there are not so many discrepancies as in some other counties of the State, it shows that more care should be exercised by the county commmissioners in correcting the assessors' returns.

Union County.

In this county we have a record of 99 sales; 30 of farm lands, 4 of unseated lands, and 65 of lots, or houses and lots. 2,008 acres, 68 perches of farm land show a consideration of $67,621.18, or $33.66 per acre, and the corresponding assessment for the same is found to be $22,992, or $11.44 per acre, being an assessment of 34 per cent. of the consideration, or price for which sold.

Nine hundred and sixty-four acres, 101 perches of unseated lands show a consideration of $3,654.14, or $31.79 per acre, and the corresponding assessment is found to be $717. or 74.3 cents per acre, being but 19.6 per cent. of the consideration or value.

The lots, or houses and lots, show a consideration of $73,800, and a corresponding assessment of $21,601, or 29.3 per cent. of the consideration or value.

The total ratio in the county of assessed to actual value is found to be 31.23 per cent.

The highest assessment of farm lands is found to be 78.5 per cent., the lowest 9.6 per cent.

The highest assessment of unseated lands is 28 per cent., the lowest 5.29 per cent.

The highest assessment of lots, or houses and lots, is 88.8 per cent., the lowest 13 per cent.

Of the 99 sales recorded, only 8 are assessed above 50 per cent., only 16 above 40 per cent., and over one-third are assessed below 30 per cent.

Westmoreland County.

Our record shows 104 sales in this county, 21 of them farm lands, and 83 lots, or houses and lots.

The farm lands comprise 1,333 acres and 81 perches, at a consideration of $106,147.51, or $79.60 per acre, and shows an assessment of 38.2 per cent. of the actual value.

The lots, or houses and lots, have a consideration of $205,686.75, and a corresponding assessment of $71,420, or 34.7 per cent. of the actual value.

The average rate of assessed to actual value in the county is shown to be 35.9 per cent.

The highest assessment of farm lands is 71.4 per cent. of the actual value, while the lowest is 8.4 per cent.

The highest assessment of lots, or houses and lots, is 150 per cent., the lowest is 7.5 per cent.

To show the inequality of assessments, from a careful perusal of this table it will be found that over one-fourth of the properties are assessed under 30 per cent. of their value, and that nearly one-fourth are assessed at 50 per cent. and over.

York County.

In the summary for York county we find, of the 110 properties taken, 45 sales were of farms and the balance, 65 sales, were of town lots, or houses and lots. The average value of farm land, we find, is $51.08 per acre, while the assessed value of the same is $42.03, or 82.2 per cent. The highest percentage of assessed to actual value for farm land is 141.46, while the lowest percentage of assessed to actual value on the same class of property is 42.24. It would seem from this wide range that there were great inconsistencies existing in this county, but a careful perusal of the table will show that these extremes are uncommon, and that the great majority of the percentage of assessed to actual values range from 70 to 90.

In the sales of lots, and houses and lots, we find the highest percentage of assessed to actual value to be 142.85, while the lowest percentage of assessed to actual value for this class of property is 42, the average percentage being 71.61. The same explanation is true of lots, and houses and lots, that we have just made in relation to farm lands, that while there appears a wide difference between the highest and lowest percentage of assessed to actual value, a scrutiny of the table will prove conclusively that the percentages are remarkably uniform (as compared with other counties), with the exception of a very few cases.

The total percentage of assessed valuation to actual valuation in this county we find to be 77.06.

The investigations in York county indicate a commendable care on the part of the commissioners and assessors in having the assessments uniform.

BUREAU OF INDUSTRIAL STATISTICS.

The Twenty-first Annual Report of the Bureau of Industrial Statistics will contain an elaborate investigation of the building and loan associations of the State. In the Sixteenth and Seventeenth Annual Reports a large quantity of statistics relating to those associations was presented, but they were not complete. It is believed that the statistics in the forthcoming report will give information regarding nearly all the building and loan associations of the State, and tables, prepared in several forms, will show many results. These associations have had a long and, on the whole, splendid history, and have in a general way filled the place of savings banks in New England and other sections of the country. It is true that in this State there are a few saving banks primarily designed for small depositors, but the building and loan associations number several hundred and have taken the place of them in many parts of the State. As is well known, these associations are organized almost wholly by the working classes, and the money furnished by them is largely devoted to the building of homes for the members. It would be interesting to ascertain how many homes in this State have been erected with money furnished by these associations. Former reports containing statistics of building and loan associations have been in constant demand. Indeed, it is probable that the Bureau has never made an investigation in any direction that has been more sought after; and requests for the reports, both in this and other States are received daily.

Another subject that will be presented with considerable fullness relates to apprenticeship and industrial schools. It is well known that the old system of apprenticeship has to a great extent been abandoned notwithstanding the enormous manufacturing interests in the Commonwealth. This decline is due to many causes which are explained in this portion of the report. One of the consequences of the decline of the system is the rise, or organization of industrial or trade schools, and a description of these is a proper sequel to the subject of apprenticeship. In all parts of the country schools of this character are being formed and in this State several have been established which are doing, it is believed, very excellent and satisfactory work. A full account of the nature and operation of these schools is contained in the report.

The next part of the report contains a review of the decisions relating to the liability of employers that have been reported since the

Nineteenth Annual Report. In that report all the law on the subject from the beginning was fully presented, and, therefore, the present report is a continuation of that subject to date.

Another portion of the report will consist of statistics relating to the strikes that have occurred in the State during the year 1893, with a description of the more important ones. The leading strike for the year occurred among the operators of the Lehigh Valley Railroad Company, and although not of long continuance, yet it was very costly and an extended description is given of it. A very large number of men were involved; it occurred at a period of the year the least favorable for the company and therefore the total loss on both sides was very great.

The next subject relates to an investigation regarding the varying rates of remuneration paid to workingmen in different employments in different parts of the State. These vary considerably, and the inquiry to ascertain what are the causes for the variations and how great they are, is an interesting one. It is well known, for example, that the iron workers west of the Allegheny mountains have been paid for many years much higher rates than those working east of the mountains, and the same fact is true with respect to those engaged in several other employments. The inquiry does not cover the subject fully, but embraces several classes of workmen and it is hoped that by another year a wider investigation will be made in this direction. Coupled with this investigation is an inquiry into the cost of living of the same classes, especially the rents paid and some of the other larger and more important items of living.

Lastly, the report will contain a historical and statistical review of the coke industry of the State. This has become an industry of very great importance; an enormous amount of capital is involved; a large number of persons are employed, and it is believed that the inquiry will be interesting to very many people.

BUREAU OF RAILWAYS, CANALS, TELEGRAPHS AND TELEPHONES.

Annual reports concerning the affairs of railway, canal, telegraph and telephone corporations are made to the Department, from which consolidated data are compiled and published as Part IV of the Department reports. The information thus collected and published has reference to the incorporation of the companies and their relations to one another as regards leases or other contracts. It also embraces the names of officers, acting boards of directors, length of lines, principal connecting points, capital stock, funded and unfunded indebtedness, cost of road and equipment, income from operations, classified with reference to freight and passenger traffic, receipts from bonds, stocks and other sources, and describes the changes that have occurred during the fiscal year covered by the report. Detailed information is also given regarding the amount of freight and passenger traffic, the former being classified as products of farms, forests, factories and mines.

With reference to telegraph and telephone companies a full description is given of the lines operated, their relations with other corporations of a similar character, and of their receipts from operations and all other sources.

The information relative to street railways covers the question of motive power, history of organization, number of persons employed, the mileage, capitalization and the number of passengers carried. All corporations embraced in the report of this bureau give full information regarding accidents to both passengers and employes.

The period covered by this report is the fiscal year ending June 30.

REPORTS OF MINE INSPECTORS.

There are eight anthracite inspection districts and eight bituminous districts in the State, in each of which there is an inspector. These inspectors make annual reports to the Department, as required by law, which are compiled and published in the part of the Department reports designated Part V. In this report general information is given relative to the amount of coal mined in the different districts, ventilation of mines, safety appliances in use for the conveyance and protection of the miners, and statistics regarding the number of accidents and the causes thereof.

The Department is required under the law to publish the mine inspectors' reports, but no provision is made for supplying it with any copies for distribution, they being distributed entirely by the members of General Assembly, the Governor, a few other State officers, and the inspectors.

Certificates for mine foremen and assistant mine foremen are issued by the Department under authority of law. During the present year 230 mine foremen's and assistant mine foremen's certificates were issued. The certificates are issued on recommendations made by the boards of examiners in the different districts, and no person is entitled to act in the capacity of mine foreman or assistant mine foreman until he has received a certificate of qualification as aforesaid signed by the Secretary of Internal Affairs, which authorizes him to so act.

PART II—Assessments. Taxes.

ASSESSMENT REPORTS.

The Following Returns made by the Commissioners of the Several Counties of the Commonwealth, to the Secretary of Internal Affairs, for the Year 1893, Show the Number of Taxables, the Number of Acres of Cleared and Timber Land, and the Amount at which all the Real and Personal Property, and all Matter and Things made Taxable by the Laws of this Commonwealth, were Valued, and the Amount of Taxes Assessed thereon for State and County Purposes, in the Various Assessment Districts of the Commonwealth, made Pursuant to the Several Acts of Assembly Relating Thereto.

ADAMS COUNTY.

NOTE.—The counties of Allegheny, Crawford, Delaware, Luzerne and Schuylkill assess stages, omnibuses, hacks, etc., for county purposes. Lackawanna devotes $11,865 of this fund for county purposes, and $9,190 of same fund for State purposes.

TAX REPORTS.

The following tables give the returns made by the Commissioners of sixty-one counties of the Commonwealth, to the Secretary of Internal Affairs, showing the entire amount of taxes collected or worked out for the maintenance of state, county, city, ward, borough and township governments; the total amount collected for the support of the poor; the total amount collected for the construction and repairs of roads and bridges; the amount collected for school purposes; the amount collected on personal property, on occupations and for licenses; the amount collected on the real estate of railroad corporations; the amount collected on the real estate of corporations other than railroads, and the amount collected on the real estate of limited partnerships, in the several assessment districts in the Commonwealth between the first day of June, 1892, and the thirty-first day of May, 1893, made pursuant to the Act of Assembly, approved the ninth day of May, A. D. 1889.

The poor are maintained as county charges. There is no separate levy for poor purposes. The money for the maintenance of the poor is forthcoming upon presentation of a monthly statement and requisition by the board of poor directors and countersigned by the county commissioners. The amount thus expended for the year last past was $47,352.58, which is included in the aggregates of columns 4 and 5.

The custom for many years has been to assess each married man, not a freeholder, twenty-five cents poll or occupation tax, and each single man, not a freeholder, fifty cents poll or occupation tax. This tax is levied directly without putting a valuation on the taxpayer's occupation. This amount is included in columns 4 and 5.

The amounts appropriated for the support of the poor in the city of Philadelphia and the county of Allegheny are given in column No. 1 of the above table.

In all the counties where there is no poor tax reported, as collected, in column No. 1, the poor are a county charge, and an annual appropriation is made by the county commissioners for their support. The table on the following page gives the names of the counties as well as the amount appropriated by each. The same table shows the amounts appropriated for the construction and repairs of roads and bridges.

AMOUNTS APPROPRIATED BY COUNTIES.—Below is given the amounts appropriated for the support of the poor in counties where the poor are a county charge. Also the amounts appropriated by counties for the construction and repairs of streets, roads and bridges.

NAMES OF COUNTIES.	Amount appropriated by counties for the support of the poor.	Amount appropriated by counties for the construction and repairs of streets, roads and bridges.	NAMES OF COUNTIES.	Amount appropriated by counties for the support of the poor.	Amount appropriated by counties for the construction and repairs of streets, roads and bridges.
